

alert %}}

- e) Vendor's Contact Email (optional)

- f) Vendor has access to red/orange data? (optional)

- g) List data and systems involved (optional)

- h) Vendor's Security Contact Email (optional)

 - Click on the magnifying glass icon to select or create a different address.
- i) Virtual Card Supporting Documentation (optional)

- j) Address (defaults from the User record)

- k) Attn (defaults from the User record)

REQUISITION LINE LEVEL

- The above information is synced from Zip or updated by FP&A Team if falls under Coupa Prepaid Automation Process.

Punchout Requisition

1. On the Homepage Screen, click on any Punchout supplier located under Additional Stores section.
1. Clicking on the Punchout link will take you to an approved supplier website where you start ordering your items, just like any online shopping experience.
1. Start searching and add items to your cart.
1. When done adding items in your cart, click "Checkout".
1. To go back to Coupa "Review Cart" screen, click "Transfer Shopping Cart".
1. Once in Coupa "Review Cart screen", populate the required information such as the Commodity and Billing Account.
1. Review completeness of the requisition and click Submit for Approval.

{{% panel header="NOTES" header-bg="info" %}}

- Cart Checkout and returning to Coupa "Review Cart" screen depends on the Punchout site.
- It is recommended that users purchase via punchouts as often as possible.
- Don't add multiple punchout suppliers to one requisition.

{{% /panel %}}

Approvals

Once the requisition integrates from Zip into Coupa, the applicable approvers are displayed beneath the cart line.

> The greater the amount of the requisition, the more approvers will be needed.

How to Add an Approver

- Click on the "Add" button.
- Type in a few letters of the approver name and the system displays all possible entries.
 - New approver must be an existing user in Coupa.
- Select if the person is to be added after the current approver, end of the chain, or only as a watcher.
 - A watcher cannot approve or reject the cart but will receive notifications about the requisition.

Methods to Approve Transactions

There are several ways to approve transactions in Coupa:

- To Do's notification on the homepage screen
 - To view the requisition/invoice/PO change request details, click on the subject line.
 - The approver may add comments on the "Approval Comments" section before clicking on the Reject or Approve buttons.
 - All approvers are displayed in the "Approvers" section.
 - When rejected, a requisition goes back to "Draft" status, the requestor needs to make changes and re-submit. (Please, remember leave a comment about the rejection for the requester).
 - When an invoice is rejected, it goes under "Rejected" status and the Accounts Payable needs to edit and resubmit the invoice (or void if necessary).
- Inbox
 - Users can access all their notifications through the "Inbox" section under "Account Name".
 - The User can change the report View to "To Do" to filter all notifications requiring action.
- Via Activity > "Transactional Tabs" > Requiring My Approval view
 - In each Activity transactional subtabs, users can change the report view to Requiring My Approval.
- Email
 - The approver receives a system-generated email notifying about the requisition or invoice as soon as a user submits the transaction.
 - All the basic information is displayed on the email.
 - The approver selects an appropriate action (View Req / Approve / Reject).
 - The "View Req" option is a link to Coupa to see the transaction in the system.
 - Once a choice is selected, an automatic email is created. The approver needs to send the e-mail for the approval to be made in Coupa.

- Once the e-mail is sent, the transaction will move to the next approver based on the approval chain in Coupa.
- If rejecting the Purchase Request, the approver should include a comment explaining the rationale for rejecting it.
- Coupa Mobile App
 - A mobile application of Coupa can be downloaded either at the Apple or Android stores. Once you download the app you need to sign-in as you normally would to the instance.
 - The app allows you to do approvals for both Requisitions and Invoices:
 - To Approve: Open the requisition or invoice notification, review the information, and approve.
 - To Reject: Open the requisition or invoice notification, review the information, and reject.
- Coupa Slack integration
 - Coupa has built-in integration with Slack, which provides users with another method for Coupa notifications. To activate Slack notifications please follow below steps or view the Coupa Slack quick demo:
 - Click "Settings" under your name on the top right;
 - Click "Notifications";
 - Click button "Add to Slack". New window will pop up. Click "Allow"

Once Slack notifications are activated you can choose what type of notifications you want to receive via slack.

To specify notifications that should be received in slack please go to Settings - Notifications - mark "IM" boxes.

Below is an example of the approval notification in Slack:

```
{{% panel header="NOTE" header-bg="info" %}}
```

- If your requisition status is "Pending Buyer Action", it is in Procurement's To Do List and is being reviewed by the procurement team who will respond as soon as possible, no longer than 1-2 business days. If there are any issues, Procurement will add comments to the requisition and you will receive notification via email, Slack or in your To Do List (depending on your notification setup in Coupa).
- If you see "Onboarding" next to the Supplier's name on the line items of your requisition (see below screenshot), the Supplier has not completed the onboarding process. Suppliers have to complete their onboarding in Coupa before the requisition can be finalized.

```
{{% /panel %}}
```

How to Withdraw a Requisition

Provided that a Purchase Requisition has not been fully approved and flipped into an Order, only Procurement can withdraw the Purchase Request and make any changes before submitting again. Please reach out to the procurement Slack Channel (including link to the Coupa

requisition) for any requests or questions.

1. Go to "Recent Activity" or "Activity" section.

1. Find the Purchase Request on "Pending Approval" status and click on the "withdraw requisition" icon (Red Arrow).

{{% panel header="NOTES" header-bg="warning" %}}

- On "Activity", select the "Pending Approval" view.

- If a Requisition has already been flipped into an Order, it cannot be withdrawn. A Purchase Order Change Request will have to be created.

{{% /panel %}}

<div class="panel panel-warning">

How to Receive an Order

{{% alert color="info" %}}

Receiving is only required for an item-based (quantity) requisition.

{{% /alert %}}

1. The requestor can locate all requisitions pending receipt via the "Activity" option under 'My Account'. This will display all the requisitions created by the Requestor.

- It is only possible to select requisitions that are pending receipt from the view Pending Receipt.

1. Click on the receipt icon under the column "Actions". This will open up the desktop receipt view.

1. On the receipt details screen, enter the Quantity (since receiving is only required for item-based requisitions).

1. Save the receipt by clicking on the "Submit" icon.

- A message indicating successful receipt is displayed.

{{% panel header="NOTES" header-bg="warning" %}}

- The requestor can receive partially OR the entire quantity.

- Receiving of goods (quantity) related purchases is required for the vendor to be paid due to 3-Way match rules.

- Adding receipt date and attachments is also possible.

{{% /panel %}}

How to Void a Receipt

There may be scenarios where a receipt needs to be voided (e.g. an incorrect receipt was made).

{{% panel header="IMPORTANT NOTES" header-bg="danger" %}}

- Only an ADMIN and Central Receiver will have the ability to void receipts.

- A receipt cannot be voided if the PO is already soft-closed or hard-closed (this will occur

once a PO is fully received and invoiced).

{{% /panel %}}

As Central Receiver, follow the below steps:

1. Go to Inventory tab then "View Receipts".
1. Search for the line to be voided (may use Advanced Search).
1. From the search results, identify the line to be voided then click the void icon under "Actions" column.
1. Below the void page, select the "Reason for Voiding" and add notes if needed.
1. Click the "Void Receipt" button.
 - Confirmation prompt appears and status should be Voided.

How to do a Purchase Order Change Request

Effective 2023-02-01, all purchase order change requests will be submitted in Zip. To learn more about Zip, check the Zip Handbook page.

{{% panel header="IMPORTANT NOTE" header-bg="danger" %}}

With the implementation of Zip effective 2023-02-01, all New Supplier Requests and Updates to Suppliers Requests will be created by the Procurement Team in Coupa.

{{% /panel %}}

How to Request a New Supplier

A supplier must exist in Zip prior to submitting a requisition for that supplier. To learn more about requesting a new supplier, check the Zip Handbook page.

To complete a New Supplier Request form:

- Click on the Forms dropdown on the Home page
- Select PROC: New Supplier
- Complete the form details and click the "Review" button (located at the bottom of the page/screen).
 - Review the information and if any changes need to be made, click the "Edit" button (located at the bottom of the page/screen) to make necessary changes.
 - If the information is correct, click the "Submit" button (located at the bottom of the page/screen).
- An External Supplier Form will be automatically sent to the Supplier to gather additional information.
 - The Supplier must complete the form and submit it back.
- After supplier submission, the external form will be routed to the Accounts Payable Approval Group for review and approval.
- After approval, the Supplier details will be integrated to NetSuite and it will flow back to Coupa to complete the New Supplier creation. By then, the Supplier should be available in Zip

when creating Purchase Requests.

How to Request Updates to a Supplier

To learn how to request updates to a supplier, check the training video.

How to Use Coupa for Invoicing and Payments

How to Request a Coupa Virtual Card

To learn more about requesting a Virtual Card, check the Coupa Virtual Card Guide.

Coupa Support

For any Coupa requests that are technical related, open an issue using the Coupa Request template.

{{% alert color="info" %}}

If your request involves a change to the current business process, either the Procurement and/or Accounts Payable Team will have to approve it depending on the type of request.

{{% /alert %}}

If you have an urgent issue, send a message to the coupahelp Slack Channel explaining your issue.

SECTION: business-technology/enterprise-applications/guides/coupa-prepaid/_index.md

<link rel="stylesheet" type="text/css" href="/stylesheets/biztech.css" />

{{% panel header="IMPORTANT NOTE" header-bg="info" %}}

With the implementation of Zip effective 2023-02-01, FP&A will be responsible for the Prepaid fields in Coupa.

{{% /panel %}}

To facilitate an improved and efficient process, the Accounting Team has implemented the automation of amortization entries. As part of the review/approval process of requisitions in Coupa, the FP&A Team will determine if changes are needed if the item is either a:

1. Prepayment OR

1. Deposit - which is any service charge that needs to be amortized/ capitalized according to Prepaid Expense Policy, or those that correspond to events or services that will occur in the

future.

If the item is a prepayment or deposit, the FP&A Team will edit the Cart Items section as listed below:

1. Check the box Is this a prepaid? if the requisition needs to be treated as Prepaid.
1. If Is this is a prepaid? = Yes, then for the Amortization Schedule, select Prepaid Expense Amortization from the drop down list.

- Set the amortization period Service Start Date and Service End Date that matches the Prepaid Expense Policy or the future dates on which the event or service will occur. This determines the date on which this invoice will be booked as an expense. In case the dates have not been selected, Coupa will automatically fill these fields with the original date of the PO and this will have an impact on the corresponding month's Budget.

- The start and end date will delimit the amortization period of the invoice. Example: If you want to refer to an invoice that needs to be amortized over 1 year, the correct dates would be 4/1/22 to 3/31/23.

- Select the appropriate Commodity for this requisition.

{{% panel header="NOTE" header-bg="info" %}}

All the information selected on the requisition flows to the corresponding invoice when it is submitted. The invoice will require an additional review before it is approved for payment. If any incorrect information is noted, the invoice will be rejected with Comments.

<link rel="stylesheet" type="text/css" href="/stylesheets/biztech.css" />

What is Virtual Card?

GitLab's preferred method of payment for suppliers is electronic funds transfer with supplier invoice provided as supporting documentation. In the instances where this option is not available with the supplier, Virtual Card, which is a temporary credit card, can be used as an alternative payment method.

How to request a Virtual Card

Virtual Card can be selected as a payment option by the Requester when completing a New request in Zip.

On the General information Navigation page in Zip:

1. Click Yes on the question "Will a virtual card be used to pay this vendor?"
1. Select American Express- Virtual Card in the field "What's the name of the vendor?"
1. Complete the remaining fields on the page.

> Check the Zip Handbook page to learn more about completing a new request.

Once the Requisition is fully approved, a Coupa Purchase Order will be generated. You will receive an emailed notification that the Virtual Card is available for use on that Purchase Order. Click on the PO link to view the Virtual Card details.

NOTE - only you, as the Requester, will have the ability to view the Virtual Card details.

{{% panel header="IMPORTANT NOTE" header-bg="danger" %}}

Prerequisite: You must set up your 2FA in Coupa to view your Virtual Cards. Review the How to Enable Two-Factor Authentication (2FA) for more details.

{{% /panel %}}

The Virtual Card information is provided on the Purchase Order under the Payment section. Click on the link to view the card details. You will be prompted to enter Two-Factor Authentication (2FA) verification code.

The card number, expiration date, and CVV code will be available to the requester. At this point the requester can use the card details to complete the purchase. Please use GitLab Inc; 268 Bush Street 350; San Francisco, CA 94104 for the Billing Address when using the Virtual Card.

{{% panel header="IMPORTANT NOTE" header-bg="danger" %}}

The Virtual Card Supporting Documentation must match the amount of the Requisition. If the amount charged to the Virtual Card differs from the PO amount, updated documentation must be provided.

{{% /panel %}}

Virtual Cards FAQ

- How long is the Virtual Card valid?

- By default, the Virtual Card is valid for 365 days. After that, the card will expire for security reasons. If you are unable to make payment within those 365 days and the Virtual Card has expired, tag @Accounts Payable Approval Group in the Comments section of the Purchase Order. You must include the business justification for reissuing a card in your comments.

- How do I request an amount to increase the Virtual Card?

- Follow the same process as How to do a Purchase Order Change Request. Once the change request has been approved, the Virtual Card amount will be increased.

- How do I attach a receipt or invoice after Purchase Order is issued?

- Receipts are NOT REQUIRED for Virtual Card charges.

- If you receive a notification to attach a receipt, click your name at the top right >

Settings > Notifications > and remove the following 2 notifications

- "Charge Created"

- "Charge missing receipt reminder"

- What if I have an Urgent Request?
 - Urgent requests that need approval in less than 5 business days, need to be escalated in the procurement channel for expediting per the below steps:
 - Your Slack message MUST include:
 - Link to your Zip Request.
 - Contracts should not be posted directly in slack.
 - Date needed.
 - Specific and quantifiable impact to the business if date is missed.
 - "Supplier wants it signed today" does not qualify as a reason for escalation and these requests will be denied.
 - "Price will increase \$45K if not signed by Friday" or "Material negative brand impact if not signed by Friday due to missed PR deadlines" are specific, tangible, business impacts, that will be reviewed.
 - Urgent requests will be evaluated. Please note these are disruptive to our workflow and our ability to meet SLA's for requests opened on time.
 - We may or may not be able to accommodate your urgent request based on the risk and bandwidth available.
 - If you have a critical request, enter the request into Zip 1-2 weeks prior to needing approval to avoid needing escalation.

- What if I have questions or issues?
 - Reach out in the zip-faq Slack Channel for assistance with requesting a Virtual Card.
 - Reach out in the coupahelp Slack Channel for assistance with an issued Virtual Card.

What is HelpLab

HelpLab is a GitLab's branding of the ServiceNow Platform.

ServiceNow is a SaaS Enterprise Service Management Platform that enables organizations to gain operational efficiencies by centralizing and automating Service Life Cycle Management. Simply put, it's a Support Ticketing System that will allow us to provide faster and more accurate help so that we maximize the Productivity of our Teammates.

Why ServiceNow?

The solution combines the people-connect, stock-admin, expense-reporting-inquiries, and payroll and ithelp Slack channels into a single destination. No more searching for the right Slack channel for your various questions; you will be able to get the help you need all in one place.

Additionally, this solution supports our continued emphasis on keeping team members' sensitive information secure and confidential. When you reach out for support, you will know that it's being handled with the utmost care to maintain your privacy.

When is it going to be LIVE?

ServiceNow (aka HelpLab) is going to be live on 2024-04-25.

What teams are available in HelpLab?

The following teams are available through HelpLab:

- People Connect
- People Compliance
- Background Checks
- Global Benefits
- People Technology and Analytics
- Team Member Relations
- Absence Management & Paid Time Off
- Stock Admin
- Expenses
- Payroll (US & Non-US)
- Sales Compensations

- CorpSec End User Services
- Enterprise Applications

How do I use HelpLab?

Accessing HelpLab

HelpLab is available via Okta. To access the platform:

1. Login to your Okta home page.
1. Search for HelpLab in the search bar.
1. Click on the HelpLab button.
 - A new tab should open with your user logged in.

Create a ticket / request

1. Log in to HelpLab via Okta. If you have a ServiceNow Fulfiller license, to open requests for other teams you will need to go to the main dashboard, as by default you will see your team's requests only.
1. Navigate to the main menu at the top and browse through the menu options to find the team you'd like to request assistance from.

1. Once you've identified the team you need assistance from, look for the topics or categories related to your question or issue.
 - If you're unsure which topic to select, or if your request doesn't fit into any specific category, consider opening a General Request available under each team. This option allows you to provide a brief description of your issue or question without selecting a specific topic.
1. Fill in the required details for your request and attach any necessary documents or screenshots to provide additional context.
1. Review your request to ensure accuracy and completeness.
1. Click on the "Submit" button to send your request to the relevant team for processing.

Add a team member to your ticket / request

After submitting your request, you have the option to add team members, such as your manager, to the watch list. Adding team members to the watch list ensures that they receive notifications and have visibility into the case. This feature is useful if there's anybody who needs to have visibility to the case's progress or if additional stakeholders should be informed about updates or resolutions.

Track & manage open requests

Navigate to the "My Requests" section.

Here, you will see a list of all your open requests along with their current state and any updates. Click on a specific request to view more details, such as progress updates and comments.

You can also filter by Open or Closed requests or search for specific requests using the search bar to quickly locate the request you want to track. If you have submitted a request using the HelpLab app in Slack, you can track its progress here as well.

HelpLab Support

For immediate support following the launch, for any HelpLab related issues, the best way to reach is by sending a message to the ithelp Slack channel. The dedicated support team will closely monitor this channel and promptly address any problems or questions you may have.

SECTION: business-technology/enterprise-applications/guides/navan-expense-guide/_index.md

<link rel="stylesheet" type="text/css" href="/stylesheets/biztech.css" />

What is Navan Expense

Navan Expense is an expense and payments platform that improves managing expenses while you're on the road.

How to access Navan Expense

BROWSER

Navan Expense is available via Okta. To access the platform:

- Login to your Okta home page.
- Find the Navan tile.
 - Navan should open in a new tab with your user logged in.
- Click on Navan Travel at the top-left corner of the page.
- Select Expenses.

MOBILE APP

- Download the app from your preferred mobile app store.
 - Navan mobile app is compatible with iOS 15 or later.
- Open the app and select Sign in with Email.

- Add your GitLab email and click Continue.

- Select Sign in with Okta SSO.

{{% alert title="Note" color="info" %}}

If you have the TripActions Liquid app, you can delete it from your device.

{{% /alert %}}

> For more information on how to use the mobile app, check the [Getting started with Navan expense on mobile](#) article.

Navan Expense - Getting Started

Navan Expense on mobile

The mobile app is organized into four main sections: My reimbursements, My cards, My policies, and My transactions. Transactions that require your attention (such as adding a receipt), will appear at the top of the screen, in the To dos section. You can access your Navan profile to manage your personal card for reimbursements and calendar integrations from the badge in the top right corner.

My reimbursements

Import business transactions paid for in cash or charged on a personal card for reimbursement through the Navan mobile app. Use this folder to track the transactions that you have submitted for reimbursement.

- Submitted: Transactions that are in admin review or pending payroll reimbursement. Transactions that require actions are labeled with a purple marker. They can be resolved by selecting one from the list and taking necessary actions.
- Scheduled: Transactions approved and scheduled for reimbursement are listed by the scheduled reimbursement date.
- Deposited: Transactions that have been deposited and the deposit date.
- Rejected: Transactions that were rejected by the approver.

My policies

The policy tab provides an overview of your assigned policies by expense type. Please note that this section is customized to your specific policy, as assigned by the Finance team. Users will have different policies assigned depending on their anticipated expenditures and role.

My transactions

The four types of transactions in Navan Expense are organized into folders in the My transactions section: Drafts, Navan card(if applicable), Purchase cards(if applicable), and

Manual. Depending on your settings, you may see some or all of these types of transactions under the tab.

To dos

If a transaction requires your attention or follow-up, it will be placed in the To dos section in one of the following categories:

- Missing receipt: Based on your company's policy, you may be required to add a receipt for certain transactions.
- You need to pay: Out-of-policy transactions that have not been approved by your admin or manager and need to be repaid to the company fully or partially.
- Info needed: Transactions that require you to respond to an approver's request with additional information.
- Needs your review: Transactions made with a Navan card that require you to fill out a custom field set by your company admin.
- Drafts: Receipts imported into Navan or manual expenses saved as a draft will be stored until you are ready to submit.

Profile

Access your profile by tapping the Profile icon located in the top-right corner of the app, then Expense settings. From this page you can manage the following features:

- Calendar integration: When enabled, this integration captures information from your calendar about events that are relevant to your card transactions (such as name, location, and participants) and automatically completes transaction details.
- Personal cards: Link your personal payment method(s) to import out-of-pocket expenses or repay your company if a charge made on your Navan card has not been approved.
- Personal bank account: Link your personal bank account to receive reimbursement for approved manual transactions (out-of-pocket expenses) .
- Call or Email support: Quickly connect with a support agent over the phone or by email.

> Check the Getting started with Navan expense on mobile article to learn how to use the mobile app.

Navan Expense on the web

Sign in to your Navan account from a web browser, click the Navan Expense tab on the left, then select Expense under the Expense section. The Navan Expense web app has three main components: Transactions (All, To-do, My money, Drafts), Cards, and Settings.

Transactions (All)

View and manage all of your manually added transactions, Navan card transactions, and purchase card transactions under the All tab. For each listed transaction, you will see the name of the

merchant, the amount, and date of the transaction, and its status. Click any transaction to view additional details, revise editable fields, or take action based the status of your expense. Transactions requiring action will also be categorized under the To-do tab.

Transactions (To-do)

The To-do tab displays transactions that require additional information or action. Click the down arrow next to each of the below categories to view associated transactions:

- Missing receipt: Transactions in this section require a receipt according to your assigned expense policy. Click Upload next to a transaction to add a receipt then drag and drop the receipt image file or click Upload file(s) to select a saved image file.
- Repayment needed: Transactions in this section are out-of-policy and require repayment to GitLab.
- Add more information: Transactions in this section are out-of-policy and more information has been requested by your approver before they approve or reject the expense. Click Add information to provide more information and then click Submit.
- Needs more information: Transactions in this section require you to complete additional transaction details requested by the Finance team. Select a transaction, then enter any missing information.

Transactions (My money)

The My money tab groups your transactions into categories based on \ status and allows you to track updates. Click the down-arrow next to each category to view associated transactions.

- Submitted: Transactions that are in admin review or pending payroll reimbursement. Transactions that require actions are labeled with a purple marker. They can be resolved by selecting one from the list and taking necessary actions.
- Scheduled: Transactions approved and scheduled for reimbursement are listed by the scheduled reimbursement date.
- Deposited: Transactions that have been deposited and the deposit date.
- Rejected: Transactions that were rejected by the approver.

Transactions (Drafts)

The Drafts tab contains transactions created from receipt forwarding or manual transactions that are saved but not submitted yet. Select a transaction to review, add missing details or receipts, then submit, or save for later.

Submitting a manual expense in the web app

Use the Add transaction button from any tab on the Transactions page to manually enter transactions for purchases made using cash or a personal card.

{{% alert title="Note" color="info" %}}

To import manual expense from a personal card instead of manually entering in your transaction details, please use the Navan app.

{{% /alert %}}

Cards

Manage Navan cards and purchase cards under the Cards section. Click the Navan card image or select a purchase card from the list to manage its settings. For each card, you will be directed to a new page that provides you with card information and associated transactions, including a section for transactions that require action.

Settings

Use the settings tab to connect your work calendar using the Calendar integration and also add a bank account to receive reimbursements for approved manual transactions.

- Calendar integration: When enabled, this integration captures information from your calendar about events that are relevant to your card transactions (such as name, location, and participants) and automatically completes transaction details.
- Personal cards: Link your personal payment method(s) to import out-of-pocket expenses or repay your company if a charge made on your Navan card has not been approved.
- Personal bank account: Link your personal bank account to receive reimbursement for approved manual transactions (out-of-pocket expenses) .
- Call or Email support: Quickly connect with a support agent over the phone or by email.

Support

If you have questions or need assistance with your Navan account, cards, or transactions, click support from any page of the web app to get in touch with our team.

> Check the [How do I use Navan Expense on the web?](#) article to learn how to use Navan on the web.

How to connect my personal banking details to Navan Expense

Connect your personal bank account or personal cards to Navan for quick and easy submission of manual expenses, reimbursement for out-of-pocket expenses, and repayments to the company.

{{% panel header="IMPORTANT NOTE" header-bg="danger" %}}

- If your personal bank account is not able to be connected, you will be reimbursed according to GitLab's regular payroll process..

{{% /panel %}}

Importing transactions

Users with a United States-issued personal card can link the card to their Navan account to import transactions for out-of-pocket expenses. Once your personal card(s) has been added, you can view and import transactions made on your card. To link your card for imports:

1. Open the Navan mobile app.
2. Tap the Profile icon, then Expense settings.
3. Select Personal cards.
4. Tap +Add account under the For importing transactions section and follow the prompts.

Connecting your bank account for reimbursements

Connect your bank account to Navan to receive reimbursements for out-of-pocket expenses. Bank accounts can be linked via Plaid (US-based bank accounts only) by entering your bank account login credentials. Additionally, US-based bank accounts and accounts based in countries eligible for direct reimbursement can be linked manually by inputting your bank account information.

- For Canadian bank accounts, the format for routing number is 0XXXXYYYY
- add a zero in the beginning for electronic transfers
- XXX = last 3 digits institution number
- YYYYY = first 5 digits branch/transit number

{{% alert color="warning" %}}

Please note that you can link only one account at a time. To add a different account for reimbursements, you must first unlink the existing account.

{{% /alert %}}

In the mobile app

Log in to your bank account

1. Navigate to the Profile icon on your Navan app, then tap Expense settings.
2. Tap Bank account.
3. Select Login to bank account.
4. Select your bank using the search bar or selecting a bank from the list.
5. Enter your credentials, then click Submit.

Link bank account manually

1. Navigate to the Profile icon on your Navan app, then tap Expense settings.
2. Tap Bank account.
3. Select Link bank account manually.
4. Use the dropdown menu to select the country where the bank account was opened.
5. Enter the required bank account information.
6. Tap Review, then Link account to authorize the connection.

In the web app

1. Open the menu and select Expenses.
2. Select Settings.
3. Expand the Bank Account section.
4. Click on Link bank account manually.

> Check the [How do I connect my personal banking information to Navan Expense?](#) article to learn how to connect your card or account.

How to get reimbursed for out-of-pocket spend

Import business transactions paid in cash or charged to a personal card to receive reimbursement through the Navan mobile app. Known as manual expensing, these transactions will be automatically approved for reimbursement if they comply with your assigned policy. Transactions outside of your assigned policy are submitted for review by your company's admin team.

There are several ways to submit for reimbursement, and all manual expenses can be saved as a draft before submitting:

- Receipt scanner: Take or upload a photo of your receipt, and all relevant details will auto-populate into the corresponding fields.
- Personal card import: Link your personal card(s) and import transactions for reimbursement.
 - Note: This option is only available to users with a United States-based bank account.
- Type in expenses: Manually type in your transaction details if you cannot link a personal card or have misplaced your receipt.
- Receipt Import: Email Navan (receipts@navan.com) a copy of your receipt(s) and they will automatically be added to an existing Navan Expense transaction or created as a transaction draft.

{{% panel header="IMPORTANT NOTE" header-bg="danger" %}}

- Receipts need to be forwarded from your GitLab email to receipts@navan.com in order to be attached to your Navan Expense account. After sending the email, the receipt should show up within a few minutes to a few hours.

{{% /panel %}}

{{% alert title="Tip" color="info" %}}

After beginning a manual expense, tap Save & close to save the transaction as a draft. Drafts are saved in the Drafts folder and can be accessed and modified at any time until you submit or delete them.

{{% /alert %}}

Receipt Scanner

To upload a receipt, tap +New transaction, then Scan a receipt. Upload or take a picture of the receipt. For information on uploading multiple receipts for the same transaction, check the How to attach multiple receipts to the same transaction section.

When uploading a receipt image, most of the required transaction information will auto-populate. It is recommended that you review the final numbers and transaction details before submitting your expense to ensure accuracy.

{{% alert title="Note" color="warning" %}}

You will need to grant the Navan Expense app access to your phone's camera or camera roll in order to take or access a saved picture of your receipts.

{{% /alert %}}

Import from Personal Card (For United States-based bank account only)

To receive reimbursement for a business transaction charged to a personal card, tap +New transaction and select Import from personal card. If you have not previously linked your personal card(s) check the How to connect my personal banking details to Navan Expense section for detailed instructions. Once your card is linked, select from the transactions shown on the Import and submit screen and submit for reimbursement.

{{% alert title="Tip" color="info" %}}

If you have recently been on a trip booked through Navan and would like to be reimbursed for a trip-related expense, toggle View by trips on to view only transactions that occurred on the date(s) of your trip(s).

{{% /alert %}}

Type in details

If you have not linked your personal cards to your profile or if a receipt was misplaced or not provided, tap +New transaction, select Type in details and input your expense details. Please note that a receipt must be submitted as expenses may not be approved for reimbursement when a receipt is not included.

Receipt Import

Forward receipts to match receipts with an existing transaction and simplify the manual expense submission process by automatically filling in transaction details. Receipts sent to Navan will be imported and analyzed, allowing you to simply review the transaction details and submit.

> Check the How can I get reimbursed for out-of-pocket spend? article for more details on the ways to submit a manual transaction.

Reimbursement Process

Transactions submitted for reimbursement can be tracked from the My reimbursements folder. They will fall into four categories: Submitted, Scheduled, Deposited, and Rejected. If you have linked your personal bank account to your profile, you will receive reimbursement via direct deposit when manual expenses are approved. If your personal bank account is not linked, you will be reimbursed according to GitLab's regular payroll process.

> Check the My reimbursements section for more details.

How to modify or add transaction details

Modify Navan Expense transactions to provide additional details, such as adding a receipt, linking associated trips, modifying the expense type, or adding participants. This includes transaction drafts, submitted expenses that are pending review, or when your company's Expense admin has requested additional information.

Accessing Transactions Details

Transactions are organized into folders based on transaction type. Select a folder to view all transactions that fall under the transaction type, then choose a transaction to modify the transaction details following the steps below:

- Navigate to the My transactions section of your Navan mobile app .
- Select a folder based on the different transaction types:
 - Drafts: Transactions created from the receipt forwarding feature or manual transactions that are saved but not submitted yet.
 - Manually added: Transactions submitted for out-of-pocket expenses.
 - Navan card: Transactions charged to a virtual or physical Navan card.
 - Purchase cards: Transactions charged to a purchase card.
- Choose the transaction you would like to modify or withdraw and proceed with any of the changes outlined below.

Add a Receipt

Depending on your assigned policy, you may be required to attach a copy of your receipt to an expense. If you did not submit a required receipt with your transaction initially, you can add it by scrolling to the bottom of any transaction detail page and selecting Add under the Receipt section.

> For instructions on how to upload multiple receipts to the same transaction, check the How to attach multiple receipts to the same transaction section.

Add Participants

Participants can be added to certain transaction types to provide your company admin or manager with additional context around your spend. For example, you may wish to add participant information to your transaction for a team event, meal or a transaction for an UberXL where multiple passengers were present to justify a higher cost. To add a participant(s):

- On the transaction details page, tap the Participants field.
 - Note: If you do not see the participants field, this indicates the transaction type is not eligible to have this information submitted.
- A Search box will appear where you can type in the name of each participant.
 - Other Navan users from your company will appear on the list of participants to select from, and their information will be pre-populated.
 - To add participants outside of your company, such as customers or guests, use the + icon to enter the new participant's information (first name, last name, and email address).
- Tap Save to save your changes.

Change expense type

Expense types for transactions charged to Navan cards will be automatically assigned based on the merchant where the card is used. However, you must still confirm that the transaction is assigned to the correct expense type. If you submit an expense with the incorrect expense type,

your transaction may be flagged for review by your approver. From there, they will determine whether the transaction can be approved as is or sent back to you to assign the correct expense category. If you need to re-assign the transaction to a different expense type, follow the steps below:

- On the transaction details page, tap the Expense type field.
- Navan will provide a list of suggested categories or you can select from a list of all expense types.
- Tap Save to save your changes.

Add or Edit a General Ledger (GL) Code

GitLab uses GL codes to map and track spend for specific types of expenses. If the system admins have provided you with the ability to add or edit the GL code associated with your transaction, you will be able to do so at the time you are submitting your transaction (for manual/out-of-pocket expenses). To add or edit a GL code, find the appropriate transaction and follow the steps below:

- On the transaction details page, tap the GL code field.
- Search for a GL code or scroll through the list provided.
- Select a GL code and click Save.
- Tap Save on the transaction detail page.

Link a Related Trip

Transactions made with a Navan card during a business trip will automatically be associated with corresponding travel booked on the Navan platform. For manual (out-of-pocket expenses), you will need to ensure this information is correctly entered before submitting your expense. To associate an expense with a trip, follow the steps below:

- On the transaction details page, tap the Trip field.
- Navan Expense will provide a list of suggested trips booked in Navan for you to select from.
- Once a trip has been selected, tap Save to save your changes.

Withdraw a Transaction

If you submit a manual transaction for an out-of-pocket expense that is not compliant with your assigned expense policy, it will be flagged for review by your expense approver. These transactions will be marked as In review and can be found in the Manual folder of the My Transactions section. If you would like to withdraw one of these transactions before your approver has taken action, you may do so by following the steps below:

- On the transaction details page, tap the ellipsis in the top right corner.
- Click Withdraw transaction to permanently delete the transaction.

Once a transaction has been withdrawn, it will no longer appear on the admin's dashboard or

under your transaction history.

> Check the [How can I modify or add transaction details?](#) article for more details on how to modify a manual transaction.

How to attach multiple receipts to the same transaction

Business expenses paid for in cash or charged on a personal card can be imported for reimbursement as manual transactions through the Navan Expense mobile app and users are required to attach a receipt for all manual transactions submitted for reimbursement. In certain instances, you may need to upload multiple receipts to the same transaction. Read below to learn how.

New Transactions

To submit a manual expense with multiple receipts, open the Navan Expense mobile app, tap Expense, +New transaction, then follow the steps below:

1. Select Scan a receipt, then tap the camera shutter button to capture each image(s) of the receipt. Alternatively, you can tap Photos or PDF to upload saved receipt images or PDFs. Tap Email to forward an email copy of the receipt to Navan. As you take each photo or add a saved image, you will see a thumbnail on the bottom right side of the screen with the number of photos taken.
2. After reviewing your photos, tap the Use photos button.
3. Use the crop icon if edits are needed. Use the trash can icon to remove unneeded images.
4. Tap Use photos. After the receipt information is scanned, you will be directed back to the expense screen, where you can review the information retrieved from the receipt and finish inputting the transaction details.

Submitted Transactions

To attach multiple receipts to transactions that have already been submitted, follow the steps below:

1. Navigate to the My transactions section in the Navan mobile app, then Navan card.
2. Find and select the transaction you would like to add your receipts to.
 - If you have not uploaded any receipts, tap Add receipt then select the method you would like to upload (Add photos, Add PDF, or Replace receipt).
 - If you need to add more receipts to a transaction that already has a receipt(s) attached, tap View, then select the method you would like to upload (Add photos, Add PDF, or Replace receipt).

> Check the [How do I attach multiple receipts to the same transaction?](#) article for more details.

How to itemize a transaction in Navan Expense

Navan Expense provides you with the ability to automatically split a single transaction into multiple items, allowing for the assignment of expense types, GL codes, custom fields, and the approval or rejection of the transaction by the admin on a per-item basis. A common use case for itemization is hotel expenses, where certain charges should be covered by GitLab (i.e. the hotel's nightly rate or parking cost) while others should be covered with your personal funds (i.e. spa services utilized at the hotel).

{{% alert color="warning" %}}

Users can itemize their own manual transactions at any time before they have been submitted or after submission only if a transaction has been flagged for review by the system admin and has not yet been actioned by them.

{{% /alert %}}

{{% panel header="IMPORTANT NOTE" header-bg="danger" %}}

- Transaction itemization is not currently available on the web app.

{{% /panel %}}

Itemizing a manual transaction

1. Open the Navan mobile app, then tap Expense.
2. Start a new transaction.
3. Tap Scan a receipt to allow Navan to auto-fill your transaction information or Type in details to input the transaction information manually.
4. After all of the transaction details are input, tap Itemize.
5. Review the scanned items page and edit as needed.
 - Note: When itemizing lodging expenses, you will be prompted to enter additional fields for the transaction, including hotel check-in and check-out dates, cost of stay, and nightly rate.
6. Tap Continue, then Let's do it! to start categorizing your items.
7. Review the items captured from the receipt. Change the expense type, delete an item, or mark an item as a personal expense to remove it from the portion that will be submitted for reimbursement. Tap Add new item if you need to add another item to the transaction.
8. Tap Save to finish and submit your transaction.

Itemizing a manual transaction after expense submission

Manual transactions are automatically approved when submitted if they fall within the parameters of your assigned expense policy and cannot be itemized. If a submitted non-itemized manual transaction has been flagged for review by the system admin for being non-compliant with your assigned expense policy, you will have the opportunity to itemize it before the admin has approved or rejected.

1. Tap the Needs your review tile on the homepage of your Navan Expense app.
2. Select a transaction.
3. Tap Itemize and follow the steps outlined in the Itemizing a manual transaction section. You can edit the itemization until it is approved or rejected by your company admin

> Check the [How do I itemize a transaction?](#) article for more details.

How to automatically add a receipt to a Navan Expense transaction

Forward email receipt to Navan Expense to automatically match it to existing transactions. Receipts sent to Navan will be imported and analyzed to auto-fill transaction details for you allowing to review, then submit.

{{% panel header="IMPORTANT NOTE" header-bg="danger" %}}

- Multiple receipts in an email will be cataloged as one transaction. If you need to submit receipts for more than one transaction, forward them as separate emails.

{{% /panel %}}

Emailing Receipts to Navan

Receipts emailed to Navan will be scanned, and the transaction information will be imported to your Navan Expense account. Receipts that match an existing transaction will automatically be added to that transaction. If a match is not found, a new transaction draft will be created using the receipt and transaction details. To import a receipt, email a copy of your receipt to receipts@navan.com from your GitLab work email.

Once received, a push notification (if enabled on your device) will confirm that your receipt was successfully imported and inform you of its status:

- Successful receipt/transaction match: Shortly after emailing your receipt, you will receive a push notification that your receipt has been matched with an existing Navan Expense transaction. Tap the notification to be directed to the transaction in the mobile app, or navigate to the My Transactions section to view the transaction to which the receipt was added. Review the transaction to confirm that all of the information is correct.
- Draft created: Shortly after emailing your receipt, you will receive a push notification that your receipt has been imported and that a transaction draft has been created and saved in the Drafts folder. Open the transaction to review, fill in all required fields, then submit.

{{% alert color="warning" %}}

If the receipt import is attached to the wrong transaction or if it needs to be replaced, see the next section, [Managing Imported Receipts](#), for instructions.

{{% /alert %}}

{{% panel header="IMPORTANT NOTE" header-bg="danger" %}}

- All receipts contained in each email will be cataloged as one transaction. If you need to submit receipts for more than one transaction, forward them as separate emails.

{{% /panel %}}

Managing Imported Receipts

Move the receipt to another transaction or replace it from a receipt's ellipsis menu. You can also add additional photos or a PDF, save the receipt, or delete the receipt from the transaction.

1. Open your Drafts folder and select a transaction.
2. Tap the ellipsis menu (three dots) on the corner of the receipt.
3. Select an option from the menu.
4. Your device's camera will open and allow you to take a picture of a new receipt, use an image from your photo library, PDF, or forward a receipt from your email address.
5. Tap Use photo to add the new receipt to the transaction.
6. Review the transaction details and choose Delete, Save & close, or Submit.

Moving a receipt to another transaction

1. Open your Drafts folder and select a transaction.
2. Tap the ellipsis menu (three dots) on the corner of the receipt.
3. Select Move receipt to another transaction.
4. Use the search bar or scroll to locate the transaction.
5. Tap Move.
6. The next screen will confirm that the receipt was successfully attached to a different transaction. Use the checkbox to indicate if you would like to delete the original transaction draft.

Replacing a receipt

- Open your Drafts folder and select a transaction.
- Tap the ellipsis menu (three dots) on the corner of the receipt.
- Select Replace receipt.
- Your device's camera will open and allow you to take a picture of a new receipt. Tap Use photo to import the new receipt into the transaction.
- Review the transaction details and choose Delete, Save & close, or Submit.

> Check the [How can I automatically add receipts to my transactions?](#) article for more details.

How to connect Google Calendar to Navan Expense

When calendar integration is enabled, this integration captures information from your calendar about events that are relevant to your card transactions (such as name, location, and participants) and automatically completes transaction details.

To connect your calendar, access your profile by tapping the Profile icon located in the top-right corner of the app, select Calendar Integration and enable your Google calendar.

How to submit a mileage reimbursement request

Navan Expense provides you with a quick and simple way to get reimbursed for mileage driven for business in your personal vehicle. The expense policy assigned to you for on-the-job expenses by GitLab's Navan Expense admin will determine your mileage reimbursement eligibility.

{{% alert color="warning" %}}

Mileage is only available in the Navan Expense Mobile App. Download the app from your preferred mobile app store.

{{% /alert %}}

Submitting a Mileage Expense (Available on the mobile app only)

To submit a request for mileage reimbursement, tap +New transaction, then Log distance driven. Proceed with completing your trip details.

- You can enter in your drive origin and destination using Google maps and select your route, or enter this information in manually. Your distance driven and total reimbursement amount will be automatically calculated.
- Your reimbursement amount is calculated based upon the total distance traveled multiplied by the mileage rate reimbursed by GitLab (click into the Information icon next to Total to see this value).
- Lastly, enter in your Date of travel (required) and any additional details to provide your Navan Expense Admin team with more details and context for your expense (optional).

{{% panel header="Note" header-bg="danger" %}}

- If you do not see the option to Log distance driven, this indicates that your company has not assigned you to an expense policy that allows for mileage reimbursement. Contact the Accounts Payable team for more information.

{{% /panel %}}

> Check the [How do I submit a mileage reimbursement request?](#) article for more details.

Repayments for Out-of-policy Expenses

Transactions charged to a physical Navan Expense card that violate the expense policy assigned to you by GitLab will be reviewed by the Accounts Payable team. Once reviewed, the approver may choose to reject the expense and request that you repay the company for the full transaction amount or a partial amount. Alternatively, if you are aware that a transaction will require repayment, you can make a payment before your approver reviews the transaction. Repayments can be processed directly through the Navan mobile app.

> Check the [How can I repay my company for out-of-policy spend?](#) article for more details.

How to submit or manage an expense for someone else

Navan Expense allows you to submit manual expenses (expenses not charged to a physical card) and manage transactions on behalf of other users within your organization through the Navan app.

Requesting Delegate Access to Book for Another Team Member

1. From your Navan homepage, navigate to your profile icon and click on Profile.
1. In the Contact info tab, locate Delegate info, and then I book travel for these users. Enter the names of the team member(s) you would like to manage book or manage travel for.

1. Team Members added to your list will receive an email asking them to approve or deny access. You will be notified by email once your request has been approved or denied. Pending requests will show in grey until they are approved.

Removing Yourself as a Delegate

To remove yourself as a delegate for another team member, select the X next to the name of the person you would like to remove from the list of people you book travel for. Once the user is removed, they will receive an email notifying them of the change.

Designating Delegate Access to Another Team Member

If you would like to designate a delegate to approve transactions on your behalf, book or manage travel to another team member, follow the below steps:

1. From your Navan homepage, navigate to your profile icon and click on Profile.
1. In the Contact info tab, locate Delegate info, and then These users can book travel on my behalf. Enter the names of the users you would like to grant permission to.
1. Users added to your list will receive an email notifying them that they now have permission to approve on your behalf for your direct reports, book or manage travel on your behalf.

Revoking Delegate Permissions

If you no longer wish to have another team member book or manage travel on your behalf, select the X next to the name of the person you would like to remove. Once you have removed a delegate's access to your profile, they will receive an email notifying them of the change.

{{% alert title="Note" color="info" %}}

If you cannot remove a user from your list of delegates, this indicates that a Navan Expense admin has marked them as a company-wide delegate. Company-wide delegates can only be added or removed by a company administrator.

{{% /alert %}}

Submitting a manual expense for another user

Navan mobile app

1. Navigate to the Profile tab on your mobile app.
1. Select Expense settings.
1. Tap Switch users and use the search bar to type in the name of the user you would like to submit/manage an expense for. This will impersonate the user within the app and you will see a banner indicating you are Logged in as [user name].
1. When you are ready to switch back to your profile, tap Profile and select your name.

Navan Expense web app

1. Click Log in as (person icon) from the homepage of your Navan account.
1. Use the search bar to type in the name of the user you would like to submit/manage an expense for. This will impersonate the user within Navan and you will see a banner indicating You are currently logged in as [user name].

1. Once you are logged in as the user, click Access your expenses and select Add transaction.
1. Select Upload receipt or Type in details and follow the prompts to submit the transaction.
1. Click End session from the top b
