

ancial well-being. It offers opportunities for individuals to share their experiences, learn about available resources, and work together to enhance and strengthen our community.

Leadership

Co-leads: @yyugitlab and @mmacfarlane. Yin is based out of Sydney, Australia, and Matthew out of Seattle, USA. We are always happy to have more leads join! In particular, it would be fantastic to have a lead based out of EMEA as we do not cover that time zone given our APAC and AMER time zones. Please let us know if you would be interested in becoming a lead!

Executive sponsor: @lboughner. Lisa is based out of Las Vegas, USA.

Advisors & allies: Could be you!

Benefits

- Prioritizing mental health is crucial for both our personal lives and our productivity at work. By offering more resources to team members, we can improve overall well-being and increase productivity at GitLab (a true win-win situation). Furthermore, research indicates that more people are facing mental health challenges than ever before, and the demand for resources is at an all-time high.

Where to reach us

- Join our Slack channel mental-health-tmag
- Create an Issue in the Mental Health TMAG Project: <https://gitlab.com/gitlab-com/mental-health-tmag>
- Sign up to get meeting invites by joining the GitLab Mental Health Google Group: <https://groups.google.com/a/gitlab.com/g/wellness-mental-health>

SECTION: company/culture/inclusion/tmdg-gitlab-early-career.md

Welcome to the Career Enablement TMAG!

Mission Statement and Vision

The Career Enablement Team Member Advocacy Group champions corporate literacy, professional development, and career planning. The group promotes inclusion and engagement at GitLab through resources such as continuous learning, community building, peer support, and mentorship.

The group supports all GitLab team members including, but not limited to: folks new to remote work, the technology industry or the workforce; team members seeking to advance their professional skills; managers learning to work with emerging talent; team members aiming to invest time in their career and more.group.

Leadership

Lead: @kpdoespr

Co-lead: @akulks

Executive sponsor: @cmestel

Advisors & allies: Could be you!

Responsibilities of the Group

- Enable GitLab team members to be more successful at the company, and in their long term careers, by educating around use of the GitLab platform, importance of living GitLab values, and understanding complex work relationships.
- Build community among the TMAG's members and create an inclusive environment for other employees to join.
- Educate group members on options for continuous learning, career growth and financial strategies.

Benefits

- Community with peers
- Increased engagement, empathy and belonging
- Career development
- Networking
- Continued learning/education

Where to reach us

- Join our Slack channel career-enablement-tmag
- Issue label: Early-Career-TMDG
- Email: earlycareertmdg@gitlab.com
- Sign up to get meeting invites by joining the GitLab Early Career Professionals Google Group

SECTION: company/culture/inclusion/tmrg-caregivers.md

Welcome to the Caregivers Team Member Resource Group space! Join us in our Slack channel [caregivers-tmrg](#) to be notified of events and meet other members.

Resources:

- Caregivers TMRG Slide Deck
- Caregivers TMRG GitLab Project
- Caregivers TMRG Slack Channel
- Caregivers TMRG Google Group

Purpose of the TMRG

The Caregiver TMRG provides a safe space for every GitLab team member to better understand the role of being a caregiver and to build a network of caregivers (including working parents) and their allies at GitLab. This TMRG is non-exclusionary in nature and open to anyone at GitLab.

"There are only four kinds of people in this world: those who have been caregivers, those who are currently caregivers, those who will be caregivers and those who will need caregivers. Caregiving is universal." -- Rosalynn Carter, Former First Lady of the United States

Main objectives for this TMRG:

- Providing peer support to TMRG members through a safe space for learning and sharing lived experience.
- Discussing issues faced by working parents and caregivers, providing insight into potential improvements, and offering support to prospective working parents caregivers.
- Providing advice and recommendations to GitLab on initiatives and activities that may better support the retention and attraction of working parents and caregivers.
- Assisting members of the TMRG, as well as other employees, towards better cultural understanding as it relates to being a working parent or caregiver and the particular demands this creates for the individual.
- Supporting GitLab's inclusive culture strategy, by engaging in local and global initiatives and acting as local inclusion champions who are making a positive difference.

Mission

"To build a community for parents, parents to be, caregivers, and family life allies that promotes the advancement, cultural awareness, and professional development of navigating the challenges of workplace and family life balance."

Bienvenidos, bem-vinda and welcome to the Gente space! We are a TMRG that was started in early 2021. Join us in our slack channel gente to be notified of our upcoming calls and feel free to check out what we've been up to so far below.

Gente TMRG Overview Slide Deck

Gente Project in GitLab

Slack Channel: gente

Join our Google Group here

Purpose of the TMRG

The GitLab's Gente TMRG provides a safe space for every GitLab Team member within GitLab to raise awareness and celebrate Latin American culture, and to understand how the diversity of this region can be leveraged to contribute to GitLab's strategic objectives. This group is not exclusionary and is open to anyone who is a GitLab employee and interested in learning more about Latin culture.

Mission

To promote advancement, cultural awareness, talent recruitment, retention, and professional development for Latinx individuals by giving a voice to the diverse backgrounds of the Latinx community in order to ensure the GitLab messaging continues to reflect its core values of Diversity, Inclusion & Belonging.

Language specific channels

Within GitLab's Slack, there are language-specific channels for those who want to converse with people in their native tongue or practice learning a new language.

- lang-es
- lang-pt

Community Outreach

Our Gente members are proud to be contributing externally to the following charitable organizations dedicated to supporting the Latinx community

- GitLab Community meetups globally · EN ES PT
- Techqueria · Techqueria is a nonprofit that serves the largest community of Latinx professionals in tech.
- Latinitas · Empowering all girls to innovate through media and technology
- Latinas in Tech · We are a non-profit organization with the aim to connect, support, and empower Latina women working in tech. We work hand in hand with top technology companies to create safe spaces for learning, mentorship and recruitment..

Gente Member Development

Learn more about the Gente community

- Renaming TMRG issue
- Why Latinx?
- LTX Fest On-Demand · The largest gathering of Latinx folks in tech, advocacy, and entrepreneurship.
- Contribute to GitLab by translating GitLab the product to promote inclusivity.
- LinkedIn Learning - Leadership in Tech · Erica Lockheimer successfully rose through the ranks at LinkedIn to become a VP of engineering. In this course, she interviews other leaders·all of whom inspired her own professional journey·about what it takes to carve out a lasting career in the lively, challenging world of tech.

Learning & Development Resources

1. Internship for Learning - If your manager has coverage, you can spend a percentage of your time working (through an ·internship·) with another team.
2. Growth and Development - Access external resources to develop their career. GitLab team-members are eligible for a reimbursement of up to \$10,000 USD per calendar year. Could include Academic Study, 4th Trimester Coaching, Professional Coaching, English Language Courses.
3. Mentoring at GitLab - Mentorship is an opportunity to learn from personal experience, background, and perspective. Mentorship builds trust, provides a safe space to make mistakes, and encourages growth for both the mentor and mentee. Reach out in the mentoring Slack channel with questions or feedback.
4. GitLab Company-Wide Mentorship Program - Applications are currently closed. Fill out this Google form to be notified of mentorship programs happening in FY24!

Organizing a Cafecito

- Make a calendar event. We need to define the process regarding making sure we have the budget to start the event. Usually, this involves reaching out to Liam on the DIB Team and asking if we have enough budget for this. For now, we use Pilar Mejia as a proxy for that, but we should improve this process to be Pilar independent.
 - When creating the invigitation, invite latinxtmrg@gitlab.com which is an alias for the folks registered into the Google Group. Depending on the visibility of the event, you can add GitLab Team Meetings if we want to silently add to the company-wide calendar without pinging folks. For our cases, this has only been relevant for Hispanic Heritage Month.
- Update TMRG Budget Forecast
- We recommend 2 time zones to cover different folks around the world - We don't have specific guidelines on picking. Gente team members tend to be located in AMER and EMEA, so prioritize those times. If possible, try to accommodate time zones that may not be as friendly for that. Logistically speaking, however, that may not be possible. You may check people's calendars to see if folks are generally free across different countries and time zones.
- Make an event with the following issue template with this link to create an issue. You can view the template here and suggest changes if you would like to
- Make sure to post in gente to make sure that people are aware that this is happening! Try to give ideally at least a week time in advance so that people are aware that this is going on.

SECTION: company/culture/inclusion/tmrg-global-voices.md

Mission

Increase awareness to GitLab's globally diverse team, the derivatives of having a global team as it relates to the wider GitLab team as well as the company, and improve the daily work life of our global team members.

Objectives

The Global Voices TMRG has determined the three main objectives to generate impact on in order to fulfill our mission:

1. Empower global team members to celebrate global representation and its benefits
1. Serve as a springboard for ideas to improve global inclusiveness to the day-to-day of GitLab employees
1. Advocate for global diversity across the organization

Leads

1. Eliran Mesika - Lead
1. Marin Jankovski - Co-Lead
1. Charlie Ablett - Co-Lead

Executive Sponsors

Sabrina Farmer, CTO.

Current Goals

With our mission and objectives in mind, we are taking a goal-oriented approach to iterative improvement. We've decided to work on a rough 6 month horizon, defining goals we'd like to target with that timeframe. For the current active horizon we'll be focusing on two:

1. Focused on global recruiting and retainment of team members
 1. Of our three objectives, this one helps address two of them and we think is a fundamental part of having a globally diverse team.
 1. It is larger in scope and will likely involve more collaboration and cross-functional discussions on how we can help drive progress with this goal. Iteration will be key to making sure there's focus and fulfillment.
 1. This will likely require 2-3 people that are interested in exploring the topic and leading it.
 1. Focus on the daily life as a global team member
 1. This will be made up of several specific initiatives where a solution is more visible and attainable. We need to determine what these will be but are thinking of 2-4 small initiatives here.
 1. These will likely short term and could easily be led by a single team member.
 1. We encourage and welcome new initiatives team members are interested in.

How to Participate

1. Join the Google Group
 1. Join the global-voices-tmrk Slack channel for conversation, announcements, and connecting with other TMRG members. Please introduce yourself and tell us where you are based when you

join the channel!

1. Open an issue on our GitLab project, [gitlab-com/global-voices-tmrg](https://gitlab.com/global-voices-tmrg) and tag the TMRG leads

Process

When a new matter/issue is raised on our portals (Slack channel or our issue tracker) the following process outlines how it should be handled:

1. @ mention the leads TMRG leads to help triage the issue
1. Ensure that a due date is set if the issue is time sensitive
1. Leads triage the discussion, identify and bring in the relevant DRIs of that respective process/area most relating to the issue which was raised for improvement
 1. In case an owner is not clear, the leads will @ mention the DIB group
1. The DIB group will then engage with the owner/s and ensure that the matter is being reviewed, progress is made and communication is transparent to the TMRG
1. TMRG leads review the progress and close the issue reporting back to the channel when necessary

When to raise an issue

We can work with other relevant DRIs only when the task at hand has an improvement component. While this can be said for a lot of things, not every item can yield a desired outcome.

For this reason, before you consider the following examples, it is critical to assume positive intent. It is not uncommon that team members you're engaging with have never even considered that there is an opportunity for improvement, (e.g. non-ISO date format is confusing), so you are responsible for educating them of a different point of view as well.

Below are some illustrative examples:

1. A form is provided requiring a phone number in XXX-XXXX XXX format for all team members
1. A swag choice in a company wide effort is limited to assume a certain climate
1. A "global" benefit is offered to all team members but only available in large cities in 1 hemisphere

Finally, it is absolutely ok to feel annoyance about something that is not considered from multiple different perspectives. It is how you decide to express it that can make a difference between success and failure. Not every problem has an easy solution, but it is infinitely easier to solve when it is approached with kindness.

SECTION: company/culture/inclusion/unconscious-bias.md

What is unconscious bias?

Unconscious biases are stereotypes about certain groups of people that individuals form outside their own conscious awareness. Nearly all our thoughts and actions are influenced, at least in part, by unconscious impulses. There's no reason bias should be out of scope. Categorizing people based on social and other characteristics is a powerful survival

mechanism, as it helps to distinguish friends from foes and make quick "life or death" decisions based on "inner feeling". At the same time this is a fertile ground for growing stereotypes, prejudice, discrimination.

Biases help the brain create shortcuts for the decision-making process and detect threats. Our unconscious biases are based on our own experiences and they help us detect patterns and find in-groups, a basic survival mechanism below our conscious radar. If unconscious bias goes unchecked, it can lead to fixed general views of how people should act or behave, and/or negative out-spoken attitude towards a person or group.

Everyone has unconscious biases, the goal is to bring them to our consciousness and navigate them, in order to provide a more inclusive and empathetic work environment.

How do I recognize it?

- Gain self-awareness and be present Pay attention to your body language and tone. Instead of reacting, set up a response. Monitor your self-talk.
- Exhibit tolerance and patience; avoid assumptions Choose to listen, pause, and consider first. Offer the benefit of the doubt. Don't jump to conclusions. Ask questions.
- Make thoughtful impressions and decisions Challenge your own default views. Take all options into consideration. Use informed decisions, not just your "gut".
- Seek feedback and choose to use it Don't avoid the conversation, seek it out. Ask for the feedback you need, not want. Achieve by understanding, not defending.
- Remain open-minded and continue learning Hold yourself and others accountable. Revisit, reflect, and review your day. Diversify your circles.

Unconscious Biases to look out for (in ourselves and in others)

- Affinity Bias: Biased towards people "who make me comfortable"; Biased against people "who make me uncomfortable".
- Affective Heuristic Bias: Immediate emotional judgement influenced by superficial traits such as race, gender, age, or names.
- Ageism Bias: The tendency to have adverse feelings/perception about another person based on age.
- Authority Bias: The tendency to attribute greater knowledge to persons in positions of authority than they may actually possess.
- Confirmation Bias: People look for ideas or findings that confirm their existing belief.
- Conformity Bias: Tendency to take cues for proper behavior based on the actions of others. Example: studies show that people are more likely to donate to charity if they know/see others donating.
- Contrast Effect: A cognitive bias that distorts our perception of something when we compare it to something else, by enhancing the differences between them. For example, your performance evaluation of a team member is affected by the evaluation that you wrote for a different team member just before.
- Gender: The tendency to prefer one gender over another gender.
- Height: Tendency to judge a person who is significantly shorter or taller than what is "deemed as socially accepted" human height.
- Halo Effect: Form of bias which favors one aspect that makes a person seem more attractive or desirable. Example: If we think someone is good looking we might also think that they are intelligible and charismatic.

- Horn Effect: Opposite of Halo Effect. Form of bias that causes one's perception of another to be overly influenced by one or more negative traits. Example: Someone who has failed the project is always like that and incapable of improving.
- Name Bias: Form of bias which favors a person based on their name and the perceived origin of their name.

Can I test it?

Unconscious bias is far more prevalent than conscious prejudice and often incompatible with one's conscious values. Therefore it would be good to have an instrument to detect and fight it.

The tool that achieved most popularity both in scientific circles and public is the implicit-association test (IAT), which is a collaborative research effort between researchers at Harvard University, the University of Virginia, and University of Washington. It is meant to reveal the strength of one's mental association between certain groups of people and certain traits. It is used to investigate biases in racial groups, gender, sexuality, age, and religion, as well as assessing self-esteem.

IAT can jump start our thinking about hidden biases:

- Where do they come from?
- How do they influence our actions?
- What can we do about them?

Tips on Recognizing and Avoiding Bias

1. Understand we all have biases
1. Determine what your biases are
1. When you see it block it
1. Maintain your awareness
1. Be ok with having an opinion different from the group
1. Be wary of first impressions
1. Do research on stereotypes
1. When working globally understand that your perceptions of bias may simply be the result of a lack of understanding of cultural differences
1. When making critical business decisions, invite others who can broaden your perspective to help ensure there are no hidden biases in the decision

Strategies for Managing Unconscious Bias in Practice

The SPACE2 Model of Inclusion - Six evidence based techniques for managing bias in oneself and others:

- Slowing Down
- Perspective Taking
- Asking Yourself
- Cultural Intelligence
- Exemplars
- Expand

Practical ways to reduce or avoid the impact of bias

- As an application reviewer or interviewer, if you find yourself biased positively or negatively, excuse yourself and ask someone else to review or interview that applicant. Being positively or negatively biased towards one candidate is unfair to all candidates.
- Data driven decision making. Rely on pre-defined measurable data points to reduce unconscious bias influences

SECTION: company/culture/inclusion/dib-working-groups/_index.md

- A strategic group of impactful team members whose purpose is to drive action and results in support of DIB and the DIB Leadership Council
- Smaller tasks that influence the bigger goals such as OKRs or company yearlies
- Measurable and deliverable on a focused issue

Goals

How/Goal

- Smaller groups (4-6 team members)
- Team members are volunteer-based on the specific topic collected in an issue in quarterly cadence.
- Team members identified through TMRGs, former DIB Influencer Group, DIB Leadership Council, and Division team members that can provide subject matter expertise or "influence".
- Limited timeframe (1-3 months)

Working Group members will include

- Group Sponsor (Optional)
- Working Group Lead
- DIB stakeholder
- PBP (for awareness only)
- Team members identified through TMRGs, former DIB Influencer Group, DIB Leadership Council, and Division team members that can provide subject matter expertise and influence

Each Working Group will have

- A problem/Issue statement/OKR
- Problem statements can be defined or influenced by DIB and/or the DIB Leadership Council
- Timeline: 1-3 months depending on the issue
- Defined Exit Criteria
- Clear goals and metrics to accomplish work group deliverable
- Communication
- Issue creation
- Slack Channel
- Cadence:
 - Weekly or bi-weekly meetings for 30 minutes to review activity and collaborate on next steps

- Provide findings/results to:>
- DIB Leadership Council
- DIB Monthly Initiatives Call

 ## SECTION: company/culture/inclusion/dib-working-groups/inclusive-practices.md

Attributes

Property	Value
----- -----	
Date Created	2024-02-20
Target End Date	2024-05-31
Slack	dibwginclusivemeetings (only accessible from within the company)
Google Doc	Working Group Agenda (only accessible from within the company)

Goal

The DIB Inclusive Practices Working Group aims to improve the use of Inclusive Practices in meetings at GitLab and with external parties.

Overview

Inclusive Practices are essential for creating a workplace where everyone feels valued and can bring a diverse set of skills and qualities to the organization. The focus of the DIB Working Group is to create inclusive practices to be leveraged in team meetings through name pronunciations and time zones.

Goals

This is a non-comprehensive list of topics to be discussed.

- What is the primary goal of Inclusive Practices in Meetings
- What is the metric for success both long and short term
- Establish the most important needs for Inclusive Meetings
 - How to develop guidance on name pronunciation
 - Guidance on do's and don't with for inclusive meetings
 - Not an exhaustive list
- Develop Resources to be used as best practices
 - Add to Handbook as a resource
- Communication plan of the resources

Exit Criteria

SECTION: company/culture/inclusion/erg-minorities-in-tech/_index.md

Mission

We are the Minorities in Tech (MIT) Enterprise Resource Group (TMRG) founded in the fall of 2019. Along with GitLab Pride, GitLab Women and GitLabDiverseABILITY, our goal is to ensure that members of these groups feel they have a safe space to communicate, unite and share issues that are reflective of their experience while at GitLab. This group is not exclusionary and is open to anyone who is a GitLab team member.

Leads

- Aricka Flowers
- Sharif Bennett

Sub-committees

Mentorship: Sharif Bennett & Darva Satcher

Events: Aricka Flowers, Morgen Smith & Shakarra McGuire

Talent Acquisition: Lorna Webster & Darva Satcher

Internal Outreach: Romer Gonzalez, Jackie Porter, & Daniel Croft

Communications

- Slack Channel: minoritiesintech
- Monthly Minorities in Tech Meeting

2021 Initiatives

- Advanced Software Engineering Course taught at Morehouse College
- Reverse AMA
- Establish a TMRG Outreach Program
- Speaker Series
- Book Club
- Newsletter

2020 Initiatives

The top four Initiatives for 2020 are:

- Mentorship
- Participation in external events
- Talent Acquisition
- Internal Outreach

MIT Mentoring Program

Mentoring is important for employee retention and growth. During the 2020 calendar year, MIT is hosting it's first Mentoring Program.

Learn More

Internal Outreach

The purpose of the Internal Outreach Committee is to communicate information about the mission, events, and initiatives of the MIT group.

We do this by:

1. Working through Slack Channels to share information
1. Organize roundtables at Contribute events
1. Coffee chats
1. Information provided in Onboarding issue

SECTION: company/culture/inclusion/erg-minorities-in-tech/advanced-software-engineering-course.md

Diversity, Inclusion and Belonging (DIB) are fundamental to the success of GitLab and the collaboration with Morehouse College, an HBCU, is an example of GitLab living our values. The Engineering organization has developed a curriculum that provides a holistic education for Computer Science students. This course will teach students about:

- Software Development Tools
- Real-world Software Development Roles & Responsibilities
- Real-world Software Development Lifecycle
- Remote work environment best practices

GitLab Benefits

- Partnering with HBCUs will provide an opportunity for GitLab to diversify it's talent acquisition pipeline, and enhance its commitment to diversity.
- Opportunity to diversify and to our Community of Contributors
- Evangelizing GitLab software to future Engineers
- Opportunity to diversify our talent acquisition pipeline

Student Benefits

- Develop an actual feature for GitLab, a software used by 40 million users
- Multiple Subject Matter Experts (Engineering, User Experience, Quality Assurance, Product Management, etc.) will instruct classes
- Due to our workforce spanning global time zones, office hour support will be very flexible
- Students will have a real-world experience and understanding of delivering software solutions to users applying a modern JavaScript web framework technology to build web applications when given customer requirements.
- Dive into Real-world Development Cycle
- Access to Software Engineers experts that are fully distributed across the globe
- Ability to apply for Apprenticeships or Full Time Employment based on availability

Organization

- Darva Satcher, Director, Engineering

Instructors

The GitLab instructors below have volunteered their time to create the course content that made this course possible. A special thanks goes out to each person listed below:

- Brendan O'Leary, Senior Developer Evangelist
- Michael Friedrich, Developer Advocate
- Darren Murph, Head of Remote
- Paul Slaughter, Senior Frontend Engineer
- Tim Zallmann, Director of Engineering
- Ash McKenzie, Staff Backend Engineer
- Florie Guibert, Senior Frontend Engineer
- Taurie Davis, Product Design Manager
- Darren Eastman, Senior Product Manager
- Ezekiel Kigbo, Senior Frontend Engineer
- Dave Smith, Engineering Manager, Reliability
- Andrew Kelly, Senior Security Engineer
- Alishan Ladhani, Backend Engineer
- David O'Regan, Engineer Manager
- Dennis Tang, Frontend Engineering Manager

- Thomas Randolph, Senior Frontend Engineer
- Eric Schurter, Senior Product Manager
- Sean Carroll, Engineering Manager
- Sharif Bennett, Mid Market Account Executive

Career Stories

The GitLab team members have shared their personal life experiences starting from their time in university up until their employment here at GitLab in an effort to show students several different career paths available to them. A special thanks goes out to each person listed below:

- Interview with GitLab Product Manager Darren Eastman
- Interview with GitLab Product Designer Timothy Noah
- Interview with GitLab UX Researcher Katherine Okpara
- Interview with Senior Frontend Engineer Ezekiel Kigbo
- Interview with GitLab Backend Engineer Serena Fang
- Interview with GitLab Support Engineer Brie Carranza
- Interview with GitLab Software Engineer in Test Mark Lapierre
- Interview with GitLab Mid Market Account Executive Rashad Bartholomew
- Interview with GitLab Security Engineer Juliet Wanjohi
- Interview with GitLab Senior Engineering Manager Darva Satcher

Topics Covered in the Course

- GitLab Overview
- Using GitLab for Software Development
- Continuous Integration (CI) and Continuous Delivery (CD)
- Markdown
- Working Remotely
- GitPod
- CSS
- JavaScript
- User Experience
- Product Management
- Frontend Engineering
- Backend Engineering
- Reliability Engineering
- Building a GitLab feature: How does a file viewer work?
- Building a GitLab feature: Getting Something on the screen
- Building a GitLab feature: Setting up a component architecture in Vue
- Handling Reviews
- Polishing a Merge Request
- Quality Engineering
- Security Engineering

Instructor FAQs

What technology is used to teach the lecture?

- All lectures are conducted over Zoom, the Zoom link will be in the Google Calendar invite.

Who will review the course homework?

- Homework will be reviewed by the Instructor unless otherwise organized.

When is the homework reviewed?

- Homework is to be reviewed once the due date has expired.

Should there be any breaks during the session?

- Have a small break every 10-15mins or so, allowing time for questions, feedback, etc.

How we use GitLab to run this course

For those interested in using GitLab to support a course whether it is Face to Face or online, please use the table below as a guide. GitLab turned out to be an excellent collaboration tool for offering an organized learning environment.

GitLab Feature	How this feature is used in this course
-----	-----
Pages	The course website runs using GitLab Pages.
Projects	Used as an environment for working on their homework and receiving more confidential feedback.
Issues	Used for classroom discussions and for turning in some assignments (by linking to their personal projects).
Merge Requests	Used to contribute to GitLab.
GitLab CI (Continuous Integration)	Used to build and test the software when students push code to production.
GitLab CD(Continuous Deployment)	Used to push every day code changes into the production environment resulting in continuous deployments to production.
Requirements	Used for homework assignments to mimic real world environments where you have customers who submit requirements to engineering teams.
Designs	Used for homework assignments to provide a visual for the Handbook Pages they will contribute to
GitLab Handbook	Students will learn to update the GitLab Handbook and they will also use some Handbook content as supplemental lecture material.
GitLab Docs	Students will use GitLab docs as supplemental lecture material.

SECTION: company/culture/inclusion/erg-minorities-in-tech/mentoring/_index.md

Purpose

The purpose of the MIT Mentoring Program is to improve GitLab's ability to attract, retain and engage minority team members. Through this program we can build relationships between team members and develop relationships across GitLab.

Goals

Diversity is a core value at GitLab and this program enables GitLab to support this value. In addition to hopefully improving team member retention rates, this program will provide the following for minorities currently employed at GitLab:

- Leadership training
- Career development support
- Enhanced relationship with team members

Projects

During every cycle of this program we end with a virtual showcase for all of the projects the Mentees and Mentors worked on during the program. Through these projects the participants acquire leadership skills, career development support and improved relationships across the organization.

Learn More

Roles & Responsibilities

Mentees

- Complete Initial Questionnaire form
- Complete GitLab Mentee Training
- Schedule bi-weekly meetings with your Mentor and arrive prepared with a pre-populated agenda
- Identify your goals and share them with your Mentor
- Complete an Independent Project
- Keep your Mentor informed of progress being made on the project
- Participate in the End of the Program Showcase

Mentors

- Complete Questionnaire
- Complete GitLab Mentor Training
- Attend bi-weekly meetings with your Mentee
- Provide guidance to Mentees
- Share professional experiences that will enrich the Mentoring Process

Minorities in Tech (MIT) Mentoring Program Working Group

- Evangelize the program to GitLab team members
- Define the mentoring program's framework and processes
- Attend the End of the Program Showcase

Minorities in Tech (MIT) TMRG

- Evangelize the program to GitLab team members
- Provide resources and support to the mentorship program and working group as needed

Matching Mentors & Mentees

Mentors and Mentees will be asked to complete a questionnaire. The responses received will enable a small, three-person sub committee from the Mentoring Program Working Group to determine the best matches based on the participants who have applied for the program. Some example of criteria that will be used for matching are:

- Career Track
- Geography
- Values
- Departments / Sub-Departments

There will be an option to provide the Mentees with a second round of matches in case the first round is not a good fit. Matching may not always be compatible, but we will do our best to ensure successful matches even if we have to start over.

Program Structure

The program will have four phases:

1. Enrollment of participants
1. Participant training
1. Program launch
1. Program conclusion/End of the Program Showcase

Learn More about the mentorship program's structure.

SECTION: company/culture/inclusion/erg-minorities-in-tech/mentoring/program-structure.md

Program Structure

The program will have four phases:

1. Enrollment of participants
1. Participant training
1. Program launch
1. Program conclusion/End of the Program Showcase

Phase 1: Enrollment of participants

- Mentors will volunteer to participate in the program
- Mentees will volunteer to participate in the program
- Both Mentors and Mentees will complete questionnaires
- Three members from the Mentoring Program Working Group will compare the questionnaires and match one Mentee with three potential Mentors
- Mentees will be sent an email with the LinkedIn Profiles of three possible Mentors
- Mentees will select a Mentor and notify the Mentoring Program Working Group
- The Mentors will be notified of their Mentee via email

Phase 2: Participant training

- Participants will be asked to review the Mentoring Handbook page prior to the start of the program

Phase 3: Program launch

- Program Kickoff meeting is scheduled
- Mentors and Mentees meet regularly
- Mentees work on Independent Projects with support of Mentors

Phase 4: Program conclusion/End of the Program Showcase

- Participants attend a Virtual Showcase featuring the Independent Projects
- Post-program Evaluation
- Recognition

Timeline

	Timeframe
Enroll Participants	May 2020
Training / Program Kickoff	June 2020
Mentor / Mentee Sessions	June 2020 - August 2020
Virtual Showcase	September 2020
Program Evaluation	September 2020

Virtual Showcase

What will be presented in the Showcase?

At the start of the program, the Mentor and Mentee will decide on an Independent Project for the Mentee to work on. This Project will be based on supporting the professional development of the Mentees.

At the end of the program, the Mentor / Mentee pair will present an overview of their Independent Project. Some examples of Independent Projects by mentees include:

- Leading a presentation
- Exhibiting commitment to a GitLab value by a specific action
- Developing a plan or project
- Contribution of improvements to a particular area of project
- Participation in a GitLab Working Group

There will be two Virtual Showcases to accommodate the various timezones. The Showcase will be held at the end of the mentoring program. All program participants will be required to attend the showcase.

Post Program Evaluation

Mentee Survey

This survey would be given to Mentees and Mentors to:

- Measure their experience in the program
- Solicit suggestions for improvements
- Highlight aspects of the program that stood out in a positive manner
- Ask if they would recommend the program to their peers

Mentee / Mentor Supervisor Survey

- Measure participant behavior during the program
- Measure whether the Mentor and/or Mentee have begun to illustrate new behaviors following the experience

Recognition

Mentor / Mentees should be recognized for their participation. Here are a some possible ways participants would be recognized for their work in the MIT Mentoring Program:

- Slack channel announcements
- Company announcements
- Diversity value consideration during annual reviews
- Being interviewed for a GitLab blog post or video

SECTION: company/culture/inclusion/erg-minorities-in-tech/mentoring/projects/_index.md

SECTION: company/culture/inclusion/erg-minorities-in-tech/mentoring/projects/2020/_index.md

This year our Mentor / Mentee pairs collaborated on the following projects:

Engineering

- Sharing GitLab's organization practices outside of GitLab (WINNER)
- Refine inactive bugs backlog
- A knowledge base and framework for engineering manages to share ideas

Finance

- Improving Financial Forecasting (WINNER)
- Should GitLab provide data residency for EU customers

Marketing

- Create a sales portal in order to track the customer journey and increase sales efficiency (WINNER)
- Increase the feedback loop between Field Sales and Product Management
- How to improve the relationship between Field Marketing and Mid Market sales
- How to improve the GitLab handbook
- Comparing Open Source strategies vs. GitHub and how to improve

Sales

- Increasing newly hired SAE's performance and reducing their churn
- A cross functional shadow program for leadership development
- LATAM Growth and expansion plan
- Creating a GitLab customer referral program (WINNER)

Diversity, Inclusion, & Belonging (DIB)

- Improving the use of misused terms
- How to increase from 34 to 100 African American employees in 18 months
- Improve detection of inclusive candidates in interview process
- To increase the percentage of diversity hires at GitLab through a rotational internship program (WINNER)

SECTION: company/culture/inclusion/erg-minorities-in-tech/mentoring/projects/2020/thankyou.md

Thank You for completing the Survey!

{.h2}

If you have not completed all of the surveys, please continue to do so, we would love for everyone to contribute!

Engineering

SECTION: company/culture/inclusion/leadership-dib-council/_index.md

A strategic group of Senior leaders Leaders who assist the DIB team in implementing the Corporate DIB strategy and provide insights to the DIB team on the Division's strategic imperatives. Each representative will bring a unique set of capabilities such as but not limited to:

- Location Diversity
- Manage a team that are geographically dispersed (providing expertise on geographical diversity)
- Division expertise
- Leader from an Underrepresented Group - Ethnic, Gender, LGBTQ, Neurodiverse, disabilities, etc.

Responsibilities

1. Ensure that the DIB strategic imperatives are embedded into business goals.
1. Unblock obstacles encountered while implementing GitLab DIB strategy globally
1. Provide Division and/ or geographic insights to the DIB team
1. Represent DIB in e-group and CEO Skips syncs.
1. Play the role of DIB Interruptor - actively advocate, challenge the norm and iterate to ensure Diversity, Inclusion and Belonging remains top of mind in their divisions amongst other senior leaders

Structure & Members

Senior leadership representative (Snr. Dir +) from each Department and a person from an underrepresented group who is manager+ where representation at Snr Dir+ is not possible.

- Engineering - Two Representatives
 - Darva Satcher
 - Tim Zallman
- Product - Two Representatives
 - Taylor McCaslin
 - TBC
- Sales - Two Representatives
 - Sherrod Patching
 - Michel Isnard
- Marketing - Two Representatives
 - Christine Lee
 - Amie Bright
- Finance
 - Andrew Murray
 - Dennis van Rooijen
- Legal & Corporate Affairs
 - Stacy Cline
- Security
 - Joaquin Fuentes
- People
 - People Business Partners
- Representative from DIB Influencer Group
- Office of CEO representative
 - TBC
- VP of DIB - Leadership DIB Council Lead
- DIB Team
- Executive Sponsors

Selection Criteria

Department Representatives

- Nominated by the E-Group member for the division: Senior Director + or a person from a URG who is Manager+ where URG representation is not possible at Snr Director+
- The team member must be performing in their role and not in any performance management process as confirmed by the People Group
- Must be a full-time GitLab team member. This includes PEO and full-time contractor team members
- At least 6-month tenure at GitLab
- Good understanding of DIB related issues within the department they are representing and an overall understanding of DIB concepts, programs and initiatives i.e. TMRGs, Unconscious Bias, Psychological Safety etc. Ideally having taken the Neurodiversity Training and/or GitLab Learn Course
- Ability to advocate for the department on DIB related issues
- Ability to advocate for the DIB Strategy and initiatives within your department

Selection Process

- The DIB Team will ensure that an agenda item is added to the E-Group Weekly Meeting to discuss nominations for the Leadership DIB Council
- The E-Group will have two weeks to provide their nominations for their department to the Chief People Officer or VP of DIB
- The nominees should already have been notified regarding their nomination
- The newly appointment member/s will then receive an introduction, an overview of the mission and purpose of the Leadership DIB Council and the Accountabilities and Commitments
- The newly appointed member/s will then be asked to acknowledge the Accountabilities and Commitments

Accountabilities and Commitments

These are the Accountabilities and Commitments that members of the Leadership DIB Council will commit to during their tenure on the The Leadership DIB Council:

- To being an active member of the Leadership DIB Council this includes but is not limited:
 - Attending a regular sync meeting that is suitable for your working hours. We will host two meetings: One in AM PST and one in PM PST or switch the times on rotation to allow all members to attend bi-monthly
 - Actively participate in the meeting by providing leadership, insights and actions on agenda items
 - Reading the notes or viewing the recording from the sync call you were unable to attend.
 - Taking on action items as an individual or part of a group
 - Advocate and sponsor DIB programs, Initiatives and Trainings
- Contribute asynchronously via Slack, GitLab or other means on projects that the group is working on
- Actively seek and distribute DIB related information within your department and other team members
- Be a trusted advisor to team members on DIB related issues and processes
- Maintain the requirements outlined in the selection process
- Whilst the role will be incorporated into your day to day actions in advocating for DIB, the role will require 2-3 hours a month including monthly meeting to work on specific actions.
- Minimum one year commitment

If you are no longer able to maintain these Accountabilities and Commitments you should let the DIB team know as soon as possible. If the DIB Team recognises that a member of the Leadership DIB Council is not maintaining the Accountabilities and Commitments they will:

1. Provide the member with feedback and ask if they are willing to renew their Accountabilities and Commitments

- If they feel they are able to recommit we will allow the member to continue
- If they feel they are unable to recommit we will start the selection process for a new member

1. If the Leadership DIB Council member continues to not meet the Accountabilities and Commitments then the DIB Team will let the member know that they will no longer be apart of the Council and begin the selection process

Processes for the Leadership DIB Council

Annual Kick-off Call

Leadership DIB Council Monthly Meeting

Agenda

- Members will do their best to add agenda items 48 hours before the meeting
- Members will review the agenda 24 hours before the meeting
- Each agenda item will have a maximum of 5 minutes of discussion. If the agenda item has not been resolved, we will move the item to an issue and contribute async

We will follow the agenda as closely as possible but ensuring that live answers from SMEs are heard

Actions

- The VP of DIB (or DIB Partner) will create all the actions from the Leadership DIB Council Monthly Meeting into individual issues and be assigned to a monthly EPIC.
- The VP of DIB (or DIB Partner) will assign the agreed upon member/s for the action to the issue
- The member/s responsible will provide updates on the progress in the issue and in the Leadership DIB Council Monthly Meeting
- Once completed the members will close the issue
- The members of the Leadership DIB Council should ensure they do not take on more actions than they are able to

Communication

All DIB council members will be added to our internal Google Group for invitations and communication.

Introduction

Mission

Promote personal and professional development. The overall goal is to position our current and prospective employees in positions such as managers, vice president, directors, etc.

- Drive inclusion and engagement
- Evaluate current retention and hiring procedures
- Provide resources and foster a community

This group is open to all members of the GitLab community.

{style="max-width: 50%"}

How to Join

- Please sign up [here](#) to be added to the Black@GitLab TMRG Google Group. This will ensure you're added to upcoming TMRG calendar events. It might take up to 24 hours before the calendar events appear on your calendar. If there is an event happening within 24 hours of you joining the Google Group, please post in the black-at-gitlab Slack channel to be added manually.
- Join the black-at-gitlab Slack channel for conversation, announcements, and connecting with other TMRG members. Please introduce yourself in the channel when you join!
- Join the reverseamacro Slack channel for communication, transparency, feedback and tracking of actions about the Reverse AMA with Black Team Members.

Member Involvement

This section is meant to outline how team members in the Black@GitLab TMRG can contribute to key initiatives each quarter. We encourage team members to contribute in any way they feel comfortable and have capacity - from meeting attendance to leading initiatives and anywhere in between!

Monthly Black@GitLab TMRG Meeting

Every month, one meeting of 45 minutes will be hosted at a time to accommodate in turn US WEST/EAST, EMEA and APAC team members. Allies are always encouraged to attend any TMRG meeting. The call structure includes:

- 25 minutes for full group discussion of agenda topics
- 20 minutes social discussion (NOT RECORDED)

This meeting can be replaced by an edition special one with different structure to cover dedicated topics.

Quartely CRO Reverse AMA

This meeting is hosted 1x per month as follows

- every 2 months (odd) on the first Thursday at 01:00pm UTC and 01:45pm UTC.
- every 2 months (even) on the second Monday at 04:30pm UTC and 05:15pm UTC.

The purpose is to provide an opportunity to increase and leverage communication between our Sales Leadership and Sales team members who identify as people of color

Understanding and acknowledging that our team members of color are experiencing a lot of emotions right now, and are processing those emotions in different ways. Our Values promote being inclusive, Building a Safe Community, and Being an Ally, and we need to lean into these focus areas, starting with our own team.

Contribute to a TMRG key initiative

We use our GitLab issue board to coordinate and prioritize projects on a quarterly basis. Contribute to the issue board by:

1. Open a new issue to propose an idea or project
1. Contribute to an open issue that is assigned to a quarterly milestone. These milestones outline the current focus projects of the TMRG

SECTION: company/culture/inclusion/tmrg-gitlab-pride/mentorship-program.md

Goals and Objectives

The Pride+ TMRG Mentorship Program (the `·Program·`) focuses on pairing interested participants with each other in pursuit of:

- Building soft skills in a corporate tech setting for both mentees and mentors,
- Connecting mentees with mentors who have technical expertise in the mentees' interests, and
- Developing professional relationships that participants can take with them throughout their careers.

Navigating professional careers (and indeed the world) as a queer person comes with its own unique challenges. The Program seeks to promote excellence within the community in a safe space where participants are free to express themselves authentically.

This Program is largely inspired by, and modelled after, the GitLab Mentorship program hosted by the Women TMRG.

Program Structure

The Program will operate on a four-quarter (12 months total) cycle. The fourth quarter of the year will be set aside for the Program to digest feedback, decide on any changes, and prepare for the next cycle.

Quarter One

During the first quarter, participants will focus on:

- Developing rapport,
- Identifying strengths and weaknesses,
- Setting goals, and
- Building a plan.

Quarter Two

During the second quarter, participants will execute their plans. Pairs will meet on a regular cadence of their choice, and progress will be measured. Mentors are encouraged to meet on at least a semi-weekly basis with their mentees. Participants are also encouraged to communicate regularly asynchronously, and not wait until scheduled synchronous sessions, in order to be as effective as possible with the time allotted.

Quarter Three

The final third quarter will be for reflection. For mentees:

- Did you achieve the goals you set for yourself?
- What difficulties, if any, did you encounter, and how did you overcome them?
- As a future mentor, what kind of advice might you give to your mentees?

For mentors:

- Was the plan you and your mentee created effective?
- Did you encounter any difficulties in developing your mentees?
- How might you approach a new mentee differently?

Quarter Four

Participants will be asked to provide feedback to the Program so that the Pride+ TMRG can look for areas of improvement. There will be channels for public and anonymous feedback. During this time, the Program managers will also solicit for participants in the next cycle.

Program Timeline

Date	Description	Related Resources
----	----	----
2024-12-20	Call for Mentors	
2024-12-20	Call for Mentees	
2025-01-17	Applications Close	
2024-01-30	Pairing of mentor relationships complete and communicated to applicants	
By 2024-02-07	Pre-Program survey sent via Culture Amp	
By 2024-02-14	Mentor/Mentee pre-program coffee chats	
By 2025-10-31	End of program feedback due	
By 2025-10-31	End of program feedback due	

Curriculum

This program is not intended to be prescriptive, and participants are free to build their own curriculum as they would like, but some suggested topics include:

- Time Management
- Skill development
- Identifying and Leveraging Opportunities
- Handling Conflict
- Being authentic

It is recommended that participants meet with their mentee or mentor at least once a fortnight.

Being a Mentor

As a mentor, you benefit from:

- Fast feedback loop between team members and leadership
- Opportunity to form relationships with team members in other departments
- Opportunity to support members of the GitLab Pride TMRG and live our values

Mentor requirements

- You have been with GitLab for at least 3 months at the time of application
- You have availability in your schedule to meet with your mentee on a bi-weekly basis for at least 30 minute meetings for the entire length of the program
- You are not on a Formal Coaching plan or PIP (Performance Improvement Plan)

Note: Anyone at GitLab can apply to be a mentor in the Pride GitLab mentorship program, though priority will be given to members of the TMRG.

Apply

Please complete the Mentor Application form.

Applying as a mentor does not guarantee you a spot in the program and eligibility will be evaluated based on criteria above.

Being a Mentee

As a mentee, you benefit from:

- Increased visibility with leadership
- Increased professional development opportunities
- Career coaching and guidance
- Opportunity to form relationships with team members on other teams

Mentee requirements

- You have been with GitLab for at least 3 months at the time of application
- You have availability in your schedule to meet with your mentor on a bi-weekly basis for at least 30 minute meetings for the entire length of the program
- You are not on a Formal Coaching plan or PIP (Performance Improvement Plan)

Note: Anyone at GitLab can apply to be a mentee in the Pride GitLab mentorship program, though priority will be given to members of the TMRG.

Apply

Please complete the Mentee Application form.

Applying as a mentee does not guarantee you a spot in the program, and eligibility will be evaluated based on criteria above.

FAQ

Can I participate as both a mentor and a mentee?

Yes, this is a possibility. It's important that team members talk with their managers to discuss their capacity to participate in both roles in this program. Participation in both roles will require a 2hr commitment per month (two 30 minute sessions as a mentor and two 30 minute sessions as a mentee).

It's possible that we will have a shortage of mentors and be unable to complete all mentor/mentee pairs. If there is a shortage of mentors and you've applied as both a mentor and a mentee, you will be assigned only as a mentor in this program.

I participated in a past mentorship program at GitLab. Can I still participate in the current iteration?

Yes! Past participants in any mentor program and as either mentees, mentors, or both, are encouraged to apply to participate again.

I'd like to participate but I can't commit the entire length of the program. Can I still apply?

If you cannot commit to the 8 month program, please consider applying for a future mentorship program at GitLab. It's important that both mentors and mentees are available for the full 8 month program to achieve the best results.

I identify as an Ally, am I still eligible to participate?

Yes, everyone is welcome to participate in the program. However, priority will be given to members of the Pride TMRG.

Results

Results will be measured through feedback gained via a pre-program survey, and post-program survey.

SECTION: company/culture/inclusion/tmrg-gitlab-women/_index.md

Mission

The mission of the GitLab Women TMRG is to cultivate an inclusive environment that supports and encourages those who identify as women to advance their skills and leadership potential through connection, mentorship, collaboration and discussion. This group shall serve as a forum for women to find their voice
