

GitLab's property, (ii) be used by Vendor exclusively to provide the Products and/or Professional Services, (iii) be destroyed or returned, at GitLab's sole option, to GitLab upon written request. Vendor hereby assigns and agrees to assign GitLab all right, title, and interest in and to the Deliverables. For the avoidance of doubt, the assignment of right, title, and interest shall not apply to Vendor Product(s) which are "off-the-shelf" and do not include any GitLab Confidential Information.

10. INSURANCE

10.1 Vendor shall be solely responsible for maintaining for itself and requiring its subcontractors and agents to maintain adequate insurance coverage that is standard and commercially reasonable for Vendor's industry. Upon request, Vendor shall supply GitLab with certificates of insurance.

11. SUBCONTRACTORS

11.1 With respect to the delivery of Professional Services, which include Vendor access and/or use of GitLab Confidential Information, Vendor shall seek GitLab's prior written approval prior to provision of Professional Services being performed by a third party. For the avoidance of doubt, Vendor shall at all times be liable for any acts or omissions taken by a third party subcontractor.

12. BUSINESS CONTINUITY PLAN & DISASTER RECOVERY

12.1 With respect to the provision of any SaaS Deliverables and/or software Products provided to GitLab, Vendor shall ensure it has industry standard business continuity and disaster recovery policies and infrastructure to ensure, (i) adequate protection of all GitLab Confidential Information, and (ii) Vendor's ability to perform its obligations under this Agreement. Upon written request, Vendor shall supply all reasonable information with regard to Vendor's business continuity plan(s) and disaster recovery process, procedures and infrastructure.

13. INDEMNIFICATION

13.1 Vendor shall defend, indemnify, and hold GitLab, their affiliates and each of their respective shareholders, members, directors, officers, managers, employees, customers, partners and representatives, and agents including, but not limited to contractors and subcontractors harmless from and against all third party claims demands, causes of action and liability for damages, losses, costs and expenses, including legal fees and disbursements and other amounts paid or payable to unaffiliated third parties, arising or resulting from: (i) the infringement or violation of any intellectual property rights by the Products and/or Deliverables, (ii) the violation of applicable law or regulation by Vendor in performance of its obligations hereunder, (iii) the violation of applicable law or regulation by Vendor, (iv) any grossly negligent act committed by Vendor, its employees, contractors or subcontractors, representatives or agents hired or engaged by Vendor in connection with the performance of Vendor's obligations under this Agreement, except to the extent such actions or liabilities are due to the willful misconduct or gross negligence of GitLab, or (v) any breach by Vendor of its obligations under the sections titled "Data Privacy" or "Confidentiality" of this Agreement. GitLab shall notify Vendor of any such claim or demand, and Vendor shall defend any suits based thereon. If an injunction is issued as a result of any such claim, Vendor agrees, at its

expense, and at GitLab's option, to: (a) procure for GitLab the right to continue using items purchased hereunder, (b) replace such Products and/or Deliverables with non-infringing items, (c) modify the Products and/or Deliverables, so they are no longer infringing, or (d) refund to GitLab the amount paid for the Products and/or Deliverables.

14. LIMITATION OF LIABILITY

14.1 IN NO EVENT WILL GITLAB BE LIABLE FOR ANY SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES OF ANY KIND IN CONNECTION WITH THIS AGREEMENT, OR EXECUTED TRANSACTION IF GITLAB HAS BEEN INFORMED IN ADVANCE OF THE POSSIBILITY OF SUCH DAMAGES. GITLAB'S LIABILITY UNDER THIS AGREEMENT AND/OR ANY TRANSACTION DOCUMENT WILL NOT EXCEED THAT ON THE APPLICABLE TRANSACTION DOCUMENT FOR THE PROVISION OF THE PRODUCTS AND/OR SERVICES STATED THEREIN.

15. INDEPENDENT CONTRACTOR

15.1 The relationship between GitLab and Vendor is one of independent contractors, and neither party will represent itself as a dealer, agent, or other representative of the other party or as having authority to assume or create obligations or otherwise act on behalf of the other party.

16. REMEDIES

16.1 The rights and remedies to GitLab herein shall be cumulative and in addition to any other rights and remedies provided by law or equity or those provided under the Uniform Commercial Code.

17. PUBLICITY

17.1 Vendor will not: (i) issue any press releases referencing GitLab; (ii) make any disclosures regarding a purchasing document, its terms, or the nature or existence of any relationship between the parties; or (iii) use GitLab trademarks, service marks, corporate or other trade names, or other proprietary marks ("GitLab Marks") without GitLab's prior written consent from the GitLab legal group. Notwithstanding the foregoing, if the purpose of the engagement under the Agreement or any transaction document includes a required use of GitLab Marks by Vendor, then GitLab grants Vendor a limited, non-exclusive, non-transferable, royalty-free license to use GitLab Marks solely related to services provided herein and in strict accordance with any logo, branding, or trademark guidelines communicated to Vendor or provided in the Brand Resources.

17.2 For the sake of clarity; use of GitLab Marks is permitted in the provision of Vendor services herein and restricted for use in the promotion of Vendor as a provider of services.

18. DATA PRIVACY

18.1 To the extent Vendor collects, records, organizes, alters, accesses, consults or transmits personal data for which GitLab is responsible and as it relates to the provision of the Products or Professional Services, Vendor shall process such personal data in accordance with the GitLab Data Processing Addendum ("DPA") and Standard Contractual Clauses found at <https://handbook.gitlab.com/handbook/legal/vendor-dpa/>. The terms of the DPA are valid upon

the Effective Date of this Agreement, and as may be updated by GitLab from time to time, provided any such updates are required by applicable law. In order to comply with applicable law and as provided for in Section 6.2 of the DPA, Vendor shall provide to GitLab its current Sub-processor List(s), prior to completing and/or providing any Services.

19. SEVERABILITY

19.1 If any provision contained in this Agreement is held to be invalid or unenforceable under the laws of any jurisdiction where enforcement is sought, such invalidity or unenforceability will not affect any other provisions of this Agreement, and this Agreement will be construed as if such invalid or unenforceable provision had not been contained herein in that jurisdiction.

20. GOVERNING LAW

20.1 This Agreement shall be construed and enforced in accordance with the laws of California, U.S.A., and the parties submit to the jurisdiction of the State and Federal courts in San Francisco, California, without giving effect to any conflicts of laws principles.

21. ENTIRE AGREEMENT

21.1 This Agreement contains the entire understanding of the parties hereto in respect of transactions contemplated hereby and supersedes any prior agreements and understandings between the parties with respect to such subject matter. The parties agree that all such prior agreements and understandings shall have no further force and effect.

Why I'm at GitLab

We have the opportunity to build a generational company that will reshape how software is developed and deployed. Our platform's impact is powerful and far-reaching, enabling transformation for multinational corporations, highly regulated public sector organizations, and SMBs alike. We are helping our customers accelerate technological progress and this energizes me. If this isn't motivational and fun, I am not sure what is!

Building a generational company is aspirational, but would only be enjoyable with the right culture and team. When I look at a company, the culture is always my first checkbox. If it is a company with a great business model but without the right culture, it's not for me.

Specifically to the CFO organization, I am proud of the team we have built here at GitLab. Since our IPO, we've made significant strides in elevating the team. My passion lies in leading high performing teams, improving team member engagement, and ensuring that every individual

experiences growth here at GitLab. We're not just building software; we're building futures.

My Personal Values

1. Deliver Results - In a high-growth environment, driving meaningful results is both a necessity and a motivator. I focus on setting clear goals, aligning priorities, and empowering the team to execute. I value impact over effort and encourage innovative thinking to achieve outcomes that move the needle. While I celebrate results, I also believe in learning from missteps to refine our approach and grow stronger as a team.

1. Act With Integrity - Integrity is at the core of everything I do. For me, this means being honest, transparent, and consistent in my actions and decisions, especially when the stakes are high. I hold myself accountable to the same standards I expect from my team and peers, and I prioritize doing what's right over what's easy. Integrity builds trust, and trust is the foundation of every successful culture.

1. Collaborate - None of us can do it alone. The best solutions emerge when we all come together. To me, collaboration means more than working alongside one another. It's about trusting and respecting differing viewpoints and engaging in constructive debates for better results. I facilitate cross-functional interlock and value input from all levels and functions. Shared ownership and alignment are essential in our fast-paced environment.

My Super Powers - how you can get the best from me

1. Execution - I have a bias toward action and delivering results. My strength lies in breaking down complex challenges into actionable steps, helping teams prioritize, while driving initiatives to completion. I also believe in holding myself and my team accountable for our execution, which fosters a culture of reliability and high performance.

1. Team Orientation - I take pride in building and supporting strong, cohesive teams. I focus on creating an inclusive atmosphere where team members feel valued, motivated, and empowered to contribute their best. My leadership style prioritizes active listening, mentorship, and celebrating shared successes, which create a sense of purpose and belonging.

1. Strategic Leadership - I see the bigger picture and have a knack for charting a course that aligns with long-term objectives. Strategic thinking requires understanding current challenges and also anticipating future opportunities and risks. My goal is to inspire confidence across the company by providing a clear, thoughtful roadmap for where we're headed and how we'll get there.

My Weaknesses

1. Brevity - Most of my days I am in back to back meetings for several hours straight. Due to schedule constraints, I am typically laser focused on work and don't spend enough time on small talk. At President's Club, Summit, offsites or other work events that are not jammed with meetings, team members usually make the comment I am very funny and personable.

- How to help me manage this: Ask questions and engage in conversations non work related. How was your weekend? Tell me something fun you are doing in the coming weeks?

1. Directness - I am very straight forward and to the point. Due to how busy we are, I usually jump straight into what needs to be discussed and will start to solve the problem.

- How to help me manage this: Similar to above. If you aren't ready to dive into the details, divert the convo. Ask a question.

1. Passion - I love to work and am reachable 99% of the time, regardless of time zone, day of week or if it is a holiday. I have been this way my entire career and it has been received well

but sometimes it is difficult to have the required balance needed.

- How to help me manage this: Call me out on it. Tell me to turn off or enjoy the day I have off.

My Expectations of Everyone

1. Transparency: I value open, honest, and timely communication. Transparency builds trust and ensures we can address challenges early. I appreciate directness - whether it's sharing progress, surfacing roadblocks, or giving feedback. Providing and receiving feedback is crucial for all of our growth, and I welcome constructive input at all times.

1. Ownership: I expect the team to take full ownership of their areas of responsibility and deliver results with accountability. This includes being proactive in identifying opportunities, solving problems, and asking for help when needed. Taking ownership means committing to follow-through while continuously learning and adapting along the way.

1. Focus on Impact: I prioritize meaningful outcomes over effort alone and encourage the team to focus on what drives the greatest value. This requires prioritization, thoughtful planning, and a willingness to recalibrate as needed. I value a results-oriented mindset, where we balance ambition with pragmatism and consistently strive to maximize impact with the resources we have.

My Role

1. I am the CFO of GitLab.

1. Our finance mission statement is We deliver timely and accurate financial information to enable optimal decision making to increase shareholder value.

1. My role: develop and layout the framework (financial and non financial metrics) to be a successful public company, communicating a simplified value proposition/message to the investor community, supporting the company to be successful, all aspects of being a public company (closing the books, SOX, compliance, audits, etc.) and a sounding board for problems you need help solving.

Communication Preferences

1. I am reachable and responsive on all modes of communication. I stay connected to Slack, email and text everyday. Real-time and/or urgent communication is best via phone or text. My SLA is to respond or acknowledge your communication within the business day.

1. Meetings should be run according to GitLab norms with a pre-populated agenda and any pre-reads shared a day in advance.

- My full scheduling preferences are here..

1. I do a good job of reviewing asynchronous documents and sharing my questions / feedback via Google comments. If there is time sensitivity Darci Tadich can help to schedule review time on my calendar.

Expectations for leadership - What I need from you. What you will get from me

1. I constantly try to balance internal needs with external metrics and investor expectations. You may not always get the answer you want. This is done with the best intentions on what's best for GitLab.

1. Communicate often.

1. I am here to help solve problems, let me know early so I can help and offer several

solutions.

1. We all have a number of competing priorities and busy calendars, please try to be responsive.

1. Give feedback, I want to know how I can better support your team and be better for GitLab.

1. If I say I will do something, you can consider it done.

1. Please ask questions. To be successful, I believe we need to constantly look at how we can reinvent our teams.

1. Think about building teams and leaders for a company that will deliver \$2B in annual revenue.

FAQs

1. What should all team members know about how our priorities tie to our financials?

- Each of our Yearlies are directly linked to financial priorities around growth:

- Win with Security & Compliance: drives Ultimate ARR growth which is consistently over 50% of bookings and the leading source of overall ARR growth today.

- Win with differentiated AI: new products, particularly Duo, drives our next phase of revenue growth. At our \$800M scale it will take time before new products meaningfully add to growth, but it is important to invest in subsequent S curves for long-term ARR growth.

- Win with customer-centricity: drives expansion and churn/contraction prevention, a cornerstone in a subscription business. When growth outpaces losses from existing customers, we create a powerful engine for sustainable, efficient growth.

1. What are some things you prioritize in your personal life? What do you do outside of work?

- Being outside and staying active is what I enjoy. I played tennis competitively in college and have run many marathons. Today I enjoy hot yoga, playing pickleball, and cycling.

- Community service and give back. I try to volunteer or help the community on a periodic basis. This consists of mission trips, building ramps for purple heart recipients, helping victims from Helene (recent) or mentoring.

- Spending quality time with family and friends.

- Life is short, live it! I had a near death experience so never wait to do something I want.

SECTION: finance/readmes/james-gladen.md

Why I'm at GitLab

Every company is now a software company. GitLab is in a unique space to accelerate software development at each and every one of these companies.

My Personal Values

1. Transparency - The GitLab Audit Committee, the E-Group, my peers and team all deserve transparency from me, including both my initial impressions as well as digested analyses of tax issues facing GitLab.

1. Bring value to GitLab - I strive to bring to any organization a tax structure which provides the optimal balance between a low tax rate and low tax risk. For a structure to provide value, it also needs to minimize transactional friction, whether the transactions relate to revenues or costs.

1. Champion the accomplishments of my team - I pride myself on the fact that many of my direct reports have ended up as heads of tax of S&P 500 companies. One of the reasons I believe this trend exists is that I ensure that team accomplishments do not go unnoticed and are socialized within GitLab.

My Super Powers - how you can get the best from me

1. Plain English - Tax is a difficult subject. Perhaps it is because I've represented several companies to Audit Committees or have spoken at conferences, but the feedback I've received has always been more positive when I'm able to break down a technical topic into a story.

1. Project management - That said, I back up my plain English with results. GitLab has completed several transformative structural improvements which has resulted in a more reliable effective tax rate within its existing footprint.

My Weaknesses

1. Shutting off work - While I will always respect my team members' personal time, I need about 3 full calendar days to completely put work down.

1. Brevity - I continue to work on feedback relating to brevity. The key is to be prepared to answer the follow up question, but not to volunteer it if it is not asked.

My Expectations of Everyone

1. Tax has a seat at the table at any discussion: The tax function has been the most efficient at my employers when there is an environment of collaboration. My expectation of any team member at GitLab is to ensure that the Tax Department has seen the issue. The tax function has been the least efficient at my prior employers when there is an environment of "let the Tax Department find out on its own."

1. My commitment to GitLab is not to say no, but to provide the options where the most tax-effective decision can be made.

My Role

1. Our finance mission statement is "We deliver timely and accurate financial information to enable optimal decision making to increase shareholder value."

1. For our tax department: In a cost-effective manner, to execute on the optimal balance between a low tax rate and low tax risk. To provide thought leadership regarding the company's tax obligations by providing timely and accurate responses to the team's stakeholders.

1. To connect the dots for GitLab in Plain English (see My Super Powers).

Communication Preferences

1. I am reachable on all modes of communication. I stay connected to Slack, email and text everyday. Real-time and/or urgent communication is best done via Slack.

1. Meetings should be run according to GitLab norms with a pre-populated agenda and any pre-reads shared a day in advance. Should you have questions regarding my availability, please contact my EBA Sarah Hobbs.

1. Meetings are best scheduled between 8 a.m. - 6 p.m. PST.

Expectations for leadership - What I need from you. What you will get from me

1. I appreciate your coming to the Tax Department with your corporate tax, sales tax, and foreign withholding tax questions. You will receive a thoughtful answer from either me or the Tax Department. Should the issue have more than one possible response, you will receive a response with possible options, recommendations (and maybe even an ROI-related question).

FAQs

1. Foreign withholding taxes

- What is the withholding rate from a given country - see PwC Tax Summaries
- Can my customer have an exemption from the gross-up requirement to withhold taxes? Please note that GitLab's pricing currently contemplates the customer's absorption of the withholding taxes, so a reasonable response to the question would be to raise the price of the GitLab subscription if GitLab is asked to absorb the withholding tax.

1. When can we open an entity in Country X for employment purposes?

- Please note that there are many factors which enter into a decision to open an entity, including the number of team members in-country and the regulatory environment there.

SECTION: finance/readmes/james-shen.md

Why I'm at GitLab

I'm energized by the opportunity to be part of building something transformative. Our work has a meaningful impact for our customers, helping them accelerate their own innovation. We're not just building software - we're enabling organizations to transform how they work. For me, a strong business model alone isn't enough - the people and environment I work with daily matter immensely. Great results come from great teams. I'm particularly proud of the teams we've built at GitLab. Our success isn't just measured in business metrics, but in how we grow together, challenge each other, and create an environment where everyone can do their best work.

My Personal Values

1. Results - I am committed to driving business results and measuring success. This means setting clear & ambitious goals and developing systematic approaches to achieve them. I measure success not by the effort but by the impact we create.

1. Resilience - I believe that our greatest growth comes from how we handle adversity and navigate challenging situations. This means maintaining composure under pressure while being willing to engage in productive conflict when needed. I view constructive disagreement as a powerful tool for achieving better outcomes.

1. Collaboration - I believe that the best solutions come when we leverage diverse perspectives and work together. This means actively seeking input from others and engaging in constructive dialogue. I value creating an environment where people feel comfortable sharing their ideas and challenging assumptions with mutual respect & trust.

My Super Powers - how you can get the best from me

1. Execution - I excel at turning plans into reality and delivering results. I break down complex initiatives into actionable steps, establish clear metrics for success, and drive

accountability in follow-through. Execution isn't about just getting things done · it's about getting the right things done in the right way, with a focus on delivering business impact.

1. Examination - As an INTJ, I naturally gravitate toward dissecting complex problems and uncovering root causes. This manifests in developing frameworks for analysis and testing assumptions from multiple angles. My approach focuses on finding data-driven insights rather than relying on intuition alone.

1. Decision Making - This combines both my execution and examination strengths. The focus is on balancing thorough analysis with pragmatic action, particularly in ambiguous situations. This means weighing multiple factors, considering downstream effects/risks, and knowing when to gather more data versus when to move forward with the information at hand.

My Weaknesses

1. Curiosity - I ask a lot of questions and like to drill into details. For efficiency I can go straight to the source. This is not a reflection of anything other than a desire to get the best information in the fastest way possible.

- How to help me manage this: Understand that detailed questions come from a place of interest and learning. Feel free to redirect me through proper channels and ask clarifying questions if my direct inquiries create confusion.

1. Drive - My execution-focused nature means I often push myself and others at a relentless pace. While this drive helps deliver results, it can be intense and sometimes makes it challenging for others to keep up.

- How to help me manage this: Open dialogue benefits everyone - having candid conversations about workload and pacing helps us find the right rhythm together. The more we communicate, the better we can balance results with sustainability.

1. Directness - I can be direct and to the point in communication. This is for efficiency, but I recognize it can sometimes come across as abrupt or lacking emotion, especially in written communication.

- How to help me manage this: Let me know if you need more context or if my directness feels too sharp. I appreciate when people ask for clarification or request that I provide more background.

My Expectations of Everyone

1. Ownership - Take responsibility for your work from start to finish. This means doing initial scoping before seeking input, coming prepared with first-pass proposals rather than open-ended questions, and showing that you've tried to solve problems before escalating them.

1. Effort vs Impact - Demonstrate good judgment in balancing perfectionism with pragmatism. Know when to dive deep and when good enough is good enough. Focus energy on work that moves the needle rather than polishing things that don't create meaningful value.

1. Self-Awareness - Know your strengths and weaknesses, understand your working style, and actively work on personal development. Understand how your style impacts others and team dynamics / collaboration.

My Role

1. I am the VP of FP&A. FP&A acts as the stewards of the GitLab business model by driving interlocked financial and operating planning, identifying and unlocking sources of enterprise value, and delivering insights that inform business decisions.

Communication Preferences

1. I am reachable and responsive on all modes of communication. My SLA is to respond or acknowledge Slack communications within a business day. Real-time and/or urgent communication is best via phone or text.
1. I appreciate quick acknowledgments on written communications - a simple emoji or "got it" helps me know things are received & moving forward.
1. I value frameworks and context in discussions - always share the reasoning behind your positions and decisions.
1. I do a good job of reviewing asynchronous documents and sharing my questions / feedback via Google comments. If there is time sensitivity Anita Mall can help to schedule review time on my calendar.

SECTION: finance/readmes/julie-malloy.md

Why I'm at GitLab

For me, being at GitLab represents the perfect blend of doing a job I truly enjoy at a fast-paced, growing company with tremendous market potential. What makes it especially rewarding is the opportunity to tackle complex challenges alongside exceptionally talented people who embody GitLab's core values. I feel incredibly fortunate to collaborate daily with such high-caliber colleagues in an environment and culture where everyone can contribute.

My Personal Values

1. Achievement - A sense of accomplishment is at the core of what motivates me. But it's more than just checking boxes off my own to-do list. I want to build an environment where everyone's shooting for the stars and we celebrate our team's victories. I thrive alongside colleagues who share this enthusiasm for excellence and pushing boundaries.
1. Collaboration - I've learned that the best outcomes often emerge when we work together, combining different perspectives and expertise. Collaboration isn't just about working side by side; it's about actively engaging with team members, ensuring buy-in from all stakeholders, and creating an environment where diverse ideas are welcomed and respected.
1. Integrity - Integrity is all about being honest, ethical, and doing the right thing. When integrity is a key value, it guides how everyone in the team behaves and makes decisions. It's about being consistent in what you say and do, building trust, and leading by example. Integrity is essential in all my work relationships and how I expect my team to operate.

My Super Powers - how you can get the best from me

1. Bias for Action - I want to get things done. I'm not content with just discussing or planning - I drive toward concrete results. When faced with obstacles, I focus on finding solutions rather than dwelling on problems.
1. Positive Approach - I see opportunities where others might see roadblocks. This doesn't mean I ignore problems, but rather I choose to focus on solutions and potential positive outcomes. I believe that maintaining a constructive attitude creates an environment where innovation and progress can be the norm.
1. Curiosity - I ask a lot of questions because that is simply how I learn. It's my process to

help me understand root causes, explore multiple perspectives and ultimately explore different aspects to find the best solution. I genuinely enjoy uncovering how things connect and work together. This drive to truly understand things, rather than just scratching the surface, often leads to insights that we might otherwise miss.

My Weaknesses

1. Impatience - I have a strong bias for action and results, which can manifest as impatience when project deadlines are at risk, deliverables lack a clear timeline or progress appears to be slowing or stalling.

- How to help me manage this: Flag potential delays early so we can problem-solve proactively. If you need more time, provide context and a revised timeline

1. Reaction to Roadblocks - While my optimistic mindset drives results, I sometimes need to better manage my response to perceived roadblocks. I tend to quickly 'shut down' when I hear no or it can't be done. Everything can be accomplished to some degree, just not maybe how it was originally envisioned or within the desired timeframes.

- How to help me manage this: Come to me with solutions that may not be a perfect fit or bring others in to help work through alternatives.

1. Curiosity - Because I ask a lot of questions, it can be misinterpreted as distrust or me doubting your understanding of your subject. That is not my intent

- How to help me manage this: direct me to source information upfront to help me get up to speed or set up time 1:1 so we can delve deeper without an audience.

My Expectations of Everyone

1. Accountability: Taking ownership of your work is fundamental to our success. This means: delivering high-quality work that meets or exceeds standards, following through on commitments and deadlines, acknowledging mistakes and course correcting, being transparent about progress and potential roadblocks.

1. Proactiveness: Success requires thinking beyond the immediate task. This can manifest in many ways: anticipate potential challenges and prepare contingency plans, identify opportunities for process improvement and efficiency gains, question existing practices or why we need them and stay current with industry trends in your area.

1. Business Partnership: our team is here to make GitLab successful. We facilitate Sales orders, negotiate Vendor contracts and administer equity, pay sales people, etc. - there isn't a function in the company that we do not interact with on a regular basis. I expect our team to be thought of as trusted business partners. That means collaborating, getting answers even if it's not in our immediate scope, acting with a high level of responsiveness, listening to stakeholders needs and being an expert in your function.

My Role

1. I am the Vice President of Accounting Operations at GitLab.

1. Our finance mission statement is We deliver timely and accurate financial information to enable optimal decision making to increase shareholder value.

1. My role is to build an exceptional finance operations team that supports GitLab's business and growth through streamlined processes, automation and high quality output while creating an environment where everyone feels supported.

Communication Preferences

1. I prefer Slack to email, but I check all forms of communication often, even when OOO.
1. If you need something urgently, text or phone is the best method to reach me.
1. Please contact Sarah Hobbs, my EBA, if you need help getting time on my calendar.
1. Meetings should have a prepopulated agenda.
1. My SLA is within a day. If there is something that you will urgently need when I am OOO, please plan ahead of time so we can coordinate

Expectations for leadership - What I need from you. What you will get from me

1. Be open to change and new ideas. I will throw a lot of ideas your way - some will land and some won't, but that's not the point. Companies don't grow if they stay stagnant - they have to evolve to what is going on around them.
1. Don't live in your lane. Try to understand your stakeholders needs, what your peers perspective is - it will make you a better business partner.
1. I am always transparent and do my best to communicate. Please do the same.
1. If you need help, ask for it. I want all of you to be successful.
1. I will support you to the best of my ability. I ask that you support each other as a team.

FAQs

1. What do you do outside of work?
 - Family and friends are top of my list. Being active is super important to me which means everyday involves something: running, bootcamp, hiking or a long walk. I volunteer at a community farm which is a great way to spend a few hours away from spreadsheets. Traveling, a fun concert and trying something creative are things that get me out of my work zone!

SECTION: finance/readmes/kelsey-turcotte.md

Why I'm at GitLab

It is not often that one has the opportunity to be part of a company that is at the heart of our global economy and shaping what the future of software looks like. Software is at the core of so much of our day to day experience. GitLab plays a strategic role in this eco-system by helping customers deliver better, more secure software faster. It is amazing to speak with our customers who are incredibly loyal to GitLab and passionate about the role that we play in building their businesses.

Few technology start-ups grow from an innovative idea to a publicly traded company. Even fewer can deliver our level of growth and increase profitability at this scale. This is a testament to the value we create and our leadership position in the market.

Fundamental to long-term shareholder value creation is company culture. In my experience teams that respect each other and communicate openly also collaborate well and innovate. I believe that is what we have at GitLab and it is unique.

My Personal Values

1. Trust - Trust is foundational for any healthy relationship or team. It is built over time by delivering on our commitments. I tend to engage with people assuming good intent and that trust is inherent. It is critical to me that I surround myself with people I can trust, both

personally and professionally.

1. Integrity - I want to wake up every morning being able to say that I am making good decisions for the right reasons. That doesn't necessarily mean that the decisions are right or wrong, but that they align with my values.

1. Ownership - When I was young I told my Dad the plate broke. He put the pieces of the plate on the counter and asked me to watch the pieces until they broke again. The plate didn't break, I broke the plate. Everyone wants to take ownership when things are going well, but we learn the most when we own things that aren't.

My Super Powers - how you can get the best from me

1. Relationship Building - I am passionate about building long term relationships and maintaining them. In my professional life I have created a valuable external network of people I also consider to be friends. This is where I find my energy.

1. Collaboration - I love working with teams across functions. There is so much to learn and the collective thinking of a group is so much more powerful than the individual. Collaboration also requires a mutual commitment to not only being your best, but to helping others be their best.

My Weaknesses

1. Impulsivity - Ideas and brainstorming make me very excited. When that happens I can generate a lot of ideas and ask a lot of questions very quickly. This can lead me to either cutting someone off (I sometimes refer to this as 'stomping' on someone) or derailing the conversation.

- How to help me manage this: Let me know I am doing it. I am working on my self-awareness and really appreciate feedback. I want to be a collaborative team member.

1. Zoom - I find Zoom to be exhausting. I spend all day on Zoom, frequently engaged with the financial community where I need to bring my best even if I am not feeling it. I also do my most productive thinking away from the computer which requires some space in my schedule.

- How to help me manage this: When you request a meeting please let Anita Mall know its level of urgency so she can schedule accordingly while at the same time keeping my Zoom time balanced.

My Expectations of Everyone

1. Put GitLab First - When I started my career an executive taught me to tackle problems with the question 'What is best for the company'. Over the years I have found that this question creates better alignment around objectives and reminds team members to put their self-interest to the side.

1. Deliver Quality - I expect attention to details. Things like spelling mistakes, typos, and miscalculations are a distraction. More than that, I believe quality is asking the question 'Why?'. Why? is where the impactful discussions can be had and decisions made.

My Role

1. I am the Vice President, Investor Relations of GitLab.

1. Our Investor Relations mission statement is Attract and retain the highest quality, lowest turnover shareholder base.

1. My role: Collaborate with the team to crisply articulate our business strategy, differentiation, and related financial performance. Consistently use this narrative in all Wall

Street facing communications including earnings, external facing assets, and conversations. Create demand for our stock by retaining shareholders and targeting highly correlated prospective shareholders through strategic financial analyst and investor engagement.

Communication Preferences

1. I keep my personal and professional phones separate. This has allowed me to be more present in my personal relationships and make space. If you have slacked me or emailed me and need a response and haven't heard back, please text me. My texts go to my personal phone and I will respond quickly.

1. I like collaborating with Google docs. That being said, if an earnings announcement is impending the number of comments and alerts get overwhelming. Please don't be shy about pointing out something if I have missed it.

1. Please acknowledge me if I have reached out. That way I know that things are in progress.

Expectations for leadership What I need from you What you will get from me

1. Communication. Working in a virtual environment eliminates the casual conversations in the hall. To balance this, please communicate frequently and intentionally.

1. Responsiveness. This will help us all keep on track.

1. Ask questions and poke at assumptions to drive to the best outcomes.

1. Be passionate about what you are doing and why.

1. Share what you know.

1. Help me understand how I can help and break down roadblocks.

SECTION: finance/readmes/nabitha-rao.md

Why I'm at GitLab

1. Our Product GitLab is a leading all-in-one DevSecOps platform, empowering organizations to thrive in a \$40B market by providing end-to-end solutions and driving innovation in a world where software is foundational to every business.

1. Our Company I thrive in high-growth environments, where I can help transform a fast-moving, dynamic organization into a well-structured, enterprise-scale powerhouse. Driving order, building scalability, and enabling sustainable success is where I excel. Additionally, our global all-remote culture embodies the future of work. GitLab is a true case study that proves remote work isn't just possible-it's a competitive advantage. I'm inspired to be part of a journey where every contribution builds to something bigger, better, and impactful.

My Personal Values

1. Results - Focusing on results means prioritizing achievement with meaningful outcomes.

1. Accountability - Your word is your bond and honor it consistently.

1. Progress - Strive to be better than the day before. Applies to me personally, to my team, processes, platforms while continuously learning, improving and growing.

My Super Powers - how you can get the best from me

1. Execution - I like to see things come to fruition. Let's get the job done.

1. Adaptable - To sustain growth and drive efficiency, we must continuously evolve our systems and operations to scale. I believe change is the one constant and I help bring order to chaos.

1. Builder - Building high-performing teams and creating an environment where personal strengths and diversity of thought contribute to team excellence. Additionally, build solutions by creating a comprehensive strategy that aligns technology with business objectives.

My Weaknesses

1. Privacy - We are more than our job. I am also very conscious that everyone is likely fighting a battle we know nothing about. I typically won't engage or will keep it light on personal conversations unless asked or told.

- How to help me manage this: If you need help, please ask for it. I will always support you to the best of my ability.

1. Brevity - I am visual and prefer short, bulleted, thoughtful and concise messages. I also think it demonstrates consideration for everyone's time and attention for both the Writer and Reader.

- How to help me manage this: Feel free to ask me to elaborate or deliver the message in a format that works for you.

1. Focused - I am in a role where I have to navigate a web of complexities around people, processes and platforms to solve problems, remove blockers and take decisive action. It leaves little room for ambiguity. The shortest path is to ask pointed questions eliminating unnecessary fluff, being clear about the situation and expectations; this encourages everyone to take responsibility about what needs to be done.

- How to help me manage this: Feel free to suggest better approaches to drive clarity. I'm always on the look out for new techniques.

My Expectations of Everyone

1. Honesty - I always appreciate direct communication and find it the best way to learn and address any situation.

1. Individual Initiative - I trust team members are highly skilled in their respective roles (calibrated by career stage); are self starters and have expertise in what they do.

1. Team Work & Collaboration - I believe we are only as strong as the weakest link. If everyone brings their best, delivers high-quality work, and is transparent of the constraints, this collectively drives individual, team and organizational success.

1. Context & Understanding - I recognize that workplace interactions are complex, and complete situational awareness is not always possible. When a request is declined/delayed, it should be understood as a strategic prioritization - what's best for GitLab, not a personal rejection.

My Role

1. Drive and align business objectives and delivery value through technology. Advancing our technology ecosystem is a continuous evolution of strategic refinement, aligning our digital capabilities where technology and organizational culture grow together.

1. My team's vision is to: Be a trusted business partner providing world-class solutions and value. By providing a stable, secure, compliant, simple and highly integrated solutions ecosystem to empower business with technology and services that enables productivity to fuel GitLab growth.

Communication Preferences

1. I am responsive on all mediums: Slack, Google Workspace, Meetings, Email and Phone (Emergencies). I will always do my best to acknowledge all inquiries or delegate to someone on my team to provide responses within 24 hours.

1. If you have any questions, please reach out to me or schedule a coffee chat. Please contact Anita Mall (EBA) for assistance with scheduling.

SECTION: finance/readmes/simon-mundy.md

Why I'm at GitLab

I am at GitLab as I believe in the huge market opportunity and best in class fundamentals that the Company offers. I have always focused on roles at platform based Company-s, and thus GitLab-s mission to replace multiple point solutions resonates with me.

My Personal Values

1. Integrity and Transparency - These are non-negotiable foundations in everything we do, from financial reporting to day-to-day interactions

1. Responsiveness - Quick and effective communication is crucial for our success

1. Bias for Action - I believe in moving quickly and decisively while maintaining accuracy and compliance

My Super Powers - how you can get the best from me

1. Prioritization - Ability to effectively balance competing demands and identify what matters most

1. Stakeholder Management - Strong focus on understanding and addressing the needs of all stakeholders

1. Building High-Performing Teams - Track record of assembling and developing teams that consistently deliver excellence

My Weaknesses

1. Impatience - When issues or projects come up I have a bias for action and want clarity and a path forward as quickly as possible.

- How to help me manage this: give me a clear timeline of a pathway to resolution. If the resolution date is unknown, clarify what dependencies there are and when those dependencies are expected to be known. Provide regular updates proactively. This will give me confidence the issue is being addressed and you are on top of it.

1. Switching off - I have difficulty switching off and often times will think about work matters on days off. This may result in questions in Slack on non-work days while it is top of mind for me.

- How to help me manage this: do not feel obligated to respond immediately if I message after hours. If something is urgent I will make it known.

1. Perceived availability - I am in back to back meetings most days and as a result do not get to spend as much time as I would like with individual team members.

- How to help me manage this: just because there is no meeting on the calendar, does not mean I am unavailable or uninterested. Please feel free to reach out over Slack if you would like to chat through anything at any time. I am busy, but supporting my team is of the utmost importance to me. We only drive results and efficiencies by working together, so help me, help you.

My Expectations of Everyone

1. Maintain a Strong Sense of Urgency: Our work is time-sensitive and impacts the entire organization

1. Take Full Accountability: Own your responsibilities completely

1. Practice Proactive Ownership: Identify and address issues before they become problems

1. Communicate Transparently and Timely: If challenges arise, raise them immediately

1. Follow-Through is Critical: If you commit to something, I will assume it's done unless told otherwise in a timely manner

1. Quality is Non-Negotiable: We must maintain the highest standards in our financial reporting and controls

My Role

1. VP Corporate Controller leading:

- SEC Reporting
- Technical Accounting
- General Ledger (GL) Accounting
- Treasury
- International Accounting
- Revenue Accounting
- SOX PMO Teams

1. Our team serves as the financial backbone of the company with two primary mandates:

- Produce materially accurate financial statements that meet all regulatory compliance requirements
- Ensure a robust internal control environment while maximizing operational efficiencies

Communication Preferences

1. Primary Channel: Slack is my preferred method of communication

1. Meetings:

- Please contact Sarah Hobbs, my EBA, if you need help getting time on my calendar
- Meetings should have a prepopulated agenda

1. Email: Not a fan of long email chains - let's move lengthy discussions to Slack or a meeting

1. Response Time:

- I aim to be highly responsive during business hours
- For urgent matters requiring immediate attention, use text if Slack isn't getting a response
- If something can wait, please use Slack and I'll respond as soon as possible

Expectations for leadership - What I need from you. What you will get from me

1. What I Need From You

- Clear communication about deadlines and dependencies

- Proactive flagging of potential issues or roadblocks
- Ownership of your area of responsibility
- Commitment to maintaining high standards in financial reporting and controls

1. What You Will Get From Me

- Clear direction and priorities
- Quick decision-making when needed
- Support in removing obstacles
- Focus on your professional development
- Protection for the team when needed
- Transparent communication about organizational changes and impacts

FAQs

1. How do you define "urgent?"

- Impacts financial reporting accuracy
- Affects regulatory compliance
- Has significant business impact
- Requires immediate attention to meet a deadline

1. What's your approach to review cycles?

- I expect materials to be thoroughly reviewed at team level before coming to me. Please highlight key changes, areas of concern, and specific questions requiring my input.

SECTION: finance/tax/_index.md

Contacting the Tax Team

The Tax Team is responsible for GitLab's tax compliance (see here for payroll taxes), tax planning and accounting for business taxes, including income taxes and indirect taxes such as sales taxes and value-added taxes (VAT). Taxation differs between countries, and taxation in one country is not always complementary to taxation in another country, resulting in possible double-taxation on the same GitLab revenue. It is the fundamental goal of the Tax Team to minimize double taxation, to optimize our global effective tax rate, and to timely apply resources to various company needs. Those needs range from routine compliance and tax audits to strategically positioning the company for its next phase of growth.

Organization

The Tax team is part of the Finance function and headed by the VP Tax. The VP Tax reports to the Chief Financial Officer. The Tax team is structured to address (a) U.S. domestic taxes and global accounting for business taxes and (b) international tax planning and compliance, including US international tax planning.

This page has been moved to the internal handbook website due to safety/privacy:
<https://internal.gitlab.com/handbook/finance/tax/>

Frequently Asked Questions - Tax ID for non-US customers

What is a Tax ID?

An Indirect Tax Identification Number (·Indirect Tax ID· or ·Tax ID·) is a unique identification number assigned by tax authorities to businesses registered for Value Added Tax (VAT), Goods and Services Tax (GST), or similar indirect taxes. This number identifies your business as a registered taxpayer eligible to charge and collect indirect taxes.

Why does GitLab need my Indirect Tax ID?

GitLab is required to comply with local tax regulations in various jurisdictions. When you provide a valid Indirect Tax ID:

- GitLab may not need to charge VAT/GST on your invoices (reverse charge mechanism)
- It helps ensure proper tax compliance for both parties
- It may reduce your overall tax burden on GitLab services

Without a valid Indirect Tax ID, GitLab may be required to charge applicable VAT/GST rates based on your location.

What if my business is not registered for VAT/GST?

If your business is not registered for indirect taxes (due to size thresholds or other reasons), you may not have an Indirect Tax ID. In such cases, GitLab will charge the applicable VAT/GST rate according to local regulations.

Samples of Indirect Tax ID Formats by Country

Important Disclaimer: The formats listed below are samples of commonly used indirect tax ID formats and are provided solely as a reference to assist customers. GitLab does not guarantee the accuracy or completeness of this information and assumes no responsibility to update or revise this information.

Europe:

- Austria - VAT numbers start with "ATU" followed by 8 digits (e.g., ATU12345678)
- Belgium - VAT numbers start with "BE" followed by 10 digits (e.g., BE0123456789)
- Bulgaria - VAT numbers start with "BG" followed by 9 or 10 digits (e.g., BG123456789)
- Croatia - VAT numbers start with "HR" followed by 11 digits (e.g., HR12345678901)
- Cyprus - VAT numbers start with "CY" followed by 9 characters (e.g., CY12345678L)
- Czech Republic - VAT numbers start with "CZ" followed by 8, 9, or 10 digits (e.g., CZ12345678)
- Denmark - VAT numbers start with "DK" followed by 8 digits (e.g., DK12345678)
- Estonia - VAT numbers start with "EE" followed by 9 digits (e.g., EE123456789)
- Finland - VAT numbers start with "FI" followed by 8 digits (e.g., FI12345678)
- France - VAT numbers start with "FR" followed by 11 characters (e.g., FR12345678901)
- Germany - VAT numbers start with "DE" followed by 9 digits (e.g., DE123456789)
- Greece - VAT numbers start with "EL" followed by 9 digits (e.g., EL123456789)
- Hungary - VAT numbers start with "HU" followed by 8 digits (e.g., HU12345678)
- Iceland - VAT numbers start with "IS" followed by 5 or 6 digits (e.g., IS12345)
- Ireland - VAT numbers start with "IE" followed by 8 or 9 characters (e.g., IE1234567L)
- Italy - VAT numbers start with "IT" followed by 11 digits (e.g., IT12345678901)
- Latvia - VAT numbers start with "LV" followed by 11 digits (e.g., LV12345678901)

- Lithuania - VAT numbers start with "LT" followed by 9 or 12 digits (e.g., LT123456789)
- Luxembourg - VAT numbers start with "LU" followed by 8 digits (e.g., LU12345678)
- Malta - VAT numbers start with "MT" followed by 8 digits (e.g., MT12345678)
- Netherlands - VAT numbers start with "NL" followed by 9 digits and "B" and 2 digits (e.g., NL123456789B01)
- Norway - VAT numbers consist of 9 digits followed by "MVA" (e.g., 123456789MVA)
- Poland - VAT numbers start with "PL" followed by 10 digits (e.g., PL1234567890)
- Portugal - VAT numbers start with "PT" followed by 9 digits (e.g., PT123456789)
- Romania - VAT numbers start with "RO" followed by 2-10 digits (e.g., RO12345678)
- Serbia - VAT numbers consist of 9 digits (e.g., 123456789)
- Slovakia - VAT numbers start with "SK" followed by 10 digits (e.g., SK1234567890)
- Slovenia - VAT numbers start with "SI" followed by 8 digits (e.g., SI12345678)
- Spain - VAT numbers start with "ES" followed by 9 characters (e.g., ES123456789)
- Sweden - VAT numbers start with "SE" followed by 12 digits (e.g., SE123456789012)
- United Kingdom - VAT numbers consist of 9 digits, sometimes with GB prefix (e.g., GB123456789 or 123456789)

Asia-Pacific:

- Australia - Australian Business Numbers (ABN) consist of 11 digits (e.g., 12345678901)
- India - GST numbers consist of 15 characters starting with state code (e.g., 07AABCU9603R1ZX)
- New Zealand - GST numbers consist of 8 or 9 digits (e.g., 123456789)
- Singapore - GST registration numbers consist of 9 digits followed by a letter (e.g., 123456789A)
- South Korea - Business registration numbers consist of 10 digits (e.g., 123-45-67890)
- Taiwan - VAT numbers consist of 8 digits (e.g., 12345678)
- Hong Kong - Business Registration numbers consist of 8 digits (e.g., 12345678)
- Japan - Registration numbers consist of 13 digits starting with "T" (e.g., T1234567890123)
- Malaysia - GST numbers consist of 12 digits (e.g., 123456789012)
- Thailand - VAT registration numbers consist of 13 digits (e.g., 1234567890123)
- Philippines - VAT registration numbers vary in format, typically include TIN (Tax Identification Number)
- Indonesia - VAT registration numbers (NPWP) consist of 15 digits (e.g., 12.345.678.9-012.345)
- China - VAT numbers vary by region, typically 15-20 digits
- Mongolia - VAT numbers typically consist of 7-8 digits
- Sri Lanka - VAT registration numbers consist of 9 digits followed by "V" (e.g., 123456789V)

Americas:

- Brazil - CNPJ numbers consist of 14 digits in format XX.XXX.XXX/XXXX-XX (e.g., 12.345.678/0001-90)
- Canada - GST/HST numbers consist of 9 digits followed by "RT0001" (e.g., 123456789RT0001)
- Mexico - RFC numbers consist of 12-13 characters (e.g., ABC123456789)
- Argentina - CUIT numbers consist of 11 digits in format XX-XXXXXXXX-X (e.g., 20-12345678-9)
- Chile - RUT numbers consist of 8-9 digits followed by a check digit (e.g., 12345678-9)
- Colombia - NIT numbers consist of 9-10 digits (e.g., 123456789)
- Ecuador - RUC numbers consist of 13 digits (e.g., 1234567890001)
- Peru - RUC numbers consist of 11 digits (e.g., 12345678901)
- Uruguay - RUC numbers consist of 12 digits (e.g., 123456789012)
- Jamaica - TRN (Taxpayer Registration Number) consists of 9 digits

- Costa Rica - Tax ID numbers vary in format
- Panama - RUC numbers typically consist of 8-11 digits
- Guatemala - NIT numbers consist of 8 digits followed by "K" (e.g., 12345678K)
- Dominican Republic - RNC numbers consist of 9 digits (e.g., 123456789)
- Trinidad and Tobago - VAT numbers consist of digits in specific format
- Bolivia - NIT numbers consist of 8-12 digits
- Paraguay - RUC numbers consist of 8 digits followed by a check digit
- Venezuela - RIF numbers start with a letter followed by 8-9 digits (e.g., J123456789)

Middle East & Africa:

- United Arab Emirates - TRN (Tax Registration Number) consists of 15 digits
- Saudi Arabia - VAT numbers consist of 15 digits
- Qatar - Tax registration numbers consist of 11 digits
- Bahrain - VAT numbers consist of 9 digits
- Kuwait - Tax registration numbers vary in format
- Oman - Tax registration numbers consist of 8 digits
- Israel - VAT numbers consist of 9 digits (e.g., 123456789)
- Turkey - VAT numbers consist of 10 digits (e.g., 1234567890)
- South Africa - VAT numbers consist of 10 digits starting with "4" (e.g., 4123456789)
- Egypt - Tax registration numbers consist of 9 digits
- Nigeria - VAT numbers consist of 8 digits followed by "-0001" (e.g., 12345678-0001)
- Ghana - VAT numbers consist of 12 characters starting with "C" or "P"
- Morocco - Tax identification numbers vary in format
- Tunisia - Tax numbers consist of 7 digits followed by 3 letters (e.g., 1234567ABC)
- Algeria - NIF numbers consist of 15 digits
- Kenya - PIN numbers consist of 11 characters starting with "P"
- Tanzania - TIN numbers consist of 9 digits
- Uganda - TIN numbers consist of 10 digits
- Zimbabwe - VAT numbers consist of 8 digits
- Mauritius - VAT numbers consist of 8 digits
- Rwanda - TIN numbers consist of 9 digits
- Ethiopia - TIN numbers consist of 10 digits
- Botswana - VAT numbers consist of 8 digits
- Zambia - VAT numbers consist of 10 digits
- Senegal - Tax numbers vary in format

Other Regions:

- Bermuda - No VAT system
- Cayman Islands - No VAT system
- British Virgin Islands - No VAT system
- Gibraltar - VAT numbers follow UK format
- Jersey - GST numbers consist of 6 digits
- Guernsey - VAT numbers consist of 6 digits
- Isle of Man - VAT numbers follow UK format
- Monaco - VAT numbers follow French format for some purposes
- Andorra - VAT numbers consist of 8 characters starting with letters
- Faroe Islands - VAT numbers follow Danish format

Important Notes

- Formats may vary within countries based on business type or registration date
- Some countries have multiple tax identification systems
- Always verify the exact format requirements with your local tax authority
- Some jurisdictions may not have VAT/GST systems in place

Need Help?

If you're unsure about your Indirect Tax ID format or have questions about tax registration in your country, we recommend consulting with:

- Your local tax authority
- A qualified tax advisor
- Your company's Tax or Accounting department

For GitLab-specific questions about updating your tax information, contact us at tax@gitlab.com.

Travel Safety and Security

Team member safety and security are a top priority for GitLab. If a team member feels uncomfortable or unsafe traveling to a location on GitLab's behalf due to concerns about the location, region, personal health, or other safety or security risks, please contact People Connect via Slack or email. The People Connect team will assist by helping to connect the team member with the right resources.

Please note that team member travel is not required unless deemed essential to the role. Please speak to your manager about whether the travel is mandatory and required for your role.

Trade Compliance Considerations

Although GitLab is an all-remote company that encourages working from anywhere, some places are subject to trade control restrictions. For this reason, team members cannot take company-owned devices to or otherwise work from US-embargoed countries or regions under any circumstances. US-embargoed countries currently include Cuba, Iran, North Korea, and Syria and US-embargoed regions include the Crimea, Donetsk, and Luhansk regions of Ukraine; however, that list is subject to change without notice. Additionally, team members cannot take company-owned devices to or otherwise work from Russia or Belarus, which are also subject to various restrictions.

Information Security Considerations

Please refer to the Internal Handbook for Information Security Considerations for GitLab Team members traveling abroad.

Business Travel Emergency Support and Insurance

Quick Emergency Contacts

- International SOS 24/7 Assistance: +1 215 942 8226
- Email: philadelphia@internationalsos.com
- Mobile App: Download the ISOS Assistance App

Emergency Assistance Program with International SOS

GitLab provides team members with comprehensive emergency support through International SOS (ISOS) during business travel worldwide. Your coverage is automatic and year-round.

When to Use International SOS

- Medical emergencies or illness during travel; including payment of Emergency Medical Expenses
- Claims Assistance for the Business Travel Insurance Policy
- Safety and security concerns
- Pre-trip planning and health advice

How to Access ISOS Services

App

1. Download the ISOS Assistance App
1. Register using your GitLab email address (use a unique password, not your GitLab credentials)
1. Press the "Need Assistance" button to connect with the nearest emergency center

> Note: This is not a GitLab application and is managed by ISOS.

- ISOS Mobile App User Guide
- ISOS Mobile App Download Information

Online Portal & Membership Card

- Access your digital membership card [here](#)
- Print or save a photo of the card with emergency contact details

Direct Contact

- Call: +1 215 942 8226
- Email: philadelphia@internationalsos.com

Business Travel Insurance Coverage

GitLab's Business Travel Accident Policy provides comprehensive protection for team members traveling domestically and internationally on business. [View policy document.](#)

Key Coverage Details

Coverage Type	Benefits
Accidental Death	5× Annual Salary (up to USD 500,000)
Emergency Medical	Up to \$250,000 per occurrence
Security Evacuation	Includes natural disaster evacuation
Personal Deviation	Extended coverage for personal travel (25% of business trip length)
Trip Duration	Covered for trips less than 180 days
Baggage Protection	Maximum of \$2,500, see policy for details
Family Coverage	Includes spouse, domestic partners, and children under 26 when traveling with you

Note: This policy is primary and will pay before any personal accident policies

See the [Policy details](#) for limits and exclusions

Using the Policy

If You Need Medical Assistance While Traveling

1. Contact International SOS immediately using the app, phone, or email
1. ISOS will arrange appropriate medical care
1. ISOS handles payments directly with providers
1. ISOS submits insurance claims to AIG on your behalf

If you've already paid for medical care during business travel:

1. Contact International SOS
1. They will provide instructions for submitting claims to the insurer

Visa Letter Documentation

For team members needing confirmation of coverage for visa applications:

1. Complete the [AIG Visa Letter Form](#)
1. Follow the
