

nt, Customer may terminate this Agreement for convenience as provided under Section 6.

7.2. This Agreement is governed by the laws of the State of California, without regard to its conflict of laws provisions. The federal and state courts sitting in San Francisco County, California, will have proper and exclusive jurisdiction and venue with respect to any disputes arising from or related to this Agreement. The United Nations Convention of Contracts for the International Sale of Goods is expressly disclaimed by the Parties with respect to this Agreement. The parties represent, warrant and covenant to adhere to all applicable laws and regulations including all export and trade compliance requirements. This Agreement is not assignable, transferable or sublicensable by either party without the other party's prior written consent.

SECTION: legal/testing-agreement-v3.md

<!-- vale off -->

Deprecated 2024-08-29

This Testing Agreement ("Agreement") is between GitLab Inc. with offices at 268 Bush Street, Suite 350, San Francisco, CA 94104 ("GitLab"), and either (i) the entity electronically accepting this Agreement; or (ii) the entity on behalf of which the Testing Features are enabled, as applicable and in either case, "Customer". This Agreement is effective as of the earlier date on which (i) Customer clicks to accept this Agreement within the GitLab software; or (ii) an individual acting on behalf of Customer opts to enable the Testing Features ("Effective Date"). The parties agree to the following terms and conditions related to Customer's use of the applicable Testing Feature.

An individual opting to enable the Testing Features subject to this Agreement represents that they have the authority to bind Customer to the terms of this Agreement. If the individual does not have such authority, they must not opt to enable the Testing Features subject to this Agreement or otherwise disable such Testing Features.

1. DEFINITIONS

1.1. "Testing Feature(s)" are experimental, alpha, or beta features that are not ready for production use. Testing Features are provided without, or with limited, support under commercially reasonable efforts, as determined in GitLab's discretion, as further described here: <<https://docs.gitlab.com/ee/policy/experiment-beta-support.html>>. The applicable Testing Feature may be listed as "experimental", "alpha", or "beta" as further described on the <<https://docs.gitlab.com/>> page covering the Testing Feature along with additional details and applicable use terms incorporated herein by reference.

1.2. "AI Assisted" means the use of, or development of work product with the assistance of, artificial intelligence (including machine learning).

1.3. "Generally Available Features" are features that are ready for production use at any scale, are fully documented and supported, and have passed the Production Readiness Review.

1.4. "Personal Data" means all information defined in the definition of "personal data" under

The General Data Protection Regulation (EU) 2016/679.

1.5. "Production Readiness Review" is a process that helps identify the reliability needs of a service, feature, or significant change to infrastructure for GitLab.com.

1.6. "Testing Period" is the period of time Customer has access to the Testing Feature for testing, evaluation, and feedback as determined at GitLab's discretion.

2. LICENSE, SCOPE, AND USE OF THE TESTING FEATURES

2.1. Subject to the terms of this Agreement, GitLab grants Customer a non-exclusive, non-transferable license to use the applicable Testing Feature(s) for internal use. Testing Features constitutes Free Software (as defined in the GitLab Subscription Agreement ("GLSA") available at <https://about.gitlab.com/handbook/legal/subscription-agreement/> and incorporated herein), subject to the applicable provisions of the GLSA (including GLSA §§ 5, 7, 10.2, 14.2). Capitalized terms not defined herein will have the meaning in the GLSA.

2.2. Customer acknowledges that the applicable Testing Feature (i) has not been made commercially available, (ii) may be unstable and could cause performance and stability issues, (iii) may not operate properly, and (iv) may contain errors, design flaws or other problems. GitLab is under no obligation to release a Testing Feature as a Generally Available Feature.

2.3. To the extent a Testing Feature involves the processing of Customer's Personal Data, Customer agrees and represents that it has provided all required notices to and obtained all necessary consents from the data subjects whose Personal Data is processed under a Testing Feature. GitLab will process Customer's Personal Data on the basis of performing this Agreement with Customer. Any sub-processors used to provide a Testing Feature will be listed at <https://about.gitlab.com/privacy/subprocessors/> and all notifications of updates to that list will be done in accordance with Section 14 of the data processing addendum as set forth in the GLSA.

2.4. Customer's use of and access to the applicable Testing Feature is solely at its own risk. Customer acknowledges that (i) it is responsible for any AI Assisted work product (including source code) generated using the applicable Testing Feature, including (a) verifying the suitability and accuracy of any AI Assisted work product for the desired purpose, and (b) any suggestions Customer may incorporate from AI Assisted Testing Features or any suggestions to Customer's work product; and (ii) the Testing Feature(s) may cause unexpected results, corruption or loss of data, or other forms of loss or damage.

2.5. The Testing Period shall commence upon the Effective Date and will automatically expire upon GitLab providing the applicable Testing Feature as a Generally Available Feature. If GitLab transitions a Testing Feature to a Generally Available Feature, Customer's continued use will be subject to applicable fees and commercial terms and further governed by the GitLab Subscription Agreement available at <https://about.gitlab.com/handbook/legal/subscription-agreement/>, or such other separate written agreement between the parties governing use of GitLab software, inclusive of a Generally Available Feature.

2.6. GitLab will retain all ownership and intellectual property rights related to GitLab software, the Testing Feature(s), and any Feedback related thereto. Customer may provide input to be processed by the Testing Features ("Input"), and receive output generated and returned by

the Testing Features based on the Input ("Output"). To the extent permitted by applicable law, both Input and Output shall constitute Customer Content as that term is defined in the GLSA.

3. FEEDBACK

As part of Customer's use, testing, and evaluation of the applicable Testing Feature, Customer will provide suggestions, ideas, enhancement requests, or other recommendations ("Feedback") regarding its use of the Testing Feature and hereby irrevocably assigns all rights in such Feedback to GitLab. The parties will mutually agree (email sufficient) on an appropriate cadence, process, and method of exchanging Feedback during the Testing Period, including use of public GitLab issues. GitLab may use any Feedback without restriction and without obligation to Customer.

4. NO WARRANTIES

CUSTOMER EXPRESSLY ACKNOWLEDGES AND AGREES THAT THE APPLICABLE TESTING FEATURE HEREUNDER IS STILL IN THE TESTING PHASE, MAY CONTAIN DEFECTS AND IS PROVIDED ON AN "AS AVAILABLE" BASIS. THE PRIMARY PURPOSE OF THIS AGREEMENT IS TO OBTAIN FEEDBACK ON PERFORMANCE AND THE IDENTIFICATION OF ANY DEFECTS OF THE TESTING FEATURE. CUSTOMER WILL SAFEGUARD IMPORTANT DATA, USE CAUTION AND NOT RELY IN ANY WAY ON THE CORRECT FUNCTIONAL PERFORMANCE OF THE TESTING FEATURE. GITLAB AND ITS LICENSORS DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT. NO INFORMATION OR ADVICE, WRITTEN OR WRITTEN, PROVIDED BY GITLAB DURING THE TESTING PERIOD SHALL CREATE ANY WARRANTY NOT EXPRESSLY MADE HEREIN.

5. LIMITATION OF LIABILITY

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, (I) IN NO EVENT WILL GITLAB BE LIABLE TO CUSTOMER FOR ANY INDIRECT, PUNITIVE, INCIDENTAL, SPECIAL, CONSEQUENTIAL DAMAGES, LOSS OF REVENUE, LOSS OF DATA, ANTICIPATED PROFITS, LOST BUSINESS OR LOST SALES, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, OR OTHERWISE, EVEN IF CUSTOMER HAS BEEN ADVISED OF THE POSSIBILITY OF DAMAGES; (II) THE TOTAL LIABILITY OF GITLAB ARISING OUT OF OR RELATED TO THIS AGREEMENT, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, OR OTHERWISE, WILL NOT EXCEED, IN THE AGGREGATE, USD \$1,000.00. THE FOREGOING LIMITATIONS WILL APPLY NOTWITHSTANDING ANY FAILURE OF ESSENTIAL PURPOSE OF ANY LIMITED REMEDY. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL GITLAB BE LIABLE TO CUSTOMER (OR ANY THIRD PARTY INCLUDING CUSTOMER'S END USERS OR LICENSEES) FOR ANY DAMAGES, INCLUDING REASONABLE ATTORNEY'S FEES AND COSTS, ARISING OUT OF OR IN CONNECTION WITH CUSTOMER'S OR ITS END USERS' MISAPPROPRIATION, INFRINGEMENT, DILUTION OR OTHER VIOLATION OF THIRD-PARTY INTELLECTUAL PROPERTY RIGHTS ARISING OUT OF OR IN CONNECTION WITH CUSTOMER'S OR ITS END USERS' USE OF THE TESTING FEATURE OR (B) USE, COMMERCIALIZATION, COPYING, MODIFICATION, PUBLICATION, DISTRIBUTION, LICENSING, SUBLICENSING, OR, AS APPLICABLE, SALE OF AI ASSISTED WORK PRODUCT GENERATED BY THE TESTING FEATURE.

6. TERMINATION

Upon written notice to the other party (email sufficient), either party may terminate this Agreement immediately for convenience. Upon expiration or termination of this Agreement, all licenses granted herein shall automatically terminate and Customer shall immediately discontinue all use of the Testing Feature. Sections 2.5, 4, 5, and 6, shall survive any

termination or expiration of this Agreement.

7. MISCELLANEOUS

7.1. Except as otherwise provided in Section 2, this Agreement and the references incorporated herein comprise the complete statement of understanding of the parties and supersede and cancel all previous written or oral agreements, communications, and other understandings relating to the subject matter herein. Any conflict of terms with the GLSA shall be resolved in favor of this Agreement. This Agreement does not provide the Customer a commercial license to use the Testing Feature once transitioned to a Generally Available Feature. GitLab may revise this Agreement from time to time in its discretion, with the most current version available at: <https://about.gitlab.com/terms/current-terms-of-use>. By continuing to access or use the applicable Testing Feature (including upon a change in designation from "experimental" to "alpha" to "beta" during the Testing Period) Customer agrees to the terms of the revised Agreement. If Customer does not agree to the terms of the revised Agreement, Customer may terminate this Agreement for convenience as provided under Section 6.

7.2. This Agreement is governed by the laws of the State of California, without regard to its conflict of laws provisions. The federal and state courts sitting in San Francisco County, California, will have proper and exclusive jurisdiction and venue with respect to any disputes arising from or related to this Agreement. The United Nations Convention of Contracts for the International Sale of Goods is expressly disclaimed by the Parties with respect to this Agreement. The parties represent, warrant and covenant to adhere to all applicable laws and regulations including all export and trade compliance requirements. This Agreement is not assignable, transferable or sublicensable by either party without the other party's prior written consent.

(Additional Terms)

This Testing Agreement (**·Agreement·**) is between GitLab Inc. with offices at 268 Bush Street, Suite 350, San Francisco, CA 94104 (**·GitLab·**), and either: (i) the entity electronically accepting this Agreement; or (ii) the entity on behalf of which the Testing Features are enabled, as applicable and in either case, **·Customer·**. This Agreement is effective as of the earlier date on which: (i) Customer clicks to accept this Agreement within the GitLab Software; or (ii) an individual acting on behalf of Customer opts to enable the Testing Features (**·Effective Date·**). The parties agree to the following terms and conditions related to Customer's use of the applicable Testing Feature (as defined below).

An individual opting to enable the Testing Features represents that they have the authority to bind Customer to the terms of this Agreement. If the individual does not have such authority, they must not opt to enable the Testing Features or otherwise disable such Testing Features.

1. DEFINITIONS

- 1.1. **Testing Feature(s)** are experimental, alpha, or beta features that are not ready for production use. Testing Features are provided without, or with limited, support, as determined in GitLab's discretion. Additional details and applicable use terms incorporated herein by reference are further described here: <https://docs.gitlab.com/ee/policy/experiment-beta-support.html>.
- 1.2. **AI Assisted** means the use of, or development of, work product with the assistance of artificial intelligence (including machine learning).
- 1.3. **Generally Available Features** are Software features that are ready for production use at any scale, are fully documented and supported, and have passed the Production Readiness Review.
- 1.4. **Personal Data** means all information defined in the definition of **personal data** under General Data Protection Regulation (EU) 2016/679.
- 1.5. **Production Readiness Review** is a process that helps identify the reliability needs of a service, feature, or significant change to infrastructure for GitLab.com.
- 1.6. **Testing Period** is the period of time Customer has access to the Testing Feature, as determined at GitLab's discretion, for testing, evaluation, and Feedback (as defined below).

2. LICENSE, SCOPE, AND USE OF THE TESTING FEATURES

- 2.1. Subject to the terms of this Agreement, GitLab grants Customer a non-exclusive, non-transferable license to use the applicable Testing Feature(s) for internal use. Testing Features constitutes Free Software (as defined in the GitLab Subscription Agreement (**GLSA**) available at <https://about.gitlab.com/handbook/legal/subscription-agreement/> and incorporated herein), subject to the applicable provisions of the GLSA (including, but not limited to, GLSA §§ 5, 7, 10.2, 14.2). Capitalized terms not defined herein will have the meaning in the GLSA.
- 2.2. Customer acknowledges that the applicable Testing Feature: (i) has not been made commercially available, (ii) may be unstable and could cause performance and stability issues, (iii) may not operate properly, and (iv) may contain errors, design flaws or other problems. GitLab is under no obligation to release a Testing Feature as a Generally Available Feature.
- 2.3. To the extent a Testing Feature involves the processing of Customer's Personal Data, Customer agrees and represents that it has provided all required notices to, and obtained all necessary consents from, the data subjects whose Personal Data is processed under a Testing Feature. GitLab will process Customer's Personal Data on the basis of performing this Agreement with Customer. Any sub-processors used to provide a Testing Feature will be listed at <https://about.gitlab.com/privacy/subprocessors/> and all notifications of updates to that list will be done in accordance with Section 14 of the data processing addendum as set forth in the GLSA.
- 2.4. Customer's use of and access to the applicable Testing Feature is solely at its own risk. Customer acknowledges that: (i) it is responsible for any AI Assisted work product (including source code) generated using the applicable Testing Feature, including: (a) verifying the suitability and accuracy of any AI Assisted work product for the desired purpose, and (b) any

suggestions Customer may incorporate from AI Assisted Testing Features or any suggestions to Customer's work product; and (ii) the Testing Feature(s) may cause unexpected results, corruption or loss of data, or other forms of loss or damage. Customer will not copy, alter, modify, reverse engineer, or attempt to derive the source code of the Testing Features.

2.5. The Testing Period shall commence upon the Effective Date and will automatically expire upon the earlier of (i) the conclusion of the Testing Period, or (ii) GitLab providing the applicable Testing Feature as a Generally Available Feature. If GitLab transitions a Testing Feature to a Generally Available Feature, Customer's continued use will be subject to applicable fees and commercial terms as governed by the GLSA available at <https://about.gitlab.com/terms/>, or such other separate written agreement between the parties governing use of GitLab Software, inclusive of a Generally Available Feature.

2.6. GitLab will retain all ownership and intellectual property rights related to GitLab Software, the Testing Feature(s), and any Feedback related thereto. If the Testing Feature includes AI Functionality, Customer may provide input to be processed by the Testing Features (·Input·), and receive output generated and returned by the Testing Features based on the Input (·Output·). To the extent permitted by applicable law, both Input and Output shall constitute Customer Content as that term is defined in the GLSA.

3. FEEDBACK

As part of Customer's use, testing, and evaluation of the applicable Testing Feature, Customer will provide suggestions, ideas, enhancement requests, or other recommendations (·Feedback·) regarding its use of the Testing Feature and hereby irrevocably assigns all rights in such Feedback to GitLab. The parties will mutually agree (email is sufficient) on an appropriate cadence, process, and method of exchanging Feedback during the Testing Period, including use of public GitLab issues. GitLab may use any Feedback without restriction and without obligation to Customer.

4. NO WARRANTIES

CUSTOMER EXPRESSLY ACKNOWLEDGES AND AGREES THAT THE APPLICABLE TESTING FEATURE HEREUNDER IS STILL IN THE TESTING PHASE, MAY CONTAIN DEFECTS, AND IS PROVIDED ON AN ·AS AVAILABLE· BASIS. THE PRIMARY PURPOSE OF THIS AGREEMENT IS TO OBTAIN FEEDBACK ON PERFORMANCE AND THE IDENTIFICATION OF ANY DEFECTS OF THE TESTING FEATURE. CUSTOMER SHOULD SAFEGUARD IMPORTANT DATA, USE CAUTION, AND NOT RELY IN ANY WAY ON THE CORRECT FUNCTIONAL PERFORMANCE OF THE TESTING FEATURE. GITLAB AND ITS LICENSORS DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT. NO INFORMATION OR ADVICE, WHETHER ORAL OR WRITTEN, PROVIDED BY GITLAB DURING THE TESTING PERIOD SHALL CREATE ANY WARRANTY, EXPRESSLY MADE HEREIN.

5. LIMITATION OF LIABILITY

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, (I) IN NO EVENT WILL GITLAB BE LIABLE TO CUSTOMER FOR ANY INDIRECT, PUNITIVE, INCIDENTAL, SPECIAL, CONSEQUENTIAL DAMAGES, LOSS OF REVENUE, LOSS OF DATA, ANTICIPATED PROFITS, LOST BUSINESS OR LOST SALES, WHETHER BASED ON CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, OR OTHERWISE, EVEN IF CUSTOMER HAS BEEN ADVISED OF THE POSSIBILITY OF DAMAGES; (II) THE TOTAL LIABILITY OF GITLAB ARISING OUT OF

OR RELATED TO THIS AGREEMENT, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR OTHERWISE, WILL NOT EXCEED, IN THE AGGREGATE, USD \$1,000.00. THE FOREGOING LIMITATIONS WILL APPLY NOTWITHSTANDING ANY FAILURE OF ESSENTIAL PURPOSE OF ANY LIMITATION TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL GITLAB BE LIABLE TO CUSTOMER (OR ANY THIRD PARTY INCLUDING CUSTOMER'S USERS OR LICENSEES) FOR ANY MATERIAL INFRINGEMENT, DILUTION OR OTHER VIOLATION OF THIRD-PARTY INTELLECTUAL PROPERTY RIGHTS. OUT OF, OR IN CONNECTION WITH, CUSTOMER'S OR ITS USERS: (A) USE OF THE TESTING FEATURE, (B) USE, COMMERCIALIZATION, COPYING, MODIFICATION, PUBLICATION, DISTRIBUTION, LICENSING, SUBLICENSING, OR, AS APPLICABLE, SALE OF AI ASSISTED WORK PRODUCT GENERATED BY THE TESTING FEATURE.

6. TERMINATION

Upon written notice to the other party (email is sufficient), either party may terminate this Agreement immediately for convenience. In the event the Testing Period has concluded or the Testing Feature becomes a Generally Available Feature, Customer acknowledges that continued use of the Testing Feature will be subject to additional fees and the GLSA, or separate written agreement between the parties, governing use of GitLab Software. Upon expiration or termination of this Agreement, all licenses granted herein shall automatically terminate and Customer shall immediately discontinue all use of the Testing Features. Sections 2.5, 4, 5, and 6, shall survive any termination or expiration of this Agreement.

7. MISCELLANEOUS

7.1. Except as otherwise provided in Section 2, this Agreement and the references incorporated herein comprise the complete statement of understanding of the parties and supersede and cancel all previous written or oral agreements, communications, and other understandings relating to the subject matter herein. Any conflict of terms with the GLSA shall be resolved in favor of this Agreement. This Agreement does not provide Customer a commercial license to use the Testing Feature once transitioned to a Generally Available Feature. GitLab may revise this Agreement from time to time in its discretion, with the most current version available at: <https://about.gitlab.com/terms/current-terms-of-use>. By continuing to access or use the applicable Testing Feature (including upon a change in designation from `·experimental·` to `·alpha·` to `·beta·` during the Testing Period) Customer agrees to the terms of the revised Agreement. If Customer does not agree to the terms of the revised Agreement, Customer may terminate this Agreement for convenience as provided under Section 6.

7.2. This Agreement is governed by the laws of the State of California, without regard to its conflict of laws provisions. The federal and state courts sitting in San Francisco County, California, will have proper and exclusive jurisdiction and venue with respect to any disputes arising from or related to this Agreement. The United Nations Convention of Contracts for the International Sale of Goods is expressly disclaimed by the parties with respect to this Agreement. The parties represent, warrant and covenant to adhere to all applicable laws and regulations including all export and trade compliance requirements. This Agreement is not assignable, transferable or sublicensable by either party without the other party's prior written consent.

SECTION: legal/testing-agreement.md

(Additional Terms)

This Testing Agreement ("Agreement") is between GitLab Inc. with offices at 268 Bush Street, Suite 350, San Francisco, CA 94104 ("GitLab"), and either: (i) the entity electronically accepting this Agreement; or (ii) the entity on behalf of which the Testing Features are enabled, as applicable and in either case, "Customer". This Agreement is effective as of the earlier date on which: (i) Customer clicks to accept this Agreement within the GitLab Software; or (ii) an individual acting on behalf of Customer opts to enable the Testing Features ("Effective Date"). The parties agree to the following terms and conditions related to Customer's use of the applicable Testing Feature (as defined below).

An individual opting to enable the Testing Features represents that they have the authority to bind Customer to the terms of this Agreement. If the individual does not have such authority, they must not opt to enable the Testing Features or otherwise disable such Testing Features.

1. DEFINITIONS

1.1. "Testing Feature(s)" are experimental, alpha, or beta features that are not ready for production use. Testing Features are provided without, or with limited, support, as determined in GitLab's discretion. Additional details and applicable use terms incorporated herein by reference are further described here: <https://docs.gitlab.com/ee/policy/experiment-beta-support.html>.

1.2. "AI Assisted" means the use of, or development of, work product with the assistance of artificial intelligence (including machine learning).

1.3. "Generally Available Features" are Software features that are ready for production use at any scale, are fully documented and supported, and have passed the Production Readiness Review.

1.4. "Personal Data" means all information defined in the definition of "personal data" under General Data Protection Regulation (EU) 2016/679.

1.5. "Production Readiness Review" is a process that helps identify the reliability needs of a service, feature, or significant change to infrastructure for GitLab.com.

1.6. "Testing Period" is the period of time Customer has access to the Testing Feature, as determined at GitLab's discretion, for testing, evaluation, and Feedback (as defined below).

2. LICENSE, SCOPE, AND USE OF THE TESTING FEATURES

2.1. Subject to the terms of this Agreement, GitLab grants Customer a non-exclusive, non-transferable license to use the applicable Testing Feature(s) for internal use. Testing Features constitutes Free Software (as defined in the GitLab Subscription Agreement ("GLSA") available at <https://about.gitlab.com/handbook/legal/subscription-agreement/> and incorporated herein), subject to the applicable provisions of the GLSA (including, but not limited to, GLSA §§ 5, 7, 10.2, 14.2). Capitalized terms not defined herein will have the meaning in the GLSA.

2.2. Customer acknowledges that the applicable Testing Feature: (i) has not been made commercially available, (ii) may be unstable and could cause performance and stability issues, (iii) may not operate properly, and (iv) may contain errors, design flaws or other problems. GitLab is under no obligation to release a Testing Feature as a Generally Available Feature.

2.3. To the extent a Testing Feature involves the processing of Customer's Personal Data, Customer agrees and represents that it has provided all required notices to, and obtained all necessary consents from, the data subjects whose Personal Data is processed under a Testing Feature. GitLab will process Customer's Personal Data on the basis of performing this Agreement with Customer. Any sub-processors used to provide a Testing Feature will be listed at <https://about.gitlab.com/privacy/subprocessors/> and all notifications of updates to that list will be done in accordance with Section 14 of the data processing addendum as set forth in the GLSA.

2.4. Customer's use of and access to the applicable Testing Feature is solely at its own risk. Customer acknowledges that: (i) it is responsible for any AI Assisted work product (including source code) generated using the applicable Testing Feature, including: (a) verifying the suitability and accuracy of any AI Assisted work product for the desired purpose, and (b) any suggestions Customer may incorporate from AI Assisted Testing Features or any suggestions to Customer's work product; and (ii) the Testing Feature(s) may cause unexpected results, corruption or loss of data, or other forms of loss or damage. Customer will not copy, alter, modify, reverse engineer, or attempt to derive the source code of the Testing Features.

2.5. The Testing Period shall commence upon the Effective Date and will automatically expire upon the earlier of (i) the conclusion of the Testing Period, or (ii) GitLab providing the applicable Testing Feature as a Generally Available Feature. If GitLab transitions a Testing Feature to a Generally Available Feature, Customer's continued use will be subject to applicable fees and commercial terms as governed by the GLSA available at <https://about.gitlab.com/terms/>, or such other separate written agreement between the parties governing use of GitLab Software, inclusive of a Generally Available Feature.

2.6. GitLab will retain all ownership and intellectual property rights related to GitLab Software, the Testing Feature(s), and any Feedback related thereto. Customer may provide input to be processed by the Testing Features ("Input"), and receive output generated and returned by the Testing Features based on the Input ("Output"). To the extent permitted by applicable law, both Input and Output shall constitute Customer Content as that term is defined in the GLSA.

3. FEEDBACK

As part of Customer's use, testing, and evaluation of the applicable Testing Feature, Customer may provide suggestions, ideas, enhancement requests, or other recommendations ("Feedback") regarding its use of the Testing Feature and hereby irrevocably assigns all rights in such Feedback to GitLab. The parties will mutually agree (email is sufficient) on an appropriate cadence, process, and method of exchanging Feedback during the Testing Period, including use of public GitLab issues. GitLab may use any Feedback without restriction and without obligation to Customer.

4. CONFIDENTIALITY

The parties acknowledge and agree that Confidential Information disclosed under this Agreement is subject to the confidentiality obligations of the GLSA or other applicable confidentiality agreement between the parties. GitLab Confidential Information includes, but is not limited to, Testing Features and any Feedback.

5. NO WARRANTIES

CUSTOMER EXPRESSLY ACKNOWLEDGES AND AGREES THAT THE APPLICABLE TESTING FEATURE HEREUNDER IS STILL IN THE TESTING PHASE, MAY CONTAIN DEFECTS, AND IS PROVIDED ON AN "AS AVAILABLE" BASIS. THE PRIMARY PURPOSE OF THIS AGREEMENT IS TO OBTAIN FEEDBACK ON PERFORMANCE AND THE IDENTIFICATION OF ANY DEFECTS OF THE TESTING FEATURE. CUSTOMER SHOULD SAFEGUARD IMPORTANT DATA, USE CAUTION, AND NOT RELY IN ANY WAY ON THE CORRECT FUNCTIONAL PERFORMANCE OF THE TESTING FEATURE. GITLAB AND ITS LICENSORS DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT. NO INFORMATION OR ADVICE, WHETHER ORAL OR WRITTEN, PROVIDED BY GITLAB DURING THE TESTING PERIOD SHALL CREATE ANY WARRANTY, EXPRESSLY MADE HEREIN.

6. LIMITATION OF LIABILITY

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, (I) IN NO EVENT WILL GITLAB BE LIABLE TO CUSTOMER FOR ANY INDIRECT, PUNITIVE, INCIDENTAL, SPECIAL, CONSEQUENTIAL DAMAGES, LOSS OF REVENUE, LOSS OF DATA, ANTICIPATED PROFITS, LOST BUSINESS OR LOST SALES, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, OR OTHERWISE, EVEN IF CUSTOMER HAS BEEN ADVISED OF THE POSSIBILITY OF DAMAGES; (II) THE TOTAL LIABILITY OF GITLAB ARISING OUT OF OR RELATED TO THIS AGREEMENT, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, OR OTHERWISE, WILL NOT EXCEED, IN THE AGGREGATE, USD \$1,000.00. THE FOREGOING LIMITATIONS WILL APPLY NOTWITHSTANDING ANY FAILURE OF ESSENTIAL PURPOSE OF ANY LIMITED REMEDY. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL GITLAB BE LIABLE TO CUSTOMER (OR ANY THIRD PARTY INCLUDING CUSTOMER'S USERS OR LICENSEES) FOR ANY MISCARRIAGE OF DUTY.

INFRINGEMENT, DILUTION OR OTHER VIOLATION OF THIRD-PARTY INTELLECTUAL PROPERTY RIGHTS, OUT OF, OR IN CONNECTION WITH, CUSTOMER'S OR ITS USERS: (A) USE OF THE TESTING FEATURE, USE, COMMERCIALIZATION, COPYING, MODIFICATION, PUBLICATION, DISTRIBUTION, LICENSING, SUBLICENSING, OR, AS APPLICABLE, SALE OF AI ASSISTED WORK PRODUCT GENERATED BY THE TESTING FEATURE.

7. TERMINATION

Upon written notice to the other party (email is sufficient), either party may terminate this Agreement immediately for convenience. In the event the Testing Period has concluded or the Testing Feature becomes a Generally Available Feature, Customer acknowledges that continued use of the Testing Feature will be subject to additional fees and the GLSA or separate written agreement between the parties governing use of GitLab Software. Upon expiration or termination of this Agreement, all licenses granted herein shall automatically terminate and Customer shall immediately discontinue all use of the Testing Feature. Sections 2.5, 4, 5, 6, and 7, shall survive any termination or expiration of this Agreement.

8. MISCELLANEOUS

8.1. Except as otherwise provided in Section 2, this Agreement and the references incorporated herein comprise the complete statement of understanding of the parties and supersede and cancel all previous written or oral agreements, communications, and other understandings relating to the subject matter herein. Any conflict of terms with the GLSA shall be resolved in favor of this Agreement. This Agreement does not provide Customer a commercial license to use the Testing Feature once transitioned to a Generally Available Feature.

8.2. This Agreement is governed by the laws of the State of California, without regard to its conflict of laws provisions. The federal and state courts sitting in San Francisco County, California, will have proper and exclusive jurisdiction and venue with respect to any disputes arising from or related to this Agreement. The United Nations Convention of Contracts for the International Sale of Goods is expressly disclaimed by the parties with respect to this Agreement. The parties represent, warrant and covenant to adhere to all applicable laws and regulations including all export and trade compliance requirements. This Agreement is not assignable, transferable or sublicensable by either party without the other party's prior written consent.

SECTION: legal/trade-compliance.md

What are trade control laws?

Trade control laws, which often consist of sanctions, export controls, and import laws, govern how and under what circumstances technology, software, and technical assistance may be exported. Trade control laws vary from country to country but usually exist to protect national

security and further foreign policy and economic interests.

Under United States law, exports, re-exports, and transfers, can take many forms, including oral, written, and visual disclosure, physical shipment, and electronic transfer or transmission. An export can also occur when technology, software, or technical assistance is transmitted to U.S. nationals abroad, or to non-U.S. nationals located within the United States. The export of certain software, technology, or technical assistance to certain countries, certain end users, or for certain end uses, may require authorization from the United States government prior to export, re-export, or transfer.

How do trade control laws apply to GitLab Software?

GitLab Enterprise Edition, related technology, and services (collectively, "GitLab Software"), are subject to the Export Administration Regulations ("EAR"), administered by the U.S. Department of Commerce, Bureau of Industry and Security ("BIS"), and various sanctions programs administered by the U.S. Treasury Department's Office of Foreign Assets Control ("OFAC"). The GitLab Community Edition is freely available to the public and is not subject to the EAR. GitLab continuously monitors developments to these regulations to maintain compliance and to leverage any opportunity to broaden access to GitLab in a compliant manner that allows everyone to contribute.

The GitLab Software has been classified via CCATS G178430 as a 5D992.c mass market encryption product with eligibility for export to most destinations under 15 CFR 740.17(b)(1) of license exception ENC. GitLab users may not export, re-export, or transfer GitLab Software, without first obtaining authorization from the U.S. government, to (a) any U.S. embargoed country including but not limited to Cuba, Iran, North Korea, Syria, Russia, Belarus, and the Crimea, Donetsk, and Luhansk regions of Ukraine, (b) any party identified on OFAC's Specially Designated Nationals and Blocked Person list or the Department of Commerce Denied Persons, Entity, or Unverified lists, or (c) for end use involving sensitive nuclear, rocket systems, unmanned aerial vehicles, missiles, chemical or biological weapons, or for any other end use prohibited by 15 CFR 744.

GitLab provides this information, which is subject to change without notice, to facilitate GitLab users' compliance with applicable trade control law. GitLab users remain solely responsible for exporting, re-exporting, and transferring GitLab Software and any user-developed content in accordance with those regulations and should seek legal counsel as necessary.

SECTION: legal/trademarks-at-gitlab.md

Trademarks at GitLab

GitLab's brand is one of its most valuable assets. As part of this, GitLab's trademarks (the name GitLab, and the [GitLab Tanuki logo](https://about.gitlab.com/images/press/logo/png/gitlab-icon-rgb.png)) distinguish GitLab's product from those of its competitors. They also signify to our customers and prospects the high quality of our product, which people associate with GitLab.

Proper use of GitLab's Trademarks

For information regarding proper use of GitLab's trademarks, see the following:

- Trademark Guidelines
- Brand Introduction

Process for New GitLab Trademarks

If considering a new trademark, review the following:

- The naming process at GitLab
- Product and feature naming guidelines

After reviewing the above guidelines, reach out to the Brand Team in brand, with your proposed mark, whether it's a logo or wordmark. If Brand approves use of the proposed logo or wordmark, they will reach out to Legal to discuss next steps.

Use of GitLab trademarks by third-parties on marketing materials

- An Authorization to use GitLab Materials must be signed by any third party wanting to include GitLab's name or logo on their website or other marketing materials, if use of GitLab's name or logo for the requested purposes is not already covered in an existing agreement.

- Follow these steps to get the Authorization signed:

1. Locate and download the Master Authorization Template in GitLab's G-Drive (Note this is only available to GitLab team members).

1. Send the template to the third party via DocuSign, ensuring that the DocuSign envelope you create requests the following details, which will appear in the signature block of the Authorization:

- Company Name
- Company Address
- Email Address for Notices
- Legal Contact

1. Contact GitLab Legal to obtain approval for any modifications the third party requests to the Authorization.

1. Assign the Authorization for countersignature via DocuSign to an appropriate GitLab team member identified in the Signature Authorization Matrix.

Third party infringement of GitLab trademarks

For GitLab Team Members Only:

If we suspect that a third party is making unauthorized use of the term GitLab, or any other GitLab trademark, the process below should be followed:

1. Open a confidential legal issue legal issue, providing details of the infringement, and including a link to the infringing material.
2. The Legal and Corporate Affairs team will review the request, and assess if the use constitutes infringement, or is covered by a fair use exemption. If no infringement is identified, the issue should be updated with the outcome of the review, and closed.
3. If infringement is identified, the Legal and Corporate Affairs team will contact the relevant party (e.g. website/platform operator or content manager) to request that the infringement be stopped.

Some examples of unauthorized use may be found in:

- Third party marketing materials or product names: Unauthorized use in a way that infers that GitLab endorses or sponsors the publisher of the marketing material.
- Browser ads (title or copy): These uses can be reported by the Legal and Corporate Affairs team to the relevant browser operator (e.g. Google, Bing).

If you're not a GitLab team member, please share any reports of suspected infringement with us at intellectualproperty@gitlab.com.

Third-party Trademarks

For information on use of third-party IP in external materials, see our [Guidelines for Use of Third-party IP in External Materials](#).

Whistleblowing at GitLab

GitLab Inc. (collectively with its subsidiaries, "GitLab", "we", "our") is committed to the highest standards of ethics, integrity, and accountability and to complying with applicable

laws, rules, and regulations. You are required to perform your duties and responsibilities with honesty and integrity and to comply with all applicable laws, rules, and regulations, as well as GitLab's policies. If you become aware of an actual or suspected violation of our policies or of any laws or regulations, it is your responsibility and obligation to report it and you should do so without fear of reprisal or retaliation of any kind.

GitLab has established whistleblower reporting channels and policies (internally accessible only) to enable the reporting of any known or suspected improper activities that are unlawful or otherwise violate our policies so that we can investigate and resolve potential violations as quickly and efficiently as possible. You are encouraged to use the reporting channels provided, the details of which are set out in each policy and are also set out in the Handbook, to report all known or suspected improper activities, noting that each is designed to facilitate confidential, or in some cases anonymous, options for reporting any improper activities.

In addition to our GitLab Inc. policy, additional policies for certain EU countries are accessible below. The GitLab Inc. policy will apply, unless a country-specific policy applies to an individual (because they are employed by the GitLab entity in that country). If the protections are greater than what is offered in the GitLab Inc. policy, then the country-specific policy will apply.

Country-specific Whistleblower Policies

- Germany Whistleblower Policy
- Ireland Protected Disclosure Policy
- Netherlands Whistleblower Policy

GitLab's whistleblower reporting channels and policies should not be used for complaints relating to a team member's own personal circumstances, or arising out of their employment contract. In those cases you should use the applicable grievance procedure in the Anti-harassment Policy, or contact Team Member Relations as appropriate. As a reminder, GitLab has engaged a separate hotline vendor, known as Lighthouse Services, to provide an anonymous reporting hotline for all team members to submit reports regarding team member relations.

Reports may cover but are not limited to the following topics: wrongful discharge or disciplinary action, sexual harassment, discrimination, conduct violations, alcohol and substance abuse, threats, improper conduct, violation of company policy. This separate hotline is available for these calls in order to reserve EthicsPoint for specific complaints that would fall under the GitLab Inc. Whistleblower Policy or applicable country policy, as defined in the applicable policy.

Lighthouse has a toll free number and other methods of reporting are available 24 hours a day, 7 days a week for use by team members.

Customer asking ESG-related questions? Follow the steps outlined in the Requesting Support with Customer ESG Questions section below

Sustainability Programs

Corporate Sustainability is a business approach that enhances long term stakeholder value by implementing a strategy that considers every dimension of how a business operates when making social, environmental and economic progress.

ESG stands for Environmental, Social and Governance and refers to the three key factors when measuring the sustainability and ethical impact of an investment in a business or company.

At GitLab we use Sustainability and ESG interchangeably. Both terms are relevant to our work and both serve different purposes depending on the audience we interact with.

Team Overview & Vision

The Sustainability Team creates and maintains GitLab's Corporate Sustainability strategy and programs by driving and integrating responsible business practices and ESG regulatory compliance.

The Sustainability team builds and maintains strong internal and external relationships to understand stakeholder expectations - including customer, investor and team members. This engagement allows us to remain customer centric and easy to do business with while meeting shareholder and team member expectations.

The Sustainability Team has two primary functions and four corresponding programs:

Compliance, Reporting & Climate Action

Compliance & Reporting: Manages customer and prospect ESG-related questionnaires, requests for proposals, and sustainability contractual clauses. Leads annual Sustainability report and external assurance process. Monitors global ESG regulation and works cross-functionally to advance GitLab's culture of compliance with applicable ESG regulations. Responds to investor ESG rating agencies to maintain competitive ESG scoring among peers.

Climate Action: Identifies and executes strategic climate programs, including annual measurement of GitLab's greenhouse gas inventory, emissions reduction target-setting, partners with Procurement to run the sustainable supplier program, identifies emissions reduction opportunities across the business, and purchases high quality carbon credits. Manages team member & customer communications related to GitLab's commitment to environmental sustainability.

Social Impact

GiveLab: GiveLab is GitLab's team member volunteer program and includes year-round volunteering, GiveLab 30 days of Impact, our annual company-wide volunteer campaign and GiveLab Champions Program. Volunteerism is an effective way to build trust through social connections - this leads to higher individual and team motivation, and greater cross-functional collaboration.

GitLab for Non-Profits: GitLab's in-kind donation program. Manages social impact communications with team members and customers, while developing strategic nonprofit partnerships to advance GitLab's ESG goals and help enhance our brand reputation by demonstrating our commitment to the nonprofit community.

Sustainability Strategy

Deeply integrated into our business philosophy, GitLab's Sustainability strategy is driven by

our values of Collaboration, Results for Customers, Efficiency, Diversity, Inclusion and Belonging, Iteration, and Transparency (CREDIT). GitLab's stakeholders, including customers, investors, team members, and community members play a key role in GitLab's Sustainability strategy.

GitLab conducted its inaugural ESG materiality assessment in 2022. By conducting a materiality assessment with our stakeholders, we identified which ESG topics have the greatest impact on GitLab's business and where we have the potential to have the greatest impact on the environment, society, and our global communities - those material topics drive the programs, policies and initiatives under our strategy.

This page will continue to be updated as we make progress towards developing plans and programs to advance our Sustainability goals.

Sustainability Advisory Committee

The purpose of the advisory committee is to create cross-functional alignment on ESG objectives and decision making, to go beyond simply compliance and into long-term operational implementation.

Members of the Sustainability Advisory Committee

Robin Schulman (Egroup)
Rob Allen (Egroup)
Brian Robins (Egroup)
Stacy Cline (ESG)
Kim Buncle (ESG)
Kelsey Turcotte (Investor Relations)

James Shen (Finance)
Marin Jankovski (Infrastructure)
Taylor McCaslin (Product)

ESG | Sustainability Programs

Compliance & Reporting

Like all functions at GitLab, transparency is a core focus. Every year GitLab publishes an annual ESG report where we share our approach to managing our key ESG focus areas, provide updates on programs and policies, achievements to date, metrics and targets, and plans for the future.

FY23 ESG Report

FY24 ESG Report

The Sustainability team works cross-functionally to prepare GitLab for compliance with ESG regulations.

The Sustainability team also supports internal teams with customer ESG questionnaires and RFPs. Customers and prospective customers are increasingly asking about GitLab's Sustainability programs, including questions related to GitLab's climate commitments and greenhouse gas emissions. Many of our customers are also subject to ESG regulation and we expect customer ESG questions to continue to increase as they look to better align to new regulations.

Requesting Support with Customer ESG Questions

If a customer or potential customer has questions related to GitLab's ESG practices as part of an RFP, please follow the RFP process

If a customer or potential customer requests information via an ESG questionnaire, please open an issue [here](#) and select the 'ESG Questionnaire' template

If there's an opportunity to connect the Sustainability team directly, please reach out in the [sustainability-esg](#) Slack channel

Climate Action

GitLab is committed to doing our part to minimize our environmental footprint, including working to reduce greenhouse gas (GHG) emissions associated with our operations. GitLab's stakeholders, including customers, investors, regulators, and team members expect the company to operate sustainably and to do our part to reduce our environmental footprint.

Many of GitLab's customers have GHG reduction targets and as a vendor, GitLab's carbon emissions contribute to our customers' emissions footprints. To remain easy to transact with, GitLab needs to meet the expectations of our customers by taking action on climate change.

GitLab's Climate Action Program consists of four pillars:

1. **Measure & Report:** Every year GitLab conducts an annual greenhouse gas (GHG) inventory in alignment with the GHG Protocol, the global best practice carbon accounting standard. We publish the results of the inventory in our annual ESG report and have the data assured by a third-party. In 2026, GitLab is subject to new regulations in the US and the EU that will make these disclosures mandatory.
2. **Act:** GitLab is taking action to reduce our carbon emissions. As a fully remote software company, the majority of our emissions come from our suppliers. Engaging our suppliers to measure their carbon emissions and set their own reduction targets is a critical component of our reduction pathway, which is why we have set an aspirational supplier engagement target. Please see the Sustainable Procurement Program for more information. The Sustainability team continues to explore other ways to reduce emissions and is doing further analysis on additional reduction pathways.
3. **Engage:** This includes engaging GitLab team members in climate education and action. In 2024, we launched the GitLab Team Member Sustainability Guide, providing actionable steps team members can take at home to minimize their environmental impact. In FY26, we launched our

partnership with Mammoth Climate, a climate literacy and challenges platform, to further engage team members with educational materials, activities, and rewards

4. Accelerate: While GitLab works to reduce our emissions, we are also committed to accelerating climate solutions by purchasing high quality carbon credits to cover a portion of our carbon footprint. We are proud to partner with Rubicon Carbon to purchase a diversified portfolio of high quality carbon credits, financing carbon removal projects that meet Rubicon's high standards of quality.

Sustainable Procurement Program

In FY25, GitLab set an aspirational science-aligned supplier engagement target to reduce our Scope 3 emissions: 70% of our suppliers (by emissions) will have science-aligned climate targets by FY29.

Our sustainable procurement program includes the following initiatives:

- Annual emissions survey to request data from suppliers in an effort to improve the accuracy of our footprint

- Use strategic business reviews to understand key barriers suppliers face when measuring and reporting their emissions

- Provide resources and training to suppliers on how to measure and reduce their greenhouse gas emissions

- Provide resources and training to team members responsible for supplier selection on our new expectations of suppliers, aligned with applicable laws.

We look forward to sharing updates on this new initiative.

GiveLab

At GitLab, all team members do work that supports the company, which supports the enhancement of an open source codebase. This codebase is freely available to everyone to make better software faster and drive progress through what they build. Between 2022 and 2024, team members made over 125,000 commits to the open source part of the GitLab codebase.

But, there are also other ways to give back and many team members choose to contribute beyond GitLab. In addition to contributing to GitLab, GitLab offers additional optional pathways for team members to give back while leveraging their unique skills and passions through programs such as GiveLab, GitLab's Team Member Volunteer Program.

GitLab encourages team members to take part in volunteer initiatives such as supporting their local communities, participating in virtual volunteer activities, and organizing volunteer activities as part of team events. Corporate volunteerism has been proven to be an effective strategy for boosting engagement, improving employee retention, and strengthening relationships at work. Volunteering with GiveLab supports team members in fostering connections, building trust among one another and embodying our CREDIT values while positively impacting our communities.

Team members may self organize volunteer events at any point throughout the year. To submit a request for a team volunteer activity with a Registered Nonprofit Organization that isn't on

the current GiveLab Nonprofit Directory, please go to the Philanthropic Requests epic and open a new issue using the VolunteerSupport Template.

Team members can also request support from the Sustainability Team to organize local or virtual volunteer opportunities on their behalf by going to the Philanthropic Requests epic and opening a new issue using the VolunteerSupport Template. Please write "yes" for the question, "Would you like the Sustainability team's help organizing the volunteer activity?"

All team members and volunteer activities must adhere to the GitLab Philanthropy Policy. Team members must follow GitLab's paid time off (PTO) policy if volunteering during work hours and use the "public service/volunteer" option in Workday.

If volunteering in person, team members may incur some expenses. For calendar year 2024, team members can expense up to a total of \$25 for expenses incurred that meet the allowed for reimbursement criteria. All expenses should be submitted in Navan using the "GiveLab" classification. Please note that GitLab does not allow team members to travel to in-person volunteer events. All in-person volunteering should be local to the team member.

As with all company expenses, team members must be thoughtful in spending the company's money and use best judgment to ensure that all expenses are deemed "ordinary and necessary." Team members should follow all team member expense responsibilities.

Expenses allowed for reimbursement (for in-person volunteer events):

Local travel only - mileage, train, taxi/rideshares. Must follow and comply with the current limits of our Expense Policy. Code under their individual travel category and use the "GiveLab" classification in Navan

Parking for the event. Must follow and comply with the current limits of our Expense Policy. Please use the "GiveLab" classification in Navan

Meal during the event. Must follow and comply with the current limits of our Expense Policy. Code under Travel-Meals for Myself and use the "GiveLab" classification in Navan

Expenses not allowed for reimbursement:

Any airfare, lodging, rental cars, coworking space, internet expenses are not allowed

Any supplies or items needed for the event

Donations to the nonprofit

Any expenses that are not mentioned as "allowed" above are not reimbursable and there will be no exceptions

As with our unique ways of working, GitLab and its team members have identified and sought out opportunities for impact that speak not only to our values but also to our all-remote nature.

To review previous opportunities that team members participated in, visit the historical activities page.

GiveLab 30 Days of Impact

GiveLab 30 Days of Impact is GitLab's annual volunteer campaign created to encourage team members to foster connections, build trust among one another and embody our CREDIT values while positively impacting our communities. We have designed this program with our high-performing

team culture and results for customers in mind.

GiveLab 30 days of Impact runs annually in Q4 and our goal is to encourage as many team members as possible to volunteer over the course of 30 days.

Throughout the month, team members can volunteer as little as one hour of their time to make an impact. We understand that our team members are driven by many different factors, and we welcome that volunteer participation will look different for everyone. Through GiveLab 30 days of Impact we aim to offer many different ways for team members to get involved such as:

- Through company-sponsored virtual events
- Local in-person volunteer events organized by the GitLab Sustainability team, GiveLab Champions, and team members
- Individual volunteer pursuits
- Find and contribute to opportunities in the GiveLab Volunteer Directory
- Include a volunteer activity at an all-hands or team builder
- Contribute to GitLab's codebase
- Assist with retention and recruitment efforts

Why GiveLab 30 Days of Impact Exists

While GitLab encourages year-round volunteerism through GiveLab, GiveLab 30 days of Impact centralizes our efforts into an annual campaign to have a larger collective impact over a specific timeframe. Corporate volunteerism has been proven to be an effective strategy for boosting engagement, improving employee retention, and strengthening relationships at work. Additionally, this program offers volunteering opportunities around a major holiday season in many parts of the world, a time when many are seeking opportunities to give back.

Team Member Benefits of Volunteerism

- Develop new skills and knowledge
- Expand your professional network and connections
- Understand the nonprofit community's needs and how your skills can help
- Make a meaningful difference in your community

Importance of Volunteerism at GitLab

- Provide an additional option for team members to volunteer and make a positive impact beyond the impact team members make every day by contributing to GitLab - the platform and the company
- Provide another way for team members to embody our CREDIT values through volunteerism and social impact
- Expand GitLab's positive impact across communities
- Build trust amongst team members through social connections
- Boost team member engagement

Utilizing GitLab's PTO Policy to Volunteer

Team member participation is voluntary, should not interfere with work commitments, and time off is required to be in alignment with GitLab's PTO policy. Travel is not permitted for this program. Team Members may choose to volunteer virtually or through local in-person events.

Volunteer events typically last between one and four hours. Managers play an important role in supporting team members in taking time for themselves and their families, while also ensuring accountability to results and coverage for teams and its goals. Our Results for Customers value sits at the top of our values hierarchy, and our PTO policy empowers managers to appropriately manage workloads and deliverables, while also giving team members the time away they need from work.

How to Request Volunteer Time Off

Team Members taking time off to volunteer should communicate time off in advance with their manager. To request volunteer time off, follow the Paid Time Off procedures outlined in our handbook and reach out to People Connect via HelpLab should you have any concerns. A step-by-step guide on how to request paid time off can be found [here](#). Note that volunteer time off should be used towards acceptable volunteer activities and in adherence with our GitLab Philanthropy Policy.

Expenses and Reimbursements for Participation

Please see our GiveLab reimbursement policy to understand current allowances as they relate to volunteering costs.

GiveLab Volunteer Directory

We have created an internal GiveLab Volunteer Directory that features a list of vetted nonprofit organizations with available volunteer opportunities. Team members can search the document for virtual volunteer opportunities, opportunities to volunteer with GitLab Foundation grantees and search for local opportunities.

We encourage all team members to contribute to our GiveLab Volunteer Directory. To recommend a nonprofit organization to add to the Directory, please open a Volunteer Recommendation Issue.

GiveLab Champions

The GiveLab Champions are team members who are passionate about giving back to their communities and want to encourage other team members to do the same.

GiveLab Champions self-identify to participate in the voluntary Champions group, managed by the Sustainability team. The GiveLab Champions help activate the GiveLab signature program (launching Fall of 2024), but also work to organize and promote volunteer opportunities year-round.

The importance of GiveLab Champions

GiveLab Champions help team members build trust through social connections, build connections within their communities, and help GitLab provide meaningful opportunities for team members to give back. The GiveLab Champions ensure global voices are heard and relevant causes are represented based on where team members live. GiveLab Champions help to make GitLab a better place to work.

Team member benefits of volunteering

Champions introduce new and current team members to GitLab's culture and help to build and maintain engagement

Champions help build trust through social connections

Champions have the opportunity to develop professional and leadership skills, build relationships across the company and make a difference at work and in local communities

Champions can network and provide positive impacts to the business

GiveLab Champion responsibilities

Recommend local Registered Nonprofit Organizations that meet GitLab's eligibility criteria for
