

chase from an Authorized Partner.

3.3 GitLab and Customer acknowledge and agree that Free Software may be: (i) modified and/or updated, without notice, and (ii) limited in functionality, features, maintenance, support and contain other limitations not present in Software purchased. NOTWITHSTANDING THE ·WARRANTY· AND ·INDEMNIFICATION· SECTIONS BELOW, FREE SOFTWARE AND SOFTWARE OFFERED ON A TRIAL (AS STATED IN AN ORDER FORM OR WEB-PORTAL PURCHASE) ARE PROVIDED ·AS-IS· WITHOUT ANY WARRANTY. GITLAB SHALL HAVE NO INDEMNIFICATION OBLIGATIONS NOR LIABILITY OF ANY TYPE WITH RESPECT TO FREE SOFTWARE UNLESS SUCH EXCLUSION OF LIABILITY IS NOT ENFORCEABLE UNDER APPLICABLE LAW. IN WHICH CASE GITLAB'S LIABILITY WITH RESPECT TO SUCH FREE SOFTWARE SHALL NOT EXCEED THE AMOUNT PAID BY CUSTOMER FOR SUCH SOFTWARE.

4. TERM AND TERMINATION; SUSPENSION

4.1 The Agreement commences on the Effective Date and continues until it is terminated in accordance with this Section 4.

4.2 A Subscription Term shall begin as of the Subscription Start Date and remain in effect for the term length as indicated on the Order Form (the ·Initial Term·). The Subscription Term will automatically renew for successive twelve (12) month terms (each a ·Renewal Term·), for the same number of User licenses purchased in the most recent Subscription Term, plus any Add-On Users activated and/or used during such Subscription Term, unless either party gives notice of its intention not to renew thirty (30) days prior to the expiration of the current Subscription Term, or as otherwise agreed to between the parties. Customer shall have the right to opt-out of such renewal, from within the Software, commencing upon the Subscription Start Date until thirty (30) days prior to the expiration of the Subscription Term. All Subscriptions (either used or unused) expire at the end of the Subscription Term unless renewed as set forth herein.

4.3 Either party may terminate this Agreement and any Order Form executed between the parties if:

(i) the other party materially breaches this Agreement and does not cure the breach within thirty (30) days after written notice; or

(ii) the other party becomes the subject of a petition in bankruptcy or any other proceeding relating to insolvency, receivership, liquidation or assignment for the benefit of creditors.

4.4 GitLab may suspend Customer's access to the Software or Supplemental Services due to a Suspension Event. As applicable, GitLab will give Customer prior notice and a reasonable opportunity to resolve or otherwise cure the issue and avoid suspension. GitLab is not required to give prior notice in exigent circumstances, or for suspension of access to avoid material harm or violation of legal or regulatory requirements. Upon resolution of a Suspension Event, GitLab will promptly restore Customer's access to the Software or Supplemental Services as applicable. Notwithstanding the foregoing, GitLab may avail itself of any other remedy under this Agreement, including terminating this Agreement under Section 4.3. For the purposes of this Agreement, ·Suspension Event· means Customer's (i) payment obligations that are thirty (30) days or more past due; (ii) breach of Section 6 (Payment of Fees), or (iii) use of the Software or Supplemental Services in breach of Section 5 (Restrictions and Responsibilities).

4.5 Unless otherwise stated herein, termination of this Agreement shall not affect any

Subscriptions currently being delivered and this Agreement shall remain in full force and effect until the expiration of the then-current Subscription Term. In the event this Agreement is terminated by Customer in accordance with Section 4.3, GitLab will refund Customer any prepaid Fees for the prorated portion of unused Subscription Term. If this Agreement is terminated by GitLab in accordance with this Section 4.3, Customer will pay (if applicable) any unpaid Fees covering the remainder of the Subscription Term of all Order Forms, to the extent permitted by applicable law. For the avoidance of doubt, in no event will termination relieve Customer of its obligation to pay any Fees payable to GitLab for the period prior to the effective date of termination. The terms and conditions of this Agreement will apply to any Renewal Term(s) provided that, unless otherwise set forth in an Order Form, Website purchase or other written agreement between the Parties, GitLab's then-current List Price will apply with regard to any such Renewal Term(s). GitLab reserves the right to (i) increase fees for any Renewal Term(s) with respect to its products and services, including the Software and Supplemental Services, or (ii) offer alternative pricing and conditions should Customer modify the selection, or otherwise reduce the number of User licenses, with regard to such products and services upon any such Renewal(s).

5. RESTRICTIONS AND RESPONSIBILITIES

5.1 Customer will not, and will not permit any third party to (not otherwise defined as a User):

(i) use the Software for any purpose other than as specifically authorized in the Documentation and this Agreement;

(ii) use the Software in violation of the Acceptable Use Policy available at <https://about.gitlab.com/terms/current-terms-of-use>;

(iii) use the Software in such a manner that would enable any third party to access the Software;

(iv) use the Software for time sharing or service bureau purposes (including without limitation, sublicensing, distributing, selling, reselling any Software);

(v) for any purpose other than its and its Affiliates' own internal use;

(vi) use the Software other than in compliance with all applicable laws and regulations;

(vii) use the Software in any manner that: (a) is harmful, fraudulent, deceptive, threatening, abusive, harassing, tortious, defamatory, vulgar, obscene, or libelous (including without limitation, accessing any computer, computer system, network, software, or data without authorization, breaching the security of another user or system, and/or attempting to circumvent any User authentication or security process); (b) impersonates any person or entity, including without limitation any employee or representative of GitLab; (c) includes content, with respect to the use of SaaS Software, which is illegal or (d) introduces any virus, trojan horse, worm, time bomb, unsolicited bulk, commercial, or "spam" message, or other harmful computer code, file, or program (including without limitation, password guessing programs, decoders, password gatherers, keystroke loggers, cracking tools, packet sniffers, and/or encryption circumvention programs); and

(viii) except to the extent permitted by applicable law, disassemble, reverse engineer, or decompile the Software or access it to: (a) build a competitive product or service, (b) build a product or service using similar ideas, features, functions or graphics of the Software, (c) copy any ideas, features, functions or graphics of the Software, or (d) determine whether the Software are within the scope of any patent.

5.2 Nothing in this Agreement shall prohibit Customer from using the Software for benchmark testing or comparative analysis. Customer will comply with all applicable data privacy and security laws and shall have appropriate technological, administrative, and physical controls in place to ensure such compliance.

5.3 In accordance with this Agreement and the Documentation, GitLab has the right to (i) verify electronically (or otherwise), and generate, or (ii) require Customer to generate and provide, reports related to Customer's installation of, access to, and use of the Software to ensure compliance with the terms of this Agreement. Customer shall maintain Customer Records during the term of this Agreement and for two (2) years thereafter. GitLab may, upon thirty (30) days' prior written notice to Customer and during Customer's normal business hours and subject to industry-standard confidentiality obligations, hire an independent third-party auditor to audit the Customer Records only to verify the amounts payable under this Agreement with respect to Customer usage of the Software. If an audit reveals underpayment, Customer shall promptly pay the deficiency to GitLab plus late fees pursuant to Section 6. GitLab shall bear the cost of an audit unless the audit reveals underpayment by more than 5% for the audited period, in which case Customer shall promptly pay GitLab for the reasonable costs of the audit.

5.4 Customer will be responsible for the following: (i) maintaining the security of Customer's account, passwords (including, but not limited to, administrative and User passwords) and files, and for all uses of Customer account with or without Customer's knowledge or consent; and (ii) any acts or omissions carried out by Contractors on Customer's behalf. Customer shall ensure that Contractors are subject to terms no less stringent than those stated herein.

5.5 Subject to this Agreement and the applicable Order Form, GitLab will provide Customer Support to Customer for the Subscriptions, during the Subscription Term, at no additional cost. Details regarding Customer Support can be found in Appendix 1, as well as at <https://about.gitlab.com/support>, as updated from time to time.

5.6 Portions of the Software are governed by underlying open source licenses as described at <https://docs.gitlab.com/ee/development/licensing.html>. This Agreement and applicable Appendix(es) establish the rights and obligations associated with Subscriptions and Software and are not intended to limit Customer's right to software code under the terms of an open source license.

5.7 Customer acknowledges and agrees that:

- (i) Account names are administered by GitLab on a 'first come, first serve' basis;
- (ii) Intentional name squatting, or purchasing, soliciting, or selling of an account name is prohibited; and
- (iii) GitLab reserves the right to remove, rename, or close inactive accounts at its discretion.

6. PAYMENT OF FEES

6.1 With respect to purchases direct from GitLab, all web-portal purchase Fees shall be due and payable immediately.

6.2 With respect to purchases direct from GitLab, the Order Form shall: (i) reference this Agreement; (ii) state the Subscription Term(s) and Subscription(s) that are being purchased; and (iii) state the Fees due for the applicable Subscription(s).

6.3 With respect to purchases direct from GitLab, such Order Form is hereby incorporated into this Agreement by reference. The parties hereby agree to the terms and conditions stated within this Agreement and those found within an Order Form to the exclusion of all other terms. The parties agree that all terms stated within a Purchase Order, or other similar document, shall be null and void and are expressly rejected.

6.4 With respect to purchases direct from GitLab, Customer will pay GitLab the applicable Fees, without any right of set-off or deduction. All payments will be made in accordance with the payment details stated within the applicable Order Form. If not otherwise specified: (i) GitLab (or applicable GitLab Affiliate) will invoice Customer for the Fees upon the Acceptance of an Order Form; and (ii) all undisputed Fees will be due and payable within thirty (30) days of Customer's receipt of an invoice. Except as expressly set forth in this Agreement, all Fees paid or due hereunder (including prepaid amounts) are non-refundable, and no credit will be due, including without limitation if this Agreement is terminated in accordance with Section 4 herein. For the avoidance of doubt, Fees shall be in U.S. Dollars unless otherwise set forth in an Order Form.

6.5 During the Subscription Term, Customer may, subject to this Agreement, activate and use Add-On Users. For the avoidance of doubt, Customer shall not have the right to report less than the number of Users originally purchased under the Subscription, and all Add-On Users shall be co-terminated to the underlying Subscription Term.

6.6 With respect to purchases direct from GitLab, at the end of each three (3) month period, commencing up on the Subscription Start Date, (referred to herein as "Quarter" or "Quarterly") during the Subscription Term, GitLab will: (i) per Section 5.3, generate a report of Add-On User(s) activated and/or used during the Quarter ("Quarterly Usage Report"), and (ii) invoice Customer on a prorated basis for the remaining portion of the Subscription Term, with respect to the Add-On User(s) activated and/or used during the Quarter as captured by the Quarterly Usage Report. For the avoidance of doubt, Add-On User(s) will not be invoiced for the Quarter in which they were activated and/or used. A Quarterly Usage Report will be generated during the first three (3) Quarters of a Subscription Term. Upon expiration of the Subscription Term, Customer's renewal of the Software shall be for the same number of User licenses purchased for the most recent Subscription Term, plus any Add-On Users activated and/or used during such Subscription Term, unless otherwise agreed to between the parties. Add-On User(s) that have been identified within the Quarterly Usage Report, shall be considered due and payable in accordance with this Section 6. In the event a Quarterly Usage Report cannot be generated, Customer shall report and pay for such Overage Users (as defined below) in compliance with Section 6.7. Unless the parties agree to an Effective Price for Add-On Users which is less than the List Price, as set forth in an Order Form or Website purchase, Add-On Users activated and/or used during a Subscription Term will be invoiced at the List Price in the most recent Order Form or Website purchase.

6.7 In the event a Customer procures Software from an Authorized Partner, or, GitLab is unable to: (i) verify and generate a Quarterly Usage Report, and/or (ii) collect payment(s) with respect to Quarterly Add-Ons as provided in the Quarterly Usage Report, Customer shall be obligated to: (a) provide a report no later than twelve (12) months following the Subscription Effective Date (·Annual Report·) of all Users from said Subscription Term (·Overage Users·), and (b) be obligated to pay for such Overage Users, for the previous twelve (12) months, at the then current List Price for the GitLab Software. Overage Users subject to the Annual Report shall not include any pro-ration, set-off and/or deduction to account for term of use, or otherwise. Overage Users that have been identified in an Annual Report shall be considered due and payable in accordance with Section 6. In the event Overage Users are outstanding upon the expiration of a Subscription Term, Customer shall be obligated to pay for such Overage Users in order to renew the Software.

6.8 Any unpaid Fees are subject to a finance charge of one percent (1.0%) per month, or the maximum permitted by law, whichever is lower, plus all expenses of collection, including reasonable attorneys' fees. Fees under this Agreement are exclusive of any and all taxes or duties, now or hereafter imposed by any governmental authority, including, but not limited to any national, state or provincial tax, sales tax, value-added tax, property and similar taxes, if any. Fees under this Agreement shall be paid without any withholding or deduction. In the case of any deduction or withholding requirements, Customer will pay any required withholding itself and will not reduce the amount to be paid to GitLab on account thereof.

7. CONFIDENTIALITY

7.1 Each party (the ·Receiving Party·) understands that the other party (the ·Disclosing Party·) has disclosed or may disclose information relating to the Disclosing Party's technology or business (hereinafter referred to as ·Confidential Information·). Such Confidential Information shall be either: (i) identified as confidential at the time of disclosure; or (ii) the nature of such information and/or the manner of disclosure are such that a reasonable person would understand it to be confidential. Without limiting the foregoing, and subject to applicable open source license(s), the Software is considered GitLab Confidential Information.

7.2 The Receiving Party agrees: (i) not to divulge to any third person any such Confidential Information; (ii) to give access to such Confidential Information solely to those employees with a need to have access thereto for purposes of this Agreement; and (iii) to take the same security precautions to protect against disclosure or unauthorized use of such Confidential Information that the party takes with its own confidential information, but in no event will a party apply less than reasonable precautions to protect such Confidential Information.

7.3 The Disclosing Party agrees that Section 7.2 will not apply with respect to any information for which the Receiving Party can document: (i) is or becomes generally available to the public without any action by, or involvement of, the Receiving Party; or (ii) was in its possession or known by it prior to receipt from the Disclosing Party; or (iii) was rightfully disclosed to it without restriction by a third party, or (iv) was independently developed without use of any Confidential Information of the Disclosing Party.

7.4 The parties' obligations with respect to the protection of Confidential Information shall remain in force for a period three (3) years following the receipt of such Confidential Information and shall survive any termination or expiration of this Agreement.

7.5 Nothing in this Agreement will prevent the Receiving Party from disclosing Confidential Information pursuant to any judicial or governmental order, provided that the Receiving Party gives the Disclosing Party, when legally possible, reasonable prior notice of such disclosure to allow the Disclosing Party, at Disclosing Party's cost, a reasonable opportunity to request confidential treatment or a protective order pertaining thereto prior to Receiving Party making such disclosure.

7.6 Each party acknowledges and agrees that the other may suffer irreparable damage in the event of a breach of the terms of this Section 7 and that such party will be entitled to seek injunctive relief (without the necessity of posting a bond) in the event of any such breach.

7.7 Both parties will have the right to disclose Confidential Information in connection with: (i) a required filing to a governmental authority (provided such party will use reasonable efforts to obtain confidential treatment or a protective order), or (ii) disclosures made to potential investors or acquirers, provided that at all times the Confidential Information shall be protected in a manner no less stringent as set forth in this Section 7.

7.8 GitLab may collect data with respect to, and report on the aggregate response rate and other de-identified measures of, the Software performance and Customer's usage of the Software. An overview of such data can be found at <https://handbook.gitlab.com/handbook/legal/privacy/customer-product-usage-information/>. Notwithstanding the foregoing, GitLab will not identify Customer to any third party as the source of any such data without Customer's prior written consent.

8. INTELLECTUAL PROPERTY RIGHTS

8.1 Subject to the terms and conditions of this Agreement, GitLab hereby grants to Customer and its Affiliates:

(i) with respect to SaaS Software, a limited, non-exclusive, non-transferable, non-sublicensable right to access and use the SaaS Software;

(ii) with respect to Software downloaded and deployed on the Customer's infrastructure (i.e. self-managed), a limited, non-exclusive, non-transferable, non-sublicensable license to download, deploy, and use the Software.

In each case, unless otherwise set forth in an Order Form, Customer's use rights will be limited (a) to the tier level selected via web direct or Order Form purchase where such selected tier (e.g. Premium/Ultimate) may not be commingled with another tier; (b) exclusively for internal use in connection with the development of Customer's and/or its Affiliates' own software; and (c) to the number of Users for which Customer has paid GitLab. Notwithstanding anything to the contrary, Customer agrees that GitLab and/or its licensors (as applicable) retain all right, title and interest in and to all Software, and all Software may only be used in full compliance with this Agreement and with a valid Subscription for the correct number of Users.

8.2 Except as expressly set forth herein, GitLab (and its licensors, where applicable) will retain all intellectual property rights relating to the Software and any suggestions, ideas, enhancement requests, feedback, or other recommendations provided by Customer, its Affiliates, Users or any third party relating to the Software (herein referred to as 'Feedback Materials'),

which are hereby assigned to GitLab. For the avoidance of doubt, Feedback Materials shall not include Customer Confidential Information or intellectual property owned by Customer. This Agreement does not constitute a sale of the Software and does not convey to Customer any rights of ownership in or related to the Software or any other intellectual property rights.

8.3 Customer shall not remove, alter or obscure any of GitLab's (or its licensors') copyright notices, proprietary legends, trademark or service mark attributions, patent markings or other indicia of GitLab's (or its licensors') ownership or contribution from the Software.

8.4 Subject to Section 8.5, Customer represents it shall be responsible for, and retain all right, title, and interest in and to, Customer Content, subject to a limited license to GitLab necessary for GitLab's provision of the Software and its development and improvement.

8.5 If Customer applies a license to publicly-available Customer Content within the Software, Customer (i) licenses that Customer Content under the terms of the applicable license; and (ii) represents that Customer has sufficient rights in that Customer Content to do so.

8.6 Customer grants to GitLab the right to use Customer's company name and logo in marketing and promotional materials, including earnings releases and calls, subject to Customer's brand and trademark guidelines as provided to GitLab from time to time.

9. WARRANTY

9.1 During the Subscription Term, GitLab represents and warrants that: (i) it has the authority to enter into this Agreement; (ii) the Software shall be provided in a professional and workmanlike manner by qualified personnel; and (iii) it will use commercial industry standard methods designed to ensure the Software provided to Customer does not include any computer code or other instructions, devices or techniques, including without limitation those known as disabling devices, trojans, or time bombs, that are intentionally designed to disrupt, disable, harm, infect, defraud, damage, or otherwise impede in any manner, the operation of a network, computer program or computer system or any component thereof, including its security or User data.

9.2 If at any time GitLab fails to comply with the warranties in this Section 9, Customer may promptly notify GitLab in writing of any such noncompliance. GitLab will, within thirty (30) days of receipt of such written notification, either correct the noncompliance or provide Customer with a plan for correcting the noncompliance. If the noncompliance is not corrected or if a reasonably acceptable plan for correcting the non-compliance is not established during such period, Customer may terminate this Agreement and receive a prorated refund for the unused portion of the Subscription Term as its sole and exclusive remedy for such noncompliance.

9.3 EXCEPT AS SPECIFICALLY SET FORTH IN THIS AGREEMENT, THE SOFTWARE, SUPPLEMENTAL MATERIALS, AND ANYTHING PROVIDED IN CONNECTION WITH THIS AGREEMENT ARE PROVIDED "AS-IS," WITHOUT ANY WARRANTIES OF ANY KIND. GITLAB AND ITS LICENSORS HEREBY DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT.

10. INDEMNIFICATION

10.1 GitLab will defend Customer from any claim, demand, suit or proceeding made or brought

against Customer by a third party alleging the Software (excluding Free Software as set forth in Section 3.3) provided by GitLab infringes or misappropriates such third party's patent, copyright, trademarks, or trade secrets (a "Customer Claim"). GitLab will indemnify and hold Customer harmless from any damages, reasonable attorneys' fees and costs finally awarded against Customer as a result of a Customer Claim, or for amounts paid by Customer under a settlement approved (in writing) by GitLab, provided Customer: (i) promptly notifies GitLab in writing of the Customer Claim; (ii) gives GitLab all reasonable assistance at GitLab's expense; and (iii) gives GitLab sole control over defense and settlement thereof except that GitLab may not settle any Customer Claim unless it unconditionally releases Customer of all liability. The foregoing obligations do not apply if: (v) the Customer Claim arises from Software, or any part thereof, that is modified by Customer, or at Customer's direction, after delivery by GitLab; (w) the Customer Claim arises from the use or combination of the Software or any part thereof with other products, processes or materials not provided by GitLab where the alleged infringement relates to such combination; (x) Customer continues allegedly infringing activity after being notified thereof or after being informed of modifications that would have avoided the alleged infringement; (y) the Customer Claim arises from software not created by GitLab, or (z) the Customer Claim results from Customer's breach of this Agreement and/or applicable Order Forms. Notwithstanding the foregoing, in the event of a Customer Claim, GitLab, at its discretion, option and expense, reserves the rights to: (a) modify the Software to make it non-infringing provided there is no material loss of functionality; (b) settle such claim by procuring the right for Customer to continue using the Software; or (c) if in GitLab's reasonable opinion neither (a) or (b) are commercially feasible, terminate the license to the Software and refund a pro-rata portion of the amount paid by Customer for such Software for the unused portion of the Subscription Term.

10.2 Customer will defend GitLab and its Affiliates against any claim, demand, suit or proceeding made or brought against GitLab by a third party alleging: (i) that any Customer Content or Customer's use of Customer Content with the Software or any software (or combination of software) provided by Customer and used with the Software, infringes or misappropriates such third party's intellectual property rights, or (ii) that Customer uses the Software in an unlawful manner or in violation of the Agreement, the applicable Documentation, or Order Form (each a "GitLab Claim"). Customer will indemnify GitLab from any damages, reasonable attorneys' fees and costs finally awarded against GitLab as a result of, or for any amounts paid by GitLab under a settlement approved (in writing) by Customer of a GitLab Claim, provided GitLab: (x) promptly gives Customer written notice of the GitLab Claim, (y) gives Customer sole control of the defense and settlement of the GitLab Claim (except that Customer may not settle any GitLab Claim unless it unconditionally releases GitLab of all liability), and (z) gives Customer all reasonable assistance, at Customer's expense. The above defense and indemnification obligations do not apply if a GitLab Claim arises from GitLab's breach of this Agreement and/or applicable Order Form.

10.3 This Section 10 (Indemnification) states the indemnifying party's sole liability to, and the indemnified party's exclusive remedy against the other party for any third-party claim described in this section.

11. LIMITATION OF LIABILITY

11.1 TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT WILL EITHER PARTY OR ITS LICENSORS BE LIABLE FOR ANY INDIRECT, PUNITIVE, INCIDENTAL, SPECIAL, CONSEQUENTIAL DAMAGES, INCLUDING BUT NOT LIMITED TO, LOSS OF REVENUE, ANTICIPATED PROFITS, LOST BUSINESS OR LOST SALES, WHETHER BASED

TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, OR OTHERWISE, EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF DAMAGES.

11.2 TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THE TOTAL LIABILITY OF EACH PARTY AND ITS AFFILIATES AND LICENSORS ARISING OUT OF OR RELATED TO THIS AGREEMENT, WHETHER CONTRACT, TORT (INCLUDING NEGLIGENCE OR STRICT LIABILITY), OR OTHERWISE, WILL NOT EXCEED THE AGGREGATE, THE TOTAL AMOUNT PAID BY CUSTOMER OR ITS AFFILIATES HEREUNDER IN THE PERIOD PRECEDING THE FIRST INCIDENT OUT OF WHICH THE LIABILITY AROSE. THE FOREGOING WILL APPLY NOTWITHSTANDING ANY FAILURE OF ESSENTIAL PURPOSE OF ANY LIMITED REMEDY. LIMIT CUSTOMER'S OR ITS AFFILIATES' PAYMENT OBLIGATIONS UNDER THE PAYMENT OF FEES ABOVE.

12. U.S. GOVERNMENT MATTERS

12.1 Notwithstanding anything else, Customer acknowledges that Controlled Subject Matter is subject to trade control laws and regulations, including the U.S. Export Administration Regulations (·EAR·) and various sanctions programs administered by the U.S. Office of Foreign Assets Control (·OFAC·). Customer shall not export, re-export, or transfer the Controlled Subject Matter except as authorized by these laws and regulations.

12.2 Without limiting the foregoing, Customer shall not export, re-export, or transfer the Controlled Subject Matter without authorization (i) to any Embargoed Country or region, including Cuba, Iran, North Korea, Syria, or the Crimea, Donetsk, and Luhansk regions of Ukraine, (ii) to Russia or Belarus, (iii) to any party identified on or subject to the limitations of OFAC's Specially Designated Nationals List, the Bureau of Industry and Security's Entity, Unverified, or Denied Persons Lists, or (iv) for any end use or end user prohibited by 15 C.F.R. 744, including, without limitation, proliferation activities relating to nuclear, missile, or chemical and biological weapons.

12.3 Use of the Software is representation and warranty that the Customer, Customer personnel, or Contractors are not located in, under the control of, or a national or resident of an Embargoed Country or a Designated National.

12.4 As defined in FAR section 2.101, any software and documentation provided by GitLab are ·commercial items· and according to DFAR section 252.2277014(a)(1) and (5) are deemed to be ·commercial computer software· and ·commercial computer software documentation·. Consistent with DFAR section 227.7202 and FAR section 12.212, any use, modification, reproduction, release, performance, display, or disclosure of such commercial software or commercial software documentation by the U.S. Government will be governed solely by the terms of this Agreement and will be prohibited except to the extent expressly permitted by the terms of this Agreement.

13. FORCE MAJEURE

13.1 GitLab and Customer will not be liable for any default or delay in the performance of their respective non-monetary obligations, to the extent that such default or delay is caused, directly or indirectly, by fire, flood, earthquake, explosions, elements of nature, acts of God, acts or regulations of government bodies, nuclear, chemical or biological contamination, court orders arising out of circumstances other than a breach of this Agreement by the Non-performing Party (as defined below), acts of war, terrorism, riots, civil disorders, rebellions or revolutions, strikes, lockouts or labor difficulties, epidemics or by any other event or circumstance that is beyond the reasonable control of GitLab or Customer. The party that is

unable to perform shall be referred to as the ·Non-performing Party·. Such an event or circumstance giving rise to the default or delay is hereby referred to as a ·Force Majeure Event·.

13.2 The Non-performing Party will be excused from any further performance of the non-monetary obligations affected by such Force Majeure Event for as long as such Force Majeure Event continues and the Non-performing Party continues to use commercially reasonable efforts to resume performance. The Non-Performing Party may terminate this Agreement if the Force Majeure Event continues for a period of thirty (30) days.

13.3 Except as expressly excused in this Section 13, each party will continue to perform its respective obligations under this Agreement during a Force Majeure Event.

14. SECURITY / DATA PROTECTION

14.1 Without limiting GitLab's obligations as stated in Section 7 (Confidentiality), GitLab shall be responsible for establishing and maintaining a commercially reasonable information security program that is designed to: (i) ensure the security and confidentiality of the Customer Content; (ii) protect against any anticipated threats or hazards to the security or integrity of the Customer Content; (iii) protect against unauthorized access to, or use of, the Customer Content; and (iv) ensure that all subcontractors of GitLab, if any, comply with all of the foregoing. In no case shall the safeguards of GitLab's information security program be less stringent than the information security safeguards used by GitLab to protect its own commercially sensitive data. Customer shall use commercially reasonable security and anti-virus measures when accessing and using the Software and to prevent unauthorized access to, or use of the Software, and notify GitLab promptly of any such unauthorized access or use of which it becomes aware.

14.2 With respect to the protection of information, the GitLab Privacy Statement located here <<https://about.gitlab.com/privacy/>>, shall apply. If this Agreement is entered into on behalf of an Enterprise, the terms of the data processing addendum at <<https://handbook.gitlab.com/handbook/legal/data-processing-agreement/>> (·DPA·) are hereby incorporated by reference and shall apply to the extent Customer Content includes Personal Data, as defined in the DPA. To the extent Personal Data from the European Economic Area (EEA), the United Kingdom and Switzerland are processed by GitLab, the Standard Contractual Clauses shall apply, as further set forth in the DPA. For the purposes of the Standard Contractual Clauses, Customer and its applicable Affiliates are each the data exporter, and Customer's acceptance of this Agreement, and an applicable Affiliate's execution of an Order Form, shall be treated as its execution of the Standard Contractual Clauses.

14.3 The parties acknowledge and agree that: (i) the Software is not designed for the purpose(s) of storing, processing, compiling or transmitting Sensitive Data (as defined herein), and (ii) Customer shall not use the Software, or otherwise provide to GitLab without prior written consent, Sensitive Data under this Agreement. ·Sensitive Data· means: (a) special categories of data enumerated in European Union Regulation 2016/679, Article 9(1) or any successor legislation; (b) patient, medical, or other protected health information regulated by the Health Insurance Portability and Accountability Act (as amended and supplemented) (·HIPAA·); (c) credit, debit, or other payment card data or financial account information, including bank account numbers or other personally identifiable financial information; (d) social security numbers, driver's license numbers, or other government identification numbers;

(e) other information subject to regulation or protection under specific laws such as the Children's Online Privacy Protection Act or Gramm-Leach-Bliley Act (·GLBA·) (or related rules or regulations); or (f) any data similar to the above protected under foreign or domestic laws. Customer further acknowledges that the Software and related features are not intended to meet any legal obligations for these uses, including HIPAA and GLBA requirements, and that GitLab is not a Business Associate as defined under HIPAA. Therefore, notwithstanding anything else in this Agreement, GitLab has no liability for Sensitive Data processed in connection with Customer's use of the Software.

14.4 To the extent Customer has Users of the SaaS Software located in the People's Republic of China, or transfers Personal Data to a Dedicated instance from the People's Republic of China, Customer represents and warrants that it has complied with all requirements of a ·personal information processor· as that term is defined under the Personal Information and Protection Law of the People's Republic of China (·PIPL·). This includes the requirement to provide adequate notice and obtain all necessary consents from relevant Users prior to the overseas transfer and processing of Personal Data by GitLab, as well as onward transfers and processing by GitLab's third-party subprocessors. In addition, Customer warrants, where required, that it will not transfer Personal Data without a security assessment, as described in PIPL, from the Cyberspace Administration of China. Nothing in this section limits GitLab or Customer's obligations under the DPA.

15. MISCELLANEOUS

15.1 If any provision of this Agreement is found to be unenforceable or invalid, that provision will be limited or eliminated to the minimum extent necessary so that this Agreement will otherwise remain in full force and effect and enforceable.

15.2 This Agreement is not assignable, transferable or sublicensable by either party without the other party's prior written consent, not to be unreasonably withheld or delayed; provided that either party may transfer and/or assign this Agreement to a successor in the event of a sale of all, or substantially all, of its business or assets to which this Agreement relates.

15.3 Except as otherwise provided in this Section 15.3, this Agreement is the complete and exclusive statement of the mutual understanding of the parties and supersedes and cancels all previous written and oral agreements, communications and other understandings relating to the subject matter of this Agreement. All waivers and modifications to this Agreement must be in a writing signed or otherwise agreed to by each party, except as otherwise provided herein. Notwithstanding anything to the contrary in the foregoing (i) GitLab may, from time to time, offer certain experimental or beta features or products in the Software and (ii) Customer acknowledges and agrees that (a) access to and use of Testing Features will be governed by the Testing Agreement available at: <<https://about.gitlab.com/terms/>> and (b) Customer's access or use of such Testing Features will constitute Customer's acceptance of such Testing Agreement.

15.4 No agency, partnership, joint venture, or employment is created as a result of this Agreement and neither party has any authority of any kind to bind the other in any respect whatsoever.

15.5 In any action or proceeding to enforce rights under this Agreement, the prevailing party will be entitled to recover costs and attorneys' fees.

15.6 All notices under this Agreement will be in writing and will be deemed to have been duly given when received, if personally delivered; when receipt is electronically confirmed, if transmitted by facsimile or e-mail; and upon receipt, if sent by certified or registered mail (return receipt requested), postage prepaid. Any notices to GitLab shall also include a copy to legal@gitlab.com.

15.7 In addition to any rights that accrued prior to termination, the provisions of Sections 3.3, and 5 through 15 shall survive any termination of this Agreement.

15.8 This Agreement will be governed by the laws of the State of California, U.S.A. without regard to its conflict of laws provisions. The federal and state courts sitting in San Francisco County, California, U.S.A. will have proper and exclusive jurisdiction and venue with respect to any disputes arising from or related to the subject matter of this Agreement. The United Nations Convention on Contracts for the International Sale of Goods is expressly disclaimed by the Parties with respect to this Agreement and the transactions contemplated hereby. GitLab may provide translations of this Agreement or other terms or policies. Translations are provided for informational purposes only and if there is any inconsistency or conflict between a translation and the English version, the English version will control.

APPENDIX 1: GitLab Subscriptions

Fees for the Subscriptions are based upon the number of Users and the applicable level of support and/or functionality of the Software, as set forth in the table below. In the event Customer does not reasonably comply with written specifications or instructions from GitLab's service engineers, regarding any support issue or request (including without limitation, failure to make backups of Customer Content or versions of Software) (each, a "Support Issue"), GitLab may cease its support obligations to Customer with respect to such Support Issue upon fifteen (15) days written notice and Customer's inability to cure such noncompliance within the notice period.

SUBSCRIPTIONS AND LEVELS OF SUPPORT

Subscription	Level of Support (First Response Time)
Support Details	
-----	-----
-----	-----
-----	-----
Free (Formerly "Core" or "Free")	GitLab Community Forum
Starter (F.K.A "Basic" or "Bronze")	GitLab Standard Support
24 x 5 Support Next business day response (24 hour SLA) Submit Tickets at	
< https://support.gitlab.com >	
Premium (Formerly Premium or Silver)	Priority Support (Based upon Support Impact) See
Priority Support Overview < https://support.gitlab.com >	
Ultimate (Formerly Gold or Ultimate)	Priority Support (Based upon Support Impact)
See Priority Support Overview < https://support.gitlab.com >	

Note: Subscription names are subject to change, however, the applicable Subscription for that tier shall remain the same during a Subscription Term.

Support Impact categories are defined at: <<https://about.gitlab.com/support/definitions-of-support-impact>>

PRIORITY SUPPORT OVERVIEW: <<https://about.gitlab.com/support/priority-support>>

CUSTOMER SUCCESS SERVICES

Customer Success Services include additional assistance with respect to Customer's use of the GitLab Software. Customer Success Services are provided at no charge, an overview of the Customer Success Services can be found at <<https://about.gitlab.com/services/customer-success-services/>>. In order to receive Customer Success Service(s), Customer acknowledges and agrees that additional data and information (·Operational Data·) will be collected. An overview of Operational Data can be found at: <<https://gitlab-org.gitlab.io/growth/product-intelligence/metric-dictionary/?datacategory=operational>>.

APPENDIX 2: Software as a Service (SaaS) Offering

With respect to Customer's purchase and/or use of the SaaS Software, the following additional terms shall apply.

AVAILABILITY

Availability to the SaaS Software will be measured, and reported on, by GitLab using instrumentation and observation tools specifically designed to provide a representative measure of service availability. Recent status, references to availability measurement definition, and historical reporting will be available at or linked from the GitLab system status site located at <<https://handbook.gitlab.com/handbook/engineering/monitoring/gitlabcom-service-level-availability>>.

RESILIENCY

GitLab will architect and maintain an underlying cloud infrastructure with commercially reasonable resiliency for all data, compute, and network services. At a minimum, GitLab will maintain the highest documented level of ·GitLab Reference Architecture· as detailed at <<https://docs.gitlab.com>>.

BACKUPS

GitLab will maintain a commercially reasonable system of data backup process and technology to ensure that primary data sources remain recoverable in the event of various system failures.

MONITORING AND INCIDENT RESPONSE

GitLab will employ a system of instrumentation and observation tools to ensure that system behavior which may limit use of the SaaS Software is detected and announced. GitLab will also employ industry reasonable practices to maintain appropriate engineering personnel availability for the purposes of incident response(s).

UPDATES AND UPGRADES

GitLab will update the SaaS Software as updates are available and when reasonably practical to implement said updates. Update timing and process will remain at GitLab's discretion.

SCHEDULED SYSTEM MAINTENANCE

GitLab will occasionally perform scheduled system maintenance which requires limits to the use of part or all of the SaaS Software features, or significantly reduces features and functions during the scheduled system maintenance period. GitLab will provide ten (10) business days' notice for all scheduled system maintenance activities. GitLab will take a proactive approach to minimizing the need for such maintenance and will limit scheduled system maintenance to less than four (4) hours per calendar month. Notwithstanding the foregoing, in the event of an emergency or urgent issue which may negatively impact GitLab's customers, GitLab has the right to carry out unscheduled maintenance to remedy such instance(s). For the avoidance of doubt, such unscheduled maintenance shall: (i) be limited to only those issues which may negatively impact customers; and (ii) will be carried out in such a manner to provide for the least amount of disruption to customers.

SUSPENSION OF SERVICE

GitLab reserves the right to suspend service to the SaaS Software in the event of a Suspension Event pursuant to Section 4.4 of the Agreement including (i) Customer's failure to comply with the Agreement and this Appendix; (ii) Customer exceeding the set application limits published within the Documentation; or (iii) requests or usage deemed malicious in nature and identified to be sourced from Customer accounts, personnel, or systems.

SECTION: legal/vendor-contract-filing-process/index.md

Execution & Storage

The GitLab Procurement team manages the execution and archiving of all vendor contracts in Zip under the appropriate vendor account for comprehensive tracking and accessibility. For inquiries regarding specific agreements, please tag the relevant Procurement team member in your existing request. Detailed information regarding the full vendor contract review and approval process can be found on the Procurement Handbook Page.

Legacy Repository

Please note that some vendor agreements executed prior to 2023 may be stored in our legacy repository, ContractWorks. Users with ContractWorks access can search for these documents within ContractWorks by the vendor name. If you require access to historical contracts but don't have ContractWorks credentials, please contact the GitLab Procurement team for assistance in retrieving these documents.

SECTION: marketing/_index.md

<i class="fas fa-bullhorn fa-fw color-orange font-awesome"></i> Welcome to the GitLab Marketing Handbook

The GitLab Marketing team operates as one team and is organized by the following departments: Integrated Marketing, Brand and Product Marketing, Marketing Operations and Analytics, Sales Development, Enterprise Data, Corporate Communications, and Developer Relations. This page documents our shared team philosophy and processes, while the individual department handbooks contain more detailed information.

Marketing Purpose

GitLab is the leading DevSecOps Platform that empowers organizations to deliver quality software faster and more efficiently while strengthening security and compliance. The marketing team's purpose is to amplify the value of the GitLab platform, authentically and transparently, by putting customers and the community at the center of everything we do.

Marketing Alignment

As the GitLab Marketing team puts customers at the center of everything we do, the marketing strategy aligns with the customer journey. The journey's purpose is to provide a clear and cohesive experience to a prospect/customer from the minute they become Aware of GitLab, to Considering the platform and Converting into a happy customer, and then of course Expanding over time and becoming an Evangelist.

Each stage has a purpose which is the guiding indicator for the marketing team to measure our success. Everything the team plans and executes in the short and long term will revolve around the customer journey, and we will also measure our success along each step to hold ourselves accountable.

Marketing Strategy

Our FY25 Marketing Strategy and Plan can be found in the internal handbook.

Marketing OKRs

Each quarter, the Marketing team creates OKRs (Objectives and Key Results) that cascade from the CEO's OKRs.

Each department within the Marketing team manages their own cascading OKRs. Team members can access the filtered OKR search.

<i class="fas fa-users fa-fw color-orange font-awesome"></i> How we work

Value-driven Marketing Team

How we work as one team aligns with the GitLab Values.

Results - The team measures success together along the customer journey. Each quarter, we align CMO OKRs based on company goals set in the company OKRs. This helps us stay aligned with company-level goals while also understanding if what we are doing quarter over quarter is moving the needle on our marquee metrics along the customer journey. Being data-driven as a team is essential for team success.

Iteration - Like the rest of the company, we aspire to be agile and experimental where possible. In every area possible, we roll out campaigns, brand updates, messaging, etc. in small iterations, measure the success, and take next steps accordingly.

Transparency - We strive to be as transparent as possible in all areas of marketing. We welcome thoughts and feedback from each other, other GitLab team members, and the community at all times.

Collaboration - A major key to success is operating as one team. Leveraging the different backgrounds, cultures and, skill sets of an entire company and community, the marketing team operates in a way where everyone can contribute. Collaboration is key to taking Marketing to the next level.

Diversity, Inclusion and Belonging (DIB) - With GitLab team members being located across the world, we strive to always keep DIB at the core of everything we do. Like the rest of GitLab, we follow asynchronous meeting principles, welcome diverse perspectives, and as marketers, foster an environment where quirkiness is welcomed.

Efficiency - We keep efficiency at the forefront of everything we do. Whether it is bringing in marketing technology to automate menial tasks and foster collaboration, finding ways to save cost, or simply doing the right things to be respectful of others' time, efficiency drives faster results for marketing.

Team Meeting Cadence

Monthly Marketing All Hands (All Marketing team members)
{.h3}

Goal: Align all Marketing team members on activities in progress to achieve our goals, and update the team on cross-functional items.

The meeting is 50 minutes and runs as follows:

1. Always begin by welcoming our newest GitLab Marketing Team Members
1. Celebrate well-deserved promotions
1. CMO Top of Mind (5 items per month)
1. ~20 minutes of CMO Leadership sharing updates
1. ~20 of either marketing team member updates (to be added during the call for items announcement prior) or special guest from another GitLab org
1. The remaining time for Q&A and most importantly recognition!

All team members are encouraged to bring forward discussion topics that they want to share with the team or to have covered during the call.

Quarterly CMO Q&A (one session for each department)

Goal: Provide the team a smaller forum to ask any questions they may have, offer feedback, and brainstorm ideas directly with the CMO

Weekly CMO Leadership Direct Reports Team Meetings (Each manager with their direct team)

Goal: Foster an environment to empower managers overseeing different functions to collaborate and share ideas and feedback.

Weekly Direct Reports Meetings (Each manager with their direct reports)

Goal: For managers to work with direct reports on removing roadblocks, brainstorming, coaching, and providing/receiving feedback.

Getting Help by Common Topics

Topic	Where to reach out	Sub-Team
-----	-----	-----
Blog posts, webcasts, the newsletter or other marketing content	content	Content
Swag	swag	Brand
Design requests, logo usage questions	marketing-design	Brand
External PR (public relations) agency, discuss GitLab media mentions, and evaluate speaking/podcasting/commentary opportunities	external-comms	Corporate Communications
Anything regarding the marketing website and website development	digital-experience-team	Digital experience
Questions about tools in the marketing tech stack, evaluating new marketing tools, marketing system process improvement	mktgops	Marketing Operations
Rules on legally compliant language for marketing communications (internal only)	mktgops	Marketing Ops
Salesforce	sfdc-users	Sales Operations (not marketing)

A complete list of marketing slack channels can be found [here](#).

General Questions and Feedback

- GitLab Marketing public issue tracker; please use confidential issues for topics that should only be visible to team members at GitLab
- Slack channel; please use the marketing Slack channel for questions that don't seem appropriate to use the issue tracker

CMO Requests

Please follow the CMO handbook for review request workflows, and communication guidelines.

Social Requests

All teams are responsible for requesting social posts themselves. If you are not the DRI on a specific category or campaign and want to request a social post, please reach out to the teams' point person identified below as a first step. Team Members in these roles reserve the right to say no to your request. If they say yes, coordinate with them to create a new social request issue so that the social team can process the request and schedule the post(s). The point person on the team or a member of the marketing or social teams may adjust copy to ensure consistency in brand voice.

- Events: Jr. Content Editor
- Release & technical posts/product updates: Technical writing
- User questions/comments on Twitter/X: Social Marketing or Developer Relations team
- Leadgen campaigns: Content team
- UX Design: UX Lead
- Press/media coverage: Post in external-comms for assistance from the Corporate Communications team
- Social media, reshares of mentions, CEO Statements/posts: Post in socialmediaaction for assistance

Company Spokesperson

Speaking on behalf of GitLab at a conference, to media or on a podcast as a GitLab team member is a significant responsibility. Please see the Corporate Communications Handbook Page for guidelines and trainings.

Blog post editing

- Product release posts: Product team
- Technical community posts/tutorials: Developer Advocacy and Blog editorial team
- CEO statements/updates: CMO
- All other blog posts: Blog editorial team

Guidelines for how to pitch and submit a blog, including templates and formatting, can be found in the Blog Handbook.

Newsletter

Marketing Newsletter

Marketing and the Editorial team send out a monthly developer newsletter, called "DevSecOps Download", to our newsletter subscribers. The newsletter always includes information about the latest release post, links to our latest blogs, plus additional content for DevSecOps teams. The goal for this newsletter is thought leadership and awareness.

To add a content suggestion, please create an issue with "DevSecOps Download Content:

[subject]" in the title (no template necessary) and tag @sgittlen (Sandra Gittlen, Blog Managing Editor). Anyone in the company can add suggestions, but the Blog Managing Editor will determine the final content.

Other Newsletter

To request a newsletter to be sent to an audience outside the newsletter subscribers, please create an issue in the Campaigns project, using the requestemailnewsletter issue template.

Newsletter requests should be submitted no less than 5 business days before the intended send date to ensure there is enough time for Content and Marketing Programs Manager's (MPM) review and set up workflow.

Community Newsletter

The community newsletter is managed by the Developer Relations team, dedicated to sharing relevant developer content, highlighting contribution opportunities, and updating community members on upcoming events. We aim to keep our contributors involved and connected with the wider community. This newsletter will not be used to drive or generate leads.

To submit to the newsletter, please follow the handbook instructions.

Sponsorship

We are happy to sponsor events and meet-ups where a marketing benefit exists, subject to approval by Field Marketing Managers. These sponsorships may be in cash or in kind, depending on individual circumstances.

Organizational or project sponsorships may also be considered where a marketing benefit exists. Typically, these sponsorships will be in kind - e.g., developer time commitments, or subsidized / free GitLab licenses.

Cash sponsorship of projects or organizations may be considered only in exceptional cases - for example, if a project or organization that GitLab depends on is struggling to survive financially.

Marketing Slack Channels

We use Slack internally as a communication tool. The Marketing channels are as follows:

- marketing: General marketing channel. Don't know where to ask a question? Start here.
- marketing-team-internal: (Private) Read-Only channel for marketing team members, with the ability to post comments. CMO staff has the ability to post. Should a team member want to make a post, please reach out to our Marketing EBA with your written statement and as much as possible, provide an issue or MR with more details.
- brand: Connect with Brand Strategy, Brand Marketing, and Brand Design here.
- brandvideo: Video production and marketing support.
- cfp: All event call for papers will be posted here. Learn more in the speaking resources

handbook.

- cmo: CMO review requests and content shares.
- cmo-staff: (Private) CMO's private staff discussion room
- content: Questions about blog posts, webcasts, the newsletter or other marketing content?

This is the place to ask.

- developer-relations: A channel for the developer relations team to collaborate.
- dev-advocacy-team: Discuss the latest tech in DevSecOps and Cloud-Native with the Developer Advocacy team. You can request speakers, customer consultancy and technical content collaboration and guidance.
- digital-experience-team: Channel for connecting with the website development and design teams
- digital-marketing: Channel for all advertising, website analytic and general digital programs.
- external-comms: To collaborate with our external PR (public relations) agency, discuss GitLab media mentions, and evaluate speaking/podcasting/commentary opportunities.
- marketing-design: Discuss, feedback, and share ideas on Marketing Design here.
- marketing-campaigns: Discuss, ask questions, stay up-to-date on campaigns and events that are being organized by the Marketing Program Managers
- mktgops: Marketing Ops communication channel for questions and project updates
- mktg-budget-holders: (Private) Discussion among all Marketing team members with budget responsibility
- product-marketing: Discuss, feedback related to product news, features and vision
- regional-partner-marketing: Discuss, ask questions, stay up-to-date on events that are being organized by Regional Field Marketing, and Channel Marketing
- remote: Discuss and share impressions on remote work experience, playbook and strategy.
- salesdevglobal: Place for the sales development team to brainstorm and share ideas. Please refer to the regional Slack channel list to reach SDR/BDR teams in AMER, EMEA, APAC.
- sfdc-users: Having issues with SFDC? Ask here first.
- socialmediaaction: Use this channel to communicate and coordinate with the Social Marketing team. You can ask for amplification help and share cool tweets, posts, etc.
- swag: Request or question regarding swag.
- website: Discuss topics related to website redesign project

Automated channels with feeds from different sources:

- developer-advocacy-updates: Zapier workflows automatically post GitLab blog posts, Developer Relations social shares, competitive insights, Common Room updates, etc.
- hn-mentions: Hacker News post feed, automated with Zapier and maintained by the Developer Relations team.
- socialmediaposts: Automated social media post feed.

Marketing email alias list

- Analysts@ company domain: external email address for contacting Analyst Relations at GitLab. Replies are forwarded to Analyst Relations manager and VP Product and Product Marketing
- Community@ company domain: external email address for sending confirmation emails related to GitLab products. Replies are forwarded to Zen Desk support
- Content@ company domain: external email address associated with management of our SlideShare account. Replies are forwarded to Content Marketing team and Marketing OPS Manager

- Events@ company domain: external email address for sending live, VIP & in-person training related emails. Replies go to Field Marketing Managers and Marketing OPS Manager
- Fieldmarketing@ company domain: external email address for requests to the worldwide Field Marketing team
- Giveaways@ company domain: external email address for receiving content & social media related promotional giveaways. Replies go to Content Marketing Team and Marketing OPS Manager
- Leads@ company domain: external email address for internal Lead alerts. Replies go to Marketing OPS Manager
- News@ company domain: external email address used to send newsletter. Replies go to Marketing OPS Manager and Manager, Content Marketing
- MPM@ company domain: external email address used to send direct generic requests to the Marketing Program Managers
- MarketingOPS@ company domain: external email address used to direct generic operational requests to Marketing OPS Manager
- MarketingSFDC@ company domain: external email address associated with management of Salesforce. Replies forward to Manager, Digital Marketing Programs; Field Marketing Manager; Product Marketing Manager; and Manager, Content Marketing
- SecurityAlerts@ company domain: external email address used to send security alerts. Replies go to Marketing OPS Manager
- Sponsorships@ company domain: external email address used to manage sponsor requests from community. Replies forward to Developer Relations Team
- Support@ company domain: external email address for sending Breaking Change and/or support related customer communications. Replies go to Zen Desk support
- Surveys@ company domain: external email address for sending the Developer Survey and/or related surveys. Replies go to Content Team and Product Marketing Manager
- Webcasts@ company domain: external email address for sending webcast related emails. Replies go to Marketing OPS Manager and Marketing Program Managers
- on24questions@ company domain: external email address used for collecting privately asked questions in On24 webinars

<i class="fas fa-users fa-fw color-orange font-awesome"></i> Get to Know the Marketing Team

Marketing Team READMEs

Get to know the people who work in GitLab's marketing team by visiting our READMEs.

Learn about the Marketing Departments

Marketing Functional Conversations are modeled after Group conversations. While Group Conversations offer high-level insights, Marketing Functional Conversations are meant to drill deeper into the various functions within the Marketing Department. The goal of Marketing Functional Conversations is to create increased awareness and mutual understanding of the functions within Marketing. Awareness and understanding is an essential building block for effective collaboration.

Recordings of the Marketing Functional Conversations can be found on the GitLab Unfiltered YouTube Channel

Brand and Product Marketing

Product and Brand Marketing represents the GitLab story at the brand, solution, product, and technical levels. We accelerate GitLab's path to market by developing market insights, leadership positioning, messaging, and narratives that elevate our brand, show value in our solution, and fuel demand for our platform. We activate brand ambassadors and customer advocates to show momentum and trust in the market. The team includes Solutions & Product Marketing, Brand Marketing, Design, and Content.
