

notification) and then once approved in the portal by the FMM, the proof will be sent to the Brand team for final approval (within the Brilliant store portal as well).

- If the swag item chosen requires a full design, please follow the instructions to submit a design request [here](#).
- Once the order has been shipped, Brilliant will submit the invoice through Coupa directly.

Store Portal Orders and Shipping Charges

- Please see the homepage of the Brilliant store portal for specific ordering instructions and helpful details.
- General swag items in the store have previously been ordered and paid for in bulk. You are not required to pay for these swag items from your individual budgets. The cost of the swag items are shown to help indicate the level of swag and how much should be utilized.
- You are required to provide an Allocadia ID and event name for all Brilliant store orders. All charges related to shipping will be associated to your specific campaign and these charges will process through our monthly invoice. When you place your orders through the store, you will be provided a shipping estimate during checkout. If you are returning items, you can estimate the same return shipping and add that total to your forecast.
 - PLEASE NOTE: Our monthly Brilliant invoice covers all charges for the previous month. Due to our prepaid policy, your shipping charges for the previous month will be reconciled in the following month, so please forecast accordingly. Example - You ship swag in August for an August event. Our August monthly invoice processes in September, so those August shipping charges should be forecasted in September.
- Item quantities are listed in the portal. Please select from the current items in stock for your event. If you need a larger quantity of an item over what is available, you intend to utilize the remaining stock for an item, or you are ordering over 500 pieces of an item, please reach out to @krogel for reordering.
- Please be aware that ordering newly designed swag or placing reorders for existing items requires adequate lead time. Time frames vary greatly based on the items selected, design approval, and availability. General Lead Times: 6-8 weeks to produce a new item and 2-3 weeks to reorder current designs

New swag ideas for bulk orders

If you would like to source a new swag item for the team's inventory, please reach out to @krogel directly. All new swag items must be approved by the Brand team for brand consistency.

Field Marketing Event Assets

Event assets utilized for shows (including backwalls, tablecloths, popup banners, event kits, etc.) are stocked at the Brilliant warehouse and can be ordered for events using the Brilliant store portal. It is also recommended that each Field Marketer keep a separate GitLab tablecloth, popup banner and table runner with them at home for easy access and to be utilized for events.

Returning Field Marketing Event Assets and Swag

It is the FMM's responsibility to not only ship assets to events, but to also ensure the onsite event DRI ships the items back within 3 days of the end of the event. Every order placed through the Brilliant portal will include return labels (one return label per box) in a red

envelope adhered to the inside flap of the box. The FMM is to make sure the onsite event DRI is aware of the location of the return shipping labels and of their responsibility to ship the items back.

PLEASE NOTE: Trash and items not stored in the Brilliant warehouse should not be put in the return shipping boxes (this includes stickers, please see below for more sticker information). All event assets are to be folded neatly and packed up cleanly and securely in their original boxes. All tool kit items should be returned to the tool kits for future event use. Please do not send small numbers of swag back to the warehouse if the items were bundled, only send full bundles back to the warehouse for restock. Example: If pens come in bundles of ten, please do not send back 2 pens as these cannot be re-bundled. Feel free to keep small quantities of extra swag to give out to customers, if appropriate. Also, only open swag bundles as they are needed so items can be returned if not used. If you have any questions, please contact @krogel.

Warehouse Address

Brilliant Team, c/o Gitlab
1605 S Waukegan Rd
Waukegan, IL 60085
415-980-4600

Stickers

For sticker orders, please reach out to @krogel for details. If all stickers are not utilized at an event, please keep the stickers with you for future events.

Print Collateral

In order to stay environmentally-friendly, we generally do not provide large quantities of print collateral at events. However, if you do need printouts or gift bag stuffers for events, we utilize Vistaprint. Please log in using the Marketing 1pass. Another option in lieu of hundreds of printed handouts is to have a handful of printed and laminated pieces of collateral to utilize for visual reference while speaking with customers at an event. Additionally, you can create a QR Code to display at your event with that same piece of content for customers to download to their own devices.

EMEA Field Marketing Swag

The EMEA Field Marketing team utilises Brilliant to source, fulfill, ship and store (European and UK warehouses) swag branded swag items. We also utilise vendor Ten&One who can source swag items and who also currently store all EMEA event material. The FMC is responsible for ensuring adequate stock levels and coordinating field event swag logistics. Additional event assets utilized for shows (including backwalls, tablecloths, popup banners, etc.) are stocked at the Ten&One warehouse and can be shipped

- Budget Allocation:

- If there is an individual order dedicated to support one specific event (e.g Cloud Expo) an Allocadia line item should be created by the FMM in their regional activity plan under this specific event.
- If swag is required from the bulk order (e.g AWS, GCP, smaller events) the FMM should

assign budget and move it to All EMEA per Quarter.

- If the event e.g Connect Day is handled by Ten & One as an all-in budget under the contract with Ten & One this should be included in that event sponsorship line item within the FMM's regional plan.

Please note shipping cost to be included in the SWAG cost that you budget per event.

- Invoicing: All invoices for Field Marketing are required to include the campaign's Allocadia ID to allow for proper finance coding.

- Existing Items: Item descriptions and quantities are listed on the Reachdesk portal, please reach out to @helenadixon for current inventory levels.

- New Items and Designs: Requests for new swag items not already available require management approval. Any new swag designs must be approved by the brand team for brand consistency. You can suggest new designs in the swag slack channel or more formally in an issue in the Swag Project.

- Large Orders: For orders over 500 pieces, contact @helenadixon for assistance.

- Shipping: Please make sure to specify all shipping requirements and deadlines when ordering your items and include in the swag section of the relevant issue.

- Lead Times: Please be aware that ordering newly designed swag or placing reorders for existing items requires adequate lead time. Timeframes vary greatly based on the items selected and design approval. General Lead Times: 6 weeks to produce a new item and 2-3 weeks to reorder current designs.

- Stickers: For sticker orders, please utilize our Sticker Mule account or contact @helenadixon for assistance with ordering.

Delivery options and timelines are provided during the ordering process. Any new sticker designs must be approved by the brand team for brand consistency. You can suggest new designs in the swag slack channel or more formally in an issue in the Swag Project.

- Non-Marketing, How to request SWAG for EMEA events: For orders from non-marketing, create an issue in the Field marketing project using the EMEASWAGRequesttemplate. This will add all labels automatically.

- Field Marketing, How to request SWAG for EMEA events: For Field Marketing EMEA, add your SWAG request to the description in the EMEAEventFieldMarketing template.

- Required information:

- Contact name(s)(onsite contact)

- Complete shipping address (Be specific as possible)

- Phone number

- Email address

- Date (timeline when shipping can arrive)

- Swag items required and Quantities

- Return Event Material from event locations to warehouse: FMC will coordinate with Ten&One the return of all banners, table cloths, back walls, counter top, iPads (not SWAG) back to Ten&One

Address: Agentur, Meyerbeerstraße 12, 81247 München, Germany, Phone: +49 89 2554190

Swag for Non-Field Marketing Teams

If you are looking to order swag or event assets for a non-Field Marketing event or would like to order swag for a customer, please see details here.

AMER Field Marketing Badge and Event Check-In Process

For details regarding this process, please visit our Events Page [here](#).

Field Marketing Fedex Account

The Field Marketing team utilizes the Field Marketing Fedex Account for shipping (details located in the Marketing 1pass). Please always include a reference when using the account (Allocadia ID, name of event, etc.) so charges can be tracked appropriately. For any questions regarding the Field Marketing Fedex account, please contact @krogel.

Field Marketing Food and Beverage Vendors for Virtual Events

AMER Field Marketing Virtual Food and Beverage Vendors

The AMER Field Marketing team utilizes Grubhub and Pizzatime for all virtual events with a food and beverage component. Both vendors offer a wide range of food and beverage options to fit the needs of your virtual event best.

Grubhub

When to use Grubhub

Grubhub will be utilized for smaller, owned, and partner events that will host executive-level registrants. Cost per person to be between \$35-\$50.

It is important to note that Grubhub will be utilized for post-event meal credit distribution. The FMM is responsible for taking account of registrants who attend in the first 30 minutes of the event. The FMM will utilize the list of attended registrants to upload to Grubhub prior to the conclusion of the event.

Order Link Sharing

It is important to note that there is a limit on link sharing when utilizing the Grubhub platform. When registrant information is uploaded to the platform for event preparation, said registrants will receive a unique, non-sharable link to place their order.

Details Regarding Grubhub Financials and Budgeting

- It is important to note that Grubhub invoices on a monthly cycle and this invoice will be paid via the FY24 Grubhub Blanket PO. @nataliepicci and @krogel are the DRIs for the Grubhub monthly invoice.
- Once the invoice is received, the FMC is to ensure the invoice includes the Grubhub Blanket PO number and the final order amount. The FMC is to send this invoice to AP for processing and the amount is to be added to the forecast line item in the AMER ALL plan in Allocadia.
 - To confirm which month the spend will hit, please refer to our Prepaid Policy.
- The FMM is required to transfer the invoiced Grubhub spend from their regional plan to the AMER ALL plan in Allocadia as soon as the event has concluded.

Grubhub Portal

<details markdown=1>

<summary>Expand below to see details regarding Accessing the Grubhub Portal</summary>

How to sign into your account

- You should have received a Welcome Email through which you created your credentials. If you never received a Welcome Email, please contact your FMC. Go to grubhub.com, click "Sign in" and enter your Grubhub credentials.

How to access the Admin Portal

The Admin Portal is where you manage all aspects of your Corporate Account from adding employees and creating meal credits to viewing invoices and order history.

- To access your Admin Portal, click on the person icon in the upper right corner of the homepage, then Business Account.

If you do not see the Business account page, you are not an assigned Admin user on the account. Contact your FMC and they will request the appropriate access.

</details>

Overview of the Grubhub Ordering Process

More detailed instructions are listed below.

1. FMM to log into their Grubhub Admin Portal.
2. FMM to create a group, naming the group the title of the event.
3. FMM to create a meal credit for the event, assigning the meal credit to the created group.
4. FMM to take account of the attended registrants in the first 30 minutes and bulk upload the attended registrant information and assign it to the created Group prior to the conclusion of the event.
5. FMC to bulk remove registrant information once the event has concluded and the invoice has been received (all invoices are sent to FMCs on a monthly cadence).

Creating Group Accounts

<details markdown=1>

<summary>Expand below to see details regarding Creating Group Accounts</summary>

Group Management

Before you create a Meal Credit, make sure that you have created a Group to associate with that credit.

Note: Employees in the Grubhub portal refer to our registrants for an event.

1. Log into corporate.grubhub.com. In the top right corner, click the person icon and select Business Account.
2. In the navigation bar, hover over Employees & Groups and click "Groups".
3. Here, you can manage all your Groups. Select Add new group.
4. Give your new Group a name (event name) and description, then click Add group.
5. Now, assign employees to that Group. Employees must first be added to your account before they can be assigned to a Group.
 - If you already have employees added to your account, click Add employees and select the employees you want to add to this Group.
 - If you don't already have employees added to your account, hover over Employees & Groups in the navigation bar and click Employees. You can manually add employees one by one with the "Add New Employee" button, or bulk add employees.
 - It is important to note that when bulk-adding employees you must include the name of the group in the upload file where applicable. This ensures the employees are assigned to a group.
6. Now you can create your meal credits.
7. FMC to bulk remove registrant information once the event has concluded and the invoice has been received (all invoices are sent to FMCs on a monthly cadence).

Corporate Account and Manual Employee Edits FAQ

<details markdown=1>

<summary>Expand below to see details regarding Corporate Account and Manual Employee Edits</summary>

Corporate Account Edits

How do I add users to an account?

You are able to upload new employees to your corporate account manually. We recommend that you upload employees manually if you have 10 or fewer; otherwise, we recommend uploading them in bulk.

1. To upload a new employee manually, click the Employees & Groups tab and select Employees.
2. Then click Add New Employee and input the employee's information. Please note that first and last name, phone number, and email address are all required.
3. You will also need to indicate if the user is a standard user or an admin user.
4. Click Add New Employee.
5. You will now be able to add the employee to any existing Groups so they can be assigned to a line of credit.
6. Go back to the Employees page, locate this user, and click on the envelope icon near their name to send their Welcome Email.

Manual Employee Edits

How do I create another admin user?

- If the employee already has an account, click on the pencil next to their name, then the "edit" button and under the Permissions section, select "Admin User". If the employee does not have an account, follow the instructions above.

Removing Individual Employees

1. Select the person icon at the top right of your screen and Business Account from the drop-down menu.
2. Under Employees & Groups, select Employees. Click the pencil next to the employee you would like to remove.

How do I change a user's email address?

- Delete the user and re-add them to the account with the new email address. Make sure to re-add them to their group(s).

What if a user has already registered their email with a personal Grubhub account?

- The credit will automatically show up on their account when it is active. They do not need to set up a new account.

</details>

Creating Meal Credits

<details markdown=1>

<summary>Expand below to see details regarding Creating Meal Credits</summary>

Creating Meal Credits

Before you create a Meal Credit, make sure that you have created a Group to associate with that credit (details above).

Note: Employees in the Grubhub portal refer to our registrants for an event.

1. Hover over "Meal credit settings" and click "Meal credits". Then, click "Add meal credit".
2. Name your meal credit; this is what your employees will see. We suggest including the name of the event or company associated with this meal credit so it's easy for your employees to identify.
3. Choose how long this budget is available.
 - One-day budgets are best for single-day events (e.g. happy hours, meetings, celebrations). They can also repeat on specific days of the week.
 - Weekly budgets are best for ongoing meal programs (e.g. providing employees lunch for the week). They can also repeat on a weekly basis.
4. Then, select the time window for when the order must be placed and delivered, or simply check the "All day" box. Orders can be placed in advance but must be delivered within the designated timeframe.
5. Next, choose what geographic areas your employees can order from. To ensure they can order from their home, select "Anywhere".
6. Under "Order Settings", you can choose how your employees order their meals. Checking all options provides the most flexibility.
7. Next, choose to require any sort of expense code/comments at checkout.
8. Lastly, we recommend notifying your employees when their meal credit becomes available. We'll send a customized, one-time email the morning their meal credit begins · so long as you create and assign meal credits the night before. Diners added to an existing budget will receive an email the morning after they're added.
9. Now, click "Add Meal Credit" and you can start adding groups to your new meal credit.
10. Scroll down to select the group(s) you want associated with this meal credit and enter the budget amount.
11. Click "Save" and you're done!

</details>

Meal Credits FAQ

<details markdown=1>

<summary>Expand below to see details regarding Meal Credits</summary>

How do I create meal credits?

- Please see the above section, Creating Meal Credits, for a step-by-step guide.

Can I change a meal credit after it starts?

- Yes. However, the date, frequency, and order window cannot be changed.

My employee is not seeing their meal credit balance and/or is being asked to enter their personal credit card upon checkout.

There could be a few reasons. Check to make sure all the below items are addressed. If you're still facing this issue, please reach out to Grubhub Corporate Support.

- The account your employee is ordering from is not tied to a corporate account. If the employee is tied to the corporate account, please check that a welcome email has been sent and that the employee registered their account.
- The user is signing in using the wrong email.
- The user is on the account but not tied to a group.
- The user is tied to a group that is not tied to an active meal credit.
- The order exceeds the amount budgeted to the user (a credit card may be required to cover overages).
- The user is attempting to order outside of your company's allotted ordering times.

</details>

Pizzatime

When to use Pizzatime

Pizzatime will be utilized for larger, virtual-owned events that will host mid to executive-level registrants. Cost per person to be between \$20-\$40.

It is important to note that Pizzatime will be utilized for pre-event meal credit distribution.

Order Link Sharing

It is important to note that there is no limit on link sharing when utilizing the Pizzatime platform. Meaning, once registrants receive the link to place their order, they can share it with non-registrants who can then redeem it for a meal.

Limiting Meal Redemptions

If attempting to limit the number of meal redemptions for an event, the below steps are recommended:

- Enable a Waitlist for the Marketo Landing Page and establish a redemption limit.
- Include the Pizzatime order link in your Confirmation Email copy.
- Individually register registrants until the established redemption limit is reached.
 - Note: When a registrant is moved from Waitlisted to Registered, they will receive the Confirmation Email.
- Once the established redemption limit is reached, re-open the Marketo LP issue and request Marketing Ops remove the Pizzatime order link from the Confirmation Email copy.

Details Regarding Pizzatime Financials and Budgeting

- It is important to note that in order to place an order with Pizzatime, you will be required to request a Coupa Virtual Card for payment.
- Please submit a Contract Request for the Coupa Virtual Card to your FMC with all the required details pertaining to your event.
- Note: Ensure all cost estimates have been added to Allocadia. If the final Pizzatime order cost is 10% above the requested Coupa Virtual Card amount, please inform your FMC as they will need to submit a PO Change Request.
- Note: The order confirmation page on Pizzatime will serve as your SOW. The steps below detail how to get to the confirmation page.
- To confirm which month the spend will hit, please refer to our Prepaid Policy.

Pizzatime Support

<details markdown=1>

<summary>Expand below to see details regarding Pizzatime Support</summary>

- Pizzatime Help Desk
- Pizzatime Support Email: pizza@pizzatime.xyz

</details>

Details Regarding Pizzatime Ordering

- Steps to place your Pizzatime order can be found in the Steps to Placing your Pizzatime Order section below.
- Once you place your Pizzatime order, Pizzatime will provide a unique ordering link for your event. You will then share this link with your registrants in the registration confirmation email and/or the reminder email (please remember to add it to your copy doc), to allow them to place their orders.

Steps to Placing Your Pizztime Order

1. Proceed to book your Pizzatime order.
1. Follow all of the prompts, selecting food & drink options relative to your event.
1. Once you reach the confirmation/payment page, take a screenshot of the entire page. Attach this screenshot to your contract request (this serves as your SOW).
1. Submit a Contract Request to your FMC. They will provide you with your Coupa virtual card information, once the order has been approved and the card has been issued.
1. Once you have the Coupa virtual card information from your FMC, proceed to book/pay for your Pizzatime order via the Pizzatime website.
1. Provide the payment receipt to your FMC for reference.

AMER Field Marketing Event Tracker for Sales

It is the responsibility of each field marketing manager to ensure that this tracker is up to date with all AMER Field Marketing initiatives. Sales should consider this spreadsheet live and current daily.

Google Calendar links

If you prefer to see the events in an actual calendar view please refer to the following:

- External virtual events
- GitLab hosted Zoom webcasts
- In person Events and Sponsorship

Suggesting an Event or Tactic

If you are interested in requesting Field Marketing's support for a particular in-person or virtual event or tactic, please follow the process listed on our Events Page.

Field Marketing planning

It is our goal to have planning for each qtr completed four (4) weeks before the next quarter starts. At this time, we have the following time line set for regional plans:

- Q1 plan is due Jan 13
- Q2 plan is due April 3
- Q3 plan is due July 3
- Q4 plan is due Oct 2

A standard deck will also be used to ensure consistency across the world in terms of how the plan is presented.

The SSOT of the plan remains in GitLab on our various issue boards.

- FY25 Standard deck.
 - Note: The deck is additive. You are only responsible for completing the slides that are due for the quarter we are in.
 - As the slides are due one (1) month before the end of the quarter.
 - The completed deck should be stored in your correct regions shared folder. Anyone within GitLab has access to search and find this folder.

Regional Marketing QBRs

Shortly following the day that the regional plans are due, each region will hold its own QBR. The regional Manager of Marketing will be responsible for setting up this meeting and inviting the necessary team members. The point of the QBR is for the Field & Channel Marketing Managers

to share their qtrly long plans with their SDR Manager colleagues, Field Marketing colleagues, and Field Marketing Leadership. This time together is meant to be informative and also educational to all who are attending.

This deck should also be used to present the regional plans to the sales teams.

FMM QBR attendees

Regional attendees:		

VP of Regional Marketing		
Manager of FMM, REGION		
Regional FMMs & FMC/S		
ABM delegate		
Manager of SDR, REGION		
SDR Managers		
Mktg Ops (optional)		
Regional Campaign Manager (optional)		
Anyone else the Manager of FMM REGION deems necessary		

Next Steps after Quarterly plans are complete

In an effort to share the regional marketing team's plans with the rest of the marketing team, the below steps will be followed:

Marketing SSoT calendar

Within two days of the quarterly plan being locked by Finance in Allocadia, the Regional Managers will download the teams' plans from Allocadia and will upload to the shared Marketing Calendar.

In order to ensure the formulas carry over properly, the download from Allocadia will need to be cleaned, similar to how we clean our leads for list upload.

The Calendar cleaner spreadsheet should be used to do this. Once the data is cleaned, it then can be copied into the Marketing Calendar.

Video walk through on how to clean. on GitLab Unfiltered.

After the initial pull, the regional marketers are responsible for adding any new tactics for the quarter if we are mid-quarter.

If an event is created after this quarterly transfer, the event DRI is responsible for adding the event to the SSoT calendar. Please see the rescheduling or cancellation guidelines for additional details regarding changes or cancellations to existing events.

AMER SSoT

In the AMER region, managers are responsible for the Marketing SSoT above, but also the AMER SSoT here (internal).

Within two days of the quarterly plan being locked by Finance in Allocadia, the AMER Regional Manager will download the team's plans from Allocadia and will upload to the AMER SSoT (internal).

After the initial pull, the regional marketers are responsible for adding all details not included in the pull, any new tactics for the quarter that weren't pulled from Allocadia, and also moving completed tactics to the Completed Events - Results tab and providing all retrospective information required.

Asks into Digital Campaigns

Details on how Field Marketing shares quarterly plans with the Digital team can be found [here](#).

Asks into Product Marketing

~~By the 15th of the 3rd month of the quarter, all asks for the Portfolio Marketing team for the upcoming quarter should be opened up for their review. Following their process outlined [here](#). It's the responsibility of each FMM to ensure their asks are in by this time. The ~Field Marketing label must be added to the request in order for the PM team to review. We will use this list to review.~~

Asks into the Customer Reference team

After the quarterly FMM plans have been added to the marketing calendar, the regional Manager of FMM will set up an alignment meeting with the Director of Market Strategy & Insights. The regional FMMs as well as the regional customer reference manager should also be invited to this meeting. During this meeting, the team will review asks into the Customer reference team and agree on asks for the quarter.

You will note in Allocadia in the details panel if you need a customer speaker. Video walk through (you must be logged into GitLab Unfiltered to view.)

Asks into BDR org

After the quarterly FMM plans have been added to the marketing calendar, the regional Manager of FMM will set up an alignment meeting with the Regional Manager of BDR and Director, Sales Dev Operations. The regional FMMs as well as the regional managers should also be invited to this meeting. During this meeting, the team will review asks into the BDR org.

You will note in Allocadia in the details panel if you need BDR support. Video walk through (you must be logged into GitLab Unfiltered to view.)

Asks into the SA org

After the quarterly FMM plans have been added to the marketing calendar, the regional Manager of FMM will set up an alignment meeting with the Regional Manager of SAs. The regional FMMs as well as the regional managers should also be invited to this meeting. During this meeting, the team will review asks into the SA org.

You will note in Allocadia in the details panel if you need SA support. Video walk through (you

must be logged into GitLab Unfiltered to view.)

Field Marketing/Channel Marketing Engagement

We know and understand the importance of working with our channel partners in region to help build pipeline, and ultimately contribute to closed won business. Jointly with their regionally aligned Channel Marketing Manager & Field Sales teams, Field Marketers should be thinking about which partners will help their sales teams build pipeline in the region and include them in their campaigns.

The Field Marketing team will work with channel partners that have successfully

1. Executed at least 3 MDF campaigns in the last 12 months - achieving ROI of 10 x Pipe 2 Spend and targeted of DRs
1. Booked business threshold.
 - Please review the internal handbook for the required threshold of business booked.

The Channel Marketing Manager is responsible for keeping track of which partners fall within this category and will support the FM campaign DRI as the link between channel partner and us to ensure a smooth campaign execution on both sides.

The complete list of Marketing Channel Partners are identified in SFDC here.

FMM/ESM alignment

Region	FMM	ESM
-----	-----	-----
AMER FinServ	Beth Parker	Jay Bahar
AMER Northeast and Southeast	Jonathan Santiago	Jay Bahar
AMER North and Canada	Julie Wyatt	Jay Bahar
AMER West Coast	Amy Moy	Lisa Cartagena
AMER Public Sector	Annatasia DeAngelis and Micaila Gardiner	David LaTour
AMER LATAM	Amy Moy	Rodrigo Rios
APJ APAC	Kate Baker and Catherine Chien	SJ Lim
APJ Japan	Shu Kawaguchi	Ryuichiro Shinoki
EMEA Southern Europe	Marcus Hall & Juliette Francon	Tristan Ouin
EMEA Northern Europe	Neha Pujari	Aaron Burgess
EMEA UK/I	Neha Pujari	Adam Woolford
EMEA DACH	Sarina Kraft	Michi Tluste (Germany)/Christian Heitzler (ALPS)
EMEA Telco	Sergei Rogalin	Country Specific

Field Marketing initiated and funded campaigns

Once the partner has reached the threshold, the Channel Marketing Manager will collaborate with the Field Marketing Manager on planning and next steps.

Suggested process:

1. Identify region/area where there is a pipeline need
1. Develop partner campaign objectives and set goal. Set up recurring biweekly cadence with

partner, CMM, GitLab sales and FMM to keep planning and campaign action items on track

1. Agree to campaign tactics and persona targets, develop budget request and expected outcomes in the form of Deal Registrations

1. Ensure that you know and understand who/what each team is bringing to the campaign.

- If there is an invitation involved, ensure that both companies have UTM tracking links to know who has driven who to the event so you all can stay aligned and ensure proper follow ups are taking place.

Note: The Channel Partner Enablement team is the DRI to make sure each Partner is fully enabled prior to FMM engagement. FMMs should not be involved in any channel enablement.

Funding joint Marketing

Campaigns with partners can be:

- Fully funded by FMM budget
- Funded jointly by FMM budget and Partner budget

We cannot use GitLab MDF dollars to fund joint campaigns.

Sample types of activities to engage with partners

- Workshops
- Webcast / Lunch and Learn programs
- Account Acceleration Programs such as executive roundtables
- Direct Mail Programs
- Surveys

Lead Management in the Channel

Please refer to the Channel Partner Joint GitLab events handbook page for details on how we set up our joint campaign and also lead sharing with the channel as a result of those campaigns.

All campaigns we are working with channel partners must flow through the outlined process as a way to ensure we are tracking the success of the campaign properly.

Tracking success of FMM campaigns with Channel

Please refer to the Marketing Performance handbook for additional information.

Useful Fields in SFDC that relate to Vartopia

1. Please refer to this handbook page for further details.

Field Marketing with Alliance Partners

AWS

Google

Register your event with Google

- If you have a joint event you are running with Google and you would like for their sales and marketing teams to help recruit attendees, you must register your event here.

Field Marketing - Public Sector

Requesting support for a Public Sector event

Requests will be reviewed by the Staff Public Sector Field Marketing Manager. Even if the event is free or low-cost, all requests must be approved by the manager prior to any commitment to ensure the event or tactic aligns to the marketing strategy within the SLA required below, and the team has the resources to support the event.

Requirements

- 60 days notice, prior to the start of the event
- Support needed from Field Marketing (landing page, swag, invites, etc.)
- Budget
- Have we run or sponsored this event in the past?
 - If yes - Please provide ROI details from previous SFDC campaign
 - If no - Please provide valid justification for adding this event to the Field Marketing plan

Charitable Donations for Event Attendance

As incentive for attending an event, GitLab can promote and process a monetary donation per participant to a charitable organization. For example: GitLab promotes a \$25 donation per attendee for attending an event, 100 attendees participate in the event and GitLab donates \$2,500 to the selected charity. Please Note: Donations are not to be made in a participant's name or reference a participant's organization.

All GitLab donations to charitable organizations must follow the Philanthropy Approval Process.

PubSec FMM Calendar share

In alignment with the PubSec team's process to lock down shared data that is accessible to teams outside of our US PubSec team - (will link to handbook page once its been created!) the Public Sector Field Marketing Managers, by default, will mark their calendar details as private. Google calendar has a feature that allows you to share your calendar with individuals once its been marketed as private and at a minimum, the FMM team member should share their calendar with both their direct manager as well as their aligned Field Marketing Specialist, pending those people are US Citizens.

GitLab Government User Group Program

Purpose

To build a community of GitLab users within Government and Education where peers can share best practices, connect with GitLab Team members and collaborate on how to best serve the public

sector.

Mission Statement

To provide opportunities for discussion, education and community building for individuals who serve the Public Sector through Meetups (both virtual and in person), training and team building

User Group Values

Transformation, Collaboration, Education, Iteration, Inclusion

Four Pillars of our User Group

1. Member Development: Helping our members grow both through both technical and professional education

1. Outreach: Engaging with the greater Public Sector community

1. Awareness & Education: Helping to drive conversations on how DevOps can benefit the communities we serve

1. Contributing: Continue to support the growth and transformation of DevOps within the technical community

Code of Conduct

To ensure a positive experience we will adhere to the GitLab code of conduct found [here](#)

Boilerplate Verbiage

Join us as we build a community of GitLab users within Government and Education where peers can share best practices, connect with public sector GitLab Team members and collaborate on how to best serve the public sector.

We are committed to providing opportunities for discussion, education and community building for individuals who serve the public sector. We look forward to connecting through both virtual and in person events, training and team building!

Branches

- Caffeine and Collaboration [caffeineandcollaboration](#)
- User Group Workshops [usergroupworkshop](#)
- Iterate! Start something new!

Recommended Formats for Event

- Roughly 1.5 hours in length
- Series of 2-3 speakers (one GitLab and 1-2 customers)
- AMA or Panel

Sample Agenda/Example Slide Deck

Sample Agenda/Example Slide Deck

GitLab Forum

- Encourage members, registrants and attendees to get involved and open up discussions on the GitLab Forum page for the GitLab Government User Group.

Imagery

- Branding should remain consistent across the entire User Group program leveraging marketing approved Tanuki graphics.
 - Press kit for Tanuki designs can be found here

Hashtags and Social Media Promotion

- The following hashtags should be used when promoting on social platforms:
 - gitlabgovernmentusergroup
 - caffeineandcollaboration (when applicable)
 - gitlab
 - devops
 - devsecops
 - gitlabusergroupworkshop (when applicable)
- Event should be promoted via GitLab's corporate LinkedIn Events page. Reach out to @KiraAubrey in Field Marketing to have the event placed on the site.
- Event should be promoted via Bambu. Reach out to @KiraAubrey to get a post created, approved and ready for team sharing.
- Encourage relevant people from the sales, marketing and technical teams to promote via their social pages.

When Engaging a Partner

Consider the following items:

- Will the partner be hosting the meeting? (applicable to both in-person and virtual versions)
- Will the partner be collecting the registrations and how/when will those be shared with GitLab?
- Ensure that the partner is aware this is NOT a marketable event.
- Ensure branding is in alignment with GitLab Government User Group branding.

Backend Processes

Getting Started with Meetup.com

1. Create your meetup page on meetup.com
1. Reach out to the community team to let them know you've created a new meetup and request the GitLab Corporate Account code
1. The community team will provide you a unique ticket link. Click and follow prompts to have your meetup page join larger GitLab network on Meetup.com
1. Once page is established alert your team that it is live and encourage page engagement
1. Once an event has been established it should be announced on the GitLab Government User

Group meetup.com page. Please reach out to @pmejia and/or @KiraAubrey to have the event published.

- Please Note: Meetup.com will be leveraged for announcements and save the date messaging. Actual registration will take place on external registration sites via GitLab or the involved partner.

- Best Practice: Create a Save the Date event for your upcoming event on meetup.com!

Best Practices - Sample Timeline for a User Group Run Through Carahsoft

- GitLab Team Member nominates a Speaker and Proposed Topic/ Speaker submission form is received

- Intro call with GitLab and Speaker

- Agenda

- Confirm topic

- Confirm availability for the event

- Confirm ability to reference agency in promo materials

- What approvals do they need

- What details do they need from GitLab to secure approvals

- Discuss Desired Format

- Presentation

- Interview

- Panel Interview

- Review Logistics

- Carahsoft hosts via Fed Zoom

- Meetup.com page will be leveraged (ask speaker to join our user group on meetup!)

- Outline Next Steps

- GitLab to provide speaker with any information needed for approvals

- Speaker to secure approvals

- GitLab to introduce Carahsoft to schedule the dry run

- GitLab and speaker walk through the agenda prior to Dry Run

- Speakers will need to provide a headshot and bio

- Carahsoft will host Dry Run

- Event Completed

- Follow up between GitLab and Speaker on approvals until they are secured

- Team effort between marketing channel and nominator

- Follow up between GitLab and Carahsoft once approvals are in flight

- Invite email copy

- Confirmation email copy and resources

- Assets

- Coffee order form if applicable

- Request Graphics from Carahsoft

- Email banner

- Social media

- Update Meetup.com with a Save the Date or Event Placeholder

- Once Approvals are secured Introduce Speakers to Carahsoft

- Carahsoft to work on scheduling dry run

- Carahsoft to share invite for speakers to leverage

- Carahsoft/GitLab to prompt speakers for headshots and bio

- GitLab and Carahsoft to Collaborate on Event Assets

- Slide Deck

- Script
- Polling Questions
- Best practice: separate doc for polling questions
- GitLab and Speaker Sync to Review Content for the Event
 - Dry Run for GitLab, Carahsoft and Speaker
 - Review Zoom logistics
 - Early login for all participants
 - Polling question logistics
 - Review Script and flow for the day of the event
 - Ensure speakers are comfortable
 - Reminder to join user group on Meetup.com
 - Reminder to order coffee if applicable
- Carahsoft and GitLab to leverage cadence call prior to event for moderator prep
 - Review script and define responsibilities around hosting, muting, poll questions etc.
 - Review slides
- Finalize copy for Thank you email and confirm CTA's and resources
- Carahsoft to Load Poll questions into Zoom meeting
- Day Before Event
 - Carahsoft sends reminder email
 - GitLab sends reminder email via meetup.com prompting RSVP's to register if they haven't already
- Carahsoft confirms all poll questions are loaded
- Day of Event
 - GitLab checks meetup.com for any questions and updates invite with zoom link (in case folks want to attend but don't want to register via Carahsoft)
 - Carahsoft and moderators to join 30 minutes early
 - Speakers to join 15 minutes early
 - Carahsoft to kick off event a couple minutes past the start time
- Follow Up
 - Carahsoft to send thank you email with resources and prompt to join the next event

User Group Event Checklist

text

- Invite Copy
- Confirmation email copy
- Resources for confirmation email
- Coffee order link (if applicable)
- Graphics
- Email banner
- Social
- Slide template
- Zoom background
- Script
- Poll questions
- Thank you email
- Resources
- Invite for next event (or meetup.com save the date link)

GitLab Company Information (Including Tax ID)

Useful Company Information

AMER Field Marketing iPad Purchasing and Setup Instructions

Purchasing Details

iPad Pro 12.9 inch/256GB/wifi

iPad Pro 12.9 inch Smart Keyboard Folio

- When purchasing, please utilize the GitLab Business Account for corporate discounts. The Apple store/online representative will look up the GitLab Business Account associated with GitLab's 268 Bush St., San Francisco, CA 94104 address.
- Do not purchase AppleCare
- iPads can only be purchased by the regional Field Marketing Manager

iPad Tracking

AMER

In the AMER region, we utilize this issue to track the team's iPads.

EMEA

In the EMEA region, Ten&One is utilized for the team's iPad tracking.

APAC

TBD

Setting Up Logins

iPad Password

- Utilize the password listed in the notes section of the AMER Field Marketing Apple ID located in the Marketing 1Pass

Field Marketing Apple ID

- Log in to the AMER Field Marketing Apple account utilizing the username and password listed under the AMER Field Marketing Apple ID located in the Marketing 1Pass. Please take note of the additional information listed in the notes section regarding cell phone verification.

Google Drive and Slides

- Follow the instructions [HERE](#) to set up Google Drive and Slides

Working with Field Marketing

Requests to Field Marketing leadership team

If you are a Field Marketing Manager and you would like to make a request in order to achieve better business results aligned to our values, please submit an issue using the Field Marketing Leadership request issue template.

FM leadership team will review all requests on a bi-weekly basis, and will prioritize as necessary or will share with you relevant issues if the request is already being worked on.

Why we use this template:

Funneling similar requests from a global team and addressing shared pain points in a single issue with a DRI will help to reduce noise and churn for other teams we collaborate with and ideally helps to improve a process that works for the WW Field organisation.

This issue should not be used as a shortcut to get questions answered but for request where FM leadership can help to improve a process which does contribute to our success as a team.

How Field Marketing Tracks Campaign Expenses

For information on how Field Marketing tracks campaign expenses, please visit the Marketing handbook page section [here](#).

Field Marketing Labels in GitLab

The Field Marketing team works from issues and issue boards. If you need our assistance with any project, please open an issue and use the Field Marketing label anywhere within the GitLab repo.

General Field Marketing Labels

- Field Marketing: Issue initially created, used in templates, the starting point for any issue that involves Field Marketing
- FY25-Q1 FY25-Q2 FY25-Q3 FY25-Q4: What event or activity is set to take place or be due in this quarter in the specific year
- mktg-status::plan: work that is proposed, in an exploratory state
- mktg-status::wip: work in progress that has been accepted and assigned to a DRI
- Events: Issues related to events - this label is held at the gitlab.com level
- Content Syndication: Issue related to content syndication
- DevOpsDays: Issue related to DevOps Days
- Direct Mail: Issue related to Direct Mail
- Executive Roundtable: Issue related to Executive Roundtables
- GitLab Connect: Issue related to GitLab Connects
- Hybrid Conference: Issue related to Hybrid Conferences
- In-Person Conference: Issue related to In-Person Conferences
- Meeting Setting: Issue related to Meeting Setting
- Owned Event: Issue related to Owned Events
- Webcast - Sponsored: Issue related to Sponsored Webcasts
- Survey: Issue related to Surveys
- Vendor Arranged Meetings: Issue related to Vendor Arranged Meetings
- Virtual Conference: Issue related to Virtual Conferences

- Webcast - GitLab Hosted: Issue related to GitLab-Hosted Webcasts
- FM Workshop: Issue related to Field Marketing-run workshops

Regional Field Marketing Labels

- APAC: Issues that are related to the APAC sales team
- EMEA: Issues that are related to the EMEA sales team
- FM AMER ALL: Issues that are related to the AMER ALL Allocadia plan
- Central Europe: Issues that are related to the EMEA Central Europe (DACH) sales team
- Europe CEE: Issues that are related to the EMEA Central Eastern Europe sales team
- Southern Europe: Issues that are related to the EMEA Southern Europe (France, Italy, Spain, Portugal, Greece, Cyprus) sales team
- Northern Europe: Issues that are related to the EMEA Northern Europe (Nordics & Benelux) sales team
- UK/I: Issues that are related to the EMEA UK & Ireland sales team
- Russia: Issues that are related to the EMEA Russia & Ukraine sales team
- MEA: Issues that are related to the EMEA MEA (Middle East & Africa) sales team
- East - NE & NYC Metro: Issues that are related to the US East - NE sales team and East - NYC sales team
- East - SE & Mid Atlantic: Issues that are related to the East - SE sales team and East - Mid-Atlantic sales team
- EAST - South Central: Issues that are related to the EAST - South Central sales team
- WEST - SW & Bay Area: Issues that are related to the West - SW sales team and West Bay Area sales team
- WEST - NW & North Central: Issues that are related to the West - NW sales team and Central - North Central sales team
- LATAM: Issues that are related to the LATAM sales team
- Public Sector US: Any issues related to US Public Sector
- AMER PubSec - FED: AMER FED tactics
- AMER PubSec - SLED/CIV: AMER SLED tactics
- AMER - DOD: AMER DOD tactics
- AMER - CIV: AMER Civilian tactics
- AMER - SLED: AMER SLED tactics
- AMER - NSP: AMER National Security tactics
- FMS AMER: FMS AMER general requests
- FMS AMER - Swag: FMS AMER swag requests
- FMS AMER - Contracts: FMS AMER contract requests
- FMC EMEA: Apply this label for the attention of the Field Marketing Coordinator-EMEA
- FMC EMEA - Event Tracking: Event/deadline tracking related to FMC EMEA
- SDR-GO Live: Label FMMs add to the SDR Request issue that notifies the SDR team that the issue has been completed and is ready to be worked by the SDRs. SDR-GO Live Summary board.

For more information on how Field Marketing utilizes GitLab for agile project management, please visit [Marketing Project Management Guidelines](#).

The Field Marketing Budget

Field Marketing manages its budget in Allocadia. Specific instructions on how we manage our expenses:

1. Each FMM will have a quarterly allocation of money to spend based on territory pipeline needs.

1. Every month on t -6 days (so 6 business days before the start of the next month) finance will do a pull of this data and push it into the company planning tool called Adaptive. Field Marketing Managers must always keep their budgets up to date, but it is essential the budget is accurate for the month prior to t -6 days, as FMM Leadership reviews the budget vs. actuals on a monthly basis.

- Via Geekbot, each FMM will receive a reminder t-8 days before the start of the next month - or 2 days before the monthly forecast is due to Finance.

1. Direct Mail accrual process - Spend should be planned and expensed in the month in which they are sent out to recipients vs. the month in which the recipient could use the direct mail piece, as we have no control over when a gift card (as an example) is used.

1. Survey accrual process - If you are using a 3rd party to complete a survey, it's the responsibility of the FMM DRI to account for the percent of work that was completed in that month in the budget. As an example, if you signed a contract with a vendor to complete 100 surveys, and in month 1, 50 of the 100 contracted for surveys were completed, then you would account for 50% of the expense in month 1.

- This update in monthly expense is due to be updated directly in the budget document, in the correct month, in advance of the t -6 days before the end of the month, which is when Finance does a pull of our budget doc to run a budget vs. actuals comparison

1. Content Syndication accrual process - If you are using a 3rd party to run a content syndication play, it's the responsibility of the FMM DRI to account for the percent of work that was completed in that month in the budget. As an example, if you signed a contract with a vendor to complete 100 leads, and in month 1, 50 of the 100 contracted for leads were delivered, then you would account for 50% of the expense in month 1.

- This update in monthly expense is due to be updated directly in the budget document, in the correct month, in advance of the t -6 days before the end of the month, which is when Finance does a pull of our budget doc to run a budget vs. actuals comparison

1. The entire cost of the program is to be forecasted for - Sponsorship + lead scanners + monitor + any other auxiliary cost that the company will incur.

1. If the event is just 1 day, then the start and end date would be the same.

1. Any expense that is less than \$5,000 USD will be expensed against your budget in the month it is paid. This is in alignment with our GitLab Prepaid Expense Policy. It is essential that you have this expense in the correct month within Allocadia.

1. For expenses more than \$5,000 USD (also in alignment with our Accounting rules), we recognize the expense in the month when the work happens, NOT when the cash leaves our doors.

- As such, when you are running paid digital ads to support campaign work, you must account for the spend in a separate line item (this is aligned with our practice of creating separate line items for each individual invoice/spend. You will keep the same campaign name for the digital spend, but you will need to account for the different vendor and different time frame in the additional line item.

1. If you are running a campaign that has more than one tactic, and there are specific dates for the tactics, then each tactic will need its own line item in Allocadia.

- As an example: If you are running a country specific campaign on CI/CD and there are 2 webinars and a workshop included in that campaign with a different specific date, then each webinar and the workshop will need its own tag, in addition to its own line item in the budget.

1. Each folder in Allocadia is protected based on the managers/DRI's for each region. Only those with permissions will be able to edit each folder. Please reach out in the allocadiamktg-budget-holders slack channel if you need permissions updated.

1. At times, expenses are shared across an entire region. These expenses are housed in the ALL region folders. Any activity plans should transfer money to the ALL folder when looking to share the cost of expense. The same expense should NOT live in multiple activity plans if its an expense that is shared amongst more than 1 activity plan.

- As an example: If all regions within AMER want to collaborate on the same campaign and they each want to spend \$5k on the campaign, the FMMs would use the transfer budget feature within Allocadia to transfer that money into the All AMER activity plan. Once in All AMER, the correct sub-geos should be selected in the details panel so its clear how this campaign will support the different regions/sub-geos. Transferring to the All folders also prevents FMMs from having to divide out the MQLs amongst the various regions as well for ROI calculation purposes.

- In order for the shared activity to be pulled into the regional pipeline reporting for QBRs, the FMM will need to remember to also select the ALL folder in addition to their activity plan name in order to pull their full plan noted in reports 3 & 4 here.

- Video walk through - must be logged into YouTube Unfiltered

- SFDC campaign owner will be the specific DRI for the overall campaign if running a shared campaign.

1. When splitting a tactic between territories, all money should be transferred to one activity plan and the PO should be raised from that one line item.

1. For budgeting purposes we need to stipulate the amount in USD (as we currently operate in USD) in the FMM budget. Allocadia does have a multi-currency function where you right click in the planned or forecasted sections and the conversion amount is completed for you pulling exchange rates that are loaded on the back end by our finance team.

1. VAT and GST does not need to be included into budget planning as these do not attribute to program expenses, however sales tax in the US does.

1. As it relates to procurement issues being approved, it is essential that the contract details are submitted with the procurement issue, that way the approver is clear about what they are signing off on.

- We aim for an MQL to not cost us more than \$500, should a contract be submitted that is over the \$500 goal, there needs to be a documented reason + path to success shown in the procurement issue. It is the responsibility of the FMM Country Manager to ensure this documentation is listed in the procurement issue before the issue is sent on to further leadership to review/approve. For C-level and other campaign where we target decision makers, the customer journey needs to be documented and we acknowledge that the MQL might be higher.

Customer Speaker Gifts

If you require information about paying for Speaker travel and hotel stay, please refer to this section in the GitLab Event Information page.

Please note that there is a limit of \$75 USD annually per person on customer speaker gifts.

Field Marketing and the Procurement Process

Field Marketing Contract Requests

In Field Marketing, the FMCs manage all Zip requisitions for their regions. For contracts or invoices ready to submit for approval, the FMM will utilize the Contract Request task in the Asana project and follow the instructions to provide important details required.

SLAs

The SLA for your FMC to submit your request to Zip/Coupa is 3 business days from when they are assigned the contract request task. Please keep in mind it generally takes a week+ to obtain all approvals and/or signatures during the procurement process (longer for more complicated contracts that may require redlines from legal), so please plan accordingly.

Document Review

Please make sure you have reviewed your document carefully and have pre-filled the contract details required in the agreement before completing your contract request task in Asana. Below are some items to keep in mind when both the FMMs and FMCs are reviewing contracts...

- Correct GitLab entity that needs to be utilized, along with the correct address associated with that entity
- GitLab company name spelled correctly (capital L!)
- Lead specifics - What contact information will be provided and when?
- Correct event dates, cost, and sponsorship level
- Clear vendor goals and if the vendor fails to deliver against T&Cs/goals, a detailed make-good clause
- If a room block is involved, accurate attrition requirements have been included

Month Close

Please Note: AP typically closes out the month by the third business day before the last day of the month (Day -3). Once AP closes the month, any charges under \$5k (under \$50k for swag/shipping) occurring via a credit card or invoice approvals will be reconciled the following month. The month close date will be announced each month in the allocadiamktg-budget-holders Slack channel and will also be added to the Marketing Finance Dates Calendar.

Prepaid Policy

Please make sure you have reviewed our company's prepaid policy and have forecasted your cost(s) correctly in Allocadia.

Signature Authority

GitLab team members DO NOT have signature authority. This means that FMMs are not allowed to sign any legal documents pertaining to quotes, orders, contracts, BEOs, etc. If you have a document that requires a signature, please submit it in a contract request to your FMC to process through procurement.

Coupa Card Versus Navan Card

This template is to be utilized for all contracts/orders/invoices that either require a signature/acceptance of terms and conditions and/or are over \$5,000 in cost. If your order does not require a contract/signature and is under \$5,000, you may utilize your Navan credit card for payment.

Coupa Card Limits

Please be aware that your Coupa card limit is directly associated to the approved PO amount. We

have a 10% overage on the card and if you try to charge more than 10% over the PO amount, the card will decline. If you require additional funds be added to the card limit, you will need to request your FMC submit a PO Change Request to increase the PO total and the card limit.

Coupa Card Max (Onboarding New Vendors)

Please also note, we can only use Coupa cards for POs up to \$25,000. Anything over \$25,000 requires ACH payment and onboarding the vendor through Zip/Coupa. If you know you have an upcoming contract/payment over \$25,000, please contact your FMC in advance so they can check to see if the vendor is currently in Zip/Coupa and if not, they can request the vendor be onboarded in advance by submitting a Zip request. No contract is required to submit this request and an estimated cost can be provided. Please note in the title of the submission that the request is for new vendor onboarding only. For any questions, please reach out to your FMC.

Various Charges on Coupa Card

If you are submitting various charges for approval on a Coupa virtual card, please make sure you either provide the PDF contract/order/quote or, if ordering through an online portal, please include a screenshot of the items you need to order. Each separate order requires a supporting PDF or screenshot that shows the vendor name, items being ordered, and total cost. These requests will be reviewed during the procurement process and if approved, the Coupa card issued will cover all costs submitted. Only one Allocadia line item is required per Coupa card approved. For example,
