

if you submit a contract request for booth, AV, and IT charges for a show that equal \$3,000, you only need one Allocadia line item ID for all three charges and your plan/forecast number would equal \$3,000.

PLEASE NOTE: These charges follow the prepaid policy and you will always reference the total cost of the charges/PO amount for determining the prepaid threshold. For example, if you submit a \$3,000 AV order and a \$3,000 booth items order together on one PO, the total PO amount is \$6,000. Even though each charge is under the \$5k prepaid threshold, the total amount of the PO is \$6,000, so you would forecast the charges under the month the event occurs.

Multi-Event Contracts

We often receive a discount for multiple events and the vendor includes all events under one contract. When this occurs, the FMM will need to create an Allocadia sub-issue and line item for each event and provide all of the Allocadia IDs in the contract request for the FMC. The FMC will submit the contract in ZIP and add separate lines for each event with that specific event's information and Allocadia ID.

PLEASE NOTE: These charges follow the prepaid policy and you will always reference the total cost of the charges/PO amount for determining the prepaid threshold. For example, if you submit a contract for 3 events and each event costs \$3,000, the total PO amount is \$9,000. Even though each event is under the \$5k prepaid threshold, the total amount of the PO is \$9,000, so you would forecast each event charge under the month the event occurs.

F&B/AV/Additional Event Charges

Since we often don't have the exact headcount for an event in advance, additional costs (such as AV, F&B, etc.) can be estimated for initial procurement approval. If your additional costs are included in the initial venue contract, please ask the venue to provide pricing for your estimated headcount in the contract (especially for F&B costs, so that you are not only submitting your F&B minimum). This will give us a baseline cost estimate for approval and your FMC will adjust the PO amount as needed, based on final cost (a PO change request will be issued for charges above 10% over the original PO amount). If your additional costs (catering, AV, etc.) are being provided by different vendors from the venue, please make sure you have separate Allocadia line items for those charges and also submit separate contract requests (if a contract is required by the vendors). If the vendor does not require a contract and charges are under \$5,000, you can pay with your Navan card.

Sourcing New Field Marketing Vendors

Field marketers are always looking for new ways to support the sales teams within their regions and to provide unique, alternative ways to draw potential prospects closer to our company and show value to our current customers in order to expand within those accounts. Field marketers have a vast tool kit of marketing initiatives for precisely that. However, sometimes a gap is identified and field marketers will look to external third party vendors to help fill that gap when it comes to achieving their goals to their marketing metrics.

When sourcing and selecting a new third-party vendor, there are a few things that should be considered:

1. What are you trying to achieve? What is the gap you have identified? Is it filling the top of the funnel? Building relationships within a specific target audience (i.e. C-Level)? Maybe your goal is delivering on more qualified leads? Be clear on your end goal(s) from the beginning.

1. Can this vendor achieve your goal? Have the vendor show you proven use cases and references on your specific goals.

1. Have you sourced more than 1 vendor? A good point of reference is to research at least 2 or 3.

1. Is this vendor willing to proceed with a pilot program with you? Even with the best intentions, not all 3rd party vendors will fulfill your needs as originally discussed. A pilot program will allow you to try out the vendor and/or their product without requiring a full investment up front.

1. Identify all of the pieces of the contract. Ensure that you and the 3rd party vendor are aligned on the following:

- Cost
- Timeline of project
- Timeline of onboarding
- What is required when it comes to integration - Full Access, No Access or Partial Access
- What are your deliverables?
- What are their deliverables?
- Identify who needs to be trained. What does that training involve?
- Who will be the DRI for the project (always have 1 person who will support you during your contract process)?
- What is the cost of renewal, or, if you are running a pilot, what is the cost of a full term contract?
- If you're running a pilot, what are the goals you have in place to determine if you should invest beyond the pilot phase?

Once you feel confident that you have chosen the right 3rd party vendor, now is the time to begin the following review process.

Working with vendors that are brand new

New vendors are popping up frequently and in the spirit of iteration and testing, the Field Marketing team at time may want to engage with a vendor that is brand new to the space (remember, at one point in time way back in 2011, GitLab the company was brand new too!). You should work with your leader to assess these opportunities. To ensure we are protecting our own company, you should follow these steps when working with a brand new vendor:

1. If contacted via social media or other manner by an unknown individual and/or individual(s) related to an event, review all event/program materials, including a detailed review of the organizers website to confirm past events. In addition, review various social media materials.

1. If an event is unknown, new or first time, the Team Member can engage with Alliance and Channel Team Members to gather feedback on the events organizer and ensure value, use your network internally and ask around if folks know this vendor.

- Where applicable, request details and documentation related to previous event(s) hosted by the organizer.

- In situations where an organizer is hosting an inaugural event, Team Members can ask for other partners / sponsors who are participating, and receive direct confirmation from the event

space host (e.g, hotel).

- In situations with first events, the field marketing team can engage the GitLab Legal Team for additional review.
- Video walk through with our legal team outlining this process can be found on GitLab Unfiltered.

Software Vendor/Product Approval Process

1. FMM and FMC to review the Procurement Handbook Page so you are familiar with the procurement process and lead times. Please be aware of the SLAs listed in the Procurement Process for processing all reviews, approvals and contract negotiations. Note the bid process based on thresholds as well.

1. FMM to open a Field Marketing issue and detail out the justification for the potential new vendor/product. Include any presentations, slides and demos that have been provided to help explain the product. Tag your regional manager in the issue to review and discuss. Approval must be received to move forward. Make sure to attach all of the following issues to your main Field Marketing Issue for easy access.

1. FMM to open a Contract Request issue and assign to the regional FMC.

- SLA for FMC to complete the Contract Request issue is 3 business days from the date all needed info is filled out by the FMM in the Contract Request issue. FMM to leave a note if turnaround is urgent (FMCs have been averaging 1-2 business days currently).

1. FMC to process an NDA with the vendor, specified in the procurement handbook here. Remember to attach your executed NDA when opening your Zip requisition in the steps below.

1. If you're requesting a new software tool, FMM to open a Marketing Ops Tools Eval issue. Marketing Ops will help evaluate the product and will assist in the procurement process. They will also help you determine if an integration is required with any products in our current tech stack and if so, which team will be the DRI for the integration.

1. FMC to follow these instructions for opening a Zip requisition. Please note that you can submit the Zip requisition even before a contract has been provided. This template details the following approvals:

- NDA requirement
- Privacy review (if applicable)
- Security review
- Tech stack request (for new software purchases)

1. If you're requesting a new tool, and if the new product requires integration with any of our existing products (SFDC, Marketo, Outreach, etc.) FMC to open an integration request issue with the appropriate team (see step above where the Marketing Ops team will help determine). Integration will not begin until all approvals are final and the contract has been fully executed, but opening the integration issue early will give the appropriate team advance notice for planning.

Field Marketing and Legal

Legal Approvals

Field Marketing executes contracts with outside vendors to support the work we do. We do so by following the company procure to pay process. All legal approvals will flow this process.

It should be a rare occasion (and not a result of poor planning), that a contract would need to be urgently (less than 5 business days) turned around. Only after all FMM approvals have

happened, should the FMC ping legal on slack asking them to please approve an urgent ask.

Sweepstakes

Field Marketing follows the legal team's process here for contests and sweepstakes.

Field Marketing Communications

Regional Email Aliases

Field Marketing utilizes regional email aliases for pre and post tactic outreach. Please see this section for more details.

Slack Rooms we use

- fieldmarketing - open to all teams to ask questions to field marketing & where weekly stand-up reports get posted to.
 - If you're an employee at GitLab trying to reach Field Marketing, please head over to our slack channel.
 - NOTE: If you're requesting we sponsor an event, instructions can be found here.
 - If a region specific question is asked in the fieldmarketing slack room, please tag the regional Field Marketing leader, as that person is the DRI.
- fieldmarketing-fyi - Official channel for Field Marketing Leadership to post announcements to the Field Marketing team.
 - Restricted permission levels to only FMM Leadership posting the announcements
 - Announcements can be submitted to your manager if you would like to something shared
 - All members have comment access to allow clarifications if needed on a thread
 - You are to react with an emoji (thumbs-up, eyes-) to signal to managers that you've seen an announcement
 - There should be no need to cross-post announcements (such as posting a link from another slack channel to the fieldmarketing channel)
 - With a company-fyi and the fieldmarketing-fyi, all relevant info should be successfully communicated by managers to team members.
 - Default to issues first, then public channels when possible to avoid siloing work information to private discussions.
 - Use DMs for personal, private conversation rather than work communication (unless you are certain it is only relevant to the 2 of you or you need immediate attention).
- fieldofdreamsteam: private room only accessible to FMMS - funny GIFs, private questions for the team.
- Please keep in mind we have detailed instructions on how GitLab uses slack.

Async Status Updates

Since we are a remote company, we utilize a Slack plugin called Geekbot to coordinate status updates. Field Marketing world wide currently conducts 1 weekly standup. Geekbot shares this update in the public im-hangout slack room.

Weekly Status Update

The Weekly Status Update is configured to run at 9 AM local time on Monday, and contains a

series of rotating questions. Below is an example of questions you may see:

1. What was your favorite part of the weekend?

The goal with this question is for you to get to know your colleagues and for you to be able to share what excited you from the previous few days when you weren't working.

1. <i>Are you traveling anywhere this week? If so, where and why.</i> <--- This question is paused for the moment. :)

As Field Marketers, we travel up to 50% of the time. Sharing where you are is important, especially if are in a different timezone.

1. What are your top 1-3 priorities for the next week?

These top 3 priorities should be focused on what you plan to accomplish that week.

1. Anything blocking your progress?

Of those 1-3 items listed, do you need any roadblocks removed in order to accomplish the priorities?

1. A question that is related to which GitLab Value we are focusing on for the month.

You will be notified via the Geekbot plug in on slack at 9 AM your local time on Mondays, as stated above. It is important to note, that unless you answer all questions in the Geekbot plug in, your answers will NOT be shared with your colleagues, so please be sure to complete all questions!

Out of Office Process

We follow the processes documented in the Communicating your time off section of our handbook page.

Specifically:

1. Add your OOO to Workday

1. Notify both your manager and the person covering for you that you will be out of the office. Make sure the person covering for you has details for items to watch or take care of for you while you are OOO.

1. Add an OOO message for your email. Please ensure you are including a DRI in your OOO email response for people outside the company to contact.

1. Turn on Google Calendar's "out of office" setting (scroll down to "Show when you're out of office") to create an out of office event that will automatically decline new and existing meetings for you. Or, please ensure to manually cancel/decline/reschedule any meetings if you will not be in attendance.

1. Add an OOO to your Slack profile (this will occur automatically when you submit your OOO to Workday). If you're traveling for an event and not necessarily on PTO/vacation, please ensure you are manually updating your Slack status accordingly.

1. If your time off was added in Workday, Time off by Deel in Slack will prompt you to add a delegate who will be covering for you. Please fill in this information so it's clear in Slack who people can contact in your absence.

1. Add an OOO to your GitLab profile and mark yourself as busy

1. If you work in ZIP, please assign a delegate by going to ZIP - Settings - Personal Settings - Out of Office.

1. If you work in Coupa, please assign a delegate in Coupa so you will not hold approvals while you're enjoying your time off.

Field Marketing MR process

Everyone can contribute, although not everyone has merge rights. Within the Field Marketing team, when someone submits an MR, the submitter needs to assign to their direct line manager to review, and then their manager will assign to the VP of Regional Marketing to review. Once the VP has reviewed/approved, it is their responsibility to ensure all threads are addressed and resolved and all merge conflicts are resolved, then merge.

Should a Country Manager of Regional Marketing or VP of Regional Marketing submit a process change in the handbook, then all Country Managers should sign off via approving the MR or commenting their approval. At which point, the Director ensures all threads are addressed and resolved and all merge conflicts are resolved, then the VP will merge.

Creating a spif for sales

At times, Field Marketers may want to create a SPIF (sales performance incentive fund) to help drive sales behavior in a campaign they are running. While this should not be our standard to offer a SPIF, should one need to be used, we do need to report back to payroll any incentive that was paid and to who. The process is as follows:

1. There is no payment threshold that would not need to be reported. All SPIFs must be reported.
1. The SPIF DRI should send the legal name of the winners to payroll
1. The SPIF DRI should include the amount of money (or value of the prize, if a prize was offered) to payroll
1. Contact info for payroll can be found here on their handbook page.

Other pages to review for a full understanding of how Field Marketing at GitLab operates

- Events at GitLab
- Marketing Operations
- Sales Development
- Marketo program/campaign support

Account Based Marketing

Account based marketing is separate but sits next to field marketing. For info on account based marketing, please head over to the ABM page.

Tiers of support from Field Marketing for Corporate lead events

In an effort to support the events the corporate marketing team runs, Field Marketing will rank the shows on an annual basis that corporate marketing runs.

Tier 1

Field Marketing will:

1. Run a meeting setting program at this event - this means that sales leadership has agreed that they want their sales team spending time on driving these meetings.

1. Evangelize the event is taking place with all regional sales teams.
1. If not already being planned by the corporate marketing team, run an auxiliary event driving registration with the sales teams.
1. Be onsite to support the event as needed
1. Participate in Corporate Events lead stakeholder calls

FY25 Tier 1

1. AWS re:Invent
1. Gartner Application Summits - AMER, EMEA, APAC
1. Gartner Security Summit - AMER
1. Google NEXT

Tier 2

Field Marketing will:

1. Evangelize the event is taking place with all regional sales teams, but will have no specific ask of the sales team
1. Will not be on onsite to support the event.

FY25 Tier 2

1. KubeCon US
1. Black Hat US

Deprecated Handbook Content

We feel like this info is too good to delete, and while we currently aren't using either the tool that is described or the process, we just aren't ready to delete.....its like that sweater you just can't seem to get rid of in case you may need it one day...

Field Marketing Event Copy Deadline Process

Please review SLAs above.

- FMM to assign FMC in main event issue.
- FMC to attach their regional event tracking label to the event issue.
- FMM and FMC to follow the process for issues Moving from Plan to WIP.
- FMC to create a Write Copy Issue and fill in the requested copy due dates for each asset the FMM has requested in the FMC checklist, and then attach the issue to the epic.
- FMM to update the Copy Document file the FMC created for them (linked in the epic) with copy for each asset. Previous Copy Documents for reference are available in the Event Support Folder.
- Once the FMM completes copy, they will ping the FMC in the Write Copy Issue to notify them which asset copy has been completed.
- If copy has not been completed for an asset yet, (1) business day before copy is due, the FMC will ping the FMM in Write Copy Issue with a copy due reminder.
- FMC will make sure copy has been provided or continue to remind the FMM, if needed.

Lead List Deadline Process

- FMC to create the List Clean and Upload issue during the plan to WIP process.
- FMC to assign a due date of 2 business days post-event
- One (1) business day after the issue is due, FMC to ping the FMM in the list clean and upload issue to remind them leads are due
- FMC will make sure leads have been provided or continue to remind the FMM, if needed

Refined AMER Regional Marketing Event Planning Cycle

The schedule provided below presents a 20-week planning timeline meticulously designed for the seamless execution of our regional marketing events. These Service Level Agreements (SLAs) are strategically established for our Field Marketing Managers (FMMs), ensuring they have ample time to orchestrate and promote a robust event, while synchronizing the availability of other teams' SLAs, including Procurement, Marketing Operations, the SA teams, our Field Marketing Coordinators, etc. It is essential to remain adaptable, as adjustments and modifications may become necessary to align with the unique event objectives, target audience, and the resources at our disposal. Ultimately, the unwavering dedication of our team will serve as the cornerstone of success for each event.

17-20 Weeks Out: Strategize and Initiate Planning

<details markdown=1>

<summary>At this stage, we lay the groundwork for a successful event by creating a well-defined strategy and rallying key players.</summary>

- Initiate strategic collaboration with Sales to align event goals and strategies.
- Define clear event objectives, messaging, target audience, and desired outcomes.
- Secure unwavering buy-in from essential stakeholders to ensure full support.
- Develop a comprehensive campaign plan using Allocadia, continually monitoring the budget.
- Compile all available details into a comprehensive Main Issue.- Secure required third-party vendors if necessary, and create vendor contract request issue(s).

</details>

14-17 Weeks Out: Resource Alignment and Team Coordination

<details markdown=1>

<summary>During this phase, we focus on coordinating resources and refining our strategies to meet evolving needs.</summary>

- Review and approve contract requests for event vendors.
- Request team member resources based on event needs.(SA,BDR, SDR, CS, Design, Internal - Speakers etc) when required use specific team request issues as needed..
- Continue collaborating with Sales to refine goals and strategies.
- Schedule meetings with relevant team members to outline their contributions to the plan.
- Please continue to revise the issue, providing comprehensive updates that capture all plan details and ensuring that all key stakeholders are appropriately tagged.

- Move to WIP.

</details>

12-13 Weeks Out: Draft Initial Content, Design and confirm all Key Stakeholders

<details markdown=1>

<summary>We delve into content creation, design, and finalizing key stakeholder involvement while maintaining a clear timeline.</summary>

- Review the Issues/Epics, adding estimated completion dates for each task.
- Confirm availability and roles of requested cross-functional team members and finalize team member assignments. Note: Internal team members must have permission from their managers to travel. Once approved, send placeholders to their calendars for events.
- Work with the design team to conceptualize event branding and design if needed.
- Begin drafting the Copy document to form the events foundation.
- Collect concise abstracts from speakers and presenters for their sessions, to enhance your landing page and agenda.
- Review initial content drafts and design concepts.
- Gather feedback from stakeholders and make necessary revisions if needed.
- If necessary, request approvals from internal stakeholders.

</details>

11-12 Weeks Out: Review, Refine Content, Develop Landing Page and Collateral

<details markdown=1>

<summary>During this phase, we polish content, initiate promotions, and ensure a seamless, finalized Copy Document for the event landing page, confirmation emails, and initial outreach (Email 1).</summary>

- Compile and organize essential Target lists: Target Accounts, Target Audience, DMA requests, Relevant Previous Campaign Subject Matter, etc., for Copy Doc.
- Explore opportunities for collaboration with Campaigns, ABM or Social teams for event promotion.
- Thoroughly review and approve landing page design and the first email.
- Launch promotional efforts across social media and other channels.
- Finalize and approve the event landing page and initial email.

</details>

8-10 Weeks Out: Fine-tuning and Launch Preparation

<details markdown=1>

<summary>With preparations in full swing, we focus on executing the first wave of communications and readying assets.</summary>

- Confirm the timing of email 1, targeting the event's intended audience.
- Continue robust event promotion across multiple channels.
- Coordinate the creation and ordering of event-related swag and materials.
- Initiate event swag shipments and asset preparations.
- Continue to refine Main Issues/Epics, ensuring they capture all the intricate details of the comprehensive plan.

</details>

3-7 Weeks Out: Enriching Engagement and Preparing for Event Second Email Communication

<details markdown=1>

<summary>This period centers on deepening engagement, fine-tuning event logistics, and enhancing participant experiences.</summary>

- Monitor the response to email 1 and track engagement with the landing page.
- Develop email 2 with additional event details if needed and value propositions.
- Sustain promotion efforts across various channels to bolster excitement.
- Collaborate with speakers and participants to ensure seamless event coordination
- If applicable, create a booth schedule for effective participant interaction.
- Conduct a thorough review of event logistics and setup details.
- Verify the timely delivery of all event-related assets and swag.
- Send out email 2 target audience, highlighting event benefits
- Finalize copy document for reminder emails and post-event follow-ups including relevant call to action resources.

</details>

1-3 Weeks Out: Final Touches and Attendee Confirmations

<details markdown=1>

<summary>As we approach the event, we focus on last-minute preparations and ensuring a smooth execution.</summary>

- Verify attendance and manage any late registrations.
- Send calendar confirmations to registered attendees, including comprehensive key event details.
- Conduct a final walkthrough of the event venue or virtual platform.
- Collect finalized assets from presenters for their respective sessions.
- Ensure all event-related assets and swag have been received.
- Prepare an all-inclusive 'Know Before You Go' guide and distribute it accordingly.
- Conduct an all-encompassing event stakeholders' run-through

</details>

0 Weeks Out: The Event Unfolds

<details markdown=1>

<summary>On the event day(s), we execute flawlessly, ensuring every detail is attended to.</summary>

- Ensure seamless technical operations and troubleshoot any unforeseen issues.
- Confirm readiness of assets, presentations, and materials.
- Ensure seamless coordination among speakers and participants.
- Execute the planned event according to the established schedule.
- Monitor event progress, promptly resolving any unforeseen challenges.
- Collect valuable leads and notes from sessions, to better foster post-event engagement.
- Pack up and return any necessary assets

</details>

1 Week Post Event: Event Follow-Up Post-Event Analysis and Reflection

<details markdown=1>

<summary>Following the event, we analyze its performance, gather insights, and embark on improvement strategies.</summary>

- Analyze key event performance metrics, encompassing attendance, engagement, conversions, and participant feedback
- Conduct 360 Review with key stakeholders on the effectiveness of the event, lessons learned and to identify areas for improvement.
- Compile and prepare leads for upload to Marketo within 48 hours, , including detailed corresponding notes. Ensure all lead information is accurate and ready for upload
- Upload event leads
- Within 48 hours, ensure that a follow-up email is scheduled to be sent to attendees with relevant call-to-action resources."
- Wrap up and close campaign issue and archive relevant materials.

</details>

1-2 Weeks Post Event: Evolving for the Future

<details markdown=1>

<summary>With one event completed, it's time to reflect, plan, and optimize for the upcoming campaigns.</summary>

- Reflect on the successes and challenges of the planning process.
- Initiate discussions and brainstorming for the upcoming quarter's planning and strategy.
- Identify opportunities for enhancement and refinement in future endeavors.
- Begin planning for the next successful event, incorporating lessons learned

</details>

Printfection Direct Mail Giveaways

<details markdown="1">

<summary>We will be deprecating usage of Printfection and will use Reachdesk or our selected swag vendor for direct mail. Expand below to see details regarding Printfection</summary>

The below steps can be followed to set up and run a giveaway campaign using Printfection for field marketing. If you come across any steps that you can't follow in Printfection, post in the swag Slack channel so a Community Advocate can update your permissions levels.

1. Register and send the items you will be using to Printfection by following these steps
1. Bundle your items together by creating a Giveaway Kit in Printfection
 - The picture of the Giveaway Kit is what the customer will see. If you'd like a different image to show than what Printfection puts together as a preview, be sure to provide this to the support team
 - Select Standard packaging or choose to create a custom box (a new custom box will incur additional expenses). If you'd like to use already created custom packaging (such as the GitLab branded Poly Mailers), check with the advocates in the swag slack channel to make sure it's okay for you to use
1. Set up a Giveaway Campaign
 - Add the kit you created as an item in the Giveaway Campaign
 - The name of the giveaway campaign will be visible to the customer
 - Change from Paused to Running when you're ready to run the campaign
1. Add a Printfection code column to your event spreadsheet with your leads. Copy over unique codes (generated above in the Printfection Giveaway Campaign) to assign a code to each lead
1. Work with your MPM to set up the Printfection URL & unique codes in your email copy (if desired, steps 5-7 are only relevant if sending a Marketo email rather than individually distributing the redemption links):
 - Place the Giveaway Campaign URL in your email copy (found on the Overview tab of the campaign in Printfection)
 - A custom Marketo field will be used to append the unique Printfection codes to the URL for each lead (example of how it works here) and to place the code under the URL
1. Complete list upload prior to the email send date (example list upload here)
1. Work with your MPM to determine post redemption email needs. The options are follow up email and an automated confirmation email. The confirmation email triggers upon redemption of codes, the follow up email is sent at one time to a group of recipients. If an automated confirmation email is needed, define what status in SFDC should trigger the follow up email using the Direct Mail campaign status progressions. (for example, when a person's campaign status changes to Queued it could trigger a confirmation email and when the status changes to Shipped the SDRs will begin follow up sequence (example here)
1. Once all above steps are complete, the Giveaway Campaign is ready to run. Make sure the Giveaway is changed from Paused to Running if you did not do this already in Step 3
1. When the campaign is running, monitor Redemptions, Shipping, and Costs under the Giveaway Campaign Overview in Printfection
 - Update redemptions/shipments in event spreadsheet if needed to notify SDRs (add additional columns to track)
 - Update SFDC status for leads once they redeem a code or item is shipped, depending on what was decided in Step 7
1. When a campaign is over and you no longer need the items in Printfection, follow these steps to remove items from Printfection. If inventory is not yet 0, you will need to ship the items back to yourself/desired recipient before archiving. Until this is done, \$25/month will still be charged per item. If relevant, the MPM must be instructed as to when the Printfection codes are no longer needed on person records. This will signal that the MPM can now run a batch smart

campaign to remove the Printfection codes from the person records, thus freeing up the custom field for use in the future.

Fees Involved:

- Cost of the items you are using in the giveaway
- Fulfillment and shipping fees for each order placed once the giveaway is running (there is a Cost Estimate under campaign settings but please note actuals have ended up higher than their estimate so far) These will be on a Printfection invoice, more details to come on the invoice process.
- \$25/month per item stocked in Printfection. This will not hit your field marketing Allocadia ID, but is an overall cost to GitLab to consider and be mindful of (noted in Step 12 here

</details>

Account-Centric Micro-Campaign

<details markdown="1">

<summary>Expand below to see details regarding Account-Centric Micro-Campaigns</summary>

The purpose of the regional integrated micro-campaign is to build and drive a specific strategy in a region (with a specific list of targeted accounts/look-a-like accounts). This could be based on intent data pulled from our ABM tool, DemandBase, or it could be based on accounts you've agreed to target with your SAE. A micro-campaign must include a minimum of 2 different account-centric tactics.

For example:

- If you are planning a virtual Lunch & Learn and want to utilize LinkedIn InMail as well, those 2 account-centric tactics together make up a micro-campaign. However, if you are planning a Lunch & Learn on its own without any additional tactics, that is just considered an individual tactic.

What does Account-Centric mean?

At times, Field Marketing will run an account-centric approach to its in-region campaigns. Account-Centric is an approach where both sales and marketing are focusing their efforts on a very specific list of targeted accounts in order to increase engagement and ultimately pipeline creation within this list of accounts. The SAE/FMM/SDR are responsible for outlining which accounts are account-centric and accounts can easily pop in and out of being in the account-centric play based on the strategy that's being executed.

i.e. If a FMM is targeting to get 15 people into an interactive roundtable discussion, that will greatly impact the number of accounts that are targeted for that specific tactic vs if they were trying to 100+ people into that same discussion.

How to track the ROI of your Account-Centric approach

In order to track engagement, you need to start with a baseline and over time, track the progress on how engaged that account is with us. Right now this is a manual process where this

SFDC report should be modified by pulling in all the accounts that are in the account-centric GTM Strategy per rep and then you must take a snap shot in time (SFDC does not allow for historical data pulls) by exporting the data and saving to a gsheet. Example of gsheet. Depending on your campaign, you can export this data on a weekly or monthly cadence to monitor progress.

In order to change the GTM Strategy field for accounts in SFDC from Volume to Account-Centric, you can employ two options: a) Change the GTM Strategy field for each account manually if you have <20 accounts in the campaign, or b) Create a MOps request to have all accounts changed from Volume to Account-Centric in bulk. To request the bulk adjustment, please utilize this MOps template.

Account-Centric is different from Account Based Marketing in the sense that ABM focuses on accounts as markets of one versus account-centric targeting a group of accounts. At GitLab we run a 3-Tiered approach to ABM focused around our ICP and target 100-150 accounts in our ABM strategy at any given time. For complete details on how GitLab runs its Account Based Marketing, please head to the GitLab ABM page.

At GitLab, we utilize Bizible for attribution tracking. In order to track the touchpoints of your campaign, modify this linear IACV SFDC report . This report shows Opportunity: Incremental ACV and Linear iACV.

- If your campaign has a SFDC campaign with leads associated to it, then you will pull in the SFDC Field Salesforce Campaign equals .
- If your campaign does NOT have a SFDC Campaign with leads associated OR you also are wanting to track the opportunities from your digital spend, then you would add in the SFDC Ad Campaign Name equals . We use the same UTM per channel, so all channels (paid ads, LinkedIn Mail, DemandBase, etc.) will pull all influenced iacv. Stay tuned for more details on Bizible.

Account-Centric Micro-Campaign Team

- Field Marketing Manager - overarching DRI responsible for opening the micro-campaign issue, reviewing the intent data from the ABM DRI, and building the strategy based on what the intent data is suggesting (i.e. are a lot of folks searching to Kubernetes? Is it digital transformation? What call to action do we have? Do you want a direct mail piece involved? Do you want to drive to an On-Demand or scheduled webcast?), owning, and driving the micro-campaign, including epic and issue creation and communicating timelines and actions needed of other team members with relevant SLAs from request to delivery.
- Account Based Marketing (ABM) Manager - will work with FMM to produce target account list based on intent data and known targets & will also lead strategy session with Demandbase Campaign Manager, should the FMM decided its part of the strategy to deploy ads via Demandbase.
- Sales Development Rep (SDR) - Will assist in building out the actual target people & build Outreach cadence to support agreed upon CTA.
- Digital Marketing Programs - Can assist in deploying paid digital strategies (ex: display ads, paid search, paid social, and/or paid publisher placement) and geo focused ads via our digital agency. They can also help get our digital agency involved should the FMM want to engage with the agency.
- Marketing Program Managers - Setup of Marketo and Salesforce campaigns with correct program type to support the tactic. Guidance on system tracking, and setup of Marketo email follow up. Facilitate new program types with MOps and other MPMs as necessary.

Steps for the Creation and Organization of Micro-Campaign Epics & Issues

1. FMM opens overarching issue

FMM opens a field marketing issue using the Micro-Campaign and Individual Tactics Template, listing the tactics to be used from the list below in step 2. At this point, the issue is in PLAN stage.

WHY? The purpose of opening the overarching micro-campaign issue is to discuss the plan with any teams that would require work and gain agreement on SLAs before opening epics and issues. Remember - as of today, epics cannot be made confidential, they cannot show up on issue boards, and there is no such thing as an epic template.

Here is what needs to be included before moving from PLAN to WIP:

- Agreement on SLAs and scope between other teams involved in selected tactics - SLA workback doc
- Formulation of a clear strategy and understanding of customer journey
- Completion of all fields in the Details section of the micro-campaign template

For anything that's listed in the Tactics included section of the template the FMM needs to be clear about their specific ask & what the desired outcome will be. If the FMM does not know, it's ok to set up a call to talk through ideas and strategies.

2. FMM opens specific tactic issues

FMM opens additional issues relevant to their micro-campaign, if required.

WHY? The purpose of opening the issue is so that each individual tactic shows up on the FMM boards. Remember - as of today, Epics cannot be made confidential, they cannot show up on issue boards, and there is no such thing as an epic template.

Issue Templates for Each Tactic:

Please see the Field Marketing Issue Templates and Epic Codes list [HERE](#) for a comprehensive list of templates to be utilized for each tactic.

3. FMM creates tactic epics

FMM follows the instructions for epic creation based on the tactics decided.

WHY? The purpose of opening the epics and issues is to organize the campaign in GitLab with the epic being equivalent to the project/campaign and issues being equivalent to the tactical execution steps to complete the campaign.

How to create the epic:

- Where to create the epic: Marketing Epic Repo
- How to create the epic: Click "New Epic" at the top right of the screen
- What to name the epic: The naming convention is listed in the epic code for each specific tactic.

- What to choose as the due date: this should be the same as your micro-campaign issue due date. For example - If your micro-campaign involves 3 different tactics and the last tactic is set to close out on December 5, 2020, that should be your due date.
- How to link the epic to the issue: In your epic click on Epics + Issues - Add - Add an existing issue - Link your issue

Micro-Campaign Epic Code

This epic will include the general details of your micro-campaign.

markdown

<--- Name this epic using the following format, then delete this line: [Micro-Campaign Tactic Name] - [3-letter Month] [Date], [Year] --->

Micro-Campaign Issue >>

:notepadspiral: Details
(copy and pasted from your micro-campaign issue)

/label ~"mktg-status::wip" ~"Field Marketing" ~"FMM-MicroCampaign" ~"FMM-Other Tactics"

Epic Codes for Each Tactic:

Please see the Field Marketing Issue Templates and Epic Codes list [HERE](#) for a comprehensive list of epic codes to be utilized for each tactic.

4. FMM creates relevant issues and assigns DRIs and due dates

At this point the FMM has the main issue (for agreement by teams), the tactic issue(s) (to show up on boards), and the tactic epics (to capture overarching tactic plan and organize issues). Now FMMs will create the issues to request the work and timeline of teams involved in each tactic.

In each epic code (from step 3), there are issue template links included that indicate what issues need to be created (example - follow up email, facilitate tracking, etc.) - if they do not say "optional" then they are required. The FMM will create each issue and link to the epic so that all tactical issues are organized together clearly in GitLab.

The FMM will designate DRI as indicated and set due dates based on SLAs for each item that is being requested. SLA workback sheet is available to help you.

Note: This is essentially creating the work-back execution plan using issues, DRIs, and due dates.

If the date of the tactic is changed, the FMM is responsible for updating the due dates of all issues accordingly. It is also important to remember that the DRIs on the issues are not notified when due dates are added. If you create an issue and then add due dates at a later time (or change due dates), please remember to ping the DRIs in the issue so they are aware dates have been added or changed.

5. Organizing Epics

Your micro-campaign issue and epic is an overview of your micro-campaign strategy and each individual tactic supporting the micro-campaign requires its own issue and epic. When you add individual tactic epics to the micro-campaign epic, the micro-campaign epic automatically becomes the Parent Epic. Each individual tactic epic, when nested under the micro-campaign epic, automatically becomes the Child Epic. Whichever epic you nest the other epics under will automatically become the Parent Epic, so remember to always add your individual tactic epics to the micro-campaign epic and not the other way around.

For example - You have created a micro-campaign that will include a self-service event with promotion, a survey, LinkedIn InMail, and DemandBase targeted ads.

- You will create an epic for your micro-campaign per the above instructions.
- Your self-service event with promotion will require a separate issue with its own epic.
- Your survey will also require a separate issue with its own epic.
- Your LinkedIn InMail will require its own issue (the only DMP tactic that currently requires an epic is Content Syndication).
- Your DemandBase ads will require its own issue (ABM tactics do not currently require epics).

To organize your various tactic epics under your micro-campaign epic:

- Click into your micro-campaign epic
- Scroll down to Epics & Issues
- Click Add an Epic
- Paste the epics from your other tactics into this section and GitLab will automatically organize the tactic epics under your micro-campaign epic

Micro-Campaign Training Video

Video training on how to set up a Micro-Campaign. This video walks you through how to set up a Self Service webcast with promotion and LinkedIn InMail. Two tactics = Micro Campaign.

Example Micro-Campaign for Training

- Micro-Campaign Epic
 - Micro-Campaign FM Issue
 - Self-Service Virtual Event with promotion Epic
 - Self-Service Virtual Event with Promotion FM Issue
 - Follow Up Issue
 - Invites and Reminders Issue
 - List Clean and Upload Issue
 - Facilitate Tracking Issue
 - Paid Survey Epic (No separate FM issue since information is in overall Micro-Campaign Issue)
 - Gated Content Request Issue
 - Follow Up Issue
 - Facilitate Tracking Issue
 - LinkedIn Inmail Issue (No epic required)
 - DemandBase Targeted Ads Issue (No epic required)

FAQ's - Micro Campaigns and Other Tactics

1. If I am only running 1 tactic, do I need to create the micro campaign issue? Answer: No, you do not. A microcampaign includes at least 2 account centric tactics.

1. If I want to run ads through our ABM vendor do I need to create a micro campaign issue? Answer: No, you do not. A microcampaign includes at least 2 account centric tactics. Ads with our ABM vendor is only 1 tactic.

Reminders - Micro Campaigns and Other Tactics

1. Labels - be aware of your labels. Please be mindful that you're adding the correct labels.

1. Epic label issue - There is a glitch right now which may keep the labels from auto-assigning. In order to have the labels added to your epic, you'll need to copy the /label line from the epic code into a comment to pull over all labels. Quick video how-to. 2 mins

1. If you create an epic & sub issues and DO NOT have a date, then when you go back and add dates then you MUST ping the assigners - could be FMC, MPM, OPS, etc.

1. When you go from plan to WIP that's when everything starts - from the SLA workback as well.

1. The details section is so important - what that tells the MPM/FMC how this program should flow. You can't move your issue to the WIP stage until the details are added - This is where if attention to detail isn't your BFF, you need to make it your BFF. ;)

</details>

SimplyDirect

<details markdown="1">

<summary>Expand below to see details regarding SimplyDirect</summary>

Overview

SimplyDirect is a third party company that helps companies identify buyers and early adopters using the latest in big data tools and high-response surveys. The program from SimplyDirect includes surveying (through GatePoint Research), responder intelligence, and custom content creation in the shape of a Pulse Report highlighting the overall findings from survey responses. These custom built surveys are developed via collaboration with GitLab sellers, Product Marketing, and Sales Development Reps, where the aim is to target accounts to create actionable sales intelligence which reveals an account's needs, pain, plans and trends. In addition, GatePoint Research provides an incentive of a free gift upon completing the survey.

Our strategy is to leverage the data from the survey responses as well as the Pulse Report provided to set meetings and create sales-accepted opportunities. The data gathered from the surveys will also help the Digital Marketing Team and Campaign Managers by providing insight into the respondents current state of DevOps use and strategy as well as pain points and challenges.

Regions that Utilize Simply Direct

At this time, SimplyDirect is only used by our AMER Field Marketing team.

Successful Usage

Strategic success is contingent upon close alignment and communication between Marketing and Sales. Marketing will work collaboratively with Sales, Product Marketing and Campaign Managers to develop the survey. Best practice for the survey is 10 questions max. SDR's will create a follow-up Outreach sequence to leverage when reaching out to those who've completed the survey.

Once the survey is complete, SDR's will leverage the individual results and work with their SAE to:

- Identify points of interest in the survey pertaining to each individual response (i.e. pain points, number of tools, etc)
- Create a strategy based on matching those issues with GitLab offerings
- Customize their outreach communications to initiate conversations towards setting a IQM

Personas

Our focus will be geared towards key-decision makers or fellow team members who can help push to key decision makers. This opens up our outreach to anyone in DevOps, DevSecOps, IT and other related fields with titles ranging from Developer Team Lead to Executives.

Examples of personas/titles include: Director/VP of Engineering, Director / VP of Machine Learning (or AI), Director/VP of Enterprise Architecture, Director/VP of Product Development/Engineering, VP of Digital Transformation, Director of Applications, Director of Security (Information Security, IT Security, Application Security), VP of Operations.

Phases for SimplyDirect

- Phase 1: Sales and Marketing create the survey and share the target accounts and personas with SimplyDirect. Upon completion, SimplyDirect sends out the survey and shares survey results with the GitLab team via the SimplyDirect portal. The account list shared with SimplyDirect has an SDR assigned to each account so the tool will send the assigned SDR an email notifying them when a survey is completed. FMM will share the portal website, username, and password in the issue for SDRs or SAEs to access survey results and analytics. FMM will also provide SDRs with training before launch on how to navigate the portal and share SimplyDirect's best practices. This phase is considered complete once the predetermined number of survey responses is achieved (number of responses will be identified in the SOW). Please note that a gift is sent to survey respondents by SimplyDirect as a thank you for completing the survey (Example: Columbia Jacket/Fleece). SimplyDirect also creates a detailed Pulse Report with survey results when the phase is completed and provides it to GitLab along with a list of high-intent targets who did not complete the survey (see Phase 3 details on how to utilize these additional targets). Access to the portal is not indefinite so a report should be pulled from the SimplyDirect portal in order to add survey responses to our own tracking sheet if needed.
- Phase 2: Leads are uploaded to SFDC automatically through our SimplyDirect<>Marketo integration and SDRs can set up an Outreach sequence to follow-up with these leads by sharing the Pulse Report. There is also an option of a swag giveaway at this phase if a meeting is booked/attended.
- Phase 3: SimplyDirect gathers a list of additional high-intent targets (also contracted in the SOW) that have not opted in to be contacted by GitLab directly. In order to try to capture these additional leads, we can create a Pathfactory track that requires visitors to enter in their contact information to view the track (which includes the Pulse Report and other assets). SimplyDirect includes this Pathfactory link in their follow-up email to the additional

contacts. Anyone who enters their contact information in Pathfactory can be sent a follow-up by GitLab.

Reporting and Dashboards

SimplyDirect defines engagement by targets filling out the survey. The SimplyDirect<>Marketo integration adds anyone who fills out the survey automatically into the Salesforce campaign.

ROI & Metrics

- Total number of meetings
- Total number of SAOs
- Pipeline progression

Working with our Digital team

- For paid social campaigns, details on how we collaborate with the Digital team can be found [here](#).
- We are not running ads for webcasts or workshops - as that is handled by our campaigns team.
- We will run paid ads to drive registration to regional in person events.
