

few milestones.) see feature request

Guidelines

Define milestone at lowest level needed

Define milestones at the LOWEST level of the organization as possible.

If the milestone ONLY applies to a specific project, then create the milestone there

If the milestone applies to a group of projects, then create the milestone at the lowest possible group.

This will mean that the lists of milestones available to a given Issue (when adding an issue to a milestone) will be limited to a smaller list of relevant milestones. (though the list might still be very long)

Milestone Naming Convention - prefix in name

Because of the filtering limitations and the massive volume of potential milestones, a consistent Naming Convention is very, very, very helpful in finding the right milestones.

All Milestone names should start with either the group or project abbreviation. The recommendation is to prepend the name with a two-letter abbreviation followed by underscore: gg.

For example:

A project milestone in the "Revenue Marketing" project should be named:

rmMilestone Name

A group milestone in the "Product and Solution Marketing" group should be named:

smMilestone Name

This will help in two ways. First, when looking at lists of milestones, they can be sorted and put the related milestones together. Second, in issues, when adding a milestone, you can search by name, which will make it easy to find the right subset of milestones (either for the project or group)

Milestone Description - Include milestone history and who owns

Because the milestone does not yet include change history or details about who created it or why, we should use the description field to fill in the blanks.

In the description field describe the purpose of the milestone and who is milestone owner/manager

Milestones Details

Use for: larger units of work (in scope and duration) that resemble a release. E.g. an executive topic or campaign

Implement with: milestones

Time and duration: variable

Naming convention: teamprefix: MilestoneName

Issue management: via workflow and iteration issue boards

Scope: default to lowest scope. Define at the top marketing group for executive topics and integrated campaigns.

Recommended dates and duration: it depends, though shorter is often better. Because the milestone has dates for start and finish, the implication is that issues and MRs in the milestone are completed in this time window. If the milestone window is 3 weeks, then the expectation is that the work in the milestone is completed in that time frame.

Every team and every project is unique and there is no one answer for milestone duration. Some teams have had milestones as long as a quarter, others 4 weeks and others 1 week. Choose the duration that works for your team, learn, and evolve.

Iterations

Define iterations at highest level required

Define iterations at the HIGHEST level required of the organization as possible (for a cohesive approach using the same time-basis).

Iteration Naming Convention - Mktg in name

A consistent Naming Convention is helpful to ensure similar iterations (i.e. not including Mktg: are used by only the Marketing department at GitLab.

Iterations Details

Use for: planning agile or agile-like sprints to capture tasks/user stories that can be completed within the iteration.

Implement with: iterations

Time and duration: 2 weeks, from Mondays to the following Sunday

Naming convention: Mktg: YYYY-MM-DD, with the ISO-formatted date being the end date of the milestone. Mktg: allows for filtering to only the Marketing-wide iterations, and the ISO date can help further filtering on month/day when assigning the milestone to an issue.

Issue management: via workflow and iteration issue boards

Scope: defined at the top marketing group, essentially for executive topics and integrated campaigns, but it is encouraged that all groups in Marketing use this one set of iterations for a unified workflow. These are the only iterations that will be defined at this level.

Backlog

Use for: issues that are either not ready to be scheduled or not planned yet. Also as a bucket to choose and schedule issues for the next iteration(s) or milestone(s)

Implement with: milestones at present.

Time and duration: undefined. Start and due dates are not set.

Naming convention: Backlog

Issue management: see TBD: backlog refinement

Scope: defined at the top marketing group. When scheduling backlog issues on an issue board or on an issue list, the backlog can be further filtered by team.

SECTION: marketing/readmes/_index.md

SECTION: marketing/readmes/brian-tabbert.md

Brian Tabbert's README

About Me

Hi there! I'm Brian. My last name is Tabbert, pronounced "tab" like the key on your keyboard combined with "bert" as in "Bert and Ernie." Although my sister and I have always joked that we should follow Stephen Colbert's lead and pronounce it "tab air," which is much classier.

I live in Indianapolis, Indiana, USA with my wife and twin daughters, who take up a majority of my free time. Otherwise I am a sports fanatic, particularly basketball, baseball and American football. My biggest passion is Indiana University basketball.

Strengths

- I am extremely Concrete Sequential, which means I thrive in situations that contain order, structure and logic.
- I am very analytical and data-driven. Put problems in front of me that deal with numbers and tangible parts.
- I am a Cool Blue. The more detailed you can be in your communication, the more useful I will be to you. Expect me to take time to make sure I have considered all available information and then come back to you with a measured response.

Assessments

My CliftonStrengths results suggest that I lead with Executing themes, which help me make things happen.

My top five individual strengths are:

- Consistency - You are keenly aware of the need to treat people the same. You crave stable routines and clear rules and procedures that everyone can follow.
- Analytical - You search for reasons and causes. You have the ability to think about all of the factors that might affect a situation.
- Focus - You can take a direction, follow through and make the corrections necessary to stay

on track. You prioritize, then act.

- Discipline - You enjoy routine and structure. Your world is best described by the order you create.

- Competition - You measure your progress against the performance of others. You strive to win first place and revel in contests.

Leadership Identity

If I could sum up my leadership style in two words, it would be "trust" and "accountability." I trust and expect members of my team to be self-motivated and able to effectively carry out their job duties without constant oversight. That being said, I "inspect what I expect" and will hold team members accountable when necessary, and expect my leaders to operate the same way.

I consider myself an empathetic person and leader, capable of putting myself in other peoples' shoes. As a result, I place a premium on two-way feedback, holding regular 1:1s with both my direct and indirect reports and making sure their voices are heard. In addition, I know that being an employee of GitLab is one of multiple roles that people hold and is nobody's entire identity. As such, life happens and I choose to give people grace to be human beings.

I am a detailed communicator and value transparency. I will always err on telling you more than you need to know rather than not enough. I have an "open-door" policy and will always prioritize my people if I am not otherwise engaged.

I am extremely data-driven. While not beholden to it, I consult and leverage data when making decisions. I rarely "fly by the seat of my pants" and change course based on feel. My goal is to use data to set my team up for success, using all available information to put them in the best possible position to execute and deliver results. Measure twice, cut once.

Communicating with Me

I'm a pretty informal communicator who values responsiveness, and you can expect a speedy reply from me if I am not otherwise occupied. The more detailed you can be in your communication, the better. Based on the scope of the topic, I'm always open to Slack, video huddle, scheduled Zoom call, or Salesforce Chatter. Feel free to book meetings with me over free slots on my calendar without needing to confirm if it will work, but please be mindful of my working hours. I have hard starts and stops for my kids.

I am always looking to improve myself and my team and am always open to feedback. Please (a) be constructive and (b) consider the privacy of others when deciding to share feedback in a group setting or 1:1.

How Sales Development Contributes

Our department helps GitLab deliver on overall business goals by initially qualifying prospective and existing customers and connecting them with Sales team members. We do this through articulating GitLab's differentiated platform vision and value in our customer outreach, driving Security adoption by positioning Ultimate as a solution, and introducing new capabilities to the market such as our Duo suite.

SECTION: marketing/readmes/christine-lee.md

README: Christine Lee

· I'm Christine! This page is intended to help others understand what it might be like to work with me, especially people who haven't worked with me before. It's also an effort at building trust by being intentionally vulnerable, and to share my ideas of a good working relationship.

Please feel free to contribute to this page by opening a merge request.

About Me

- I grew up in Alpharetta, Georgia (a suburb near Atlanta), and went to college at MIT in Cambridge, Massachusetts, where I studied Materials Science & Engineering.
- I have lived in the San Francisco Bay Area since 2009. It feels like home now, though I still visit my family in Atlanta often.
- I live in San Jose, CA with my partner Dennis and my two pet bunnies, Cinnabun and Teddy.
- I currently lead our Marketing Ops & Analytics team at GitLab, which comprises of Marketing Ops, Marketing Analytics, and Globalization & Localization.

Strengths

- Problem Solving: I am a problem solver at heart and get the most job satisfaction when I am working on challenging projects with people I enjoy working with. I think critically and try to understand "the why" behind "the why".
- Organizing: My natural tendency is to organize chaos, i.e. bringing structure and clarity to unstructured or ambiguous situations.
- Collaboration: I enjoy working with diverse teams to accomplish a goal. I strive to ensure that team members can contribute with their individual strengths, so that we can collectively get to the best outcome. I find great satisfaction when we have globally optimized as a team to do what's best for the whole. I am equally happy leading or contributing to an initiative; I care little about power and have no ego.
- Communication: I communicate clearly and in a structured way. I think about how to deliver messages in the most effective way to various audiences. I value context and try to share as much as I can without causing information overload. I am able to simplify and explain complex concepts.
- Persistence: I don't give up easily. I am meticulous and will sweat the details.
- Care: I care a lot - about the integrity of my work and the people that I work with. I will often put extra effort into work and work relationships.
- Trust: I have been told that I am easy to trust. I believe this comes from having good judgment and self-awareness, holding myself accountable, and being genuine and authentic. I like to "keep things real."

Growth Opportunities (and how you can help me)

- Balance: I am easily consumed by things when I am focused on them, and tend to go full-force. This can sometimes cause me to lose balance (e.g. experiencing burnout) or lose perspective. It can also come off as intense / serious to others.

- How you can help me: Please make me aware and remind me to rest or take time off. If my intensity is too high, let me know so I can dial it back a bit.
- Overthinking: When I encounter situations where I can't figure out the "why" behind something is happening, or if decisions appear to be illogical, my brain goes into overdrive to try to make sense out of the situation.
 - How you can help me: Say why not just what. Feel free to tell me "you might be overthinking."
- Solutioning: Because I gravitate towards problem solving, I sometimes jump to solutioning instead of listening. I am an active listener, but sometimes I cut people off too early.
 - How you can help me: Please don't be shy to point this out to me, for example "I just wanted to vent for a bit, before solutioning."
- Risk-Averseness and Decisiveness: At the same time, my analytical nature sometimes causes me to be slow to make decisions, so that I can gather more information to inform that decision. I can often see both sides of a situation, which can make me seem like I lack conviction. I am risk-averse by nature and sometimes need to be pushed to take calculated risks.
 - How you can help me: If you are asking me for a decision, please come with a few options laid out and a preferred option if possible.
- Saying no: I have trouble saying "no" and this can lead to me taking on too much at times.
 - How you can help me: If I'm agreeing to take on something new, please ask me what I'm deprioritizing to help force me think about my capacity.
- Communicating excitement: I don't naturally exude high energy in how I communicate - my friends joke that I have Eeyore energy. Sometimes I am actually quite excited about something, but this doesn't come through in how I communicate.
 - How you can help me: If you feel I should have been more energetic in communicating something exciting, or notice that this is bringing down the mood in a team setting, please let me know.
- I can't get control of my browser tabs. If anyone has tips on this, please let me know. :)

Working with me

- What gives me energy:
 - Working on challenging problems with people I enjoy working with. I take my work seriously, but I also like to have fun while doing it!
 - I am action-oriented and driven by achieving impact and results, both individually and as a team. When I don't have this, I spend most of my energy figuring out how to fix this.
- What takes energy:
 - Repetitive tasks and "checking the box" vs. working on more impactful things.
 - I have low tolerance for drama. We work on challenging problems already, so when there is drama that adds unnecessary complexity, I have little patience for it.
- Availability:
 - I typically work from 8am/9am to 5pm/6pm PT. I can take meetings as early as 7am PT but I try to limit them if possible as my brain doesn't work as well at that time.
 - I am a night owl and am often most productive late at night. If I send messages in the evening, I don't expect a response until working hours. I try to use delayed message send as much as I can when I do this, but sometimes forget.
- Communication and Meeting Preferences:
 - I prefer Slack and I try to respond as quickly as possible. I am not as responsive over email as I use it mostly for external communication. If something is urgent, please text me.
 - I try to stay on top of my GitLab To-Do's but if something is time-sensitive or if I am blocking something, I appreciate it if you ping me the comment over slack.

- If we've already talked about scheduling a meeting, please feel free to put time on my calendar in a spot that looks open. I tend to have more mindspace on Fridays for coffee chats. If you need help finding time, please reach out to Blaire Sullivan, EBA to the Marketing Leadership team.

- I really appreciate context. When you ask me for something, please explain the context for where the request is coming from, and say why not just what. You'll also find that, when I am communicating information, I try to share as much context as possible.

- Other Notes:

- I tend to be colloquial in my written communications and use a lot of emojis. In text communication, I believe emojis help a lot with non-verbal cues that we could miss otherwise.

- I have a terrible memory, and if I don't write something down chances are I will forget it. That's why you may see me always taking notes. Sometimes I might forget something that you have told me about your personal life - it's not that I don't care! Please be patient with me.

Personality Tests

Clifton StrengthsFinder

- Full results here. I lead with Executing themes (purple = executing, orange = influencing, blue = relationship building, green = strategic thinking)

- My top 5 strengths are:

- Individualization - People who are especially talented in the Individualization theme are intrigued with the unique qualities of each person. They have a gift for figuring out how people who are different can work together productively.

- Achiever - People who are especially talented in the Achiever theme have a great deal of stamina and work hard. They take great satisfaction from being busy and productive.

- Learner - People who are especially talented in the Learner theme have a great desire to learn and want to continuously improve. In particular, the process of learning, rather than the outcome, excites them.

- Analytical - People who are especially talented in the Analytical theme search for reasons and causes. They have the ability to think about all the factors that might affect a situation.

- Relator - People who are especially talented in the Relator theme enjoy close relationships with others. They find deep satisfaction in working hard with friends to achieve a goal.

Simpli5 / 5 Dynamics

- Full results here

- Abundant in Examine, effortless in Execute, deliberate in Explore and Excite.

Meyers Briggs

- INTJ - Introverted, Intuitive, Thinking, Judging - "Architect"

My Life Outside of Work

I spend most of my time outside of work in San Jose, CA with my partner Dennis (Mechanical Quality Engineer at Apple) and my two pet bunnies, Cinnabun and Teddy. Family is very important to me so I try to visit my parents and sister's family in Atlanta often. I'm mildly obsessed with my nephew Ian and niece Hannah.

My interests include:

- Gardening & indoor plants - Forces me to get away from screens
- Podcasts - Regular rotation includes The Daily, 99% Invisible, The Moth, Stuff You Should Know, How I Built This
- Food - Cooking, baking, trying new restaurants
- Hiking and being in nature
- Travel - Favorite trips include: French Polynesia, Barcelona, Banff & Jasper, Japan, Taiwan
- Music and concerts - Mostly indie / alternative

Thanks for Reading

As you get to know me, please share when you see a pattern of how I work that you think would be beneficial to articulate in this document.

If you have any questions, please reach out to me or schedule a coffee chat.

SECTION: marketing/readmes/jean-baptiste-larramendy.md

Jean-Baptiste Larramendy's README

About me

Hi! My name is Jean-Baptiste, or JB. Let's go with JB as it's much easier for everyone. I'm currently GitLab's Global Sales Development Team leader.

I have spent my entire career in sales and have specialized in Sales Development over the past 10 years. Even though I love building organizations that scale and consistently deliver results, my ultimate goal is to make as many people successful as I can.

This page is intended to give you a quick overview of who I am before we get the chance to meet.

Here's a bit about me:

- I live in Toronto, Ontario, Canada.
- I am a dual citizen: French & Canadian
- I have 2 mostly wonderful kids and a fantastic wife
- I have lived, studied and worked in France, Spain, Germany and now Canada
- I love all things outdoors
- My 2 favorite quotes are: "Take your job seriously, never take yourself seriously" & "A smooth sea never made a skilled sailor"

Strengths

(Clifton Strengths assessment results)

- Individualization: You are intrigued by the unique qualities of each person. You have a gift for figuring out how different people can work together productively.
- Relator: You enjoy close relationships with others. You find deep satisfaction in working hard with friends to achieve a goal
- Arranger: You can organize, but you also have a flexibility that complements this ability. You like to determine how all of the pieces and resources can be arranged for maximum productivity.
- Activator: You can make things happen by turning thoughts into action. You want to do things right now, rather than simply talk about them.
- Maximizer: You focus on strengths as a way to stimulate personal and group excellence. You seek to transform something strong into something superb.

Communicating with me

I'm pretty informal, message me on Slack, send an email, or tag me on a thread, and I'll respond as soon as I can. It's very important for me to know people: who they are, and what makes them tick. I love Coffee chats and connecting with people. So please reach out.

What I Assume about Others

- Positive intent.
- There are plenty of things I can learn from you.
- You'll ask for my input and help if it's needed.
- You have more going on than the one thing we're discussing.
- Everyone is likely fighting a battle we know nothing about.

[Website](#)

About me

I'm a frontend developer originally educated in UX and product design. I attended a coding bootcamp, fell in love with CSS, and the rest is history. If you're into accessible design and execution, I'm sure we'll be great friends.

Here's a conference talk I did at ForwardJS on the elements of a design system that developers love.

Impactful Books

Ruined By Design, by Mike Monteiro takes a look at the ethical considerations designers need to fight for when building a product.

Reset, by Ellen Pao tells the journey of the former venture-capitalist-turned-Reddit-CEO and her experiences of misogyny, discrimination, and retaliation in the tech and finance industries.

The Undoing Project, by Michael Lewis examines the Nobel-Prize-winning duo of behavioural psychologists Daniel Kahneman and Amos Tversky, and how they changed perceptions on decision-making.

Strengths/Weaknesses/Musings

I am not a morning person - I apologize in advance.

I might second-guess myself, and love having a sounding board of teammates to talk through ideas.

Everything I build is going to be as pixel-perfect as possible.

I'm a cat person, but I've been told I have 'dog person energy' so do with that what you will.

I like wine and coffee. Not in like, a snobby way; more in a 'just happy to be here' way.

I celebrate my birthday with a week-long event called LauraPalooza. Is that a strength or a weakness? I'll let you decide.

Communication Preferences

Message me on slack, send me an email, tag me in an issue - I like when things are written down and documented, since sometimes I don't trust my own memory. If we discuss something on a zoom call, I will likely post a summary of anything we agreed upon for my own recollection.

SECTION: marketing/readmes/lauren-barker.md

Lauren Barker README

I'm Lauren Barker. I lead by creating inclusive environments that empower teams to exceed their goals. I do this with strategic collaboration, communication, and a dose of humor.

How I work

I work daily on building and maintaining trust

Trusting people and being able to be trusted is crucial to a happy and productive work environment for everyone and it takes continuous work.

My focus as a manager

- The role of the IC is deep focus on difficult technical tasks.
- My role as a Manager is to focus on the big picture, filter the noise, to work with Marketing and help prepare the work as achievable pieces, then remove any roadblocks so scheduled work can be merged.
- Together, we deliver GitLab's marketing digital experience.

1:1s

1:1s with my team are the most important part of my day.

Team 1:1s are a meeting where I listen to your concerns and ideas, and strive to take immediate follow-up actions. I am happy for you to completely drive this meeting.

To keep notes, we have an ongoing Google document and for topic inspiration, we have an optional template.

Myers-Briggs Personality type

· "The Protagonist" (ENFJ-A/ENFJ-T)

Individual traits:

Mind: 72% Extraverted

Energy: 53% Intuitive

Nature: 51% Feeling

Tactics: 54% Judging

Identity: 57% Assertive

The Fun Stuff

Coffee chats

I'm a huge fan of Coffee Chats, they are an important part of the culture when a company is all remote. I have a personal target of 1 Coffee Chat a week with someone not who is not on my direct team.

Please don't hesitate to schedule one with me!

Books

These are books that have made an impact on me along with a great book on baking bread ⇒

- The Importance of Living, Lin Yutang
- The Prophet, Kahlil Gibran
- Tao Te Ching, Lao Tzu
- Beard on Bread, James Beard

Bits of Info

- · I'm born and raised on the Central Coast of California.
- · Surfing and the ocean is where I feel at home.
- · I race outrigger canoes with Pale Kai.
- · I love design and development.
- · I'm a lifelong learner who values knowledge and teamwork.
- · Coffee or wine please.

SECTION: marketing/readmes/michael-friedrich.md

This page is intended to help everyone to understand how I work, how to find me, my strengths and weaknesses, and my expertise and background. I'm intentionally vulnerable and open to feedback.

Please feel free to contribute to this page by opening a merge request.

About me

Grown up in Linz, Austria, I wanted to understand how a computer works in school. A 486 PC turbo-boost button that was not enabled by default inspired me to study Hardware/Software Systems Engineering, leading to circuit design, hardware and software programming languages, and more adventures with NFC and multimedia streaming in 2005. A student's dorm network project in Vienna, Austria, allowed me to dive into spanning trees (and loops!) and routing, which I expanded on with DNS and monitoring at the University of Vienna, Computer Center. Maintaining an open-source monitoring project for 11 years required me to understand how the software is used in production. CVEs raised awareness about security scanning. I therefore engaged with global events and community meetups to learn and understand the roles in modern DevSecOps and cloud-native workflows. My passion for open-source communities also inspired me to move to Nuremberg, Germany, in 2012, where I live today in the countryside. In March 2020, I started my all-remote adventure at GitLab.

Outside of work, you'll find me building LEGO models, combining embedded hardware with home automation, exploring nature, and travelling. You can learn more on my personal website: <https://dnsmichi.at/about/>

Biography and headshots

I have a detailed biography and CV available in different text lengths and languages, as well as professional headshot photos. You can find these resources in this public document.

My work values

I follow GitLab's values and specifically embrace these:

- I always assume positive intent. and encourage others to do the same.
- I love transparency, and keeping everyone SAFE. I work in public by default, with a low level of shame. You can expect me to document my work, share updates, and engage in important discussions to help achieve company goals.
- We are managers of one. I will go with a bias for action and not ask for permission to propose an idea, MR, action. If you want me to prioritize a request, please ask me directly by tagging me in an issue. You do not need to ask my manager to ask me.
- Say why, not just what. Understanding the why helps me validate decisions, and make better proposals. Merge Requests without a description explaining the why can lead to questions in Slack, or otherwise back-and-forth communication. Time that could be used more efficiently.
- Handbook first. Everything needs to be documented in the handbook so that everyone can learn async. If something is wrong or not documented in the handbook, it is a bug, and we need to create an issue or a merge request to fix it.
- I love project management. GitLab issues, epics, labels, due dates, and overall tracking. This provides transparency and results reporting, and enables efficient collaboration. Often, I identify feature proposals through dogfooding.
- I believe in "Everyone can contribute". Technical problems/blockers/barriers, product features, handbook updates, etc. need to be broken down, and explained on everyone's knowledge level. If you see me "testing" your knowledge in a conversation, be honest and frank and let me know if the explanation attempt is too low level, or instead needs a more in-depth deep-dive. I'm always happy to help and make it a learning coffee chat.
- There is only one Single Source of Truth, and it is discoverable by all team members, async.
- Slack is not a knowledge base (and messages will expire after 90 days). Every Slack thread should be summarized and broken down into actionable issues.
- I follow disagree, commit, advocate and trust that decisions can be changed.
- I often step on everyone's toes. My role requires cross-functional knowledge. Learning and discussing outside my comfort zone and expertise keeps me challenged, and requires a safe environment where short toes are the default.
- I love honest and actionable feedback. Do not feel intimidated to share feedback -- use a private message, or schedule a coffee chat to help me grow.
- No agenda, no attenda. If a calendar invite does not attach a Google document, or has an empty agenda, I will not attend in sync.
- Inclusive communication: We are an all-remote global company. I will remind everyone to use ISO dates and time zones, and provide clear due dates.
- Manual work is a bug. If you see me using quick actions, terminal commands, or writing scripts for the GitLab API, it often is because the manual work will continuously consume too much time, making me less efficient. I also love challenges -- Do not hesitate to ask to learn more. We can do "pair programming" coffee chats together.
- Family and friends first, work second. While I am passionate about my work, I enjoy the freedom of flexible work hours and PTO, and working remotely, allowing me to put family and friends first.

- Trust needs to be earned. I will work hard to earn yours.

I bring my authentic-self to work every day -- can you spot all easter eggs in my remote workspace?

Strengths and weaknesses

Strengths

- I'm a fast learner. I'm always eager to expand my knowledge and skills, whether it's learning a new programming language, framework, or technology. I enjoy tackling challenges and finding creative solutions.
- I'm adaptable. I'm comfortable working in various environments and can quickly adjust to changing priorities or requirements. I'm able to pivot and find new ways to contribute when needed.
- I document everything. Depending on the scope, a handbook merge request or GitLab issue is never far away. You can help me with your bias for action, and also assign handbook merge requests for review.
- I love connecting everyone. I'm not shy to engage in important discussions to help achieve company goals or contribute to cross-functional work, often in key Slack channels, epics, working groups, cross-functional initiatives, or monthly field syncs.
- I'm a team player and prioritize helping others achieve their results. I take the time to unblock processes and results (content reviews, feature and setup debugging, etc.) or contribute ideas to iterate faster.
- I have a broad knowledge base. My career has touched on many different technical topics and open-source collaboration. I'm here to share my knowledge and help you advance your knowledge, goals and career.

Weaknesses

- I'm passionate about my work, and sometimes push my opinion. When I think that my solution has the most impact for the business, I push for it, even though I am not the DRI (Directly Responsible Individual). I can also be direct, which can come across as overbearing at times. I am working on being more mindful of this and balancing my passion with consideration for others' perspectives.
- I say yes too often. I'm constantly challenged with many requests and my own ideas, and I sometimes overload myself with tasks and need to reprioritize. The printed Eisenhower Matrix on my desk helps me do, schedule, delegate, or delete tasks. I might forget about requests that are not tracked in an issue with a due date and a to-do assignment (Google Docs, Slack, Email). Please be proactive and create Developer Advocacy requests and assign them to me.
- My native language is German, not English, sometimes leading to misunderstandings. I have a vocabulary weakness for day-to-day items (e.g., kitchen and food). I'm learning through coffee chats, social conversations, and using Grammarly to improve my English. For example, when I share a tip to make you more efficient, it does not mean that you are not efficient. Instead, I am always looking for ways to help others benefit from my discovered efficiency tips, and need to word it differently.
- I'm not good at email communication. If I should follow up on an external email conversation, you might have to remind me to do so, or create a tracking issue.
- I occasionally fall into old habits and aim for perfection and completeness. Minimal valuable changes, boring solutions, and iteration are challenging sometimes. If you see me writing a

long tutorial blog post or a capture-everything issue, please jump in and remind me to break down the tasks.

Working with me

- I prefer asynchronous written communication over synchronous calls.
- GitLab issues, merge requests, and forum topics are preferred over Slack or Discord.
- I love low-context communication, providing all necessary context so that everyone can continue when I'm offline or focused on other tasks.
- Avoid live screen sharing presentations in meetings. Instead, record a walkthrough video, upload it to GitLab Unfiltered on YouTube, and share the resources in advance for the synchronous meeting.
- Ask questions in public Slack channels, so that everyone can contribute.
- This helps loop in more team members, subject matter experts, and those responsible for specific areas (DRIs).
- Please avoid direct messages (DMs) unless it's private feedback or confidential information. I'll respond to DMs with lower priority than public requests.
- I enjoy helping in public, and sometimes work evening hours to assist with incidents or timezone aligned tasks (after 10 AM PT, which is 7 PM CET).
- If I need to leave during a planned task, I will communicate the sign-off time and provide a handover summary.
- My calendar invites are editable by guests.
- Feel free to adjust the time to fit everyone's schedule.
- No worries about short-notice reschedules. I always have a task or project to work on, or appreciate the short break.
- My default Zoom URL has a waiting room set up for external guests. If I don't show up in Zoom on time and let you in, ping me on Slack.
- If you think a repeating coffee chat or a topic-specific 1:1 would be beneficial for efficient collaboration, propose a new calendar event and include an agenda document.
- My work hours cover mostly AMER and EMEA time zones.
- Meetings can be scheduled in my afternoon (5 AM to 10 AM PT, 2 PM CET to 7 PM CET). My mornings are reserved for focused work or personal time (shopping, extended lunch with friends).
- Ask when scheduling during my focus time blocks (customer calls, EMEA syncs, etc.).
- Team members can always schedule a coffee chat with me. I'd love to learn about you, your background, life stories, experiences, and interests.
- Wider community members can ask for my Calendly link.

Finding me

I go by dnsmichi everywhere: Slack, GitLab.com profile, GitLab forum, social media, and my personal website. However, for email and calendar, you need to find my full name Michael Friedrich or the short form mfriedrich. I love coffee chats, so please schedule one without asking for permission. :-)

I enjoy connecting with team members on LinkedIn, and amplifying your voice into my network (hiring, product/engineering insights, marketing, etc.). Tips for social media messaging are documented in the Developer Advocacy on Social Media handbook. I'm active on social media, but I have push notifications disabled on my mobile devices. I'm not good at responding to many private messages or connection requests, so using a different channel is more efficient. I

uninstall social media apps during vacations to relax and maintain my mental health.

My private contact details are available internally to team members. Please do not share them with anyone, as I don't want to receive spam calls or phishing attempts. If a web form asks for a phone number, use the company phone number instead. You can connect with me through WhatsApp, Telegram, or Signal, which is more reliable for location sharing, dinner coordination, and private pictures.

I do not have Slack installed on my mobile unless I am traveling for events. If an incident becomes urgent, text me on my private mobile.

Experience and engagements

In my career, I studied hardware/software engineering, debugged networks, hardware packet filters and DNS, and learned how services behave differently on Linux, Unix and Windows. I enjoy debugging and troubleshooting in production - therefore I run cloud VMs, containers, Kubernetes, Raspberry Pi, Arduino boards to keep me in practice, learning and building in public. Depending on the audience, I create GitLab blog posts or write about it on my personal blog.

I love creating tutorials, workshops, and trainings about GitLab use cases and new technologies - the 5-minute success moment is key for me. At my previous company, I authored their GitLab and Git training from scratch, and continued building workshops in my role as Developer Advocate at GitLab.

I usually try to understand the big picture and always want to look behind the curtain. I am interested in many cloud-native and DevSecOps technologies, but often reduce my scope after understanding the basics, blockers, and challenges. For example, I was fascinated by Chaos Engineering and WebAssembly in FY23 but found it hard to build a business case for it, after creating talks and workshops, for example at KubeCon EU 2022. I also invested in learning eBPF in FY24 and created workshops for GitLab Summit 2024 to share the knowledge with team members, but did not identify an immediate business impact for the Observability group, and paused the efforts.

GitLab Duo and AI required me to learn everything from scratch again. Finding a strategy to learn and scheduling coffee chats with product and engineering team members allowed me to expand my expertise. This also led to the GitLab Duo Coffee Chat on YouTube, a boring solution to help customers with real-world scenarios. Researching GitLab Duo with embedded use cases and GitLab Duo prompts and challenges took priority in FY25, and excite me every day in close collaboration with customers.

I thrive in areas where I am not an expert, and someone has asked for help, providing a real use case. For example, GitLab Duo adoption in a customer environment requires me to learn Java Spring Boot. My knowledge about GitLab features continuously sources from helping users on the GitLab Community Forum. I also help maintain the GitLab handbook backend and engage in CI/CD components initiatives.

My role as Developer Advocate enables me to take different hats: provide product feedback from different user personas' views, evaluate marketing messaging, or generally brainstorm about product feature ideas and architecture. Feel free to loop me into UX workflows, architecture

proposals, product roadmaps, or website design for different target personas. Recent examples of my cross-functional engagements are the SaaS Free User Efficiency initiative, the CI Use Case Adoption WG, and Developer Relations initiatives to drive company goals with GitLab Duo Adoption and CI/CD, Security Adoption.

I'm a leader within GitLab, and I'm happy to share my knowledge, expertise, and connections with everyone. I'm active in the Global Voices TMRG, and I'm an ally, for example, by supporting underrepresented groups in my mentoring and coaching activities.

About me

Hi! I'm Nathan, designer turned engineer who has spent the last 9 years building awesome SaaS products: Superna Eyeglass, SurveyMonkey Apply, SurveyMonkey Market Research, and Wufoo.

I am curious minded, with a strong sense of direction. I value moving fast, and facing difficult challenges.

Outside of work, I enjoy golfing, soccer, traveling, and trying new cuisine.

What excites me

Simplifying process.
Meeting challenges.
Outside the box thinking.

Simpli5 Report Overview

<https://www.simpli5.com>

When it comes to getting the job done properly and efficiently, I bring the following gifts:

Meeting challenges.
Organizing.
Focusing on and completing the task at hand.
Attaining goals.
Achieving and handling success.
Recognizing your own strengths.

Here are some of the things in myself and in others with which I have limited patience for:

Wasting time.
Disorganization.
Not being heard.

I know where I am and where I need to be by a certain time. I am gifted in knowing how to get there quickly and successfully. Well-organized and focused on my mission, I don't succumb to distractions.

Reaching my goals within a fixed timetable is important to me. I appreciate it when my teammates share this urgent enthusiasm. Steady and strong-minded, I truly enjoy challenges.

I am known for breaking down an entire project into workable parts to facilitate quick, efficient completion. I am a natural group leader; my ambition, enthusiasm, and vision will get the job done right and in a timely manner.

About Me

- I grew up in Allentown, PA (just outside Philadelphia).
- I have lived in Denver, CO since 2012. I love calling Denver home and am fortunate that a lot of my family has relocated to Colorado over the last ~10+ years.
- I live with my husband, AJ, our son, Micah, and our dog, Piper.
- Outside of work, I love adventuring outdoors including hiking and camping in the summers and snowboarding in the winter. I am an avid rock climber, although mostly in the gym. I also love cooking and baking (and eating), music (live and on vinyl), and have recently become a bit of a bookworm. My guilty pleasures are 90 Day Fiance and true crime.
- I'm a massive sports fan. I love the Philadelphia Eagles, Phillies, and Sixers (not an avid hockey watcher). I'm also a fan of and nerd for all things NBA and basketball in general .
- I currently work on the Marketing Operations team as a Staff Marketing Operations Manager at GitLab.
- I'm currently working on earning my Master of Business Administration (MBA) degree thanks to GitLab's Growth and Development Benefit
- In early 2023, I was diagnosed with ADHD. It's been an interesting journey to unpack this diagnosis as an adult but ultimately has been a powerful opportunity for self-discovery and development.

My Values at Work

- Integrity
- Autonomy
- Flexibility
- Feeling Valued
- Doing challenging, meaningful work
- Making a difference

Strengths

- Openness: I am very curious and actively seek new things to explore. I thrive in situations that involve investigation and discovery. Because of my high level of curiosity I'm very willing to try new things and explore new ideas.
- Thinker: I am constantly analyzing and reflecting on problems and situations and trying to make sense of what's going on around me. I am a conceptual, abstract thinker.
- Independent: I love to figure things out on my own and find my own way of doing things. My mom's favorite story to tell about me is that when I was a kid, I decided I wanted to teach myself to ride a bike. I borrowed a friend's bike and took it to my backyard where we had a big hill. I spent an entire day cruising downhill and struggling to ride back up, until I figured it out.
- Deliberative: I tend to be very process-oriented and I strive for objectivity in decision-making.
- Action-Oriented: I'm compelled to turn ideas into action and to do things now, especially when I am excited about something. I do tend to lose energy over time, which can be challenging.
- Values-Driven: I've done a lot of work clarifying my values and I frequently find myself reflecting on situations through the lens my values.
- Nurturing: I have a tendency to be sensitive to and aware of people's emotions, behaviors, and tendencies. I also love bringing out the best in other people and finding ways for different people to work together effectively.
- Leadership: I'm willing take charge in a group setting and rally others around a shared

vision or goal.

- Humor: I love to laugh and to make other people laugh. Be warned: I have a very dry sense of humor.

Growth Opportunities (and how you can help me)

- Focus: I am easily excited by new ideas. This can be a strength, but it can also distract me from working on what's most important/impactful.

- How you can help me: Please feel free to nudge me about a project if you are not getting what you need from me.

- Energy Fade: Similar to my challenges focusing, I often start a new project with a head full of steam, but can lose energy over time.

- How you can help me: It helps me to be reminded of why a project is important and what impact it will have. When I lose steam, it can also be helpful to schedule a working session where we re-group synchronously.

- Practicality: I tend to get stuck thinking about the big picture and can struggle to be concerned with the practical or tactical.

- How you can help me: In this situation, it can be really helpful to sync up and talk through what specifically needs to get done to move a project forward.

- Giving Critical Feedback: I can be hesitant to give critical feedback and prefer to prioritize keeping the peace. I am actively working on this, both personally and professionally.

- How you can help me: Ask me for feedback if you're comfortable. Let me know how I did if I give you critical feedback.

- Clarity: Because of my curiosity and tendency to think deeply, I can sometimes overwhelm and confuse people.

- How you can help me: Feel free to ask clarifying questions and/or let me know if something I'm explaining isn't clear.

Working with me

- What gives me energy:

- Big picture, strategic projects
- Organizational leadership and thinking about how we work
- Continuous improvement and process improvement
- Coaching and helping other people

- What takes energy:

- Working on things that don't have clearly defines impact or that I don't perceive as important

- When I don't understand the purpose behind something

- Availability:

- I typically work from 8:30am/9:00am to 5:00/6:00pm Mountain Time. I am protective of my non-working time and keep Slack/email on Do Not Disturb outside of my working hours.

- Communication and Meeting Preferences:

- I prefer Slack and I try to respond as quickly as possible. I am not as responsive over email as I use it mostly for external communication. If something is truly urgent and I am not available on Slack, please text me.

- I manage my daily working with GitLab issues and To-Do's. If something is time-sensitive or if I am blocking something, I appreciate it if you ping me about it in Slack.

- I keep my Google calendar up-to-date.

- Especially as someone with ADHD, I really appreciate having a meeting agenda with adequate time to prepare. I check my next day's agendas at the end of every working day and it really helps me if I can prepare in advance.
- Focus Time:
 - I try to block off focus time on my calendar at least once per day, Monday-Thursday, and as much of my working day on Fridays as possible. I am flexible with my focus time and understand that sometimes it is the only time for a meeting.

Personality Tests

Clifton StrengthsFinder

- Full results here. I lead with Strategic Thinking themes (purple = executing, orange = influencing, blue = relationship building, green = strategic thinking)
- My top 5 strengths are:
 1. Futuristic - People exceptionally talented in the Futuristic theme are inspired by the future and what could be. They energize others with their visions of the future.
 2. Activator - People exceptionally talented in the Activator theme can make things happen by turning thoughts into action. They want to do things now, rather than simply talk about them.
 3. Input - People exceptionally talented in the Input theme have a need to collect and archive. They may accumulate information, ideas, artifacts or even relationships.
 4. Individualization - People who are especially talented in the Individualization theme are intrigued with the unique qualities of each person. They have a gift for figuring out how people who are different can work together productively.
 5. Ideation - People exceptionally talented in the Ideation theme are fascinated by ideas. They are able to find connections between seemingly disparate phenomena.

Big Five Personality Scores

- Full results here
- High Openness to Experience (88 out of 100)
- Moderate agreeableness (58 out of 100)
- Moderate conscientiousness (58 out of 100)
- Moderate negative emotionality (58 out of 100)
- High extraversion (75 out of 100)

Meyers Briggs

- INFJ-T - Introverted, Intuitive, Feeling, Judging, Turbulent - Advocate
 - Advocates are quiet visionaries, often serving as inspiring and tireless idealists. These rare types are open-minded and imaginative, applying care and creativity.

Thanks for Reading

As you get to know me, please share when you see a pattern of how I work that you think would be beneficial to articulate in this document.

If you have any questions, please reach out to me or schedule a coffee chat.

SECTION: marketing/readmes/salina-tran.md

..... About Me

- I am Salina, Senior Marketing Operations Manager part of the Marketing Operations team.
- I am born and raised in Ottawa, Ontario ..
- I currently live in Manotick, 30 minutes south of downtown Ottawa with my boyfriend, Eric and our 13 year old dog, Nala, who is a shepherd/husky mix (she's absolutely adorable).
- I like to keep myself busy by creating and making objects and I enjoy picking up new hobbies and learning new things including:
 - · Knitting
 - · Crocheting
 - · Gardening/Planting (I have an indoor greenhouse that I'm using to grow vegetables)
 - · 3d printing
 - · Pottery (wheel)
- When I am not busy creating, I spend time with friends and family.
 - · Playing badminton
 - · Playing board games (my current favourite is Lords of the Waterdeep)
 - · Trying new things/experiences
 - · Watching movies and trashy reality tv shows
 - · Travelling to places and eating foood
 - · Attending music festivals (raves)
- Dyslexia

Definition: Dyslexia (video) is a learning disorder that involves significant impairment of reading accuracy, speed, and/or comprehension to the extent that the impairment interferes with academic and/or professional activities of daily life.

I have always known that I've had dyslexia from the beginning of time, and it was particularly difficult for me during high school and university when I did not understand how to work through my dyslexia. In 2019, I was officially diagnosed with a learning disability with impairment in reading. Over the years, I've learnt how to cope and comprehend how my brain works.

I do my best to mask the characteristics of Dyslexia, but there are times when I do not catch them, so I ask that you be patient with me. If I say or type something that doesn't quite make sense, please ask me to clarify.

- I often switch words when I'm typing including
 - Words that look similar: "down" and "done"; "no" and "not"; "coach" and "couch"
 - Words that are negative to each other which I understand can be problematic and confusing: "can" and "can't".
- I say idioms completely wrong and out of order!
- I write out a sentence I may remove or add a word.
- I read numbers and words incorrectly when read out loud. For numbers, I always recall the last number first. For example, if I see the number 259, I read the number 9 first. Whereas reading words/sentences out loud is very nervewracking for me, I often skip, add or say words

completely wrong when reading. It always takes me 2-3 times of reading a sentence to comprehend it fully.

- I am a visual person - I process new information by visualizing what it would look like. When I am learning or being explained something new, I need to see it in my mind to be able to follow along.

- and the list goes on...

· Strengths

I covered a number of challenges with Dyslexia, however there are tons of positives associated with this. I am·

- · A big picture and visual analytical problem solver - I can effortlessly pick out trends and patterns from a pool of data/information for quick troubleshooting. I also use 3-dimensional thinking to seek the whole picture to bring new ideas.

- · Self-aware - I have a strong understanding of my strengths and weaknesses as I have spent hours studying how and what makes my brain tick. I can easily find solutions to compensate for my weaknesses or know when it's time to ask for help.

- · Goal oriented - I am motivated by an end goal, and determined to achieve the goal that is set before me.

- · Emotionally intelligent - I am able to stay calm in stressful and difficult situations as I am used to things not going my way, and I can compose and regulate my emotions. Additionally, I am mindful of what I do/say and how it can affect others.

- · Organized - I map out all the information and insights in a written or visual form to be able to think clearly. This allows me to break a project into smaller digestible steps and create a flushed-out plan.

- · Effective communicator - I am mindful to include all forms of communication style when disclosing a new process or information including visual, auditory, written and kinaesthetic. I myself require a mix of all four of these learning styles, thus I ensure it's incorporated in my enablement process and how I convey my message.

... Working with Me

- I prefer written communication and requests - if you have a question, drop a slack, however if you have a request, I ask you to create a GitLab issue with a clear problem statement and any additional context/examples. Every written message sent to me via Slack and GitLab, I rely on speech to text to ensure I fully understand what's communicated to me.

- Should there be a task that is urgent - I ask that you are clear with the deadline and when you expect it to be completed, so I know to prioritize the items and finish it in the requested time frame.

- The asynchronous work culture at GitLab makes information processing easier for me. This includes:

- Having the agenda provided prior to a meeting
- Active note taking during meetings
- Written request captured via GitLab issues
- Wealth of information in the handbook.

- I'm very open to feedback - as long as it's constructive feedback. I am always looking for improvement and ways to better myself.

· Availability

- My working hours are between 9 am ET and 5/6pm ET.
- I respond to issues and slack messages at least within the first 24 hours - if I don't get back to you within a week, feel free to ping me.
- My google calendar is updated with my current availability.
- I am based in Canada, and I follow the Canadian Stat Holidays.

..... Personality Tests

Clifton Strengths

- Analytical - People exceptionally talented in the Analytical theme search for reasons and causes. They have the ability to think about all of the factors that might affect a situation.
- Focus - People exceptionally talented in the Focus theme can take a direction, follow through and make the corrections necessary to stay on track. They prioritize, then act.
- Relator - People exceptionally talented in the Relator theme enjoy close relationships with others. They find deep satisfaction in working hard with friends to achieve a goal.
- Learner - People exceptionally talented in the Learner theme have a great desire to learn and want to continuously improve. The process of learning, rather than the outcome, excites them.
- Individualization - People exceptionally talented in the Individualization theme are intrigued with the unique qualities of each person. They have a gift for figuring out how different people can work together productively.

Myer Brigg (16Personality)

A Consul (ESFJ) is a person with the Extraverted, Observant, Feeling, and Judging personality traits. They are attentive and people-focused, and they enjoy taking part in their social community. Their achievements are guided by decisive values, and they willingly offer guidance to others.

· Thanks for Reading

Thanks for taking to time to get to know me, and if you are interested in learning more - don't hesitate to reach out!

SECTION: marketing/sales-development/_index.md

Welcome to the Sales Development Organization at GitLab! We are a team designed to drive results for customers through both inbound and outbound strategies. Our structure is designed to maximize efficiency, responsiveness, and creativity in our outreach efforts.

1. Sales Development Representatives (SDRs) - Inbound Focused

Key Attributes:

- Fast Response Time
- Global Coverage
- Alignment with Marketing for SLAs and Feedback on Campaigns
- Defined and Prescriptive Inbound Processes

- Round Robin Assignment Rules
- Talent Incubator for BDR Teams

Our Inbound-focused SDRs are known for their swift response times, ensuring global coverage and alignment with marketing initiatives. They operate with defined and prescriptive inbound processes, utilizing round-robin assignment rules. Additionally, the SDR team serves as a talent incubator for our Business Development Representatives (BDRs).

2. Business Development Representatives (BDRs) - Outbound Focused

Key Attributes:

- Alignment with SAEs/AE & Sales Leadership
- Collaboration with Field Marketing + ABM
- Strategic Account Planning and Research
- Targeted and Creative Messaging
- Talent Incubator for Sales Teams

Our Outbound-focused BDRs excel in strategic account planning, research, and delivering targeted and creative messaging. They work closely with Sales Account Executives (SAEs), Account Executives (AEs), and Sales Leadership. The BDR team

The Sales Dev Index

Please follow the table below to quickly find the most relevant place for what you're looking for. You can also use the searching method explained here to increase your searching capabilities.

Our handbook page has contributions from a diverse team. To help you efficiently find answers, we highly suggest that you cmd+F this page as a best searching practice.

Try searching for as many permutations of what you're looking for. For example, if you want to find information on lead scoring search for keywords like score, scoring, lead, leads, scoring. Remember that information retrieval is a core GitLab value, and a skill that will make a big difference in your careers.

If you can't find what you're looking for please reach out to a member of the Sales Dev Ops team and we'll help you find it, or update the handbook to include it!

Page	What you'll find
How-Tos Page	Quick information on finding your leads and accounts, actioning your inbound/outbound pipeline, creating Sales Accepted Opportunities (SAOs), and any other main process that you'll work with on your day-to-day.
RoE, FAQ and KPIs Page	Answers to the most common questions around career progression, rules of engagement, general expectations from the role, opportunity credit, ramping periods, lead routing and compensation.
Tanuki Tech Page	Anything related to your ongoing enablement as part of the Sales Dev team.
The Sales Dev Knowledge Vault	Information and knowledge that can help to improve your

skills. Includes managerial-level processes, manager or team member onboarding, and tool walkthroughs. |

How we typically help the teams we work with

| What is your role and ask? | How will the Sales Dev Org help |

| ----- | ----- |

| I am Field Marketer, and want to have people invited to my event | We typically work with the FM process outlined on the issue template called FM-BDR-Collaboration-Template that can be found here, but are always eager to collaborate in making your events more successful, if your ask is not covered in the template linked above, please write to us on the salesdevglobal slack channel and we'll jump in to assist. |

| I am an Account Executive, and want to nominate accounts for outbounding efforts | Our end-to-end outbound process is here. The easiest way to automate your workflow is to find the field BDR Prospecting Status on the SFDC Account record, and select the Queued option from there. The BDR team will then pick it up and research it for their outbound pipeline. |

| I am an Account Executive, and want to check the state of accounts, or quality of prospects, in my territory | Our BDR team uses a set of 1:1 dashboards that consolidate all relevant resources in one place. Our BDR team typically uses these on 1:1s with the Sales team to facilitate better account and territory planning. |

| I am a Field Marketer, or Account Executive, and want to suggest that the SDR or BDR team uses my messaging for reaching out to prospects or clients | We have a quick process for creating new flows on Groove, our messaging tool. Even though the BDR or SDR are the ones typically creating these requests, we always welcome collaboration with other teams so feel free to log your own request directly if you'd like. |

| I am a Sales Manager, and want to gauge the quality and progress of the SAOs provided to my team. | We have a robust set of pipeline progression dashboards that break down results in a lot of granularity. We also have a structured path for handing off opportunities from the SDR/BDR teams to the AE team that you can use to measure adherence to qualification criteria and next steps. |
