

ccounts not in AWA: <br> This report shows a breakdown of prospects currently on a Groove Flow. Should be reviewed for any further actions to be taken. | Consider whether adding more individuals to a flow for a particular account might make sense, or whether the individuals from the top prospect accounts should be getting additional outreach outside of the flow steps.

|

| 1:1 Account Dashboard | 17. Consider past Actively Worked Accounts. | For accounts not in AWA: <br> As a final check, this report should accounts that were previously outbound for the territory, do any of them make sense in terms of re-engagement? | Outbound efforts typically take a long time to convert an account, and reviewing new intent data is a great practice to maintaining a good re-engagememt pipeline. |

| Tableau Dashboard | Inbound Interest Dashboard | This dashboard is an intuitive way for BDRs to manually screen their database. It should be used as a complementary resource to the account-level dashboards above. | While the account-level dashboards are pre-made, and there to guide the thinking of team members in terms of account research, this Tableau dashboard allows a team member more flexibility into sorting through the database. They can use the filters to replicate the permutations of the account level reports in any way that they please. |

| Tableau Self-Dashboard | Self-Managed Instances Dashboard | This dashboard allows BDRs to track and manage instances that are self-deployed by prospects or clients. | It helps BDRs understand how self-managed instances are performing and identify any potential opportunities to convert them into fully managed accounts or upsell additional services. |

| Tableau Self-Dashboard | Self-Managed Instances Dashboard | This dashboard allows BDRs to track and manage instances that are self-deployed by prospects or clients. | It helps BDRs understand how self-managed instances are performing and identify any potential opportunities to convert them into fully managed accounts or upsell additional services. |

| Prospect 360 | Prospect 360 Dashboard | This dashboard consolidates data from key systems like Salesforce, 6Sense, Qualified, and Marketo, providing BDRs and SDRs with a starting point for account-level prospecting. It can short-listed to identify accounts that| By offering a holistic view of account activities, including engagement history and lead/contact interactions, it helps teams identify and prioritize high-potential accounts for conversion. Watch the Enablement Video (accessible through GitLab Unfiltered Account) for a comprehensive overview. |

## General Sales Development Leadership Resources

| Resource | Purpose |

| :----: | :----: |

| Leadership Handbook | Tools and resources to assist people managers in effectively leading and developing team members at GitLab |

| Compensation Review Cycle (Compa Review) | How to review our Compensation Calculator and carry out the Compensation Review Cycle |

| Sales Dev Manager Onboarding Checklist | Make a copy and complete this checklist to ensure you know your team's tools and processes |

| 360 Feedback | Opportunity for managers, direct reports, and cross functional team members to give feedback to each other. Schedule and all information on this page.|

| Workday | All team member HR information |

| Transitioning to a Manager Role at GitLab | New manager resources and what to expect |

## Lead Routing & Alignment Resources

| Resource | Purpose |

| :----: | :-----: |

| Territory Change Request Issue Board | Use the territory Change Request Issue Board and the BDR Territory Change Sales Development Issue Template in order to request a territory change for your rep. |

| Sales Dev Internal Onboarding and Transition issue template | This issue template is to be used when a new team member is joining the Sales Development Org for the first time or they are transitioning from SDR to BDR or vice versa. |

| BDR Territory Change Request issue template | Use the BDR Territory Change issue template when you would like to request territory changes for your BDRs. |

| Sales Dev Exit Handover Template | This template is meant to be used for team members that are departing from a team to hand off their pending tasks to their peers. |

## GitLab Resources

|  
Resource

| Purpose |

| :-----: |

----: | :-----: |

| Adding yourself or someone else to the team page

| Video to assist new hires with updating their blank team page placeholder |

| Update manager or

SDR role in Salesforce

| To update a manager or Sales Development role in Salesforce, submit a single person access request or bulk access request depending on the number of roles that need to be updated. |

| Create or update

members of a Slack user group

| A user group is a group of members in a workspace who often need to be notified at once · for example, @managers. To update who is in one of the Sales Development groups, submit a single person access request or bulk access request depending on the number of people that need to be added. Fill out the requested info and delete any remaining info that isn't needed. Under 'Account Creation' put Slack User Group: @ Name (i.e. @Managers). You can also use the bulk AR to request the creation of a user group and list the users who should be in it. |

| Add someone to

the Sales Development Gmail alias

| Submit a single person access request or bulk access request depending on the number of people that need to be added. Fill out the appropriate info and delete any remaining info that isn't needed. Under 'Account Creation' put the Sales Development email alias |

| Make an edit to the handbook

| Guide for how to edit the handbook. Note: all new hires must do this as part of their onboarding |

| Add a new page to the handbook

| This GitLab Unfiltered video will walk you through how to create a new handbook page |

| Create a new job family

| For each job at GitLab, the job family is the single source of truth for the expectations of that role. If you need information about when to create a new job family vs when to use an existing one watch this video |

| Resolve failed pipeline when creating an MR

| Quick overview of how to go about identifying why a pipeline might be failing for a merge

request to the handbook page |

| Sales Development Onboarding Job Specific Task Section | This task section will automatically be added to the general onboarding issue for new SDRs based on their role when hired. |

## SalesDevfyi Channel Information

### Post Naming Convention

- Posts in SalesDevfyi should have a header that lets the Reps know who the post is for, what type of post it is, and the urgency of the post.
- It is requested when a post in the Sales Dev FYI channel pertains to you that you leave a · emoji on the post to let management know that you read it

Format: Audience | Type | Urgency

Example:

- Audience
  - All of Sales Development
  - All SDRs
  - All BDRS
  - Specific Teams/Positions
  - Ex. AMER Large Land East
- Type
  - Enablement - (Mandatory, Optional)
  - Operations - (Process Change, Tools, Flows, Reports, System Changes/System Updates )
  - New Event/Initiative/Resource
  - Survey
  - Org Wide Announcement
- Urgency
  - · Action Required - urgent, action required with a due date
    - Example: Mandatory enablement launch
  - · Need to Know - urgent, update directly impacts audiences' workflows/processes
    - Example: Sales Dev process change
  - · Feedback Requested - less urgent, action requested (with or without long-lead due date) but not required
    - Example: Survey from Product Group
  - · Review - less urgent, does not directly or materially impact audiences' workflows/processes
    - Example: New customer story or new competitive resource
- Example SalesDevfyi channel post titles
  - [All of Sales Development] | [Enablement - Mandatory] | [· Action Required]
  - [All BDRs] | [Operations - Groove Flow Process Cleanup] | [· Need to Know ]
  - [EMEA Enterprise Land] | [Operations - New Groove Event Flows] | [· Action Required ]
  - [All of Sales Development] | [Survey - People Group Survey Reminder] | [· Feedback

Requested ]

#### Field Marketing <> BDR Collaboration Process

Our FM/BDR collaboration process is a method that we follow in the spirit of maximizing cross-functional collaboration. We have created an issue template for Field Marketers to populate, which in turns gets managed from the Kanban Board here. The premise of the issue template and board is to streamline communication between our teams. The issue template very clearly articulates all next steps required of this process while it also tries to leave space for us much AdHoc collaboration as required for each specific event.

As a BDR Director you will be tagged first in this issue as the primary DRI, while as a BDR Manager you will be involved in this issue on a case-by-case basis by your regional Director. All next steps of this process are clearly mentioned in the template for the issue so please follow each step in turn. The Sales Dev Operations team is also tagged and will be there to monitor progress and offer help if requested.

#### Status Related 6Sense Reports

On folder 5 in the 6Sense segments list, you'll find the templates for the main three categories of accounts that we have. These templates are meant to be cloned and edited for your teams as per the guidelines below and will assist with coaching on 1:1s and team calls, as well as driving more predictable pipeline building.

#### Currently Actively Working Accounts Template

- This report will cross-reference your team's currently AWAs against 6Sense intent data, and will highlight the best ICP accounts currently on your team's pipeline.

#### CE/SFDC Accounts not in Actively Working Status

- This report will highlight the best ICP accounts on our existing database, that are not actively being pursued by your team.

#### Greenfield Accounts not in Actively Workin

- This report will highlight the best ICP accounts that are NOT currently on our existing database. Please note that due to the complexity of our sales territories, there may be edits required on filter 8 (Address). There are multiple variants for City, Country or Region that can be used to accurately display each team's territory. Please feel free to reach out to the Ops team to help you determine these and generate the best reports possible.

#### Sales Dev Territory and Role Reports

#### Sales Dev by Salesforce Profile and Role -

- Sales Dev Ops profile is the only profile with the ability to help add a member to opps beyond stage 0 (we can't add SDR/BDR to closed won opps however)
- Certain roles have certain permissions ie. Team Lead roles are able to transfer leads. Director level roles are able to help when account assignments are incorrect by updating

account address and employee size information.

- Roles determine visibility based on the region (AMER, APAC, EMEA). Example: a BDR with EMEA in their role, will be able to see all accounts where the account territory owner has EMEA in their territory role name.

Sales Dev Territories by Team role/member associated with each territory -

- This allows you to see what members/roles are associated with each territory. When you need a change in BDR assignment to a territory, please share the territory name with Sales Dev Ops, not the name of the account. Search for the account owner name and tell Sales Dev Ops which territory/territories require that BDR to be assigned.

#### New Account AE Reports

- Use this report to figure out the territory name for the account you are working. Use command F to find the zip/state/country and figure out correct territory name.
- Then use this report by plugging in the territory name to figure out who the correct AE is
- Please make sure you have all the correct location information on the lead you converting to initially create this new account.

#### Onboarding

GitLab People Connect Team members will create the onboarding issue and start completing the onboarding tasks, no later than one week before the new team member joins. People Connect Team members require a minimum of 4 business days (with the new hire timezone as the basis) before the new hire's start date to complete all onboarding tasks. This issue will be automatically assigned to you. As a manager, you will also have tasks that need to be completed prior to the new team member's start date.

The general onboarding issue will also automatically add a 'Sales Development' section under 'Job Specific Tasks' based on the role of the new SDR. Both you and your new hire will have tasks to complete in this section.

With the creation of this issue, an access request (AR) will also be automatically created for a new team member on their second day at GitLab. This AR lists the role based entitlements (pre-defined groups and system-level access that are granted automatically to team members depending on their role) your new hire will need.

See what is being auto provisioned on this AR [here](#).

#### New Hire's First Day

On your new hire's first day, the assigned People Connect Team member will schedule a welcome email to arrive at 7:30am (local time of the new team member) on their start date detailing how your new hire can access GitLab and begin their onboarding process.

#### Manager Onboarding Checklist

##### Prior to Day 1

- Complete 'Manager' tasks on the onboarding issue Note: there are tasks to complete prior to

your new hire starting

- Schedule a welcome call at the start of your new hire's first day to discuss:
  - Main focus should be completing as much of your onboarding as possible.
  - When you have available time feel free to move ahead as some onboarding task lists for the day won't take you all day.
  - How to manage meeting invites in your inbox (there are a ton!)
  - You will receive numerous emails in their first two weeks asking you to register or activate your license to a specific tool we use, please go ahead and do all of this.
  - What you can expect in regards to onboarding at GitLab as an SDR

After new hire has started

- Complete remaining 'Manager' tasks on the onboarding issue
- Set up 1:1s

Career Mobility Issues

A career mobility issue should be opened 2 weeks before the transition date by the people connect team. If the aligned manager does not see that issue created 2 days before the scheduled transition date, the manager should reach out to the People Connect Team via the people-connect Slack Channel.

People connect opens mobility issue if any of the following are true:

1. If there is a change in department. Ex. SDR/BDR moves to the SMB Sales Team
2. Someone changes from Individual Contributor to Manager
3. Someone changes from Individual Contributor to Team Lead
4. Someone Changes from Manager to Individual Contributor
5. Someone Changes Teams

Leave of Absence

If an SDR will be out for a prolonged period of time, please follow the proper processes and complete the SDR leave checklist.

- Parental Leave
- Emergency Situations
- Unpaid leave

Manager Sales Development Leave Checklist

-

Offboarding

The full process for offboarding at GitLab differs based on whether it is voluntary or involuntary. These processes can be found on the offboarding handbook page.

Manager Offboarding Checklist

- The people team will create an offboarding issue, complete all 'Manager' tasks on the issue. If you have any questions use the managers people-connect slack channels. You can also reach out to the assigned people ops team member on the issue.

### Sales Dev Handover Issue

- When a team member is either leaving GitLab, leaving the Sales Dev Org, or transferring to another BDR team the departing team's manager must create a Sales Dev Handover Issue

### Sales Development Onboarding

As BDRs and SDRs, you work closely with the larger marketing org as well as the sales team. Due to this, your onboarding will encompass training on tools and processes related to not only your role but a blend of marketing and sales.

This learning experience involves virtual self-paced learning paths in the form of a general company-wide onboarding issue, a Sales Development specific issue, as well as a Google Classroom course to prep you for Sales Quick Start (SQS). SQS is a 3-day in-person immersive and hands-on workshop for all new hires in a sales development or sales role. In parallel, you will meet regularly with your manager, onboarding buddy and members of our sales development enablement team to chat through and dig a bit deeper into the topics within your onboarding.

The goal in all of this is to ensure that you feel confident and comfortable to hit the ground running at the start of your second month on the job when you will have a ramped quota. Our hope is that along this journey you are not only gaining the tactical skills needed to complete your job, but that you form connections with colleagues, gain a strong understanding of our culture, and begin to develop industry knowledge.

### Sales Development Onboarding Process

1. The People Team initiates a general GitLab onboarding issue for every new GitLab team member. On your first day, you will receive a welcome email with a link to your specific onboarding issue and steps to get started. You will also meet with your manager to discuss:

- Access to your sales development specific issue
- Prioritizing your onboarding issues
- How to manage calendar invites in your inbox on Day 1

1. Within 3 days of starting at GitLab, you will receive an email giving you access to Command of the Message (CoM) e-learning materials. CoM is our value-driven conversation framework that will be covered during SQS.

1. During your second week, the Sales Enablement Team will send you a calendar invite for the upcoming SQS as well as an email prompting you to log in to Google Classroom to begin working through the Sales Quick Start learning path. Connect with your manager to arrange travel for SQS or if you are unable to attend the next session.

1. Within a week of attending SQS, you will receive access to the 13-week Command of the Message Fast Start program.

1. In your first few weeks you will receive access to your Sales Development Technical Development training. This is to be completed within your first 180 days and ties directly to SDR progression.

### Graduating from Sales Development Onboarding

- Complete GitLab general onboarding issue
- Complete BDR/SDR specific onboarding issue
- Complete Google Classroom SQS prep work
- Attend the SQS workshop
- Complete the 13-week Command of the Message Fast Start program

#### BDR/SDR Quota for Months 0-4 and Compensation

For BDRs and SDRs joining on the first Monday of the month

- Month 1 = 25% quota
- Month 2 = 50% quota
- Month 3 = 75% quota
- Month 4 = 100% quota

For BDRs and SDRs joining GitLab on the 15th or after of the month

- Month 0 = no quota
- Month 1 = 25% quota
- Month 2 = 50% quota
- Month 3 = 75% quota
- Month 4 = 100% quota

Quota and compensation will be assigned by the BDR/SDR Manager and discussed in the first 1:1. If a fully ramped BDR/SDR transfers BDR/SDR teams they will have a 50% ramp for month 1 and 100% quota for month 2.

#### Sales Development Onboarding Resources

- Adding yourself to the team page

- BDR New Hire 1:1 Template

#### Frequently Asked Questions (FAQ) and Rules of Engagement (RoE)

##### Rules Of Engagement (RoE)

1. Is the lead connecting to accounts from the Financial Services (AMER) or Telecommunications (EMEA) industries?

No: Please proceed to the next step.

Yes: Normal RoE rules are superceded, and the lead is worked by the respective Telco/Finserv BDRs, not the SDR team <br>

2. Is the MQL from an Existing Account?

No: It is worked by the SDR team <br>

Yes: Check the BDR Prospecting Status and Account Type

3. Is the Account a customer?

No: Move on to the next step

Yes: Check for Opportunities

4. Is there an existing renewal opportunity?

No: Move on to the next step

Yes: Align with the sales RoE for renewals and check whether the lead is involved in an upcoming renewal, check in with the Account Executive and your Regional Manager to determine what's the best course of action for this person.

5. Is the Account in "Actively Working" Status

No: It is worked by the SDR team <br>

Yes: Check for Activity

6. Does the account have activity placed by the BDR in the last 30 days?

Yes: It is worked by the BDR Assigned. <br>

No: Check to see if there are leads related to the account that have activity using this report

When you modify this report based on company name and email domain, do you see any activity in the last 30 days? <br>

Yes: It is worked by the BDR Assigned <br>

No: It is worked by the SDR Team.

Next Steps: SDR chatters the BDR Assigned and lets them know you didn't find activity and will go ahead and Flow the lead. FYI's the BDR Manager. BDR Manager will work with the BDR to put the account into the correct BDR Prospecting status. If a BDR is able to relay information that was not picked up in the SDR's research, the SDR should end the Flow if the prospect hasn't engaged and change lead ownership to BDR so the BDR can reach out. If the SDR has engaged with the prospect, there will need to be a coordinated handoff worked out between SDR and BDR. Note: Only activity logged in SFDC will be recognized as activity.

7. Is the Account in "Queued" Status?

Yes: It is worked by the SDR team

8. Is the Account in "Worked in FY" Status?

Yes: It is worked by the SDR team

9. Is the Account in "Restricted" Status?

Yes: It should be routed to the BDR assigned. The BDR assigned will chatter the SAE about whether they'd like them to reach out or whether they would like to own that responsibility. The AE should respond within 48 hours.

- If they reply back that the BDR can work, the BDR will continue with the prospect as a lead record and take action.

- If they reply back that they want to be responsible, the BDR will convert the lead so that it becomes a contact.

After determining an MQL is to be worked by the SDR team:

10. Is the new MQL related to an existing MQL that is part of the same account?

No: The MQL can be worked by the SDR that received it through the round robin

Yes: Check the status of the existing MQL

11. Is the existing MQL in Accepted or Qualifying status?

No: The MQL can be worked by the SDR that received it through the round robin

Yes: Check the activity on the existing MQL

12. Is there activity in the last 30 days or a follow up task scheduled for the future?

Yes: The MQL should be worked by the owner of the existing MQL

No: The MQL can be worked by the SDR that received it through the round robin. If you are not sure, double-check with the related SDR.

13. Is the lead automatically generated from UseGems as evident from the Initial Source field?

Yes: If it's an SMB lead it's worked by the inbound team, if it's a MM/ENTG lead it's passed to the BDR associated with the territory regardless of the rest of the RoE. BDR is expected to follow the outbound actively worked account process as per usual.

If the related SDR relays information that was not picked up in the new SDR's research, the new SDR should end any active Groove Flow if the prospect hasn't engaged and change lead ownership to the team member who has been engaged so they can reach out. If the new SDR has engaged with the prospect, there will need to be a coordinated handoff worked out between the new SDR and the related SDR. Note: Only activity logged in SFDC will be recognized as activity.

Routing Workflow Chart

Frequently Asked Questions (FAQ)

General Sales Dev Trouble-shooting

Q: I can't see certain Groove collections!: <Br>

A: You potentially were added to the incorrect Sales Dev Team in Groove. Please reach out to Sales Dev Operations.

Q: My version of Salesforce seems very basic.: <br>

A: Make sure you are using the Sales version of Salesforce. To check, please go to the top right corner of your Salesforce window and click the blue button with the drop down window. From there select "Sales".

Q: I have not received access to all of my tools and it has been a week. <br>

A: Notify your manager and have them comment on your Onboarding Role Entitlements Issue.

Q: I have uploaded more leads from ZoomInfo than what are showing up in my Salesforce ZoomInfo Lead View. <br>

A: This most likely due to these leads already being in our Salesforce. The problem is that they are listed as a contact in Salesforce and will only appear in your ZoomInfo Contacts view rather than your Zoominfo Lead view.

Q: I do not know what this person did to score as an MQL. <br>

A: First check the last interesting moment description on Salesforce and then check the Scoring tab of the Marketo Sales Insight widget that is also on the Salesforce lead page. If no points were allocated to behavior and only to demographic type information please Slack the Marketing Ops group so they are aware that this lead did not take any new action.

Q: I received a personal data subject request by a prospect. <Br>

A: Our MOPs team has set up a process to address any data subject requests for deletion or access to data. If you receive a request for deletion or access to data, please re-direct inquiries to the Personal Data Subject Request.

Q: Why are BDRs no longer the Account Owner in SFDC? <br>

A: BDRs are no longer listed as the account Owner in SFDC to improve Sales Dev and Sales visibility across all prospects/accounts (excluding PubSec). If you want to filter to see just your accounts, please use the 'BDR Assigned' field.

Q: A prospect said they were going to buy through our website (known as a Web Direct). How can I tell if they did? <br>

A: SDRs get credit for opportunities where the SDR had meaningful two way communication with a prospect 60 days before they bought GitLab through our website. The best way to search for a web direct opportunity is to use this report. First, set the date range to the time you think the prospect would have bought. Next, find the opportunity that is tied to your prospect's account. Then follow the process to request SAO credit.

Note: Sometimes someone else from your prospect's company actually made the GitLab purchase, leading to the opportunity being related to them instead.

Q: How do I request credit for a web direct opportunity? <br>

A: On the opportunity record in Salesforce, compose a new Chatter message that includes the following:

1. Tag a member of the Operations Team (Ramona Elliott or Ed Bao) or the Director of Global Commercial Sales Development (Brian Tabbert). Do not tag Sales Support Yourself

2. Include a link to the record in Salesforce that shows your related two-way activity in the past 60 days. If your related activity is a phone call, you must have entered the details of the phone call into the Qualification Notes field on the lead record at the time of the call in order for it to be considered. Qualification Notes entered after the Web Direct opportunity has been created will not be considered for credit.

3. Explain how you influenced their decision to purchase GitLab (helped with evaluation, uncovered a need, provided value, etc)

The Operations team and/or Director will review the information and decide whether SAO credit is warranted. If confirmed, they will Chatter Sales Support to add you to the opportunity. If rejected, they will communicate to you the reasoning for their decision.

## RoE Common Questions

Q: Should BDRs flag duplicate accounts? <br>

A: Yes. However, they do not have the ability to merge it themselves so should chatter @Sales Support to do it.

Q: How do we resolve a dispute over SAO credit?<br>

A: SDR and BDR first try to talk through a solution If no agreement: Managers will determine a solution If no agreement between the managers: Escalate to Senior Leadership Double credit nor double compensation will be given

Q: Who will be handling inquiries from an SDR/BDR standpoint? <br>

A: Inquiries will go to an open queue. SDR's will not work them. We want to give marketing time to progress these to MQLs. <br>

A: BDR's can work leads in all statuses if they are related to their "Actively working" accounts. Outreach to these leads would be part of their account strategy.

Q: What if a prospect comes back directly to the BDR much delayed, when the account is not marked as "Actively Working" anymore, but resulting from personalized messaging? <br>

A: Yes, if they email, reply via LI, or call the BDR directly, the BDR will need to check that the lead is in queue ownership. If so, they must move the account back to "Actively Working", so that the lead can be put into their ownership.

Q: Why are my leads being reassigned to Inquiry Queue? <br>

A: Marketing Operations has a daily scheduled clean at 10:30 PM EST/EDT that update Status = Inquiry to Inquiry Queue. To prevent the reassignment, you'll want to update the leads from Inquiry to Accepted or add to an Groove Flow.

Q: What should BDRs do when a prospect or contact responds with a compliance related question or objects to being contacted? <br>

A: Immediately reach out to the Privacy Team via [privacy-team-help](mailto:privacy-team-help) and forward any email from the contact to [dpo@gitlab.com](mailto:dpo@gitlab.com).

Q: How do I know if a lead is associated to a Partner Account and is being worked by a Partner?

A: Partner leads will not be assigned to BDRs or SDRs as they will be assigned to the Partner Queue. To tell whether a lead is associated to a Partner Account, check their Vartopia Partner Account - if it's empty, you are may proceed with outreach.

Q: When a partner lead is assigned to Partner, when and how can we recall the lead?

A: Partner lead will be recalled after a certain period of time if they are not accepted by Partners for joint marketing campaigns. They will be initially be recalled with a Recycle status, once they become MQL, they will be assigned to BDRs or SDRs. For more information on this process, see the Vartopia handbook page.

## Announcement Common Questions

There are three deciding factors on what channel you should use for your announcement:

- Urgency: How crucial is it that the Sales Dev Org or team/teams see this announcement right now?
- Who: The entire Sales Dev Org, SDR/BDRs, or a specific SalesDev Team
- Impact: How much does it impact the audience's ability to sell and create SAOs?

## Announcement Channels

- Email Newsletter
- Weekly Team Meetings
- Sales Dev FYI Slack Channel
- Monthly All Hands Meeting
- Specific Team Slack Channels

## KPIs and SLAs

## Ramping Periods and Lead Routing

| Levels | Details

|

|-----|-----

-----|

| Onboarding | - Timeframe: Month 0 - Parameters: SDR not on quota, leads are off in Traction, Qualified is off |

| Ramping 1 | - Timeframe: Month 1 - Parameters: SDR is on 25% quota, leads are set at 50% in Traction, Qualified is off |

| Ramping 2 | - Timeframe: Month 2 - Parameters: SDR is on 50% quota, leads are set at 100% in Traction, Qualified is off |

| Ramping 3 | - Timeframe: Month 3 - Parameters: SDR is on 75% quota, leads are set at 100% in Traction, SDR is added to Qualified |

| Expert | - Timeframe: Months 4+ - Parameters: SDR is on full quota, leads are set at 100% in Traction, Qualified is on |

| | - SDR is now able to create their own Groove Flows pending approval. |

- Managers can update MQL round robin pools in traction. Please watch these videos on managing your teams and mql round robin in traction and updating a reps availability in traction

## Sales Development Credit Matrix

| Products Considered | Who | Order Type | Segment | Opportunities |

|-----|-----|-----|-----|-----|

| GitLab ultimate/premium, add ons | SDR | FO, New Connected, Growth | All segments | 1 |

| GitLab ultimate/premium, add ons | BDR | FO | Commercial, Enterprise | 1 |

| GitLab ultimate/premium, add ons | BDR | New connected, Growth | Commercial, Enterprise | 1 |

| Additional seats in current customer department | everyone | Growth | All segments | 1 |

| Tier upgrade | everyone | Growth | All segments | 1 |

| GitLab Duo | everyone | Growth | All segments | 1 |

| Agile planning | everyone | Growth | All segments | 1 |

| Storage, Compute | everyone | Growth | All segments | 0 |

| Professional services | everyone | All motions | All segments | 0 |

- NOTE If an account only has bought CI minutes, the SDR/BDR will still get credit for a first order Opportunity if the account purchases Premium or Ultimate licenses.

## Sales Development Org Compensation Breakdown

| Sales Development Org Compensation Breakdown |

|-----|

| Quota Components Depending on Sales Segment |

| Sales Accepted Opportunities (SAOs) |

| ARR pipeline component |

| 2-way communication must be documented on the Contact in the Opportunity to receive credit. Opportunities missing this documentation will not be considered for compensation and will not retire quota. |

| For BDRs and SDRs who have SAO/ARR goals, compensation is based on the SAO attainment. ARR attainment is a qualifier for accelerator payments. Our aim is to land net new logos and expand

to new customer business units, SAOs being our quantity metric and ARR our quality metric. Our mission is to create good qualified pipeline for the company. SAO credit is given for licenses and not for PS Opportunities (for training, for example) nor pipeline minutes. |

| Team Member OTE (SDRs) |

| 70% Base Pay |

| 30% Variable Pay: |

| - 100% Individual SAO Quota: |

| - No floor or ceiling |

| - Accelerator x 1.5 after meeting 100% of target |

| Team Member OTE (MM and ENT BDRs) |

| 70% Base Pay |

| 30% Variable Pay: |

| - 70% Stage 1 nARR Pipe: |

| - No floor or ceiling |

| - Accelerator x 1.5 after meeting 100% of target |

| - 2x on all Focus Account new logo opp nARR (1. New - First Order and 2. New - Connected order types only) |

| - 30% Stage 3 nARR Pipe: |

| - 75% floor |

| - 200% ceiling |

| - Accelerator x 1.25 from 100% to 200% |

| - Accelerator x 0.0 after meeting 200% of target |

| - 2x on all Focus Account new logo opp nARR (1. New - First Order and 2. New - Connected order types only) |

| Results |

| - ARR won from opportunities BDR sources |

| Activity |

| - Number of opportunities created |

| - Number of calls made |

| - Number of personalized emails sent |

| - LinkedIn InMails |

| - Qualified Engagements |

| - Number of leads accepted and worked |

| Daily outbound metrics |

| - We aim for 50 touchpoints per day using the various methods above. This is a broad expectation and may vary per team given the segment, functionality, and strategy of the team manager. |

## Sales Dev Career Path

| Position                      | Promotion Criteria                                               |
|-------------------------------|------------------------------------------------------------------|
| SDR to SDR Team Lead (SDR TL) | - Minimum 8 months in the SDR Role (incl. ramp)                  |
|                               | - Hitting quota cumulatively over the last fully-ramped 5 months |

|                                                                                                 |                                                     |
|                                                                                                 | - Completion of BDR Q1-Q4 Tanuki Techs              |
|                                                                                                 |                                                     |
|                                                                                                 | NOTE: All promotions require a formal application + |
| interview. Performance and adherence to values guarantee an interview, but candidates must      |                                                     |
| demonstrate suitability during the process. Factors such as interview performance, headcount,   |                                                     |
| and language requirements can influence promotion timelines.                                    |                                                     |

## Sales Dev Performance Management Process

The Sales Development organization believes in getting the job done (consistently delivering results) and doing it right (meeting KPI/SLAs, adhering to Our Three Pillars, and being good partners both internally and externally). Our performance management process is deeply rooted in this philosophy. As we are building high-performing teams, it is important to understand that while we expect results, we also have expectations surrounding how we get to those results. Therefore, a performance management process will be initiated if a team member is not meeting their performance targets and/or is not adhering to their KPIs/SLAs. The idea behind our framework is to address issues promptly to ensure the long-lasting success of all team members.

The sections below will provide more details as to the performance management process on quota attainment as well as Our Three Pillars and KPIs/SLAs for inbound leads and outbound account management. While regular coaching is expected in weekly 1:1s, informal performance management will be initiated if a ramped team member has two consecutive months below 75-80% attainment (SAOs, Stage 1 XDR Net ARR or Stage 3 Net ARR).

Range due to varied quotas

## SAOs and Stage 1 XDR Net ARR

Once the team member is informed, expectations will be:

- Month 1: 75-80% attainment + adherence to Our Three Pillars
- Month 2: 75-90% attainment + adherence to Our Three Pillars
- Month 3 and beyond: 100% attainment + adherence to Our Three Pillars

Should the team member fall short of the targets above, a formal warning will be issued. After the formal warning is issued if the team member falls short of targets again, additional disciplinary action could be taken up to and including termination.

## Stage 3 Net ARR

As a business we understand that Stage 3 Net ARR is a metric that can take time to influence. We are viewing Stage 3 Net ARR attainment as an indicator of healthy pipeline generation. Two consecutive months below monthly quota attainment suggests potential issues. Stage 3 Net ARR is a direct consequence of Stage 1 Net ARR. Therefore, performance management will focus on what can be immediately influenced by a team member: Stage 1 Net ARR (not Stage 1 XDR Net ARR stamped amounts, but real opportunity value: Stage 1 Net ARR).

The process, however, will

stay the same: once the team member is informed, expectations will be:

- Month 1: 80% attainment + adherence to Our Three Pillars
- Month 2: 90% attainment + adherence to Our Three Pillars
- Month 3 and beyond: 100% attainment + adherence to Our Three Pillars

Effective in FY26, Net ARR generated from a Focus Account New Logo (First Order or New Connected) will be counted twice toward this attainment.

Should the team member fall short of the targets above, a formal warning will be issued. After a formal warning is issued if the team member falls short of targets again, additional disciplinary action could be taken up to and including termination.

## Our Three Pillars

| Task                             | Details                                                                                                                                                                    |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  |                                                                                                                                                                            |
|                                  |                                                                                                                                                                            |
|                                  |                                                                                                                                                                            |
|                                  |                                                                                                                                                                            |
| 1. Uphold Daily Activity Metrics | - Adhere to the two hour MQL SLA                                                                                                                                           |
|                                  |                                                                                                                                                                            |
|                                  | - Complete a minimum of 50 omni-channel activities per day (calls should total 200 per week, made during Golden Call hours and LinkedIn/email messages to be personalised) |
|                                  |                                                                                                                                                                            |
|                                  | - Maintain an minimum of 2 discovery meetings weekly                                                                                                                       |
|                                  |                                                                                                                                                                            |

| - Work lead records within Salesforce by leveraging relevant Flows tags in Groove.

| - Use Business Intelligence platforms like ZoomInfo or LinkedIn to verify the validity of inbound lead datapoints. Take appropriate actions to clean up and assure accuracy and consistency of SFDC/Groove data.

| - Maintain SFDC data integrity by following the outbound workflow in researching and prospecting accounts.

| - Flow steps to be actioned within the same day of them being due. Move steps to a further date only because of national holidays affecting outreach (i.e., Christmas day).

| - Maintain cross-functional relationships in terms of outbound account planning. Attend each initial qualifying meeting (IQM) with the AE/SAE you work with. Document accurate up-to-date notes in SFDC.

| 2. Displaying Business and Sales Acumen | - Display business acumen and sales skills in personalizing inbound/outbound leads, following our CoM email writing principles.

| - Display business acumen and sales skills in preparing for cold-calls, following our CoM cold-calling principles.

| - Display business acumen and sales skills in preparing for scheduled discovery calls, following our CoM sales training.

| - Outbound accounts to be added in a weekly cadence, according to the expectations set within each regional team, in terms of outbound cycle (monthly, weekly), and volume of accounts.

| 3. Maintain Cross-functional Relationships | - Collaborate with the Sales team in terms of account planning.

| - Collaborate with the Field Marketing team in terms of event outreach.

## Inbound Lead Management

The below apply for all inbound-related leads for both the SDR and BDR teams. Please note that, other than SFDC lead views, inbound MQLs will also be flagged to you in a dedicated Slack alert channel. The official tracking of SLA times is done on SFDC, but you will also find an 'Acknowledge' button on the Slack notification that you can press so that it helps with daily check-ins with your Manager.

| Metric                              | Description                                                         |
|-------------------------------------|---------------------------------------------------------------------|
| ----- -----                         |                                                                     |
| Response Time for leads             | - Net New MQLs: 2 work hours <br> - Inbound Responses: 8 work hours |
| Low vs High Touch Groove Flow Usage | - Over 70% of inbound leads enrolled to High Touch Flows.           |

| Inbound tasks past due per day | - No more than 10% of tasks pending per day. <br> - 90% of tasks to be properly completed, not skipped. <br> | Two way conversations | - 50 per week. |

## Outbound Account Management

In addition to the above, BDR team members are expected to:

| Metric                                          | Description                                                                                                                                                                                                                                                                                                     |
|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Volume of Actively Working Accounts per Quarter | - Enterprise: <br> - 75 AWA'd accounts per BDR per Quarter, measured per Actively Working Start Date. <br> - 65 6QA'd accounts per Quarter, per BDR. <br> - Mid-Market: <br> - 125 AWA'd accounts per BDR per Quarter, measured per Actively Working Start Date. <br> - 25 6QA'd accounts per Quarter, per BDR. |
| Research Quality                                | >80% usage of Intent tools on AWA'd accounts, with high propensity to purchase indicators showed.                                                                                                                                                                                                               |
| Volume of Prospects per Account                 | 5-10 prospects added to Groove Flow per account, whose titles and personas match our ICPs.                                                                                                                                                                                                                      |
| 6QA Account Review                              | All automatically 6QA'd accounts to be reviewed, and either accepted or rejected, within 48 hours.                                                                                                                                                                                                              |

## PTO and Flexible Working

### Sales Development Organization Time Off

In accordance with the Time Off Policy, you need give your manager a heads up early of your intended time off so that they can help arrange cover for your tasks, if necessary.

We want to help our team members being able to fully unplug from work during their PTO, while not having to worry about their workload or target attainment. Based on this, we have created this PTO Territory Planning Issue that you can use to strategize your work and be aligned to the GitLab value of being a Manager of One.

To log a PTO Territory Planning request, please go to the Issue list on the SDR GitLab project here and choose PTOCoverageTemplate from the Description drop-down list. All of these requests are then managed through the board here. and all next steps and guidelines are on the issue description.

### Flexible working

At GitLab we have flexible working hours. This means that you can organize your working day as you like and are not expected to arrive and leave at a set time every day, but we do expect MQL's to be followed up within 1 hour (during business hours) so communication with your manager will be necessary if you plan to be out for an extended period of time. Managers will provide direction on the routing of leads during that time.

With a prospect-facing role in Sales Development, do keep in mind when you are calling and emailing prospects:

- The best times to call are early and late in the business day, so these may be best blocked for this activity.
- Groove allows you to schedule emails at set times. For outbound prospecting, the most effective emails are those that come in the early morning and early evening, so you can take advantage of this feature. On the other hand, inbound MQL's must be handled regularly throughout your day as they come in.
- Lunchtimes are good for outreach as most prospects have meeting blocks for three hours in the morning and then two hours mid-afternoon.
- The above blocks you can use for account research and planning, customer meetings, or meetings with your sales reps, manager, peers, and teams.
- Although you are not expected to start work and end work at the same time every day, please do keep in mind the normal business hours of your prospects, and make sure to schedule your own working hours to ensure you maximize opportunities.

In short, working at GitLab means that if you start the day early you can take a long lunch break to hit the gym or go grocery shopping in the middle of the day when it's quiet, yet you can still do a full day's work around that and don't need to be accountable all the time, as long as you are available to call prospects and be available for prospect meetings during normal working hours for your region/territory.

---

## SECTION: marketing/sales-development/tanuki-tech.md

## Tanuki Tech

Tanuki Tech (short for "Tanuki Institute of Technology") is the world class sales/technology bootcamp that we provide for the sales development organization. Our goal is to powerfully equip our sales development team members to be successful in their current role as well as prepare them for their next role, whatever that may be. We are doing this because we care about our team members.

## Goals

How do we measure success? The specific goals for this program are:

Increased sales development effectiveness and organizational efficiency (increased quota attainment).

Decrease time to value for sales development new hires (we want to equip our new team members to be successful quickly).

Job placement for team members who complete our program. We want the people that we develop here as part of our sales development program to be abundantly prepared for their next role whether that's in sales, marketing, or somewhere else.

The average coding bootcamp here in the United States costs 13.5k and graduates report an average starting salary of 67k (CourseReport 2020). Our goal is to far exceed the job placement and starting salary metrics of our peer institutions, completely as a free value to our team members as part of being part of this organization.

## Guiding Principles

Enablement should be powerful and effective. If there is something that you feel would help our organization and is currently missing or have suggestions for improvement, let us know.

Enablement should be quick and effective. We are not trying to inundate you with information to eat up all of your time. Most courses in our curriculum are designed to take up around two hours including examination.

We test often and we test behaviors that apply to your actual job. Research shows that the most effective teachers consistently test more than their peers. Do not get discouraged if you fail a test; it is better to fail in front of a peer who is trying to help you than in front of a customer.

Classes are generally offered in hybrid format (live and recorded options). Examinations are mostly offered in a written format.

All classes are available on demand. Recordings and assets (slides, exams) are listed here under "Sales Development."

## Curriculum

100s -

### TT100: Introduction to Technology

> Serves as an introduction to the technology industry and GitLab's space in it. In this course, we will explain fundamental concepts such as applications, operations, and the hybrid cloud. We will also explain why technology has been the main driver of innovation in the twenty-first century.

>

> 3 credit hours

### TT101: Introduction to GitLab

> GitLab is an extremely promising suite of technologies that is broad as well as deep. In this course, we will introduce GitLab and explain why it is such a special piece of technology.

>

> 3 credit hours

### TT102: The People of Technology

> To effectively engage in customer conversations, we need to understand the people that make up the technology industry. In this course, we will explain the various people that you will meet, their responsibilities and drivers, and how to have effectively engage each type of audience.

>

> 3 credit hours

### TT103: Calls and Credit

> Teaches cold call best practices and what it means to make a cold call here. As part of onboarding we do two mock calls: one for a director of engineering (target buyer) and one for an application architect (technical influencer). Also covers quota and compensation.

>

> 3 credit hours

### TT104: Sales Development Processes

> Teaches both the SDR and BDR roles from a process perspective. Also covers best practices for navigating the handbook, using Slack, etc.

>  
> 4 credit hours

#### TT105: Audit Process

> In this class, we will go through the monthly sales development audit process. This class ends with a short quiz for credit.

>  
> 1 credit hours

#### TT110: Competitive

> Because we operate in so many different product categories, GitLab has a large number of competitors. In this class, we discuss our biggest four competitors and how to effectively handle competitive situations with them.

>  
> 3 credit hours

#### TT120: GitLab Workshop 1

> This is a hands-on workshop where we use GitLab to update our very own website (no technical skills required). Learn the product by using it in action.

>  
> 3 credit hours

200s -

#### TT200: Introduction to Development

> In this class, our goal is to have more effective conversations with developers by understanding what they do and learning to speak their language. Topics include life as a developer, how software is developed, where applications run, the public cloud, and APIs.

>  
> 3 credit hours

#### TT201: Partnering with Sales - Good to Great (Goals)

> In the first part of this class, we talk about how to live your life with purpose, maintain vision, and achieve hard things. In the second half of this class we talk about best practices for partnering with sales.

>  
> 3 credit hours

#### TT210: GitLab Create and Plan

> In this class, we go indepth explaining create and plan functionality. Topics include GitLab's SCM and Agile featureset and competitive differentiators.

>  
> 3 credit hours

#### TT211: GitLab Verify and Secure

> In this class, we will learn about verify and security functionality. Topics include waterfall versus agile, continuous integration, software testing, devsecops, and automation.

>  
> 3 credit hours

TT220: GitLab Package, Configure, and Release

> In this class, we will learn about package, configure, and release functionality. Topics include how software is packaged and ultimately released (rolling deployments, A/B testing, etc.).

>

> 3 credit hours

TT230: GitLab Manage, Monitor, and Govern (deprecated)

> In this class, we will learn about manage, monitor, and govern functionality. Topics include how we allow engineering leaders to make proactive decisions to optimize their organizations and infrastructure.

>

> 3 credit hours

TT240: GitLab Workshop 2 (deprecated)

> Learn GitLab by seeing it in action. In this class, we will walk through what a new customer does when setting up the product and explain how we are different from our competitors.

>

> 3 credit hours

TT241: Free to Paid (deprecated)

> In this class, we talk about how to identify free users in your accounts, connect with prospects, and ultimately handle the free-to-paid conversation.

>

> 3 credit hours

TT250: Social Selling with LinkedIn (deprecated)

> This class covers social selling with LinkedIn to maximize customer mindshare and effectively get meetings. Also covered in this class is how team members can work together with their sales counterparts to conduct joint social selling motions.

>

> 3 credit hours

TT251: Competitive Workshop

> In this class, we talk about our biggest competitive differentiators and how to utilize them in sales conversations.

>

> 3 credit hours

TT252: Objection Handling

> In this class, we discuss more
