

ed in different countries, consider ensuring you and your manager both have an app that facilitates international communication (ex. Whatsapp, Zalo, etc.). If costs are incurred when trying to contact your manager, this can be considered a business expense and can be submitted for reimbursement through Navan Expense.

- Consider leveraging GitLab's flexible time off policy to take the time you need.

Examples of Potential Extenuation Circumstances

- Regional internet or telecommunications outages
- Natural disasters or severe weather events
- Sudden medical emergencies affecting the team member or immediate family
- Civil unrest, political instability, or government actions affecting communications
- Technology failures when no alternative communication means are available
- Sudden travel emergencies with no connectivity
- Unexpected legal detention or immigration issues

Team Member Safety

Preventing Unsafe Situations

While GitLab is 100% remote, there may be times when team members travel for work-related functions or co-working events. GitLab is committed to the value of a safe, violence-free work environment and ensuring and exhibiting equal commitment to the safety and health of team members.

In general, please consider the following recommendations to ensure safety when traveling or coworking:

1. Do the research. Have some familiarity with the destination before you arrive. Check with your country's government department that provides advice for traveling overseas:

- United States: check the State Department's website for country updates and enroll in a Traveler Program such as Smart Traveler Enrollment Program (STEP).
- New Zealand: Safe Travel.

1. Try not to draw attention. People who appear to be from out of town are more vulnerable to crimes. Try to respect the culture you are visiting by blending in. Consider protective clothing to avoid pickpockets or other theft. Do not flash money or credit cards unnecessarily.

1. Make copies of important documents. Consider carrying hard copies of important documents (passport, driver's license) in a separate location in the event your documents are misplaced or stolen.

1. Keep friends and family updated. No matter whether you're going on an overnight jaunt or a week-long international journey, it's always a good idea to let friends or family know your plans. Before you leave, send a copy of your itinerary to a few trusted people who can keep tabs on your whereabouts. Check in regularly with your contacts so they know you're where you're supposed to be.

1. Be wary of public Wi-Fi. Be aware that hackers can steal sensitive information in the public forum. Use a VPN or other secure access if you plan to access sensitive data. More information on VPN usage at GitLab and the Personal VPN page.

1. Safeguard your hotel. Lock and deadbolt the door while you are in the room. Ensure the door is locked when you leave. Keep the windows closed. Try to give the impression that you're in your room even when you're away, such as placing the Do Not Disturb sign on the outside of your

door and keeping the blinds or windows closed. Don't let any strangers into your room, even if they say they work for the hotel. You can always call the front desk to check whether someone was ordered by hotel staff to come to your room.

1. Be aware of your surroundings. Always keep an eye on your personal belongings and use good judgment when talking to strangers. A big part of the joy of traveling is the opportunities it affords to meet new people and learn about their cultures. But if someone near you is acting suspiciously, or if you feel uncomfortable, leave the area immediately. Trust your instincts.

1. Adhere to any recommended safety recommendations made by the GitLab group. For all large self-hosted events we (jointly completed by our internal security team and our contracted security agency) will do a full risk assessment before we converge. It will be up to team members to read said risk assessment and adhere to recommendations outlined.

1. If you are sick please do not come or participate in person workplace activities. This is for your safety and for others. We recommend that GitLab team members not travel while sick.

Responding to Unsafe Situations

The following are GitLab's procedures in the event a team member feels threatened or unsafe:

1. If at any point, a team member feels that they are in danger of physical harm, please contact the local authorities immediately. Local law enforcement can act quickly to protect the individual and neutralize any threats.

1. If at any point, a team member feels like they or another team member may require immediate medical assistance, please contact the local authorities.

1. Once the immediate threat is controlled, team members should report any safety concerns to People Connect.

1. If you believe that a certain location, event or area presents greater risk or exposure to individuals, please notify People Connect. People Connect will strive to proactively communicate the concerns to other potentially affected team members.

1. If at any point you believe you, personally, may commit an unsafe act, People Connect can assist in providing information about available Modern Health options.

Workers' Compensation

Workers' compensation provides benefits to team members who suffer work-related injuries or illnesses. If you have been injured at work, at a co-working site, or traveling to a customer location please follow our reporting procedures:

- Seek appropriate medical attention immediately for serious injuries. For emergency situations, call local emergency services (911 in the US).
- Report all injuries, regardless of severity, to your manager as soon as possible.
- Contact the Absence Management team through HelpLab within 24 hours of the injury. The Absence Management team will provide you with paperwork to file your claim and explain your benefits.
- Complete all required documentation as directed by the Absence Management team.

CA Team Members Only: Complete this form and submit to the Absence Management Team in HelpLab.

The following states are considered "monopolistic" workers compensation states, meaning employers must purchase workers compensation coverage directly from the state. If a team member in these states is injured, they may file the claim themselves or the Absence Management Team

will file on their behalf. Team members in these States are still required to contact the Absence Management Team, even if they file their own claim through the State:

- Ohio
- Washington
- North Dakota
- Wyoming

Substance Abuse

GitLab strives to maintain a workplace that is free from illegal use, possession, sale, or distribution of alcohol or controlled substances. Legal or illegal substances shall not be used in a manner that impairs a person's performance of assigned tasks. This will help to maintain the efficient and effective operation of the business, and to ensure customers receive the proper service. GitLab team members must also adhere to the local laws of where they reside and where they travel to for company-sponsored events.

Mental Health Awareness Statement

1. Why is awareness of Mental Health important at GitLab?

- It can affect any and all of us. Statistics indicate that 1 in 4 of us will be affected by mental or neurological disorders at some point in our life. That said, we are all subject to periods where we or those around us find the "the normal stresses of life" harder than usual to deal with.
- The more we are aware of mental health, the more inclusive we are. That will help encourage any colleagues currently experiencing mental health issues to talk about it.
- Our business at its core is a group of people working together towards a common goal. With awareness of what might affect our colleagues, we are better equipped to help them if they do discuss it with us and therefore help our business.
- Mental health has so much emotional baggage as a topic that it can initially seem scary to talk about. Promoting mental health awareness helps to remove the stigma and taboos associated with it.
- GitLab can offer "productive and fruitful" work for all of our employees. That should not be underestimated.
- In the cold-light of business metrics, the healthier we are, the more productive we are.

1. At GitLab we strive to create a stigma-free workplace. In accordance with the National Mental Health Association and the National Council for Behavioral Health we would like to:

- Educate employees about the signs and symptoms of mental health disorders.
- Encourage employees to talk about stress, workload, family commitments, and other issues.
- Communicate that mental illnesses are real, common, and treatable.
- Discourage stigmatizing language, including hurtful labels such as "crazy," "loony" or "nuts."
- Help employees transition back to work after they take leave.
- Encourage consultation with our employee assistance programs.

1. What are we doing to get there?

- Talk about mental health issues and ideas in the mentalhealthaware Slack channel.
- GitLab would also like to encourage GitLab team members to take time off to properly take care of themselves. We encourage the team to go to yoga, take a long lunch, or anything else in their day to day life that assists in their mental and emotional well-being.
- In addition to our current EAP programs available for employees, we encourage GitLab team

members to take a look at these Resources for Employees for insight into reclaiming well-being at work, off work, and return to work.

- We believe that our values and culture lends itself to being able to discuss mental health open and honestly without being stigmatized, but let's work together to make it even more inclusive. For example, Finding the right words:

- "How can we help you do your job?"
- "You're not your usual self."
- "Do you want to talk about it?"
- "It's always OK to ask for help."
- "It's hard for me to understand exactly what you're going through, but I can see that it's distressing for you."

For additional information, please see the Mental Wellness Services offered through Modern Health and tips on Leading Through Adversity. Additionally, team members should learn to recognize burnout and to prevent it.

Any questions or concerns? Please feel free to contact the People Connect team via HelpLab.

GitLab Ltd (UK) Health and Safety Risk Assessment

To ensure the physical and mental health and safety of our team members in the UK, and to maintain compliance with local employment regulations, all team members employed by GitLab Ltd. must review the guidelines for working comfortably at home and complete a home working risk assessment at onboarding. If you think you may need accommodations in order to achieve and/or maintain a healthy and safe work environment, please contact the People Connect team via HelpLab. If you need to report an accident or injury, please contact Team Member Relations. Team members should regularly inspect their home offices for potential hazards related to the

following:

- Electrical equipment: make sure that your plugs, wiring, and casings are in good working order and there is no fraying.
- Fire: regularly check your smoke detectors and develop an escape plan in case of fire, if you haven't already.
- Slips and trips: keep your work area clear of boxes, cables, uneven surfaces, and other obstacles that may cause a trip hazard.
- First aid: Keep first aid provisions in your home and be careful when handling sharp objects and hot or cold liquids.

The handbook also has a wealth of information and recommendations for setting up your workspace and procuring the proper equipment:

- How to Create an Ergonomic Workspace
- Focus your Workspace
- Combating Burnout, Isolation, and Anxiety in a Remote Workplace
- Considerations for a Productive Home Office

Working Time Regulations

What are the Working Time Regulations?

The Working Time Regulations (1998) were introduced to support the health and safety of workers by setting maximum requirements for the number of hours that they can work, paid time off and rest periods.

The 48-hour working week

The regulations state it is illegal for you to work any time over a total of 48 hours each week. You can agree to exceed this limit if you want to, but you cannot be mandated to work more than 48 hours per week.

Average working hours are calculated over a 'reference' period, which is usually 17 weeks. This means you can work more than 48 hours one week, as long as the average over 17 weeks is less than 48 hours a week.

For more information about the 48-hour working week restrictions, please visit the government's website.

How to opt-out of the 48-hour working week

It is entirely your decision if you would like to work more than an average of 48 hours a week. GitLab is committed to enabling team members to maintain a healthy work-life balance, but on occasion (for example during periods of high customer demand) you may be asked to work longer hours. To ensure that we remain compliant with the regulations, we ask you to opt out of them, in case such a need arises.

If you would like to opt-out, you can do this by signing this written agreement, known as the opt-out agreement. You may have chosen to sign/confirm this agreement already during your onboarding. The duration of the agreement is indefinite. If you haven't already signed this agreement but would like to do so, you can make a copy of this document, add your name and sign

it, and attach a copy of it to a new case to the People Connect team within HelpLab, with a request that it be saved with your documents in Workday.

How do I cancel my opt-out agreement?

You can choose to cancel your opt-out agreement at any time. The notice period you are required to give is three months.

SECTION: people-policies/inc-usa.md

All policies on this page apply to US-based team members who are employed by GitLab Inc. or GitLab Federal LLC. If a policy specifically states that it applies to federal contractors, it applies only to team members who are employed by GitLab Federal LLC.

Equal Employment Opportunity Policy

GitLab, Inc. is an equal opportunity employer. In accordance with anti-discrimination laws, it is the purpose of this policy to effectuate these principles and mandates. GitLab prohibits discrimination and harassment of any type and affords equal employment opportunities to team members and applicants without regard to race, color, religion, sex, sexual orientation, gender identity or expression, marital status, pregnancy, age, national origin, disability status, genetic information, protected veteran status, or any other characteristic protected by law. GitLab conforms to the spirit as well as to the letter of all applicable laws and regulations.

Scope

The policy of equal employment opportunity (EEO) and anti-discrimination applies to all aspects of the relationship between GitLab and its team members, including: Recruitment, Employment, Promotion, Transfer, Training, Working conditions, Wages and salary administration, and Team member benefits and application of policies.

The policies and principles of EEO also apply to the selection and treatment of independent contractors, personnel working on our premises who are employed by temporary agencies and any other persons or firms doing business for or with GitLab.

Dissemination and Implementation of Policy

The officers of GitLab, Inc. will be responsible for the dissemination of this policy. Directors, managers and supervisors are responsible for implementing equal employment practices within each department. The People Group is responsible for overall compliance and will maintain personnel records in compliance with applicable laws and regulations.

Procedures

GitLab administers our EEO policy fairly and consistently by:

- Posting all required notices regarding employee rights under EEO laws in areas highly visible to team members.
- Advertising for job openings with the statement "We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity or expression, pregnancy, age, national origin, disability status, genetic information, protected veteran status, or any other characteristic protected by law."
- Posting all required job openings with the appropriate state agencies.
- Forbidding retaliation against any individual who files a charge of discrimination, opposes a practice believed to be unlawful discrimination, reports harassment, or assists, testifies or participates in an EEO agency proceeding.
- Requiring team members to report to a member of management, an HR representative or the Director of Legal - Employment any apparent discrimination or harassment. The report should be made within 48 hours of the incident.
- Promptly notifying the Senior Director of Legal - Employment of all incidents or reports of discrimination or harassment and takes other appropriate measures to resolve the situation.

Remedies

Violations of this policy, regardless of whether an actual law has been violated, will not be tolerated. GitLab will promptly, thoroughly and fairly investigate every issue that is brought to its attention in this area and will take disciplinary action, when appropriate, up to and including termination of employment.

Harassment

Please refer to the GitLab Anti-Harassment Policy for more information.

Individuals with Disabilities Policy

GitLab Inc. ("The Company") complies with the Americans with Disabilities Act (ADA) and all applicable state laws, which make it unlawful to discriminate in employment against a qualified individual with a disability. The Company prohibits discrimination against team members and applicants with disabilities in all aspects of employment. Our company's commitment to this policy includes making reasonable accommodations to otherwise qualified persons with disabilities to enable them to perform the essential functions of their jobs, unless doing so would pose an undue hardship on our business, would pose a direct threat of substantial harm to the team member or others or is otherwise not required by applicable law.

Our Commitment

A team member or applicant in need of a reasonable accommodation should make the Company aware of their request by notifying the Team Member Relations (TMR) via a ticket in HelpLab; applicants should communicate their need to Talent Acquisition. The Company will work with each individual to define their job-related or application-related needs and to try to accommodate those needs.

Roles and Responsibilities

Applicant: May request reasonable accommodations to assist them in the application process or to enable performance of the essential functions of the position for which they are applying and are otherwise qualified to perform.

Team Member: Must let the manager and Team Member Relations Team know that they need an accommodation or adjustment at work due to a medical condition, in order to perform their job.

Manager: The manager will act as the SME (subject matter expert) as it relates to the essential functions of the team member's job, order any equipment needed as it relates to the accommodation, ensure the team member is trained properly on any equipment and it is regularly serviced (if applicable), and follow up with the Team Member Relations Team if the accommodations are not helping the team member perform their job or their performance is not meeting expectations.

People Business Partner (PBP): Partner with the Manager to evaluate the essential functions of a team member's job, and possible accommodations.

Team Member Relations Team (TMR): Will serve as a liaison between manager, team member/candidate, and the team member's or candidate's physician and will provide input to the team member's or candidate's request for a medical restriction and/or accommodation as it relates to the job requirements and working conditions, when appropriate. The TMR team will verify and/or clarify the team member's claim of a medical and/or medical restriction, when necessary, once an accommodation is requested. They will also monitor the need for the restriction beyond the expiration date of the restriction.

Talent Acquisition: Will assist the Team Member Relations team in identifying potential work assignments for which the candidate is qualified. They will also ensure accommodations are made available for the application process.

Qualified Individuals with Disabilities

Qualified individuals with disabilities are defined as individuals with disabilities who can perform the essential functions of the job in question with or without reasonable accommodation. Per the Americans with Disabilities Act (ADA), a disability means, with respect to an individual: a physical or mental impairment that substantially limits one or more of the major life activities of such individual; a record of such an impairment; or being regarded as having such an impairment as described in Section 36.105, paragraph (f) of the ADA. So to clarify, you may have been or currently be diagnosed by a disability as per the ADA and not feel that it substantially limits your life activities and still self-identify as having a disability status.

Please find an overarching list of what can fall into the disability definition per the ADA,

including but not limited to:

- Developmental disabilities, for example, cerebral palsy or autism spectrum disorder
- Traumatic brain injuries
- Deafness or serious difficulty hearing, benefiting from, for example, American Sign Language
- Blindness or serious difficulty seeing even when wearing glasses
- Missing extremities (arm, leg, hand and/or foot)
- Significant mobility impairments, benefitting from the utilization of a wheelchair, scooter, walker, leg brace(s) and/or other supports
- Partial or complete paralysis (any cause)
- Epilepsy and other seizure disorders
- Intellectual disabilities (formerly described as mental retardation)
- Significant psychiatric disorders, for example, bipolar disorder, schizophrenia, PTSD, or major depression
- Dwarfism
- Significant disfigurement, for example, disfigurements caused by burns, wounds, accidents, or congenital disorders

And not all disabilities are obvious to the eye. These are known as invisible disabilities. An invisible disability is a physical, mental, or neurological condition that can't be seen from the outside. But it can impact someone's movements, senses, or activities, according to the Invisible Disabilities Association. Some examples of invisible disabilities include autism spectrum disorder, depression, diabetes, and learning and thinking differences such as ADHD and dyslexia. Invisible disabilities can also include symptoms such as chronic pain, fatigue, and dizziness.

GitLab values all team members for their strengths. We offer team members with disabilities · whether visible or invisible · an equal opportunity to succeed, to learn, to be compensated fairly, and to advance. True inclusion is about embracing differences.

Pregnancy Accommodation

Pregnancy accommodation is governed by the Pregnancy Discrimination Act, the Americans with Disabilities Act, the Family and Medical Leave Act, and numerous state and local laws. If you need a temporary change to how, when, or where you work due to pregnancy or related conditions, you may request an accommodation under this policy. A team member in need of a reasonable accommodation should make GitLab aware of their request by notifying the Team Member Relations Team via HelpLab.

Reasonable Accommodation

A reasonable accommodation is any change or adjustment to a job, the work environment or the way things usually are done that enables a qualified individual with a disability to perform the essential functions of the job and that does not pose an undue hardship for the Company or create a direct threat to health or safety. When requesting an accommodation, team members should notify the Team Member Relations Team via HelpLab of the need for the accommodation. The Company may ask for medical documentation supporting the need for an accommodation and all supporting documentation should be returned as quickly as possible to prevent a delay in the accommodation process. Requests for a reasonable accommodation for a medical condition and any supporting documentation, will be treated as confidential, maintained in a file separate from

an employee's other personnel documents and disclosed only as permitted by applicable law.

Determining Appropriate Accommodations

When a team member requests a change in the job or working conditions and relates the need to a medical condition, or notifies GitLab "the company" of medical restrictions, the manager or supervisor should direct the team member to open a ticket in HelpLab or notify the Team Member Relations Team (teammemberrelations@gitlab.com) of the request. The Team Member Relations Team will then follow the steps outlined below.

Frequently, when a qualified individual with a disability requests a reasonable accommodation, the appropriate accommodation is easily agreed upon. The individual may recommend an accommodation based on their life or work experience. The ultimate decision as to whether a particular accommodation will be made rests with the Company. When the appropriate accommodation is not obvious, the Company may assist the individual in identifying one. If more than one accommodation will enable the individual to perform the job, the Company reserves the right to choose which accommodation it will make. If you feel that you have been unreasonably denied an accommodation request, please speak with the Team Member Relations Team by emailing teammemberrelations@gitlab.com. If you have any questions concerning this policy you should speak with the People Operations team.

Members Requesting Accommodations

Please submit your request for an accommodation by opening a ticket in HelpLab. Your ticket will only be viewed by the Team Member Relations Team, and only the requested accommodation(s) will be shared with your Manager/PBP as needed.

While you are under no obligation to provide GitLab with a diagnosis, you may be asked questions related to how your condition impacts your ability to perform the essential functions of your job, in accordance with applicable law. The Team Member Relations Team will provide you with any necessary paperwork, and assist you with your request.

US Access to Personnel Records

Current and former team members may request a copy of their personnel file in writing to dpo@gitlab.com. Additionally, team members can access certain records at anytime via Workday.

Leave Policies

Please review our US-specific Leave of Absence page.

Pay Transparency Non-Discrimination Provision

GitLab will not discharge or in any other manner discriminate against team members or applicants because they have inquired about, discussed, or disclosed their own pay or the pay of another team member or applicant. However, team members who have access to the compensation information of other team members or applicants as a part of their essential job functions cannot disclose the pay of other team members or applicants to individuals who do not otherwise have access to compensation information, unless the disclosure is (a) in response to a formal complaint or charge, (b) in furtherance of an investigation, proceeding, hearing, or action,

including an investigation conducted by the employer, or (c) consistent with the GitLab's legal duty to furnish information. 41 CFR 60-1.35(c) If you believe that you have experienced discrimination contact OFCCP.

OFCCP Makes it Safe for People to Ask About, Discuss, and Disclose Their Pay

1. What is employment discrimination based on inquiring about, discussing or disclosing my pay or that of other team members?

This type of discrimination generally exists where an employer takes an adverse employment action against team members or job applicants because they inquired about, discussed, or disclosed their own compensation or the compensation of other team members or applicants. One example is an employer firing a team member because they discussed their salary with another team member. Another example is an employer decreasing a team member's work hours because they asked their coworkers about their rates of overtime pay.

2. What are my rights?

Under Executive Order 11246, employees of a federal contractor have the right to inquire about, discuss, or disclose their own pay or that of other team members or applicants. Employees of a federal contractor cannot be disciplined, harassed, demoted, terminated, denied employment, or otherwise discriminated against because you exercised this right. However, this right is subject to certain limited exceptions.

3. Are federal contractors prohibited from having formal and informal pay secrecy policies?

Yes. Federal contractors are generally prohibited from having policies that prohibit or tend to restrict team members or job applicants from discussing or disclosing their pay or the pay of others. For example, a government contractor's policy that prohibits team members from talking to each other about end-of-the-year bonuses would be considered a violation, as it prohibits team members from discussing their compensation.

4. What is considered pay?

Pay generally refers to any payments made to a team member, or on behalf of a team member, or offered to an applicant. This includes but is not limited to salary, wages, overtime pay, shift differentials, bonuses, commissions, vacation and holiday pay, allowances, insurance and other benefits, stock options and awards, profit sharing, and retirement.

5. Does the protection include employer defenses or exceptions?

Yes. The Executive Order provides federal contractors with two ways to justify or defend actions taken that might otherwise be seen as discriminatory and prohibited: the "essential job functions" defense, and the general, or "workplace rule" defense.

6. What are "essential job functions" under the Executive Order?

The term "essential job functions" means the fundamental job duties of the employment position an individual holds. A job function may be considered essential if:

- The access to the amount of pay provided to team members or offered to applicants, salary structures and market studies related pay and policies related to setting or changing employee pay are necessary in order to perform that function or another routinely assigned business task; or
- The function or duties of the position include protecting and maintaining the privacy of team member personnel records, including amounts and types of pay provided to team members, salary structures, market studies related to pay, and policies related to setting or changing a team member's pay.

7. What is the "essential job functions" defense?

Under the "essential job functions" defense, a federal contractor can defend against a claim of discrimination by showing that it took adverse action against a team member because they (a) had access to the compensation information of other team members or applicants as part of their essential job duties and (b) disclosed that compensation information to individuals who did not otherwise have access to it. However, even team members who have access to compensation information as part of their essential job functions may discuss, disclose, or inquire about compensation in some instances. For example, they can:

- Discuss or disclose the pay of applicants or team members in response to a formal complaint or charge; as a part of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer; or in accordance with the contractor's legal duty to furnish information.
- Discuss their own pay with other team members.
- Discuss possible pay disparities involving other team members with a contractor's management official or while using the contractor's internal complaint process.
- Discuss or disclose amount or types of pay of other applicants or team members based on information received through means other than access granted through their essential job functions.

8. What is the "workplace rule" defense?

Under the "workplace rule" defense, a federal contractor can defend against a claim of discrimination by showing that it took adverse action against an team member for violating a consistently and uniformly applied company rule. The rule must not prohibit, or tend to prohibit, team members or applicants from discussing or disclosing their compensation or that of a co-worker or job applicant. Examples of "workplace rules" may include rules on the use of leave and the length of breaks.

9. Does my employer have to tell me what other team members are being paid?

No. Executive Order 11246 does not require employers to provide team members or job applicants with information on the pay of other team members or applicants.

10. Who does OFCCP protect?

OFCCP protects the rights of team members and job applicants of companies doing business with the US Federal Government. This includes team members at banks, information technology firms, meat packing plants, retail stores, manufacturing plants, accounting firms, and construction companies, among others.

Filing a Complaint

11. What can I do if I believe my employer discriminated against me because I asked about, discussed, or disclosed my pay or the pay of another team member or applicant?

You can file a complaint with OFCCP. You do not need to know with certainty that your employer is a federal contractor or subcontractor to file a complaint.

12. How do I file a complaint with OFCCP?

You may file a discrimination complaint by:

- Completing and submitting a form online through OFCCP's Web site;
- Completing a form in person at an OFCCP office; or
- Mailing, e-mailing or faxing a completed form to the OFCCP regional office that covers the location where the alleged discrimination occurred.

The form is available online here and in paper format at all OFCCP offices. To find the office nearest you, visit the online listing of OFCCP offices.

You must remember to sign your completed complaint form. If you fail to do so, OFCCP will still take your complaint but an OFCCP investigator will ask you to sign the form during a follow-up interview. Complaints alleging discrimination for discussing, disclosing, or inquiring about pay must be filed within 180 days from the date of the alleged discrimination, unless the time for filing is extended for good cause. The same 180-day time frame applies to complaints alleging discrimination based on race, color, religion, sex, sexual orientation, gender identity, or national origin.

13. Can my employer fire, demote, or treat me less favorably because I filed a complaint?

No. It is illegal for your employer to retaliate against you for filing a complaint or participating in an investigation. OFCCP's regulations protect you from harassment, intimidation, threats, coercion, or retaliation for asserting your rights.

14. Can I file a complaint with OFCCP and the Equal Employment Opportunity Commission (EEOC)?

Yes, if you file with both OFCCP and EEOC, your complaint will be investigated by the appropriate agency. In some instances, OFCCP and EEOC may decide to work together to investigate your complaint. OFCCP generally keeps complaints filed against federal contractors that allege discrimination based on discussing, disclosing, or inquiring about pay. OFCCP also generally keeps complaints filed against federal contractors where there appears to be a pattern of discrimination that affects a group of team members or applicants, and those that allege discrimination based on a person's sexual orientation or gender identity, disability, or protected veteran status.

15. What will happen if there is a finding that I was a victim of employment discrimination?

You may be entitled to a remedy that places you in the position you would have been in if the discrimination had never happened. You may be entitled to be hired, promoted, reinstated, or reassigned. You may also be entitled to receive back pay, front pay, a pay raise, or some

combination of these remedies. In addition, if OFCCP finds that the federal contractor or subcontractor discriminated, OFCCP could seek to have the company debarred or removed from consideration for future federal contracts or have the company's current contracts or contract modifications cancelled.

Infectious Disease Policy

It is the goal of GitLab, Inc. during a period of an infectious disease outbreak or pandemic to maintain essential functions and services and provide a safe and healthy work environment for team members, customers/clients, vendors and the public. GitLab is committed to establishing methods for monitoring the severity and duration of an outbreak or pandemic, implementing measures to minimize exposure in the workplace and sustaining essential functions until the organization can resume normal operations.

Communication

People Operations will oversee the implementation of this policy and coordinate communications from management to team members and other stakeholders. Duties include:

- Monitoring and coordinating events and communications around an infectious disease outbreak or pandemic; and
- Creating work rules that could be implemented to promote safety through infection control.

Oversight includes the maintenance of a current list of contacts including:

- Government agencies;
- Emergency response and healthcare facilities and services; and
- Equipment suppliers and service contractors who can or have agreed to assist during and after an outbreak or pandemic.

Safety and Health Measures

GitLab will implement disease mitigation and protective measures for team members working onsite and offsite and for interactions with customers/clients, vendors and the public during the outbreak or pandemic. GitLab is committed to providing the most current and credible information about the disease, including the way it spreads, symptoms and measures to prevent its transmission.

Health Monitoring

All team members will be notified on how to self-monitor for symptoms and report to their supervisor/manager when they are ill or experience infectious disease symptoms.

Rest When Sick

Team members are urged not to report to work when they are feeling ill or are experiencing

symptoms of an infectious disease. A team member who appears to exhibit infectious disease symptoms when reporting to work or who becomes sick during their time at work will be strongly encouraged to log off from work.

If a team member is confirmed to have contracted an infectious disease, they may be eligible for additional leave after utilizing the Paid Time Off Policy. In the event that the sick leave provided under your local law is more generous than GitLab's policy, then your local law would supersede this policy.

Business Travel Restrictions

GitLab will evaluate the risk of team member exposure to the infectious disease from business travel, and may restrict, cancel or ban business travel as necessary to minimize or prevent risk of infection. In making such determinations, consideration will be given to any travel bans or advisories issued by government agencies, including the U.S. Department of State and the CDC.

Non-Essential Activities

During an infectious disease outbreak or pandemic GitLab may postpone or cancel all nonessential activities, including meetings, gatherings and training sessions. Affected team members would be notified as soon as practicable.

Attendance and Leave

GitLab's attendance policies will remain in place during an infectious disease outbreak or pandemic, unless otherwise notified. If a team member has a challenge (e.g., childcare issues in the event of a school closure), they should speak to their supervisor/manager to determine an alternative plan. Team members will be notified of any work schedule changes caused by an infectious disease outbreak or pandemic. Requests to adjust individual work schedules will be addressed on a case-by-case basis.

If a team member is out of work because of exposure to an infectious disease, or other illness or condition recognized by federal, state or local law, the team member may be required to submit additional information for the absence. To the extent permissible by law, GitLab may modify its leave policies to reflect conditions during a declared infectious disease outbreak or pandemic.

Compensation

Team members will be paid for all hours worked during an infectious outbreak or pandemic. Team members will be notified of any changes in pay rates for non-exempt team member hourly rate of pay or exempt employee salary as a result of long-term business needs caused by significant business disruption or economic shutdown due to an infectious disease outbreak or pandemic.

Furloughs/Layoffs and Closings

In the event of a temporary or permanent closing due to unforeseen business circumstances related to the infectious disease outbreak or pandemic, team members will be notified as soon as practicable concerning a furlough, layoff or business closing, including an explanation as

to why notice was not provided if a furlough/layoff is implemented without advance notice. Team members subject to a furlough/layoff under this policy will be notified about available benefits and where to obtain additional information and guidance.

On-Site Work Prohibited

GitLab reserves the right to prohibit an employee or another individual with a confirmed positive test for an infectious disease or who is displaying symptoms (even without a confirmed positive) or has been in close contact with someone with a confirmed or presumed positive test for an infectious disease from entering on-site facilities, programs and functions if a determination is made that the entry introduces a recognized hazard to the workplace and the restriction protects the safety and health of team members, customers/clients and others.

Confidentiality

Infectious disease-related diagnostic information about team members will be treated as confidential, privileged information. All information about a team member's illness will be treated as a confidential medical record in compliance with federal or state law. GitLab will adhere to all federal, state and local public health reporting requirements.

No Retaliation

Team members who raise a concern or make a complaint regarding any aspect of this policy in good faith will not be retaliated against or penalized in any manner. Any team member who believes they have been retaliated against in violation of this policy should notify Team Member Relations usteammemberrelations@gitlab.com immediately.

Additional Information

Team members may contact People Compliance people-compliance@gitlab.com with questions regarding this policy.

Fair Credit Reporting Act (FCRA) and Related State Law Compliance

Step 1: Disclosure and Authorization

The applicant must give the employer consent to have a third party service conduct a background check. The Disclosure and Authorization form can be presented to the applicant at the time they complete the employment application form. The form should grant the employer permission to conduct an initial background check (and, subject to state law, subsequent background checks if the applicant is hired) utilizing a third party service. Also, a "Summary Of Your Rights Under The Fair Credit Reporting Act" should be enclosed with the consent and disclosure form. For New York applicants, a copy of Article 23-A of the Correctional Law also should be enclosed and any other relevant state summary of rights.

The background investigation cannot be lawfully conducted without a signed Disclosure and Authorization form. Applicants can be advised that they will not be considered for employment without submitting the signed form. Equally for current team members, they can be advised that their employment may be impacted if they do not consent to the background check.

Step 2: Pre-Adverse Action: Notify the Applicant of Negative Report BEFORE Adverse Action is taken

If the consumer reporting agency reports information which may be used, in whole or in part, as a basis for an adverse employment action (e.g., rescinding a conditional offer of employment), the applicant must receive notification before a final decision is made to deny employment. As a result, the employer must provide a copy of the consumer report, a pre-adverse action letter, and another copy of the FCRA notice of rights (and for New York applicants, the Article 23-A notice). The applicant shall also receive any applicable state rights as required.

If the disqualification decision is not based on a misrepresentation or omission in the employment application, it is a best practice to discuss the potentially disqualifying information with the individual prior to issuing the pre-adverse action notice. This practice supports the individual job-related nature of any disqualification decision.

Step 3: Wait for a Reasonable Period of Time to Find Out What, if Any, Explanation is Offered by the Applicant

If the applicant does not respond at all to the notification within a reasonable period of time (5 days), the employer may proceed with its decision to rescind the conditional offer. If the applicant responds, the employer should carefully consider the information submitted and then make a decision. If the explanation is reasonable under the circumstances, then it may still be possible to go forward with the new hire (for example, a case of mistaken identity). However, if the applicant's explanation is determined to be insufficient, then the employer should proceed to the next step.

Step 4: Notify Applicant of Adverse Action

The employer must provide the applicant with written notice of the adverse action and the name, address, and telephone number of the consumer reporting agency.

The Adverse Action Notice form should be sent along with the federal summary of rights and any applicable state summary of rights. The notice includes a statutorily required statement that the consumer reporting agency did not make the decision and does not know why the decision was made should be included as well as a notice of the applicant's right to obtain the report and dispute the information.

Step 5: Maintain Documentation

For all adverse decisions, document each step taken. Keep copies of all consent and disclosure forms and other documentation sent to the applicant in the event the company has to defend its decision at some later point.

Record Retention

All documents related to the background check process must be retained for the minimum period of time required by applicable law.

Financial Checks

Finance team members only will be required to participate in a federal check through Sterling,

which searches for any tax-related or financial offenses. See the Initiating a Background Check through Greenhouse section for process details.

Français: GITLAB FRANCE S.A.S. CHARTE SUR LE TÉLÉTRAVAIL

PRÉAMBULE

Avec plus de 1700 membres d'équipe répartis dans plus de 65 pays, GitLab (est l'une des plus grandes entreprises au monde mettant en œuvre du travail à distance intégral.

L'approche "travail à distance intégral" de GitLab favorise le recrutement et la mobilité des salariés (ci-après « membres de l'équipe) dans le monde entier, ainsi que la flexibilité des horaires de travail, en permettant aux membres de l'équipe de mieux travailler ensemble, qu'ils se trouvent au même endroit ou qu'ils soient répartis sur plusieurs fuseaux horaires.

Par conséquent, l'ensemble des membres de l'équipe de GitLab France S.A.S. (ci-après « la Société ») travaillent à distance 100% de leur temps de travail.

La présente charte (ci-après la « Charte ») a été élaborée afin d'encadrer le télétravail au sein de la Société GitLab France conformément au cadre légal applicable.

1. DÉFINITIONS ET CHAMP D'APPLICATION

Le télétravail est toute forme d'organisation du travail dans laquelle un travail qui aurait pu être exécuté dans les locaux de la Société est effectué par un membre de l'équipe hors de ces locaux en utilisant les technologies de l'information et de la communication.

Le travail à distance intégral est l'une des conditions d'embauche de la Société.

Cela signifie que la Société ne dispose pas de locaux et que l'ensemble des membres de l'équipe n'a pas accès aux locaux de la Société/espaces de travail de la Société afin d'exercer leurs fonctions pour la Société.

Ainsi, dès leur embauche, l'ensemble des membres de l'équipe de la Société effectuent 100% de leur temps de travail à distance.

Cette organisation du travail à distance étant un élément essentiel du contrat de travail, elle ne peut être modifiée ou résiliée qu'avec l'accord des deux parties au contrat de travail.

2. LIEU DU TÉLÉTRAVAIL

Le télétravail sera effectué soit au domicile du membre de l'équipe, soit dans un lieu tiers à définir d'un commun accord de la Société et du membre de l'équipe concerné.

Par domicile, on entend le lieu habituel de résidence du membre de l'équipe, c'est-à-dire celui dont l'adresse figure sur le bulletin de salaire.

Tout lieu de télétravail doit être situé sur le territoire français.

3. AMÉNAGEMENT ET MISE EN CONFORMITE DES LOCAUX

3.1 Conformité des locaux

En cas de télétravail à domicile, le membre de l'équipe doit prévoir un espace de travail respectant les règles relatives à l'hygiène, à la sécurité et aux conditions de travail et accepte qu'un représentant de la Société contrôle la conformité de son logement.

Une synthèse des obligations applicables est annexé à la Charte.

Le membre de l'équipe sera prévenu des dates et heures du contrôle au moins 5 jours ouvrés à l'avance.

De plus, le lieu de télétravail doit respecter les exigences concernant la conformité des installations électriques. Dans ce contexte et préalablement à la date d'embauche, le membre de l'équipe doit fournir un diagnostic d'électricité récent ou, à défaut, une attestation sur l'honneur de la conformité de l'installation électrique du lieu de télétravail.

La réalisation d'un diagnostic peut être organisée par le membre de l'équipe lui-même (les frais engendrés sont pris en charge par la Société sur justificatif).

En cas de déménagement, le membre de l'équipe s'engage à prévenir la Société et à lui communiquer sa nouvelle adresse. Le nouveau logement pourra également faire l'objet d'un contrôle de conformité. De plus, la conformité des installations électriques doit être démontrée comme précisé ci-dessus.

En cas de télétravail dans un lieu tiers, le membre de l'équipe s'engage à fournir une déclaration sur l'honneur sur la conformité de l'installation électrique de ce lieu de télétravail, le respect des règles relatives à l'hygiène, à la sécurité et aux conditions de travail (notamment en termes d'ergonomie, d'éclairage, etc.) et la couverture de ce lieu par une assurance au sens de l'article 7 de la Charte. Cette déclaration doit être fournie préalablement à la prise du télétravail de ce lieu.

Il est rappelé que l'ensemble des consignes concernant la conformité du lieu du télétravail sont des instructions en matière de santé et de sécurité contraignant le membre de l'équipe de prendre soin de sa sécurité et de sa santé au travail. Le non-respect de ces consignes est passible de sanctions disciplinaires pouvant aller jusqu'à un licenciement pour faute grave.

3.2 Travailleurs handicapés

Le télétravail est ouvert aux travailleurs handicapés selon les modalités suivantes:

- Adaptation du mobilier;
- Mise en place des logiciels particuliers;

- Aménagements de l'environnement de travail.

La section sur les aménagements raisonnables (version en Anglais) de la politique interne prévoit des informations complémentaires.

4. ORGANISATION DU TEMPS DE TRAVAIL

Pendant la période de télétravail, le membre de l'équipe organise librement son temps de travail sous réserve de respecter:

- La limite du temps de travail effectif journalier convenu dans le respect des plages horaires régulières applicables dans la Société, c'est-à-dire entre 9h le matin et 20h le soir.
- Les plages de disponibilités convenues avec le supérieur hiérarchique pendant lesquelles il doit pouvoir être joint par téléphone ou tout autre moyen de télécommunication utilisés au sein de la Société (notamment email, Slack, Zoom, etc.).
- Les limites imposées par la législation en vigueur concernant les temps de repos minimum (11 heures consécutives entre 2 journées de travail et 35 heures consécutives par semaine).

5. TEMPS DE TRAVAIL ET CHARGE DE TRAVAIL

5.1 Contrôle du temps du travail

Pour chaque journée de télétravail, le membre de l'équipe effectue le temps de travail de référence qui lui est applicable. Le cas échéant, le télétravail ne peut générer aucune heure supplémentaire, sauf sur demande expresse de la hiérarchie.

Pour les jours de télétravail, le décompte du temps de travail est effectué selon un système auto-déclaratif dont le bilan mensuel doit être soumis sans demande au supérieur hiérarchique à la fin de chaque mois. La politique interne paie fournit plus d'informations à ce sujet: Payroll - Global Upside France.

5.2 Modalités de régulation de la charge de travail

Le télétravail ne doit pas avoir pour effet d'augmenter la charge de travail habituelle du membre de l'équipe ou de compromettre la bonne exécution du travail.

Le membre de l'équipe communiquera régulièrement et au moins sur une base hebdomadaire avec son supérieur hiérarchique sur l'avancement de ses travaux. A cette occasion la charge de travail du membre de l'équipe pourra le cas échéant être réajustée si nécessaire. Le membre de l'équipe devra, en outre, contacter son supérieur hiérarchique sans délai en cas de difficulté de réalisation des travaux qui lui sont confiés, afin de trouver une solution au plus vite.

Indépendamment des réajustements éventuels en cours d'année, l'évolution de la charge de travail du membre de l'équipe sera discutée lors de l'entretien annuel prévu à l'article 10 de la Charte.

6. ÉQUIPEMENTS DE TRAVAIL

La Société fournit, installe et entretient le matériel nécessaire à l'activité du membre de l'équipe.

Les équipements fournis se composent des éléments suivants:

- Un ordinateur portable,
- Tout logiciel nécessaires pour l'exécution des obligations contractuelles;
- Un écran si nécessaire;
- Un clavier/un souris, si nécessaire;
- Un bureau/une chaise ergonomique, si nécessaire,
- Une imprimante, si nécessaire.

Le membre de l'équipe s'engage:

- à prendre soin des équipements qui lui sont confiés ;
- à avertir immédiatement la Société en cas de panne ou de mauvais fonctionnement des équipements de travail.

En cas de besoin d'intervention sur l'équipement par un expert technique, le membre de l'équipe contactera l'équipe informatique via le canal Slack ithelp ou en ouvrant un Issue dans le Team Member Enablement Issue Tracker.

Le membre de l'équipe s'engage à prendre connaissance des consignes d'utilisation des équipements qui lui ont été données et à les respecter scrupuleusement sous peine de sanctions pouvant aller jusqu'au licenciement.

En cas de besoin et à la demande de la Société, le membre de l'équipe s'engage à suivre les formations nécessaires portant sur l'installation, l'utilisation et l'entretien de ce matériel et, en cours de période de télétravail, celles liées à son adaptation.

Le membre de l'équipe s'engage enfin, sous peine de sanctions pouvant aller jusqu'au licenciement, à utiliser les équipements mis à sa disposition par la Société conformément aux politiques internes applicables.

La Société s'engage à prendre à sa charge les frais d'entretien, de réparation, voire, en tant que de besoin, de remplacement du matériel.

L'ensemble des équipements fournis par la Société restent sa propriété et à ce titre sont insaisissables.

Le membre de l'équipe s'engage à restituer le matériel fourni par la Société dès la fin du contrat de travail sans délai.

7. ASSURANCES

Si le membre de l'équipe utilise son domicile pour télé-travailler, il s'engage à informer son assureur du fait qu'il travaille à son domicile avec du matériel appartenant à la Société et à remettre à cette dernière une attestation « multirisques » habitation couvrant son domicile.

La Société prend à sa charge les coûts supplémentaires d'assurance en résultant dans les conditions indiquées à l'article 9 de la Charte.

8. PROTECTION DES DONNÉES

Le membre de l'équipe s'engage à respecter les politiques internes l'ainsi que les règles mises au point par la Société, destinées à assurer la protection et la confidentialité des données.

Le membre de l'équipe veillera, en particulier, à ne transmettre aucune information à des tiers et à verrouiller l'accès de son matériel informatique afin de s'assurer qu'il est le seul à utiliser son poste de travail.

9. FRAIS DE TÉLÉTRAVAIL ET FRAIS PROFESSIONNELS

Les frais induits par l'utilisation du domicile d'un collaborateur du télétravail (wifi, chauffage, électricité, etc) seront couverts par l'entreprise conformément aux règles légales applicables au moment de l'engagement de la dépense.

Ceci signifie que vous recevrez montant de 57,20 euros minimum par mois, dans les limites fixées par notre politique en matière de frais, et sous réserve que vos dépenses de télétravail réellement induites mensuellement s'élèvent, au moins, à ce moment.

Actuellement, ceci est intégré à notre processus général de gestion des frais et des remboursements par le biais de notre outil d'évaluation des frais (Navan).

Toute dépense liée au télétravail doit, pour des besoins de traçabilité, être justifiée par les reçus et justificatifs appropriés.

Indépendamment des frais liés au télétravail, les frais engagés par le membre de l'équipe à des fins professionnels seront pris en charge par la Société selon les règles légales et les politiques internes applicables.

Outre la prise en charge des frais liés au télétravail le membre de l'équipe percevra une indemnité mensuelle de sujétion de 50· bruts correspondant à la contrainte de l'affectation d'une partie de son domicile privé à des fins professionnelles. Cette indemnité fait partie intégrante de la rémunération fixe convenue dans le cadre du contrat de travail.

10. ENTRETIEN ANNUEL

Le membre de l'équipe bénéficie d'un entretien annuel au cours duquel seront abordées notamment les conditions d'activité et la charge de travail liées au télétravail.

11. PROTECTION DE LA VIE PRIVÉE

Si un moyen de surveillance est mis en place (contrôle technique, système ayant pour but de lutter contre la cybercriminalité, et cetera), le membre de l'équipe devra en être informé. Ce dispositif devra concerner exclusivement l'utilisation des outils mis à disposition pour l'exercice professionnel.

12. FORMATION

Indépendamment de la formation spécifique liée à l'utilisation des équipements techniques mis à sa disposition, le membre de l'équipe a accès à la formation et aux possibilités de support et d'accompagnement afin d'assurer son évolution professionnelle.

13. SANTE ET SÉCURITÉ

En cas de maladie ou d'accident pendant les jours de télétravail, le membre de l'équipe s'engage à prévenir le service Team Member Relations (teammemberrelations@gitlab.com) dans le délai de 24h maximum.

14. TRADUCTION

En cas de conflit entre les versions en langue française et anglaise de la Charte, le texte en français prévaudra en toutes circonstances.

English: GITLAB FRANCE S.A.S. REMOTE WORK CHARTER

PREAMBLE

GitLab is one of the world's largest all-remote companies with over 1,700 team members located in more than 65 countries around the world.

GitLab's all-remote approach promotes hiring and work
