Did You Know? ·

On 2020-11-01, GitLab released the first MVC of allowing users to purchase additional storage. When additional storage is purchased and applied to a GitLab.com namespace, the system will automatically apply the storage to blocked project and open them for use. Additional unused storage will remain available for use dynamically as projects near the 10GB limit. The Fulfillment team is still working on customer-facing docs, but you can get a sense for how it works on the subscription FAQs page.

In an effort to increase customer satisfaction and speed time to adoption, the Professional Services Education team recently redesigned the GitLab System Administration course. Here are the main changes:

- 1. New Ordering Process - Admin Training Only: Use the custom SOW process rather than the standard SKU process to ensure alignment with your customer's specific deployment.
- 1. New Flexible Format: Pick from a list of common deployment variables to quickly build a customized topic list for a basic administration training SOW.
- 1. New "Advanced" Option: Add on the new advanced administration course dedicated to monitoring and de-bugging, for customers with Tier 2 admin team members.

The NEW Partner Deal Registration system will launch on 2020-11-03! All Authorized GitLab Partners will have immediate access via their Partner Portal login. This new system and process improves both our Partners' and the GitLab team's knowledge of the Channel business and services. Some of the key features are:

- 1. Detailed reporting and real time metrics
- 1. Additional visibility to opportunities and information
- 1. Simplified deal management and process

Please review the handbook for more details around the updates and process. Reach out to the channel-ops Slack channel with any questions.

What's New in GitLab ·

The GitLab 13.5 release is live! Here are the takeaways for customers and prospects:

- Reduce Security and Compliance Risk: Teams can take advantage of a valuable security testing solution for mobile apps with our new Mobile SAST language coverage, combined with our existing fuzz testing for Swift and Java projects. This feature was contributed by GitLab customer H-E-B that saw the need for Mobile Application Security Scanning and brought MobSF into the merge request pipeline to deliver this new capability.
- Increase Operational Efficiencies: 13.5 offers a few more ways to help groups collaborate. This includes the launch of Group Wikis · our most sought-after feature with the most upvotes ever · which offer a central point of collaboration at the group level with a deep-level wiki navigation side bar for ease of use. This also includes a new timeline view for discussions in incidents, which provides clarity around the sequence of events in threaded discussions, as well as the Generic Package Registry, which enables release and build teams to effectively work in GitLab no matter what type of binary they are building in CI/CD.
- Deliver Better Products Faster: The ability to create Snippets with multiple files allows teams to create and share complex Snippets. Furthermore, new templates, including a template for deploying to AWS EC2, a new GitLab CI/CD template for Terraform, and the new SAST configuration UI that enables the GitLab CI/CD SAST template for users without CI/CD experience, promotes best practices and consistency across teams.

Visit the 13.5 Release Post for more details

To see what's ahead in 13.6, watch the kickoff videos or check out the kickoff review page.

Upcoming Events ·

Corporate/Regional Event Spotlights

- GitLab Partner Webcast - Nov. 12 (Major Partner updates!)

Enablement Corner ·

GitLab's Corporate Learning & Development team has launched a monthly Continuous Learning Call as an opportunity to come together and discuss L&D and Field Enablement initiatives. See the deck [here](#) and watch the recording [here](#).

Team Member Spotlight ·

Rob Nalen · Director, Contracts & Legal Operations

Rob Nalen · Director, Contracts & Legal Operations

Where did you grow up, and where are you based now?

I grew up in Upstate New York (Syracuse area) and have been in the Raleigh area since 2008.

What is your favorite thing about your job?

First, my team. I am so happy to have such a great group of people that I work with, whether it's the Contract Managers, or other Legal folks. Second is the opportunity to be creative. GitLab is my second start-up and I really enjoy building things and discovering how to address problems in new ways.

Which of GitLab's Values resonates most with you?

Results. Building a team and being a part of the sales / revenue side of GitLab, it is extremely important to focus on Results.

Do you have a helpful tip for working at GitLab to share?

As with any start-up, learn to be flexible. G&A groups are trying their best to address a growing team, new regulations & responsibilities, and scaling the company to meet the demands that our sellers bring.

What is a hobby or skill you have that the team might not know about?

I was a collegiate hockey goalie and I still play to this day.

Icebreaker: What's the craziest fashion trend you ever rocked?

At my first start-up I made a bet with the Sales organization to help them motivate the team... I lost and a handlebar mustache was earned.

Questions or feedback? We want to hear it! Reach out to the field-enablement-team Slack channel or capture it using this process.

See the Field Flash Newsletter handbook page for more information about this newsletter and copies of all past newsletters.

NEW · GitLab Field Flash: December Edition ·

In this month's Field Flash, you'll find new resources and an asset inventory from Strategic Marketing to aid your customer conversations, new integrated competitive takeout campaigns for GitHub and Jenkins, a new Partner Locator and other exciting updates from the Channel team, the Field Certification Program and more. Plus, Ian Chiang and Jonathan Lim walk us through how they leveraged AWS to close a significant expand opportunity with an APAC FinTech company. And, we learn more about some of Timm Ideker's hidden skills in his team member spotlight.

The Latest Strategic Marketing Assets

Make sure you're up-to-date on the latest resources from our Strategic Marketing team including:

1. Learn @ GitLab - This newly redesigned site contains bite-sized content that customers can use to learn more about the GitLab product. Consider sharing this great resource with your customers.
1. Gartner Market Guide for DevOps Value Stream Delivery Platforms (VSDP) - GitLab has successfully influenced the definition of a new Analyst Category! Watch this webinar (@ 7:00 mark) for a high-level overview, and point your customers to the Download Landing Page to access the full report.
1. Strategic Marketing Asset Inventory - Wishing you could search for marketing assets by type, use case, value driver and more? You can! Bookmark this inventory to filter, search and export assets to support your Sales motions.

Questions? Reach out in marketing.

Deal of the Month ·

Ian Chiang and Jonathan Lim highlight their \$349K+ Expand deal with a large APAC FinTech company. They also share more about working closely with AWS on this deal and how Alliance Partners can give us unique customer inroads and solutions to roadblocks.

Did You Know? ·

GitLab is running multiple integrated campaigns meant to highlight our CI, security and CD capabilities against competitors:

1. GitHub Competitive Campaign - Dec. 1
1. Jenkins Competitive Campaign - Nov. 16

Find more information and supporting resources in the epic links above. Remember that you can add a prospect to a nurture campaign using this issue template, and you can access all of our competitive content, including detailed Decision Kits, from the DevOps Tools Landscape page.

There is exciting momentum from the Channel team including:

1. The new Partner Locator is live, making it easier for customers to find a Channel Partner to fit their need(s) for implementation, integration and optimizations services.
1. The Channel Services Program has launched to help new or existing partners design service portfolios around the DevOps Lifecycle in correlation to GitLab products.
1. We have created a robust Channel Partner Training and Certification Program to enable partners in our ecosystem to sell, market, service and support GitLab prospects and customers.

Field Ops has captured all of the asks of the management team+ from Q4-FY21 QBRs in this QBR Ask Tracker and they have provided a consolidated view of progress and top asks by segment and/or team in this issue. If your ask is not on this prioritized list and/or if you have asks outside of the QBR cycle, Field Ops encourages you to open up an issue using this template at any time throughout the quarter.

Learn more about our QBR ask prioritization process on the QBR Handbook page and reach out to sales-support with any questions.

YOUR input is needed so Field Enablement can make it easier to find valuable content when you need it to support your customer engagements. Please complete this survey (10 minutes or less) to help us better understand how you currently find and create content.

Team Member Spotlight ·

Timm Ideker - Area Sales Manager, ENT West (Global Director, Mid-Market Sales)

Timm Ideker - Area Sales Manager, ENT West (Global Director, Mid-Market Sales, effective 2021-02-01)

Where did you grow up, and where are you based now?

I grew up in Sioux Falls, South Dakota, USA and I settled in Minnesota (after short pitstops through Kansas & Maine) in about 1996. No plans to leave the Land of 10,000 Lakes!

What is your favorite thing about your job?

1:1 connectivity to team members is what fills my cup.

Which of GitLab's Values resonates most with you?

Everyone can contribute is a mantra but also a call to action; everyone must contribute. There is no cavalry and we are the experts who are going to solve some of our client's most difficult challenges.

Do you have a helpful tip for working at GitLab to share?

donut-be-strangers is a great slice of technology that connects you to a GitLab team member. I have been doing these random coffee chats every 1-2 weeks since I got here and I always learn something new about another person and / or our business. Highly recommend!

What is a hobby or skill you have that the team might not know about?

Is bartending a skill?!? I can also remember nearly all movie dialog.

Icebreaker: What was the first concert you ever went to?

Guns N' Roses / Metallica / Body Count at Kansas City Arrowhead Stadium in 1992.

Questions or feedback? We want to hear it! Reach out to the field-enablement-team Slack channel or capture it using this process.

- 1. Redesigned Trust Center with more resources related to privacy and data protection.
- 1. Updated Customer-Facing Security FAQ Page.

Please post any questions in [sec-fieldsecurity](#).

What's New in GitLab ·

The GitLab 13.7 release is live! Here are the takeaways for customers and prospects:

- Increase Operational Efficiencies: 13.7 features multiple enhancements to package and dependency management, ensuring less development time goes to waste. This includes the added option to quickly find and view generic packages. It also includes multiple improvements to GitLab's Dependency Proxy · the ability to avoid Docker rate-limits and speed up pipelines with the Dependency Proxy, use the Dependency Proxy with private projects and use pre-defined variables with the Dependency Proxy instead of relying on defined variables or hard-coding values in the `gitlab.ci.yml` file.
- Increase Operational Efficiencies: Enhanced cross-collaboration means customers spend less time managing projects and more time developing valuable features. New project management features in 13.7 make it easier to efficiently collaborate across groups and projects, including the addition of merge request reviewers, which allows customers to quickly find out who's involved in the merge request or request a formal review that will send them a notification. This also includes the ability to clone issues with quick actions and sort issues by blockers to uncover which issues are blocking progress for other issues.
- Deliver Better Products Faster: Get value into customers' hands sooner and more frequently with improved automation and deployment flexibility, including a new feature to automatically revert an unsuccessful deployment back to the last successful deployment and send an automatic status notification, and the ability to view deployment status in the Environment page. 13.7 also features the first officially supported beta of GitLab Runner container on Red Hat OpenShift and the Certified Runner Operator to give customers even more flexibility over how they release with GitLab.

Visit the [13.7 Release Post](#) for more details

Enablement Corner ·

In December 2020, the Field Enablement team launched the first role-based field certification course · Building Success Plans · to the global Customer Success Manager team in GitLab Learn, our new Learning Experience Platform (LXP). Initial feedback has been positive and we look forward to onboarding other teams on the new learning platform in the coming weeks.

Team Member Spotlight ·

Ricardo Amarilla - Customer Success Manager

Ricardo Amarilla - Customer Success Manager

Where did you grow up, and where are you based now?

I was born and raised in Asunción-Paraguay, where I am also based. I have never lived abroad.

What is your favorite thing about your job?

The freedom I have in choosing the best time to do my job is something I have never experienced before. GitLab enables me to find the right balance between family, friends, and work.

Which of GitLab's Values resonates most with you?

Collaboration · at GitLab, everyone is willing to help and collaborate, which is unique. Even though we are all-remote, I never feel disconnected thanks to this level of collaboration.

Do you have a helpful tip for working at GitLab to share?

Our customers usually have Technical Communities in MeetUp, LinkedIn, or other platforms. I would recommend participating in some of them for networking purposes. Besides learning new things, it has also helped me re-engage with some accounts.

What is a hobby or skill you have that the team might not know about?

I started playing paddle a few weeks ago; this is a new hobby for me. Besides this, I spend my spare time with my family, running, and riding my bike.

Icebreaker: What's the craziest thing on your bucket list?

Participate in an Ironman Triathlon.

Questions or feedback? We want to hear it! Reach out to the field-enablement-team Slack channel or capture it using this process.

See the Field Flash Newsletter handbook page for more information about this newsletter.

Archive: Edition 10, Description: January 2021 Field Flash

SECTION: sales/field-communications/field-flash-newsletter/edition-2021-02-01.md

This email newsletter was originally sent to the GitLab Field Team and stakeholders on 2021-02-01.

NEW · GitLab Field Flash: FY22 Kickoff Edition ·

Congratulations on closing out a successful Q4 and FY21! This Field Flash edition contains numerous updates that will help you start FY22 off strong, including: Steps to take to prepare for virtual SKO 2021, resources for our shift to ARR, more details about our IBM partnership and more. Plus, Joe Miklos and team explain how they closed a 700+ Ultimate upgrade while creating significant future expansion opportunities. And we learn more about Evon Collett, Partner Help Desk Specialist, in her Team Member Spotlight.

One Week Until SKO 2021

We hope you are excited to learn, network and celebrate at SKO as we prepare to reach our Peak Performance together in FY22. Please ensure you have completed these items in preparation for the event:

1. Complete your registration in HopIn by 2021-02-05. If you are an approved attendee, you received a registration link in an email from Sales Events titled "It's Time · Register for GitLab SKO 2021!"

1. Set up your HopIn profile. Include your title and the region you cover alongside your last name in the field "Last Name." Share something fun about yourself or your role in the "Headline" field!

Complete your SKO Pre-Work by 2021-02-05. To access the course, (approx. 2-2.5 hours completion time) go to gitlab.edcast.com, sign in via SSO, click on "My Learning Plan," then click on the "SKO 2021 Pre-Work" course.

1. Get ready for Team Olympics. Participate in various activities in HopIn throughout SKO to earn points for your team and win prizes. Learn more in the latest SKO update email titled "Win the Gold at SKO · Introducing Team Olympics!"

1. Check out the full agenda on Sched. This agenda is for viewing-only · there is no need to add it to your calendar! Once SKO starts, you will be able to participate in all content within the Hopin platform.

Please see the SKO Handbook Page for an event FAQ. Questions? Reach out in [sko-virtual-2021](#).

Deal of the Month ·

Joe Miklos, Ken McKnight, Taylor McCaslin and Sam White share how they closed a 700+ seat Ultimate upgrade with a major technology firm. Learn how they successfully competed with a free legacy solution and created a unique contract that will give GitLab significant expansion opportunities in the customer's business moving forward.

Did You Know? ·

Finance and Sales Operations have collaborated to introduce a new bookings policy that will determine the correct period to close a sales-assisted deal. This policy is effective 2021-02-01, and can be reviewed in full here.

Policy Summary

- 1. New Business, Add-On, and Renewal Opportunities with non-zero Net ARR can be closed no more than 15 days prior to the Quote Start Date.
- 1. Flat Renewals can be closed on or after the Quote Start Date.
- 1. Late Renewals will be Closed Lost if the renewal is not achieved within 45 days after the Quote Start Date (i.e. Renewal Date).

Important Notes

- 1. Exceptions must receive CFO approval.
- 1. Sales should continue to submit opportunities for approval as requirements are met. Deal Desk will hold the opportunity until it is ready to be approved per this policy.
- 1. Licenses/Entitlements will continue to be sent to the customer upon opportunity closure.

Questions or feedback? We want to hear it! Reach out to the field-enablement-team Slack channel or capture it using this process.

See the Field Flash Newsletter handbook page for more information about this newsletter.

Archive: Edition 12, Description: March 2021 Field Flash

SECTION: sales/field-communications/field-flash-newsletter/edition-2021-04-06.md

This email newsletter was originally sent to the GitLab Field Team and stakeholders on 2021-04-06.

NEW · GitLab Field Flash: April 2021 Edition ·

In this month's Field Flash, you'll find important Field Operations process updates and improvements, six new competitive resources, a new IDC study that features GitLab, our first IBM Cloud Paks customer win and more. Plus, Marsja Jones and team share how they closed an Ultimate upgrade deal with the help of GCP. And, we learn more about Sales Development

Representative Danielle Madry in her team member spotlight.

Get the Latest · Field Ops Updates

As we work to close out Q1-FY22, Field Ops has announced multiple updates to help streamline your processes. Review the summary below to ensure you're up-to-date:

1. President's Club Criteria - Eligibility criteria for President's Club 2022 has been announced. Check out the Club handbook page for more details. We hope to see you at the Ritz-Carlton Grand Cayman Islands Resort in May 2022!

1. Q1 QBR Cannonball Run - Field Ops just wrapped up their latest Cannonball Run to quickly respond to high-priority QBR asks: Rules of Engagement Updates, SFDC Reporting, SFDC Hygiene & Process Improvement, Discount Approval Update and New Refund creation process in SFDC. See the issue for more details, and see the full list of Q1 QBR asks in the Ask Tracker.

1. Starter End of Availability Tracking - To ensure we're capturing Sales' engagement with our EoA customers, all EoA customers can now be tracked in SFDC leveraging the "FY22 On Starter/Bronze" field. Please review the process changes and corresponding reports in the Go To Market handbook page.

1. Starter End of Availability SLA - Due to the extreme volume of EoA Ramp Deal requests, Deal Desk has published an SLA specifically for these requests. Please review the handbook entry for more information.

1. Improvements to wins and wins-key-deals Channels - We are leveraging a new tool (Troops) to improve the readability of the alerts in these channels. You will now see alerts that provide a more holistic view of the won deal, highlighting key deal information without the need to click.

Questions? Reach out in sales-support.

Deal of the Month ·

Marsja Jones, Taylor Medlin and Kasim Ahmad share how they closed an Ultimate upgrade with an SMB AI customer. Learn why "reduce security and compliance risk" guided the conversation and how the team leveraged alliance partner GCP to close the deal.

Did You Know? ·

One of our key GTM changes in FY22 is around GitLab-delivered services, which includes the launch of Services Attach. New - First Order opportunities with a Net ARR · \$20,000 in the large segment will require a \$15,000 minimum in attached GitLab or Partner Professional Services.

Services Attach applies to ENT AMER only in Q1/Q2 and will roll out to EMEA and MM - First Order in Q3. To learn more about Services Attach, including the full opportunity criteria, rollout approach, SFDC process and more, please see this deck. You can also access the notes

and recording from the Field AMA session [here](#).

Please direct questions about the Services Attach requirement to your manager or sales-support.
Please direct questions about positioning PS to the professional services slack channel.

Coming Soon: New Async Certification Options! Since last May when we launched the first GitLab Technical Certification, we've awarded over 500 certifications to GitLab Professional Education Services customers and partners. We are excited to announce the availability of new self-service study + exam bundles as an async option that will start rolling out 2021-04-20 on GitLab Learn to anyone with a GitLab.com account! Questions? Reach out in the professional services slack channel to learn more.

What's New in GitLab ·

The GitLab 13.10 release is live! Here are the takeaways for customers and prospects:

- Reduce Security and Compliance Risk: Teams can reduce the overhead of managing and sharing vulnerabilities with Bulk Status Updates that allow security teams to modify the status of multiple vulnerabilities simultaneously. They can also identify and triage relevant information quicker with improvements to vulnerability reports and the vulnerability trends chart. When issues do arise, customers can now more efficiently handle them with tools to help integrate and manage alerts from multiple monitoring solutions and enhancements to disaster recovery for customers using GitLab Geo.
- Increase Operational Efficiencies: The GitLab Runner Operator is generally available in the Red Hat OpenShift Container Platform! Check out and share this step-by-step demo and blog post from Red Hat that explore how to install and configure the GitLab Runner Operator. Also, check out this video from IBM on configuring GitLab Runner on OpenShift.
- Deliver Better Products Faster: GitLab leveled-up support for DORA metrics in 13.10 with new functionalities to track and identify blockers across a portfolio of projects including an API to track lead time for changes and Deployment Frequency metrics via API at the group level.

Visit the [13.10 Release Post](#) for more details

To see what's ahead in 13.11, watch the kickoff video or check out the kickoff review page.

Upcoming Events ·

Corporate/Regional Event Spotlights

- AMER: Jenkins to GitLab CI Migration Virtual Workshop - April 20
- AMER PubSec: DevSecOps Workshoppin' with GitLab and RedHat - April 20
- EMEA: GitLab German Connect Tag - April 28
- APAC: Japan Virtual Round Table - April 20

For a full list of virtual events, see a convenient calendar view in the [Marketing Handbook](#).

Archive: Edition 13, Description: April 2021 Field Flash

SECTION: sales/field-communications/field-flash-newsletter/edition-2021-05-03.md

This email newsletter was originally sent to the GitLab Field Team and stakeholders on 2021-05-03.

NEW · GitLab Field Flash: May 2021 Edition ·

In this month's Field Flash, you'll learn more about the first GitLab Sales Play, GitLab's leadership position in Gartner's latest Magic Quadrant for Enterprise Agile Tools, how GitLab compares to Jenkins when solving common decision maker problems, new resources for working with alliance partners and more. Plus, dive into Peter Davies' Land deal of the month, and learn more about Alyssa Belardi in her team member spotlight.

Introducing: The First GitLab Sales Play

The first Sales Play · Upselling Premium to Ultimate · is now available for all sales segments! Review the details below and start leveraging Sales Plays in your selling motions today.

1. What is a Sales Play? A Sales Play is a prescriptive set of actionable steps to guide reps through one of our key GTM motions: CI/CD, DevOps Platform, and GitOps. Sometimes it is also tied to a Marketing campaign.

1. What is included in a Sales Play? In this Sales Play, you'll find:

1. Detailed Background Information: Ideal customer profile, target buyer personas, common pain points, discovery questions, elevator pitch, value positioning, objection handling and more.

1. Sales Play Tactics: Detailed, step-by-step actions for ENT, MM and SMB reps to put the play into practice to generate leads.

1. Where does it live? You can find this and future Sales Plays in the GitLab Handbook.

1. Who is it for? This Sales Play is for ALL Sales segments (ENT, MM, SMB) for team members who call on existing GitLab Premium customers.

1. Where can I learn more? Check out these resources:

1. Sales Enablement LevelUp Webcast recording

1. Mural outlining overall campaign & Sales Play flow for SMB vs. MM/ENT

1. Practitioner track and manager track assets in PathFactory

Keep an eye out for additional Sales Plays coming in Q2! Please reach out in sales with questions.

Deal of the Month ·

Peter Davies and John Feeny discuss how they closed a 300-seat Premium Land deal with a government entity on a tight timeline by demonstrating a clear understanding of the customer's digital transformation goals as well as the specific needs and requirements of Public Sector timelines and paper processes.

<figure class="videocontainer">

<iframe src="https://www.youtube.com/embed/BLOIY5YGnJg" frameborder="0" allowfullscreen="true"> </iframe>

- Updated Pricing Page: Why Premium?

- Updated Pricing Page: Why Ultimate?
- Expanded Use Case Page: GitOps
- Demo: DORA-related features in GitLab 13.10

Did You Know? ·

Sales Ops has updated the bookings policy for Subscription Start Dates to ensure proper revenue recognition while adding efficiency to the Sales cycle. See the details for New Business, Add-Ons and Renewals on the Sales Order Processing Handbook page and reach out in sales-support for any questions on the changes.

The pricing of Rapid Results (Self Managed) is increasing from \$25K to \$40K to align with the market and value of this package of services. Under this new pricing structure, customers can expect a 4-week delivery timeline. At the end of the engagement:

1. The customer will have a Highly Available deployment of GitLab with a backup solution
1. The customer's SRE team will know how to maintain/upgrade the deployment using the delivered IaC/Configuration Automation
1. Users will know how to use git, GitLab and GitLab CI
1. The customer will be in a position to succeed with higher potential for faster growth.

If you have any questions, please reach out in the professional services slack channel to learn more.

The People team recently launched the Team Member Relations group, a centralized team that works with both manager and team member in an intermediary function to understand and help resolve workplace issues. The team member relations specialist can also help coach and advise managers and team members on policies and processes. For more information, check out the handbook page.

What's New in GitLab ·

The GitLab 13.11 release is live! Here are the takeaways for customers and prospects:

- Reduce Security and Compliance Risk: Security pros will be happy to see that they can now secure the software supply chain even further with support for custom detection rules, custom certificates and email alerts for key expirations. The new On-Call Schedule Management will lay a strong foundation as we mature our security alerts in future releases, providing a valuable incident management capability with end-to-end visibility across the entire DevOps process.
- Increase Operational Efficiencies: Teams can grow and scale while simplifying compliance efforts with new controls that keep automation on track, including the GitLab Agent for Kubernetes for .com which supports pull-based deployments that are preferred by security as well as Network Security policy integration and alerts which enables fine-tuned RBAC controls within clusters. Compliant Pipeline Configurations allow customers to enforce a higher degree of separation of duties and reduce business risks, while Admin mode increases security and control of a customer's GitLab instance by requiring admin users to reverify their credentials before running administrative commands.
- Deliver Better Products Faster: 13.11 delivers faster, more reliable pipelines with a host of

pipeline improvements. These include enhancements to the Pipeline Editor such as the Empty State enhancement and the ability to configure multiple cache keys in a single job, which helps customers get to work even faster and stay more productive once they begin. It also includes a new DORA 4 graph showing lead time for changes and metrics on DevOps Adoption at the group level.

Visit the [13.11 Release Post](#) for more details

Enablement Corner ·

From avoiding common discovery pitfalls to co-selling with IBM to deal registration and working with partners, the 9 LevelUp Webcast sessions in Q1 helped us start off the fiscal year strong by honing many of the skills needed to reach our Peak Performance in FY22. See all recordings on the [Sales Enablement Sessions handbook page](#) and join us for more sessions each Thursday at 9 am PT this quarter.

Team Member Spotlight ·

Alyssa Belardi - SAE, AMER West

Alyssa Belardi - SAE, AMER West

Where did you grow up, and where are you based now?

I grew up in a split household between San Francisco and Tiburon, California. I love the SF Bay Area and have been fortunate enough to stay here for my entire life (except for a short stint living in the Australian bush- slack me to hear that crazy story) and now reside in Orinda, CA.

What is your favorite thing about your job?

Collaborating with various teams to achieve desired results. The most important part of my job is triangulating resources to tell an impactful story, prove the product, provide for and inspire our customers. Without the support of the broader GitLab team, I would most certainly not be able to do my job effectively.

Which of GitLab's Values resonates most with you?

Results because I firmly believe one can't achieve Results without Collaboration, Iteration, Diversity/Inclusion, Efficiency and Transparency. This GitLab value holds me accountable every day.

Do you have a helpful tip for working at GitLab to share?

Don't be shy in Slack channels. Using the channels yields incredible responses from multiple sources · I've learned so much from some of the conversations started with what I thought was a simple question.

What is a hobby or skill you have that the team might not know about?

I collect vintage and unique glass items. Vases are my favorite - especially from Sklo Union, Rosenthal Studio and Louise Roe Copenhagen. I adore arranging flowers in special vases around the house, it's my simple pleasure to make living itself an art.

Icebreaker: What was your favorite item of clothing as a kid?

When I was 8, I loved my red high top Chuck Taylor converse· they were the best and I wore them until there were holes through the soles. I still love and wear high top chucks today!

Questions or feedback? We want to hear it! Reach out to the field-enablement-team Slack channel or capture it using this process.

See the Field Flash Newsletter handbook page for more information about this newsletter.

Archive: Edition 14, Description: May 2021 Field Flash

SECTION: sales/field-communications/field-flash-newsletter/edition-2021-06-07.md

This email newsletter was originally sent to the GitLab Field Team and stakeholders on 2021-06-07.

NEW · GitLab Field Flash: June 2021 Edition ·

In this month's Field Flash, you'll find more details on the GitOps Infrastructure Automation Sales Play, the President's Club 2022 dashboard, the latest quarterly Microsoft Compete Report,

a new resource to help you position the value of Ultimate and much more. Plus, bid farewell to Haydn Mackay in his Team Member Spotlight.

NEW Sales Play: Infrastructure Automation with GitOps

The newest Sales Play is here: Infrastructure Automation with GitOps! Check out the details below and start using this play to help close more business.

What: This Sales Play will help you identify customers interested in GitOps and have the GitOps conversation with confidence. In it, you'll find:

1. Insights on buyer personas, common pain points and required capabilities
1. Guidance on positioning value, including an elevator pitch, value prop, differentiators, competitive intel and objection handling
1. Sales Play Tactics that provide step-by-step actions for ENT, MM and SMB reps to put the play into practice to generate leads and meaningful customer conversations

Who: This Sales Play focuses on expanding DevOps best practices to Infrastructure teams.

Why: GitOps is HOT right now! More than 45% of our survey respondents at Kubecon EU highlighted that GitOps is a priority for their organization in the short term. Our GitOps marketing campaigns have been the best performing since launching in April 2020. Need more reasons? Look [here](#).

For a detailed overview, watch the Sales Enablement LevelUp Webcast recording. If you have any questions about this or future Sales Plays, please post in sales and the core team will respond.

Deal of the Month ·

Marc Kriz and Kevin Chasse share how widespread cross-functional collaboration and a deep understanding of the customer's goals and needs led to us closing a deal for GitLab's now largest customer.

Did You Know? ·

DocuSign has officially been deployed as GitLab's enterprise e-signature tool! · DocuSign is the industry-leading tool and will provide significant efficiency gains to the entire Field team in our day-to-day processes. It is FedRAMP certified, easy to use and offers a strong, seamless integration with Salesforce and other tools. As a part of this change, Sertifi has been deprecated.

Take 5 minutes to review the updated Sales Order Processing handbook page for instructions and enablement on how to send order forms to customers for signature using DocuSign. Reach out in sales-support with questions.

The Channel Ops team has announced multiple updates and improvements to Channel processes:

1. The @ Partner Help Desk Chatter alias is now live in Salesforce for Partner-related requests
1. New partner discount structures and partner requirements are now live
1. Channel Neutral will now be calculated during the end of month close process based on validated deal attribution and will no longer show an estimate in SFDC while a deal is open

Please reach out in sales-support with questions.

What's New in GitLab ·

The GitLab 13.12 release is live! Here are the takeaways for customers and prospects:

- Reduce Security and Compliance Risk: On-Demand DAST scanning is now generally available for all GitLab Ultimate customers to help them ensure their production environment is always secure. In addition, GitLab Ultimate customers are invited to a public beta for a new browser-based crawler for DAST, which is expected to provide significantly better security testing coverage for modern applications compared to GitLab's current proxy-based crawler. Lastly, the Project Vulnerability Report now gives customers the ability to filter by scanner and vendor, allowing them to more easily benefit from a unified scanner view in GitLab.
- Increase Operational Efficiencies: GitLab has made pipelines easier to use for both new and experienced users with features like a collapsible panel of guided instructions that will help new CI/CD users create their first pipeline, the ability to break .gitlab-ci.yml files into multiple smaller files to improve reusability and readability, the ability to define variables within rules and a new view in the pipeline graph that shows dependencies between jobs.
- Deliver Better Products Faster: 13.12 embraces insights that improve customers' DevOps maturity, including the introduction of a group-level deployment frequency chart, which will help customers understand the efficiency of their deployments over time, find bottlenecks, and focus on improvement areas that span across projects and teams. It also includes improvements to value stream analytics to help identify the root cause of inefficiencies in workflows.

Visit the 13.12 Release Post for more details

To see what's ahead in 14.0, watch the kickoff video or check out the kickoff review page.

Upcoming Events ·

Enablement Corner ·

Field Enablement and Marketing are partnering to create a new pitch deck for Sales to use in conversations with senior economic buyers. Please take this quick, 10-question survey and let us know how we can make this next pitch deck great for you!

GitLab is making a significant investment to help Enterprise reps be successful in reaching their Peak Performance in FY22 and beyond through Account Planning! By now, all ENT SAEs, SAs and CSMs should have completed the Account Planning Methodology Course, and the Account Snapshot in Gainsight Course and identified their account to plan. The next mini-course, Relationship/ Influence Mapping, is due June 18.

Team Member Spotlight ·

Haydn Mackay - Regional Director, AMER West

Where did you grow up, and where are you based now?

I was born in Melbourne, Victoria, Australia but moved to a small country town about 3 hours north of Melbourne called Milawa when I was 5 years old. After 17 years in the San Francisco Bay Area, I moved to Incline Village, Nevada on the east shore of Lake Tahoe right before COVID broke out.

What was your favorite thing about your job?

It's always been about the people and building new relationships (both internal and external) to achieve a goal. Helping someone be successful has always provided me the most satisfaction.

Which of GitLab's Values resonates most with you?

When I first found GitLab in 2014, the value of Transparency really stood out. As an open source project, being open and transparent with your community is really important, and I suspect that's why GitLab was able to build a strong community very quickly.

Do you have a helpful tip for working at GitLab and/or in the Field org to share?

In 2018, William Chia (Manager, Product Marketing), was kind enough to introduce me to Twilio's current CRO, Marc Boroditsky, for a coffee chat. Marc used the term 'relentless prioritization' and that stuck with me. With GitLab being so open where everyone can contribute, it's easy to lose focus on your OKRs. So, I encourage you to write that on a post-it note and stick it on your monitor.

In terms of day-to-day work, my advice is to bookmark the Field Flash archives page as there's

so much useful and consolidated content that can help you.

What is a hobby or skill you have that the team might not know about?

I can touch the tip of my nose with my tongue.

We will miss you! Are there any parting words you'd like to share with the team?

Be kind to each other. With all that's happening in the world right now and the pressure of working at a fast-growing company, kindness
