- Standard Quote Creation
- Opportunity Creation
- Forecast Management

- RFP/Vendor Form Responses
- Customer / Partner facing communication

Who and Where We Are

Regional Support

The Deal Desk team is located around the world and will be available during standard business hours within most regions. We operate under a Regional Support Model, meaning, each region (EMEA/APAC/AMER) will receive support from a dedicated regional team of Deal Desk Specialists and Analysts.

For Alliances & Private Offer Creation, this process is supported by one team member globally, with managers trained as back ups for escalation points. For all Alliances deals, each region will be supported by a dedicated Deal Desk Analyst who specializes in Alliances, based out of AMER (Pacific Time).

During holidays, or when team members are on PTO, individuals located in different regions may step in to support and ensure appropriate coverage. This is reserved for End of Month/End of Quarter, or other times when the team is short-staffed.

Support will be provided based on the following business hours in the respective region. If a complex case or non standard deal request is submitted after 4:00PM (Local Time) the case will be prioritized the following business day.

Region	Standard Support Hours
APAC	8:00AM to 5:00PM (IST)
EMEA	8:00AM to 5:00PM (GMT)
AMER / LATAM	7:00AM to 5:00PM (PT)

Support Model - Public Holidays, Friends & Family Days

Our regional teams do not operate on a 24/7 support model. If your request is submitted after 4:30PM local time, or outside of standard support hours, it may not be reviewed until the following business day. The only exceptions for this are End of Month/End of Quarter. Support hours and availability will be shared in advance of high volume periods through field-fyi.

Regional Teams observe all local Public/Federal Holidays. There will be no coverage on Public/Federal Holidays.

The team also participates in Family & Friends day - there will be very limited coverage on these days.

It is the responsibility of the Sales team to plan ahead and submit requests prior to regional holidays.

Regional Structure

As of 2022-02-01, the Deal Desk team is structured as follows:

AMER Team:

- Manager, Deal Desk (AMER)
- Deal Desk Analyst, Alliances (Global)
- Deal Desk Specialist (AMER)
- Deal Desk Specialist (AMER)
- Deal Desk Specialist (AMER)

EMEA/APAC TEAM:

- Manager, Deal Desk (EMEA/APAC)
- Deal Desk Analyst (APAC)
- Deal Desk Analyst (EMEA)
- Deal Desk Specialist (EMEA)
- Deal Desk Analyst (Alliances) (Open Req)

Communicating with the Deal Desk Team

Salesforce Communication

Deal Desk's primary communication process to request internal support is SFDC Cases. Support can be requested on the Opportunity Object in SFDC, by clicking on the "Request Support" button in the top right hand side of the page layout. Please reference the "Requesting Internal Support" section in the Handbook for detailed instructions.

For enablement on requesting Deal Desk Cases, please reference the New Internal Support Request + Quote Approval Processes - 2024-11-21 in HighSpot.

- Always use the "Request Support" workflow on the Opportunity Object to create a case for Deal Desk. For general support, please use the sales-support Slack channel for general questions.
 - Please do not tag Deal Desk team members directly in chatter on an Account or Opportunity or make a request through Slack direct message. Only @mention someone directly on a case where they are the Case Owner. This ensures our team is working as efficiently as possible and that you are covered in case the DD team member who replied first is unavailable.
 - Direct chatters on Account or Opportunities to team members will not create a case in the Deal Desk queue, and therefore will not be prioritized. You may experience a significant delay in response, or no response at all. Please always use the "Request Support" workflow on the Opportunity Object to create a case for Deal Desk.
- If someone is working on a case, they will continue to support until the case is closed. If an issue has been resolved but needs further support from the Deal Desk team, use the "Request Support" workflow on the Opportunity Object to create a new case for Deal Desk. Deal Desk will determine if the resolved case should be reopened, or if the newly created case will be used.
- If you add any @ mention tag on an existing Chatter post/comment by editing it, that action may not generate a notification. If you fail to @ mention someone in your comment, just @ them in the thread instead of editing the comment. Please use the "Request Support" workflow on the Opportunity Object to create a case for Deal Desk.

For cases related to Account Segmentation (ROE, Territory), account data, or account merges, Deal desk will reassign these cases to our Sales Operations team to review and resolve.

Slack Communication

Primary Slack Channel

Use our Slack channel in case of general, non-record related requests and/or urgent questions: sales-support [If the request is related to a quote or opportunity - please Request Support on the opportunity in Salesforce instead of the Slack channel.]

Slack Best Practices

Please avoid contacting the DD team members directly via Slack. Utilizing the sales-support channel is best to ensure timely coverage, helps others who may have similar questions, and aligns with our Transparency value.

In case of a specific opportunity or quote related question please Request Support on the Opportunity level.

Slack Announcements

Deal Desk process updates and announcements will be communicated via field-fyi, sales and sales-support Slack channels.

Deal Desk Office Hours

Weekly Deal Desk Office Hours are scheduled as follows:

- EMEA Office Hours: Thursday at 10:30 GMT,
- US Office Hours: Wednesday at 12:00 PM EST.

During Month End, Office Hours will take place on Monday, Wednesday, and Friday, scheduled in both AMER and EMEA time zones. Calendar invites will be sent to Sales-All Distribution group. Priority will be given to opportunities closing within the quarter.

Supported topics include:

- Create or modifying a quote
- Quote approval acceleration
- Net ARR calculation
- Submitting an opportunity for close
- Validation/segmentation of closed opportunities
- And anything else to help drive opportunities closing within the quarter!

Deal Desk AMA

Deal Desk AMA's are an opportunity to invite someone from Deal Desk to your local team call. We can help address any questions regarding quote processes, best practices, or unique deal structures. Think of this as an opportunity for your team to learn together on general topics for quoting or opportunity management. For specific questions related to in-flight opportunities, it is best to join Deal Desk Office Hours.

Request Support (creating a case) or Slack sales-support if you are interested in having Deal Desk join your team call!

Key Performance Indicators

1. Deal Desk Case SLAs

The Deal Desk team will do their best to respond to each request to SFDC Case within 6 business hours. Revenue generating or current quarter requests will take priority, especially during Month & Quarter End. If a task is not resolved within 24 hours it will be escalated (if necessary).

The SLAs below are applicable (especially for contract resets and ramp deals) if all the necessary information is provided in the request.

Type of Request	First Response	Resolution
Basic Quote Assistance	6 Hours	8 Hours
Ramp Deal	6 Hours	24 hours
Alliances, General Support	8 Hours	48 Hours
Alliances, Private Offer Creation	24 Hours	48 Hours
Flat Renewal	6 Hours	24 Hours
IACV/ARR Review	6 Hours	24 Hours
Contract Reset / Co-Term	6 Hours	24 Hours
RFP/Vendor Forms	6 Hours	Dependent on AM

SLA for EoA Ramp Deal Requests

The Deal Desk team will respond to EoA Ramp requests as quickly as possible. However, due to the complexity involved in building ramp deals, the SLA for an EoA Ramp Deal Order Form creation is as follows:

Subscription Term Start Date	First Response	Resolution
< 30 days in the future	6 Hours	1 Business Day
> 30 days in the future	6 Hours	3 Business Days

A Deal Desk team member will respond to your case request with an estimate on when the Order Form will be complete. Please let us know if your customer requires the quote in advance due to lengthy procurement cycles or budget planning reasons - exceptions will be considered in cases of urgency, or to meet a customer's needs.

Escalation Path for Case Review

Cases that are urgent, customer impacting, or critical to business may be prioritized upon request. If the case has been submitted after Standard Support hours, you may escalate the case for a different regional team to review in the sales-support Slack channel. You may also tag regional Deal Desk Managers for review and assistance in delegating the case.

Cases in this queue must be urgent and business critical. Cases that are routinely escalated out of individual convenience instead of legitimate urgency will be addressed with Sales

Management.

Reports To Track Deal Desk SLA

Cases / Average First Response

2. Regional Support Satisfaction

All regions will receive a Quarterly Customer Satisfaction survey at the beginning of each new quarter. Our team aims for a 92% satisfaction rating for their supported region. This survey is a valuable tool to provide feedback on areas of improvement related to the Quote to Cash lifecycle.

Results from the survey will be used to evaluate team member performance and to identify areas for improvement.

Measuring Regional Support Satisfaction:

- A positive satisfaction rating is determined by measuring the ratio of positive responses to the question: "How would you describe the level of support you received from Deal Desk during Q1?"
- Available responses include:
 - Excellent
 - Good
 - Neutral
 - Poor
 - Very Poor
- Satisfaction rating is determined by the percentage of Excellent, Good, and Neutral responses, as compared to the total number of responses. The outcome in percentage form is the Regional Support Satisfaction rating.

Case Reduction through Proactive Support - Training, Documentation, and System Improvements

The Deal Desk team will be responsible for taking action on feedback received in our Quarterly CSAT survey by improving process related to common quoting errors, opportunity bugs, or gaps in process documentation. The goal is to decrease the number of cases and enable the field to complete the standard duties related to quoting without Deal Desk intervention. Deal Desk will always assist in complex or non-standard deals.

Key Performance Indicators: Results

To review quarterly KPI results, see: Deal Desk & Order Management KPI - Results

Proactive Opportunity Review

In an effort to proactively prevent common order issues (especially those that would require a customer to resign our order form) the Deal Desk team will conduct a manual review of all opps that meet the following criteria:

- Close Date = Within Current Quarter

- Net ARR = \$100k+
- Opportunity Stage - 4 OR 5

Team members will review opps in their region each week. We are looking for anything that would prevent the opportunity from booking smoothly, including:

1. Check that quote is built correctly for the opportunity type and route to market (direct, channel, marketplace)
2. Review quote approval requirements are met
3. Review IACV / ARR (IACV review through FY21Q1)
4. Review PO Requirement. If the account requires a PO, chatter the rep with a reminder
5. Check with rep to determine whether any questions or additional needs, especially if you see something structured oddly on the opp/quote, or if it is a complex deal

Review Cadence

The team will review opps on a monthly basis, as time allows throughout the work week. During the last month of any quarter, the review will be conducted weekly.

Calculating ARR

To calculate ARR, please review the ARR in Practice handbook page.

Zuora Quote Configuration Guide - Standard Quotes

The following is intended as a step by step guide for opportunity owners or ISRs to learn how to create standard quotes for New Subscriptions, Amendments, and Renewal opportunities in CPQ X: Quote Studio.

Additional Quote Studio Enablement Materials

Quote Creation: General Tips & Tricks

Required Fields

- The following fields must be populated to successfully create a quote:
 - Start Date (this is the first day the license will be usable)
 - Initial Term (this is the term of the subscription in months)
 - Renewal Term (this is the term that the subscription will renew for after the Initial Term is complete)
- Quote Template
- Bill To Contact
- Sold To Contact

Selecting a Quote Template

Template	Use For
Standard Order Form	Most quotes, including alliance marketplace transactions, EDU/OSS/YC, or Customers with an Existing Agreement (MSA) in place
Standard Order Form (Hide Discount)	Hide the Discount Column for Direct Deals. Otherwise Identical to the Standard Order Form Template
Authorized Reseller Order Form	Authorized Reseller Transactions
MSP Order Form	Managed Service Provider Transactions
Distributor Order Form	Distributor Transactions

Negotiated Subscription Agreements (or "MSA")

- If there is a signed MSA between the customer and GitLab, the "MSA Effective Date" field should be populated with the date of the MSA's signature. If "MSA Effective Date" is populated on the quote object, the Order form will automatically generate with Acceptance Language that References the existing agreement. If it is not populated the language will default to Standard terms.

Add Language to the Order Form Automatically

- Add any preapproved legal language selections to the order form. Checking the box next to the language selection will automatically generate an order form with pre approved legal language - no need for Deal Desk intervention. Selections are as follows:

Toggle Field	Output
Annual Payments	Annual Payment Language will populate in Payment Details on the Order Form PDF
Customer Reference Language	Customer Reference Language will populate in Notes Section of the order form
Add Quarterly True Up Language	Standard Quarterly True Up language will populate in the Notes section of the Order Form
Remove Signature Block	Signature Block will be removed. Use for customers with Existing Agreements (MSA)

Non-Standard Deal Elements

As of 2024-11-20, we have created a new quote section called Non-Standard Deal Elements. The fields in this section should be populated when certain non-standard deal elements are requested. If populated, these fields will trigger an approval requirement. By populating the applicable fields and clicking 'Submit for Approval,' users can seek approvals via automated

quote approval workflow.

The below guide is meant to help users determine if they should populate the Non-Standard Deal Elements fields on a quote, and what should be populated in each field.

Deferred Payments

- Criteria: If a customer's payment schedule is not prepaid or paid annually, approval is required. The default value is Prepaid.
- Process: When creating a quote that will not be prepaid, users should follow the instructions here to build the quote. On the quote, users should leverage the Payment Schedule field to select the appropriate value.
 - The options are as follows:
 - Prepaid (default)
 - Annual Payments
 - Custom Payment Schedule
 - GCP Prepay
 - GCP Postpay
 - AWS Prepay
 - If a payment schedule other than Prepaid or Annual Payments is requested, users should select Custom Payment Schedule and populate the request details in the Custom Payment Schedule Details field (required). This requires approval per the Deal Approval Matrix.
 - Opportunity Mapping: The 'Payment Schedule' field on the quote maps to the 'Billing Schedule' field on the opportunity - i.e. if you select 'Annual Payments' on the quote, the opportunity will be updated automatically to reflect 'Annual Payments'.
 - Order Form Language: If 'Annual Payments' is selected, '[Language] Add Annual Payments' will flip to TRUE automatically.
- Example: I am creating a 18 month deal, where I'd like 6 months billed up front, and then the final 12 months billed at the 6 month mark. When I create the quote, I select 'Custom Payment Schedule' in the 'Payment Schedule' field. I then populate 'Custom Payment Schedule Details' with the following: I would like a payment schedule for this deal where the first 6 months are billed up front, and the final 12 months are billed at the 6 month mark. When I'm ready to seek this and all other applicable approvals, I click 'Submit for Approval' on the quote. After I receive approvals, I make sure to work with Legal to obtain applicable language for the Order Form.

Price Lock / Optional Future Pricing

- Criteria: If a price lock or any optional future pricing language is to be included on an Order Form, approval is required per the Deal Approval Matrix.
- Process: When creating a quote that will require a price lock or optional future pricing language, users should check the box next to Price Lock/Optional Future Pricing and populate the request details in the Price Lock Details field.
 - Note: Request details should be entered in this field, but final language must be sought

from Legal via Legal Request case after approvals have been obtained for the price lock request.

- Example: I am selling a deal where I would like to lock in the price of any add-ons during the subscription term at a certain rate. The customer would like this stated on the Order Form. When I create the quote, I check the box next to **Price Lock/Optional Future Pricing**. I populate **Price Lock Details** with the following: I would like a price lock that states that any users added during the subscription term will be priced at \$XXX.XX per user per year. When I'm ready to seek this and all other applicable approvals, I click **Submit for Approval** on the quote. After I receive approvals, I make sure to work with Legal to obtain applicable language for the Order Form.

Deal Contingent on Future Product/Feature Release

- Criteria: In the rare scenario that we are selling a deal that is contingent on a future product or feature release, approval is required from a number of stakeholders, including executives, per the Deal Approval Matrix.

- Process: When creating a quote for a deal that is contingent on a future product or feature release, users should check the box next to **Deal Contingent on Product Release** and populate details in the **Deal Contingency Details** field.

- Note: Details should be entered in this field, but final language regarding the deal contingency must be sought from Legal via Legal Request case after approvals have been obtained for the deal contingency.

- Example: I am selling a deal that is contingent on a new feature release. Specifically, the customer says they are only going to sign this Order Form if we confirm that a specific feature will be available. When I create the quote, I check the box next to **Deal Contingent on Product Release**. I populate **Deal Contingency Details** with the following: I would like language that states that X feature will be available as of Y date. When I'm ready to seek this and all other applicable approvals, I click **Submit for Approval** on the quote. After I receive approvals, I make sure to work with Legal to obtain applicable language for the Order Form.

Multiple Production Instances

- Criteria: In the scenario where a customer is requesting a secondary production instance free of charge (i.e. \$0 subscription), approval is required per the Deal Approval Matrix and will not be granted in all circumstances. The most common example of this scenario is a migration, where the customer requests a \$0 subscription to maintain their existing instance for a period of time while they transition to the new instance (which is paid).

- Process: When creating a quote for a secondary \$0 subscription, users should check the box next to **Secondary Production Instance (\$0 Sub)**.

- Example: My customer is migrating from Self-Managed to SaaS. They need both environments for 3 months to support the migration. As such, I need to create a \$0 subscription for 3 months to maintain the Self-Managed instance. On my quote, I check the box next to **Secondary Production Instance (\$0 Sub)**. When I'm ready to seek this and all other applicable approvals, I click **Submit for Approval** on the quote. After I receive approvals, I make sure to work with Legal to obtain applicable language for the Order Form.

Non-Standard Ramp Deal

- Criteria: A Non-Standard Ramp is defined as a ramp deal where the ramp intervals are not annual - i.e. the ramp periods are not equal to 12 months. This requires approval per the Deal Approval Matrix.
- Process: The user creating the ramp deal should check the box next to the Non-Standard Ramp field and populate details regarding the request in the Non-Standard Ramp Details field.
 - Note: If the ramp deal requires multiple unique quotes, this approval is only required on the initial year's quote.
- Example: My customer would like a 24 month subscription with non-standard ramps - they'd like to increase users every 6 months. When I create the quote, I check the box next to 'Non-Standard Ramp' and I populate 'Non-Standard Ramp Details' with the following: I'd like a 24 month deal where users increase by X every 6 months. When I'm ready to seek this and all other applicable approvals, I click 'Submit for Approval' on the quote. After I receive approvals, I make sure to work with Deal Desk to build the ramp deal.

Billing/Payment Schedule

At GitLab, the default billing/payment schedule is full prepayment. In the case of multi-year deals, you may opt to choose Annual Payments. As noted above, you must select "Annual Payments" in the Payment Schedule field, which will automatically update the Annual Payments toggle field on the quote to populate language on the order form that commits the order in question to an annual billing/payment schedule.

If you choose to add Annual Payments to a quote, please keep in mind the following:

1. On a New Business quote, Initial Term must equal 24, 36, 48, or 60. On a Renewal quote, Renewal Term must equal 24, 36, 48, or 60.
2. All quotes with Annual Payments must use the "1 Year" Product SKU. You will see an error message if you select Annual Payments and anything other than the 1 Year SKU.
3. All opportunities with Annual Payments should have "Annual Payments" selected in the "Payment Schedule" field.
4. You may not convert a prepaid deal to Annual Payments via Add-On/Amendment quote, or vice versa. Add-Ons will always follow the original billing/payment schedule.

Contact Requirements

- Select "Sold To" and "Bill To" contacts. Note that the "Sold To" contact will receive the EULA or License file via email. Note: Each contact record must have a complete address, if the address is not fully populated, you will need to update this before you can proceed with the quote.
- For One-Tier Reseller or MSP deals, populate the "Invoice Owner", "Invoice Owner Contact" and "Resale Partner" fields. For Distributor deals, populate the "Invoice Owner", "Invoice Owner Contact", "Resale Partner" and "Distributor" fields. For Direct Deals leave "Invoice Owner", "Invoice Owner Contact," "Resale Partner," and "Distributor" fields blank.
 - "Invoice Owner" and "Invoice Owner Contact" should reflect the account and contact of the party being quoted by GitLab. This means we should leverage the Resale Partner's Billing Account and Billing Account Contact for One-Tier Reseller and MSP deals, and the Distributor's

Billing Account and Billing Account Contact for Distributor deals.

- Search for the Partner Account Name in the "Invoice Owner" field to select the Billing Account for the partner. If there are no results matching the partner account, this means that a Billing Account does not yet exist for the partner. Request Support to Billing Ops team, tagging the Partner Account Owner listed on the Partner Account Record and ask for a Billing Account to be created.

- "Invoice Owner Contact"

- The Billing Account on the Partner Account lists the accounts payable contact information associated with that account (refer to "Contact Information" section on the billing account), so that contact should be used as the "Invoice Owner Contact". If that contact does not exist on the Partner Account as a Contact Record, please create the contact using the following naming convention "[Partner Account Name] - Accounts Payable".

- Ensure that the "Invoice Owner Contact" is connected to the Partner Account record and matches the contact information from the partner's Billing Account (i.e., Invoice Owner).

- The "Resale Partner" field should be populated with the Partner Account of the Reseller or MSP transacting (please note a partner may have both a Customer and Partner Account Record, the Partner Account must be selected. Check the "Account Record Type" field on an account to identify whether it is Customer or Partner account).

- For deals through distribution, the "Distributor" field should be populated with the Distributor Account of the Distributor transacting (for all Distributor Deals, you must also populate Resale Partner).

Term Requirements

- Populate "Initial Term" in months. (i.e. for a two-year deal, enter "24"). For standard deals, "Initial Term" should always match the SKU that you are quoting (i.e. Premium - 2 Year = Initial Term 24 Months).

VAT ID

- If the customer or reseller is based in the EU, enter the "VAT ID" number. This is required to book the order.

Payment Capture Link Step by Step Guide

The payment capture link functionality is a tool by which Opportunity Owners can send a credit card capture link to customers for First Order deals. This ensures a successful payment for new subscriptions, while at the same storing their credit card information for future transactions. Before going into the step by step guide on how to use this tool, please see an outline of the tool below:

- Deal Type: The payment capture link tool is only available for First Orders / new subscription deals. This tool is not available for Partner deals. As of April 4th 2024, the the payment capture link flow is required for all SMB \$19 Promo deals.

- Quote Type: The tool can only be used when Credit Card is selected as the payment method when creating New Subscription quotes in Quote Studio.

- Approvals: Quote has to be submitted for approval & approved or approval not required before payment link can be sent to the customer.

- Distribution Method: The Opportunity Owner sends the link through a Send Payment Link button in SFDC, which triggers an email out to the customer with a payment capture link.

- Link Expiration: The payment capture link expires after 72 hours, after which you will need to send another link if the recipient has not entered their details yet. You will be notified on SFDC if this occurs.
- Opportunity Closure Requirements: The credit card details need to be captured before you can close the Opportunity. In other words, the customer needs to successfully open the payment capture link and enter their credit card information for the deal to close and for them to access GitLab.

Step by step guide:

Please see this video (with a scenario that requires quote approvals) for a visual walkthrough of the below steps.

1. After you have reached the Select "Sold To" and "Bill To" contacts. step of the New Subscription Quote step by step guide, select Credit Card under the Payment Method dropdown menu.
1. Complete the To Add Products to your quote, step of the New Subscription Quote step by step guide and add appropriate discounts if needed.
1. Once you are ready to save the quote, click Submit at the top of the screen.
1. The Quote has to be submitted for approval & approved or approval not required (i.e. there is no discount or the discount is too low to require approvals as per the appropriate discount matrix) to be able to send the payment link. So, please ensure you have gotten the appropriate approvals before proceeding to the next step.
1. Click on the dropdown menu while you are on the Quotes page next to the Generate Signature PDF button.
1. Select Send Payment Link.
1. This will send a payment link email with the subject Set Up Your Secure Automated Credit Card Payments to the customer. Please see the above linked video for a customer POV.
1. Once the customer has successfully entered the payment details in the capture link, the quote will be updated confirmation of the capture in the fields Payment Method Captured and Payment Method Capture Date. If the customer does not enter the enter their details within 72 hours, the link is expired and you will be notified. You will have to send another link.
1. The Opportunity cannot be closed until the payment details have been captured.

FAQ:

1. Is the payment capture link a payment link? No, this is strictly a link to capture the payment information. The actual payment happens at a later date (explained in a later question below).
1. Could we get notifications when the customer has successfully completed the payment capture link form? We are working on this and the notification will show in SFDC once the customer successfully enters the required information.
1. What if the customer does not want to use the payment capture link? If you are unable to get the customer to submit their credit card payment details for whatever reason, you can switch to Wire payment.
1. When should I explain to the customer how the payment capture link works? We advise that you inform the customer ahead of time on how the payment capture link works and that they will not receive a license until they provide the payment information.
1. At what point in the deal should I send the payment capture link? Assuming you are also sending an order form, please consider the timing of sharing the order form alongside the

payment capture link such that it is a smooth process for the customer.

1. Do customers using this tool get an invoice? How does it get paid? All customers using this tool will receive an invoice within 24 hours of the opportunity status being updated to closed won. As the customer is on auto-pay, the payment will typically happen on midnight of the date the invoice is due via the captured credit card.

1. Can the payment terms for customers using this tool be Net 30? Although we highly recommend Due Upon Receipt, it can be Net 30 if the customer is pushing for it.

Quote Creation: Step by Step Guide by Quote Type

New Subscription Quote

Follow this step by step guide for creating a New Subscription quote in Quote Studio. Use a New Subscription quote when the customer is purchasing a brand new subscription, OR if the deal structure includes a Contract Reset.

A. Open the New Business opportunity and click the "New Quote" button.

B. This button launches the first of two pages in the quoting experience: The Billing Accounts and Subscriptions page. You have two options to create a new subscription quote on this page:

- If the customer has an existing Billing Account, and you intend to sell a new subscription using the same Sold To Contact listed under the Billing Account, select the applicable Billing Account and click "New Quote."

- If the customer does not have an existing Billing Account, or if the Sold To Contact you intend to use is not listed under one of the existing Billing Accounts, click "New Billing Account."

C. On this second and final page of the quoting experience, populate Quote Detail Information.

- The following fields must be populated to successfully create a quote:

- Start Date (this is the first day the license will be usable)

- Initial Term (this is the term of the subscription in months)

- Renewal Term (this is the term that the subscription will renew for after the Initial Term is complete)

- Quote Template

- Bill To Contact

- Sold To Contact

- Selecting a Quote Template

Template	Use For
----------	---------

--	--

-----	-----
-------	-------

Standard Order Form	Most quotes, including alliance marketplace
---------------------	---

transactions, EDU/OSS/YC, or Customers with an Existing Agreement (MSA) in place	
--	--

Standard Order Form (Hide Discount)	Hide the Discount Column for Direct Deals. Otherwise
Identical to the Standard Order Form Template	

Authorized Reseller Order Form	Authorized Reseller Transactions
--------------------------------	----------------------------------

	MSP Order Form	Managed Service Provider Transactions
	Distributor Order Form	Distributor Transactions

- If there is a signed MSA between the customer and GitLab, the "MSA Effective Date" field should be populated with the date of the MSA's signature. If "MSA Effective Date" is populated on the quote object, the Order form will automatically generate with Acceptance Language that References the existing agreement. If it is not populated the language will default to Standard terms.

- Add any preapproved legal language selections to the order form. Checking the box next of the language selection will automatically generate an order form with pre approved legal language - no need for Deal Desk intervention. Selections are as follows:

Toggle Field	Output
-----	-----

Annual Payments	Annual Payment Language will populate in Payment Details on the Order Form PDF
Customer Reference Language	Customer Reference Language will populate in Notes Section of the order form
Add Quarterly True Up Language	Standard Quarterly True Up language will populate in the Notes section of the Order Form
Remove Signature Block	Signature Block will be removed. Use for customers with Existing Agreements (MSA)

- Select "Sold To" and "Bill To" contacts. Note that the "Sold To" contact will receive the EULA or License file via email. Note: Each contact record must have a complete address, if the address is not fully populated, you will need to update this before you can proceed with the quote.

- If you are selecting Credit Card under the Payment Method dropdown menu, please follow the Payment Capture Link Step by Step Guide before returning to this guide.

- For One-Tier Reseller or MSP deals, populate the "Invoice Owner", "Invoice Owner Contact" and "Resale Partner" fields. For Distributor deals, populate the "Invoice Owner", "Invoice Owner Contact", "Resale Partner" and "Distributor" fields. For Direct Deals leave "Invoice Owner", "Invoice Owner Contact," "Resale Partner," and "Distributor" fields blank.

- "Invoice Owner" and "Invoice Owner Contact" should reflect the account and contact of the party being quoted by GitLab. This means we should leverage the Resale Partner's Billing Account and Billing Account Contact for One-Tier Reseller and MSP deals, and the Distributor's Billing Account and Billing Account Contact for Distributor deals.

- Search for the Partner Account Name in the "Invoice Owner" field to select the Billing Account for the partner. If there are no results matching the partner account, this means that a Billing Account does not yet exist for the partner. Request Support to the Billing Ops team, tagging the Partner Account Owner listed on the Partner Account Record and ask for a Billing Account to be created.

- "Invoice Owner Contact"

- The Billing Account on the Partner Account lists the accounts payable contact information

associated with that account (refer to "Contact Information" section on the billing account), so that contact should be used as the "Invoice Owner Contact". If that contact does not exist on the Partner Account as a Contact Record, please create the contact using the following naming convention "[Partner Account Name] - Accounts Payable".

- Ensure that the "Invoice Owner Contact" is connected to the Partner Account record and matches the contact information from the partner's Billing Account (i.e., Invoice Owner).
- The "Resale Partner" field should be populated with the Partner Account of the Reseller or MSP transacting (please note a partner may have both a Customer and Partner Account Record, the Partner Account must be selected. Check the "Account Record Type" field on an account to identify whether it is Customer or Partner account).
- For deals through distribution, the "Distributor" field should be populated with the Distributor Account of the Distributor transacting (for all Distributor Deals, you must also populate Resale Partner).
- Populate "Initial Term" in months. (i.e. for a two-year deal, enter "24"). For standard deals, "Initial Term" should always match the SKU that you are quoting (i.e. Premium - 2 Year = Initial Term 24 Months).
- If the customer or reseller is based in the EU, enter the "VAT ID" number. This is required to book the order.

- Note: Non-standard payment terms (Net 30 = standard) should be reflected on the quote object, and will require approval per the approval matrix.

D. To Add Products to your quote, locate the search bar between "Subscription" and "Browse Products" at the bottom of the page, and search for the Product SKU you would like to sell. Once you have located the correct Product SKU, click the circular + button to add that product to the quote. Repeat this process to add additional Product SKUs.

E. For each Product SKU you have added to the quote, edit Quantity, Discount, and/or Effective Price as desired. After you have correctly configured Product SKUs, you can click "Preview Metrics" to preview the quote total while still in draft mode. Once you are ready to save the quote, click "Submit" at the top of the screen.

- For Channel deals, see this cheat sheet to confirm correct discounts to apply. Partner discounts must be added in addition to any customer discounts and required approvals must be received by submitting the quote in the system, per the quote approval matrix. If there are no customer discounts and standard partner program discounts are used, additional quote approvals will not be required. Request Support to Ecosystems team for questions.

F. Add Annual Payments to a order form by:

- Checking "Annual Payments" checkbox on Quote Detail Page
- Updating "Initial Term" to 24, 36, 48, or 60. If Initial Term is not updated correctly, the quote will not generate the correct Total"
- All Annual Payment quotes must use the 1 - Year Product SKU. You will see an error message if you select Annual Payments and anything other than the 1 - Year SKU.

G. SuperSonics: Review the Zuora fields to determine whether any Cloud Licensing features apply to the subscription. For more information on Cloud Licensing, see: SuperSonics and Sales Assisted Transactions

H. Order Form Generation

- If no discounts or special terms are requested, click "Generate PDF."
- If the deal contains discounts that require approval, please submit the quote for approval using the button on the quote. The quote must be approved before the PDF can be generated.
 - In the case of reseller deals, please obtain the approvals based on the approval matrix.
- Order Form Manual Edits
 - Please note that Sales reps may only generate PDF versions of the Order Form. If you require special wording or other manual edits, please make the request by using the "Request Support" workflow on the Opportunity Object to create a case for Deal Desk.

To supplement these steps, review the Highspot Page or the RISE Course to see each step live for a New Subscription quote.

Amend Subscription Quote

The following is intended as a step by step guide for opportunity owners or ISRs to learn how to create standard quotes for amendments in CPQ X: Quote Studio.

This quote type should only be used when new users are being added to an existing subscription during the current subscription term or when you are changing or adding products during the current subscription term. Please note: Amendment quotes cannot extend a subscription term.

Add On Opportunity should be Closed-Won before submitting a Renewal opportunity for approval.

Additional Zuora Quote Studio Enablement Materials

In addition to the step-by-step quoting guides that follow this paragraph, check out these additional quoting resources!

1. Highspot Page
2. RISE Course

A. Add-On Quote Creation

- Create the Add-on opportunity on the latest closed won annual opp (Renewal or New Business) that is related to that subscription (use the "New Add On Opportunity" button)
- Fill out all required fields on the opportunity level (i.e Close date) and save.
- Open the Add-On opportunity and click the "New Quote" button.
- Select the applicable billing account.
- Next, locate the subscription you would like to amend. If you are unsure which subscription to amend, click on the blue subscription name (i.e. A-S00263985) - this will open a new window that details that subscriptions products, quantities, pricing, etc.
- Click the pencil icon to amend that subscription.
- Note: If there are subscriptions available, click on the subscription name to open the subscription information and review the dates, products, and pricing of that subscription.
- If you are still unable to determine which to choose, please use the "Request Support" workflow on the Opportunity Object to create a case for Deal Desk.
- On this second and final page of the quoting experience, populate Quote Detail Information.

- The following fields must be populated to successfully create a quote:
 - Start Date (this is the first day the license will be usable)
 - Initial Term (this is the term of the subscription in months)
 - Renewal Term (this is the term that the subscription will renew for after the Initial Term is complete)
 - Quote Template (Amendments must transact through the same route to market as the original order)
 - Bill To Contact
 - Sold To Contact

- The Start Date cannot be set before the subscription start date.
 - The End Date will automatically be set to co-terminate with the existing subscription.
 - The Initial Term is automatically updated to reflect the initial term of the original New Business or Renewal subscription which is being amended by this quote. Please do not override the automatically populated Initial Term on Amend Subscription quote objects (i.e. if you're amending the quote halfway through a 12 month term, the Initial Term should be 12, not 6.)
 - The GitLab Entity must be the same as it was on the initial deal you're amending.
 - For One-Tier Reseller or MSP deals, populate the "Invoice Owner", "Invoice Owner Contact" and "Resale Partner" fields. For Distributor deals, populate the "Invoice Owner", "Invoice Owner Contact", "Resale Partner" and "Distributor" fields. For Direct Deals leave "Invoice Owner", "Invoice Owner Contact", "Resale Partner," and "Distributor" fields blank.
 - "Invoice Owner" and "Invoice Owner Contact" should reflect the account and contact of the party being quoted by GitLab. This means we should leverage the Resale Partner's Billing Account and Billing Account Contact for One-Tier Reseller and MSP deals, and the Distributor's Billing Account and Billing Account Contact for Distributor deals.
 - Search for the Partner Account Name in the "Invoice Owner" field to select the Billing Account for the partner. If there are no results matching the partner account, this means that a Billing Account does not yet exist for the partner. Request Support from Billing Ops and tag the Partner Account Owner listed on the Partner Account Record and ask for a Billing Account to be created.
 - "Invoice Owner Contact"
 - The Billing Account on the Partner Account lists the accounts payable contact information associated with that account (refer to "Contact Information" section on the billing account), so that contact should be used as the "Invoice Owner Contact". If that contact does not exist on the Partner Account as a Contact Record, please create the contact using the following naming convention "[Partner Account Name] - Accounts Payable".
 - Ensure that the "Invoice Owner Contact" is connected to the Partner Account record and matches the contact information from the partner's Billing Account (i.e., Invoice Owner).
 - The "Resale Partner" field should be populated with the Partner Account of the Reseller or MSP transacting (please note a partner may have both a Customer and Partner Account Record, the Partner Account must be selected. Check the "Account Record Type" field on an account to identify whether it is Customer or Partner account).
 - For deals through distribution, the "Distributor" field should be populated with the Distributor Account of the Distributor transacting (for all Distributor Deals, you must also populate Resale Partner).
 - We cannot change route to market through an Amendment quote. If the original order was sold Direct, all subsequent amendments must also be Direct. If it was initially sold through a Partner, all amendments must go through the same partner for the duration of the subscription.
 - If the customer or reseller is based in the EU, enter the "VAT ID" number. This is required to book the order.

- If there is a signed MSA between the customer and GitLab, the "MSA Effective Date" field should be populated with the date of the MSA's signature. If "MSA Effective Date" is populated on the quote object, the Order form will automatically generate with Acceptance Language that References the existing agreement. If it is not populated the language will default to Standard terms.

- To add, remove, or edit Product SKUs on the quote, locate the search bar between "Subscription" and "Browse Products" at the bottom of the page, and search for the Product SKU you would like to add. Once you have located the correct Product SKU, click the circular + button to add that product to the quote. Repeat this process to add additional Product SKUs. You can also remove a Product SKU by clicking on the trash can icon under the SKU name.

- For each Product SKU you have added to the quote, edit Quantity, Discount, and/or Effective Price as desired. After you have correctly configured Product SKUs, you can click "Preview Metrics" to preview the quote total while still in draft mode. Once you are ready to save the quote, click "Submit" at the top of the screen.

- Note: If a product has been amended multiple times during a subscription period, the product will display multiple lines with each quantity of the product shown. In this instance, only modify one line with the new quantity. Do not modify multiple lines. Additional information can be found [here](#).

- To add users to the existing subscription at a different price or discount, the new user licenses should be added as a separate product line.

- True-Ups: NOTE: The true-up SKU does not add users to the license - it's simply a retroactive one time charge. If you are conducting a quarterly or semi annual true-up for a customer with our former percentage-based fee schedule, do not use the true-up SKU unless the true-up is in conjunction with their renewal and the customer will be renewing for less users. Instead, you should add users using an appropriately priced subscription product SKU. If you are quoting true-up users, search for the applicable True-Up SKU and add it to the quote. Edit the quantity and effective price. Click "Submit."

- Order Form Generation

- If no discounts or special terms are requested, click "Generate PDF."

- If the deal contains discounts that require approval, please submit the quote for approval using the button on the quote. The quote must be approved before the PDF can be generated.

- In the case of reseller deals, please obtain the approvals based on the approval matrix.

- Order Form Manual Edits

- Please note that Sales reps may only generate PDF versions of the Order Form. If you require special wording or other manual edits, please use the "Request Support" workflow on the Opportunity Object to create a case for Deal Desk.

Prorata calculation of add-on order forms

Explanation with screenshot of example order form

- On add-on/amendment order forms the amounts are prorated based on calendar days as per the following example (adding 10 users to existing subscription)

- Annual fee for 10 add-on users: $10 \text{ users} \times \$228 = \$2,280.00$

- Number of calendar days of the add-on period: 177 days (7 Apr 2022 - 1 Oct 2022 in this example)

- Prorated fee calculation: $(\$2,280.00 / 365 \text{ days}) \times 177 \text{ days} = \$1,105.64$

B. Upgrade or Switch Products During the Subscription Term

Follow this process to change products mid-term. A common use case for this process is migrations from Self-Managed to SaaS or from SaaS to Self-Managed. In such scenarios, once the opportunity becomes Closed Won, the standard licensing process will occur.

- Create an "Amend Subscription" quote by following the steps in Section 2 (A) above.
- The Start Date should be the date of the product exchange.
- In the Product search bar, search for the new product type, and add the correct SKU.
- Remove the prior existing product by clicking on the trash can icon under that Product's Name.
- Adjust the new product line - quantity, discount. Click "Submit."
- Note: On the Order Form, the product being removed will display with a negative amount reflecting the credit for that product for the remainder of the subscription term.
- Mid-term product upgrade can only be processed via the same route to market.

To supplement these steps, review the Highspot Page or the RISE Course to see each step live for a New Subscription quote.

Mid-Term Upgrades with Reduction in Seat Count

GitLab only allows customers to reduce their seat count mid-term during an upgrade if there is a positive ARR implication. Keep in mind the following licensing nuances for this scenario:

When a customer upgrades mid-term and reduces their paid seat count below the max billable users count as of the upgrade date, GitLab will immediately show an overage of max billable users - new paid seat count, regardless of the prior paid seat count. This overage will be shown in the GitLab product and will be billable unless waived at the customer's next renewal.

For example:

1. Customer had a premium license for 50 users, and had 48 max billable users as of the upgrade date.
2. Customer upgrades to Ultimate but reduces seat count to 25.
3. GitLab will immediately show a seat overage of 48 (max billable users during upgrade) - 25 (new paid seat count) = 23 until the next renewal (unless the customer then goes above 48 seats, in which case the overage will increase).
4. A True Up for the difference of 23 will be required at renewal. Consider seeking approval for a true up waiver in this scenario, during the renewal, to prevent licensing issues.

We don't have a way today to track separately how many Ultimate seats are used after the upgrade, the max billable users calculation always looks at the full term, in this case including the time period prior to the upgrade.

NOTE: this wouldn't be a problem if the customer goes from 50 to 25 users but their max billable users was 25 or less at renewal time. It's only a problem when they go below their current max billable users count.

Payment Schedule for Amendment Quotes

Amendment quotes on Multiyear Terms (13 or more months) will default to the same billing schedule as the originating agreement (New Subscription Order Form or Renewal Order Form, whichever is most recent). This means:

If the originating agreement's billing schedule was set up for:

- Annual billing - any amendment quote will be billed annually as well (without the need for redundant Annual Terms language). If the Amend Order Form includes Annual Billing language, it will also be accepted for bookings so long as the originating agreement also included Annual Billing language.
- Prepaid - the customer will be billed for the prorated amount for the remainder of the current subscription period.
- For any custom billing schedule, please engage Deal Desk as your Order Form may need customizations.

It's important to note that the term's billing schedule should not be changed mid-term. If a change in billing frequency mid-term is your intent, this should be done at renewal. Otherwise, updating billing schedule mid-term will require you to engage with Deal Desk.

Renew Subscription Quote

This quote type should be used when the customer has reached the end of their subscription term and wishes to renew the subscription for another term.

Important:

1. "Renew Subscription" quotes should be used even if the customer is renewing for a different term length than the previous period. i.e. If the customer is renewing a 12 month subscription for 24 months, choose "Renew Subscription" and enter "24" in the Renewal Term field.
2. Gaps are not allowed between opps linked to the same subscription ie. new subscription quote object cannot be used on a renewal opportunity, unless you encounter one of the following scenarios.
3. Scenarios when new subscription quote is allowed on a renewal opp:
 - Contract reset (aka early renewal)
 - Customer has lost access or customer decided to renew after 30 days (this is the only scenario where a gap is allowed between renewals)

Additional Renew Quote Studio Enablement Materials

In addition to the step-by-step quoting guides that follow this paragraph, check out these additional quoting resources!

1. Highspot Page
2. RISE Course

A. Standard Renewal

The following is intended as a step by step guide for opportunity owners or ISRs to learn how to create standard quotes for renewals in CPQ X: Quote Studio.

- Open the Renewal opportunity and click the "New Quote" button.
 - Select the applicable billing account.
 - Next, locate the subscription you would like to renew. If you are unsure which subscription to renew, click on the blue subscription name (i.e. A-S00263985) - this will open a new window that details that subscription's products, quantities, pricing, etc.
 - Note: If there are multiple billing accounts or subscriptions available, and you are unable to determine which to choose, please use the "Request Support" workflow on the Opportunity Object to create a case for Deal Desk. Please select "Quote Help" as the request type and select "Quote Help" as the Sub-Request Type.
 - Click the curved arrow renew icon to renew that subscription.
 - Note: If there are subscriptions available, click on the subscription name to open the subscription information and review the dates, products, and pricing of that subscription.
-
- On this second and final page of the quoting experience, populate Quote Detail Information.
 - The following fields must be populated to successfully create a quote:
 - Renewal Term (this is the term that the subscription will renew for after the Initial Term is complete)
 - Quote Template (Amendments must transact through the same route to market as the original order)
 - Bill To Contact
 - Sold To Contact
 - The Start Date cannot be edited. This will be the true renewal date.
 - The End Date will automatically be determined by the Renewal Term.
 - Populate "Renewal Term" in months. (i.e. for a two-year renewal, enter "24")
-
- For One-Tier Reseller or MSP deals, populate the "Invoice Owner", "Invoice Owner Contact" and "Resale Partner" fields. For Distributor deals, populate the "Invoice Owner", "Invoice Owner Contact", "Resale Partner" and "Distributor" fields. For Direct Deals leave "Invoice Owner", "Invoice Owner Contact", "Resale Partner," and "Distributor" fields blank.
 - "Invoice Owner" and "Invoice Owner Contact" should reflect the account and contact of the party being quoted by GitLab. This means we should leverage the Resale Partner's Billing Account and Billing Account Contact for One-Tier Reseller and MSP deals, and the Distributor's Billing Account and Billing Account Contact for Distributor deals.
 - Search for the Partner Account Name in the "Invoice Owner" field to select the Billing Account for the partner. If there are no results matching the partner account, this means that a Billing Account does not yet exist for the partner. Request Support from Billing Ops and tag the Partner Account Owner listed on the Partner Account Record and ask for a Billing Account to be created.
 - "Invoice Owner Contact"
 - The Billing Account on the Partner Account lists the accounts payable contact information associated with that account (refer to "Contact Information" section on the billing account), so that contact should be used as the "Invoice Owner Contact". If that contact does not exist on the Partner Account as a Contact Record, please create the contact using the following naming convention "[Partner Account Name] - Accounts Payable".
 - Ensure that the "Invoice Owner Contact" is connected to the Partner Account record and matches the contact information from the partner's Billing Account (i.e., Invoice Owner).
 - The "Resale Partner" field should be populated with the Partner Account of the Reseller or MSP transacting (please note a partner may have both a Cust
