Role-Based Onboarding

To accelerate ramp time and to support the GitLab values of results, iteration and efficiency, we have optimized the field onboarding program to provide new team members with the core information and essential competencies paired with the day-to-day skills that they need to be successful in their individual role. Learning is combined with specialized on the job training and a more robust shadowing program to ensure that new team members can contextualize and apply what they are learning throughout the entire onboarding journey.

The onboarding program includes individual role-based learning journeys for AEs, SAs, CSMs, CSEs, RMs, SDRs, & BDRs. Each role-based learning journey is designed based on the unique needs of each segment and includes the following milestones:

- Month 1: Understand role and GitLab product (SQS & Pre-work)
- Month 2: Become customer-ready certified & meet customers
- Month 3: Close first deals
- Month 4 and Beyond: Continue to develop intermediate and advanced skills

How To Get Started

Check out the links below to find the specific onboarding handbook page for your role. On these pages you can find additional role based onboarding and shadow program information including learning objectives, manager expectations & graduation requirements.

- Enterprise, Commercial & Ecosystem Sales - Sales Onboarding (Shadow Program) Handbook
- Renewals Managers: RM Onboarding Handbook
- Customer Success: CSM Onboarding Handbook
- Customer Success: CSE Onboarding Handbook
- Solutions Architects: SA Onboarding Handbook
- Sales and Business Development - SDR & BDR Onboarding (Tanuki Tech) Handbook

Click on a link below to begin your role based e-learning journey.

- Enterprise, Commercial & Ecosystem Sales - Sales (AE) Onboarding Journey
- Renewals Manager: Renewals Manager (RM) Onboarding Journey
- Solutions Architect - Solutions Architect (SA) Onboarding Journey
- Customer Success Management: (CSM) Onboarding Journey
- Customer Success Management: (CSE) Onboarding Journey
- Sales Development - Inbound (SDR) or Outbound (BDR)
- All Other Roles - Sales Quick Start

Role Based Journeys Coming Soon

- Ecosystem Sales

Onboarding Program Health Measurement

The Kirkpatrick model is a popular framework used to evaluate the effectiveness of training programs. Below is a summary of the four levels of evaluation used to measure the success of the sales onboarding program at GitLab using the Kirkpatrick model.

Level 1: Reaction - At this level, we gather feedback from new team members on their reactions to the sales onboarding program.

For the level 1 reaction, we measure the quality of the program by asking learners for feedback on various aspects of the training. The feedback is collected via a post-workshop survey, which includes the following questions:

1. Presentations were clear and organized
2. Instructors stimulated student interest
3. Instructors were available and helpful
4. Learning objectives were clear
5. Course content was organized and well planned
6. Course workload was appropriate
7. Course organized to allow all students to participate fully
8. On a scale of 1-5, how likely are you to recommend Sales Quick Start to future new hire sales professionals at GitLab?

The survey respondents are asked to rate each of these metrics on a scale of 1 to 5, with the following options:

1. Strongly disagree
2. Disagree
3. Neutral
4. Agree
5. Strongly agree

New team members are also asked to give qualitative written feedback about their onboarding experience via the following questions:

1. What aspects of this course were most useful or valuable?
2. How would you improve this course?
3. Do you have any additional feedback you would like to share (good, bad, or otherwise)?

By collecting feedback on these metrics, we can assess how well the training program met the learners' expectations and identify areas for improvement. The results of the level 1 reaction evaluation can be used to improve the overall quality of the training program and ensure that learners have a positive experience.

Level 2: Learning - This level evaluates how much new team members learned during the sales onboarding program. This is measured via the successful completion of Sales Quick Start

e-learning courses which include: 9 e-learning courses with 7 quizzes (Total of 60 multiple choice questions), 4 free response questions, 3 coffee chats with peers, and 2 surveys (pre & post workshop).

For level 2 of the Kirkpatrick Evaluation Model, we also measure the effectiveness of the onboarding program by assessing the learners' knowledge and skills before and after the training. This is done via the post-workshop survey which includes the following questions:

1. Level of effort you put into the course
2. Level of skill/knowledge at the start of the course
3. Level of skill/knowledge at the end of the course
4. Contribution of the course to your skill/knowledge

New team members are asked to answer each question on a scale of 1 to 5, with the following choices:

1. Poor
2. Fair
3. Satisfactory
4. Very Good
5. Excellent

By collecting feedback on these questions, we can assess how much the learners' knowledge and skills have improved as a result of the training program.

Level 3: Behavior - At this level, we assess how the new team members are applying the knowledge and skills they learned during onboarding. During Sales Quick Start, this is done via completion of a mock call for customer facing team members using the Command of the Message value selling methodology taught during sales onboarding.

For level 3 of the Kirkpatrick Evaluation Model, we also measure the improvement in learners' confidence levels before and after the training program. To do this, we administer a pre-workshop and post-workshop survey that both include the following questions:

1. On a scale of 1-5, how confident are you now in your ability to lead a discovery call with a prospect (for GitLab)?
2. On a scale of 1-5, how confident are you now in your ability to clearly articulate the GitLab elevator pitch?
3. On a scale of 1-5, how confident are you now in navigating issues and merge requests, etc. on GitLab.com?
4. On a scale of 1-5, how confident are you now in being able to find information you need to do your job in the GitLab Sales Handbook?
5. On a scale of 1-5, how confident are you now in being able to clearly articulate the differences in GitLab's pricing tiers?

Learners are asked to rate their confidence level for each question on a scale of 1 to 5, with 1 being the lowest level of confidence and 5 being the highest level of confidence.

By comparing the learners' pre-training and post-training confidence levels, we can measure the impact of the training program on their confidence levels. This information is used to

determine the effectiveness of the training program and identify areas for improvement.

Level 4: Results - Finally, we evaluate the overall long term business impact of the sales onboarding program on the company's sales performance. This includes tracking key performance indicators such as time to ramp and sales cycle length for each market segment.

By using the Kirkpatrick model to evaluate the sales onboarding program at each of these four levels, we gain a holistic view of the program's effectiveness and make data-driven decisions to improve it.

Sales Quick Start Onboarding Workshop & e-learning Feedback

Your feedback on the onboarding process and content is important to us and we welcome your thoughts and ideas about how we can improve in the future.

Please share your feedback by opening an issue using the following SQS Feedback issue template.

SECTION: sales/onboarding/graduating-sqs.md

Graduating from Sales Onboarding

In order to officially "graduate" from Sales Onboarding at GitLab and be awarded the Sales Quick Start - Core Curriculum badge, we have identified a few components that are considered milestones of achievement (many of these must be done concurrently to ensure completion):

Sales, Customer Success and SDR Roles

- Complete Sales Quick Start learning path in LevelUp prior to the SQS Workshop (at least 80% completion required before starting the SQS Workshop, though 100% is preferred). The Sales Quick Start pre-work is an 15 hour time commitment consisting of 20 action items.
 - 11 eLearning Courses
 - 11 Quizzes (Total of 75 multiple choice questions)
 - You must score 80% or better to pass each quiz.
 - 4 Free Response Questions
 - 3 Coffee Chats
 - 2 Surveys (Pre & Post Workshop)
- The Sales Quick Start Workshop is a 19 hour time commitment consisting of 17 instructor led trainings including Command of the Message, our value based selling methodology, with 5 hands on group activities.
 - Customer Focus: Command of the Message - Value Selling Methodology - (6 hours)
 - Solution Focus: Intro to GitLab Product & Personas - (50 minutes)
 - Solution Focus: Intro to the Competition - (50 minutes)
 - Operational Excellence: MEDDPIC - (1 hour 30 minutes)
 - Operational Excellence: Intro to GitLab's Partner Ecosystem - (50 minutes)
 - Operational Excellence: Intro to GitLab Legal - (30 minutes)
 - Operational Excellence: Intro to Deal Desk - (30 minutes)
 - Operational Excellence: Intro to GitLab Field Security - (30 minutes)
 - Customer Focus: Customer Success Management Overview - (50 minutes)

- Customer Focus: Intro to Professional Services - (50 minutes)
- Customer Focus: Intro to Renewals Manager Organization - (30 minutes)
- Customer Focus: Working with Sales Development & Marketing - (50 minutes)
- Customer Focus: Mock Calls - (2 hours)
- Complete 1 mock discovery call at the SQS Workshop with a PMM, Manager, or a more experienced SA or CSM.
 - Mock calls are scored using a point system, with 80 points required to pass. Points are awarded as 0 points, half points, or full points across 6 core skills outlined below using this Google Form as the official rubric and system of record.
- Mock Call Grading Criteria
 - Uses open-ended (Discovery Questions and/or Trap-Setting Questions) - 30 Points
 - Effectively identifies customer challenges (Before Scenarios or Negative Consequences) - 20 Points
 - Draws out specific customer needs and goals (Positive Business Outcomes, Required Capabilities, or Metrics) - 20 Points
 - Delivers a value statement about the GitLab solution related to customer challenges and/or effectively respond to competitive objections. (How We Do It / Better) - 10 Points
 - Leverages Proof Points that are relevant to the Positive Business Outcomes - 5 Points
 - Uses the Mantra to confirm what they heard and gain agreement to move forward. - 10 Points

For now, the same requirements apply for all customer-facing roles. Upon completion of SQS, the final grade report will be provided to the managers for review.

Learning Objectives

<details>

<summary markdown="span">Introduction to GitLab</summary>

- Define DevOps.
- Describe how GitLab fits into the DevOps lifecycle.
- Describe GitLab's 3 value drivers.
- Discover GitLab's culture as a fully-distributed team.
- Discover the GitLab culture of "Everyone can contribute."

</details>

<details>

<summary markdown="span">Describe the DevOps Landscape</summary>

- Define the Software Development Lifecycle.
- Describe how GitLab fits into the Software Development Lifecycle.
- Discover why cloud native app development requires a shift to a DevOps operating structure.
- Differentiate between a traditional DevOps toolchain and GitLab's visions for a Complete DevOps solution.
- Describe how to integrate and automate security in the DevOps Lifecycle.

- Describe GitLab's advantages as an integrated platform for developers and operators.

</details>

<details>

<summary markdown="span">Our Customers</summary>

- Discover how customers are segmented at GitLab.
- Describe the various buyer personas.
- Examine GitLab's success stories.
- Locate helpful GitLab information.
- Locate internal-facing GitLab content that helps advance the sale.

</details>

<details>

<summary markdown="span">Our Portfolio</summary>

- Observe how to deliver the GitLab Pitch Deck and practice making it yours.
- Explain how GitLab helps in each stage of the DevOps Lifecycle.
- Differentiate what's included in each product tier and be ready to ask questions during the live session.
- Identify what sets higher tiers apart from Free and practice advising clients on how they can create a more efficient and secure environment.
- Review GitLab pricing at different tiers.
- Describe what a use case is and identify GitLab's unique use cases.
- Identify the GitLab Security Capabilities, practice using them, and observe a click-through demo of them.
- Identify GitLab's Professional Services offerings and describe what their team can do to enable your clients to realize the full value of their GitLab installation.
- Discover GitLab's Roadmap and review our latest releases.
- Describe GitLab as an overall product, identify our differentiating features, and be able to tell prospects/clients where to find this information when they ask.

</details>

<details>

<summary markdown="span">Field Sales Roles & Expectations</summary>

- Discover the different sales roles at GitLab and identify what constitutes "meeting expectations" when it comes to your particular role.
- Discover how the SA role at GitLab relates with your role and the prospect/customer.
- Discover how the CSM role at GitLab relates with your role and the prospect/customer.
- Discover how the PSE role at GitLab relates with your role and the prospect/customer.
- Recognize where to find your CS resources at GitLab.

</details>

<details>

<summary markdown="span">Sales Process</summary>

- Practice the basics of CoM and MEDDPICC and visualize how it fits into selling here at GitLab.
- Describe what CoM is and practice how to use discovery questions, value drivers, defensible differentiators, trap-setting questions, and the Mantra to advance the sale.
- Describe what MEDDPICC is and how it will advance the sale.
- Describe our value drivers and practice how to uncover customer needs and how to articulate value and differentiation.
- Observe where sellers turn off buyers and how this fits into CoM.
- Discover the art of using social networks to find, connect with, and nurture your customers and prospects. Develop a profile that will resonate with your prospects.
- Recognize the role of the SDR in the sales process and experiment with ways to keep your pipeline filled.

</details>

<details>

<summary markdown="span">Sales Action & Role Plays</summary>

- Predict the customer side of the sales equation so you can be better prepared to have a productive, consultative conversation with them.
- Prepare for a sales conversation by using the GitLab value framework.
- Practice the flow of a sales call with your peers.

</details>

<details>

<summary markdown="span">Our Competition</summary>

- Examine the DevOps industry from our CEO's perspective.
- Describe our different features and explain how we stack up against our competitors. Recognize where to find the resources you'll need during the sales cycle.
- Identify the differences between GitLab and GitHub and practice articulating them with your peers/prospects/customers.
- Identify the differences between GitLab and Cloudbees/Jenkins and practice articulating them with your peers/prospects/customers.
- Observe from other sellers at GitLab how they would approach a sales conversation involving a competitor.

</details>

<details>

<summary markdown="span">Tools to Get Your Job Done</summary>

- Practice using GitLab - specifically, practice using Projects, Issues, MRs, Pipelines, Settings, User & Admin Areas.
- Discover all the tools you use on a daily basis and identify the tools your counterparts in related departments will be using as well.
- Practice creating an issue.
- Practice searching for an issue and filter to find the issue you're looking for.
- Modify your LinkedIn profile to encourage social selling.

- Discover how GitLab has set up its instance of SFDC and practice how you'll use it in your role.
- Determine how to gather current references (case studies) and discover how to contribute to the bank of case studies in the future.

</details>

<details>

<summary markdown="span">Sales & CS Support</summary>

- Identify which teams/team members are responsible for which products so you know which teams to contact with questions in the future.
- Observe how our GitLab Support team works with customers and with us internally to keep our product functioning seamlessly.
- Summarize how the Alliances team can help you advance a sale that involves our partners.
- Review the process of submitting contract requests for Legal/Contract assistance.
- Review the following terms and conditions which govern all use of the GitLab.com website, or any other website owned and operated by GitLab which incorporate these terms and conditions (the "Website"), including all content, services and support packages provided on via the Website.
- Review our various marketing events and how to sign up and participate.

</details>

<details>

<summary markdown="span">GitLab Customer Support Team</summary>

- Review the GitLab Support Team Handbook, which is the central repository for why and how we work the way we do.
- Sign up for Zendesk Light Agent.
- Visualize the process a customer might experience if they submit a support ticket to our support team. Review the different issues a customer might experience to understand some of their pain points.

SECTION: sales/onboarding/sqs-workshop.md

Sales Quick Start Workshop

- NOTE: The Sales Quick Start (SQS) Workshop is MANDATORY for all new Sales Team Members. If you must cancel for any reason, please be sure to obtain Regional Director approval in writing.
- After completing the virtual, self-paced Sales Quick Start learning path, new sales team members (along with new Solution Architects, Customer Success Managers, and Sales Development Rep) participate in an interactive in-person workshop where participants practice applying this new knowledge in fun and challenging ways including mock calls, role plays, and group activities
- As a result, new sales team members exit Sales Quick Start more confident and capable in

their ability to lead an effective discovery call with a customer or prospect

- Participants also benefit by establishing a community of similarly-tenured peers and more experienced mentors and colleagues to support each others' growth and development at GitLab
- Note: The Results Value is our highest priority and we strive to deliver sales training and enablement remotely as much as possible and reserve in-person formats only for circumstances when we can't obtain the desired results via remote/virtual delivery)
- Iteration is expected to keep moving what we can to remote models once we can achieve the same or better results that way
- Future iteration of this process will define what sales team members need to KNOW, DO, and BE ABLE TO ARTICULATE (by sales role, customer segment, and geo as appropriate) after they complete the above and support those learning objectives as they continue their ramp to GitLab sales performance excellence!

Sales Quick Start In-Person Workshop Agenda

This SQS 2025 Agenda sheet contains the most up to date agenda for our in-person Sales Quick Start Workshop. Please check the tabs at the bottom of this document to see each day's agenda. This agenda is subject to change based on the individual needs of the class and the availability of SMEs, but we will make every effort to surface those changes in this document.

Targeted Sales & Customer Success Roles for Sales Quick Start (SQS)

The Sales Quick Start (SQS) Workshop is MANDATORY for all new Field Sales team members.

If you need to cancel for any reason, you must obtain approval from your VP.

Please send a copy of the written approval to the Field Onboarding Program Manager.

- Targeted roles for the Sales Quick Start learning path include recently hired:
 - Enterprise and Public Sector Account Executives
 - Mid-Market and SMB Account Executives
 - Renewals Managers (RM)
 - Solution Architects (SA)
 - Customer Success Managers (CSM)
 - Customer Success Engineers (CSE)
 - Professional Services Engagement Managers, Practice Managers, and Technical Architects
 - Area Sales Managers (ASMs), Regional Directors (RDs) & Vice Presidents (VPs)
 - Customer Success Managers and Directors
 - Ecosystems (all roles)
 - Field Operations Revenue, Strategy, Enablement & Operations (all roles)
- Professional Services Engineers (PSEs) do not participate in the Sales Quick Start Workshop
- Sales Development Reps (SDRs) have their own separate onboarding process (but many of the same elements are shared), and they attend SQS Workshops as well

Sales & Customer Success Learning Path - Core Curriculum

<details>

<summary markdown="span">1. Welcome to GitLab Sales!</summary>

1. Welcome to GitLab Sales

- ACTIVITY: Let's Get To Know Each Other! (Assignment, 5 minutes, 1 Point - Pre Work)
 - Please complete this brief google form to introduce yourself.
- What is GitLab? (Material - Video, 31 Minutes)
 - GitLab is a single application for the entire DevOps lifecycle. Watch the video.
 - GitLab customers buy GitLab for 3 primary reasons: 1) Increase Operational Efficiencies, 2) Deliver Better Products Faster, and 3) Reduce Security and Compliance Risk. Check out the GitLab Customer Deck and watch the video.
- Company Infomercial (Material - Video, 5 Minutes)
 - Check out our company infomercial!
- GitLab Culture (Material - Video, 3 Minutes)
 - Every year, our entire remote workforce gets together in one location for the GitLab Summit. We use this time to bond, build community, and get a bit of work done. It's an essential part of the GitLab experience·watch the video to learn more about our culture, and what it's like to be on our globally distributed team.
 - Watch the video
 - Read the Handbook
- Everyone Can Contribute (Material - Video, 3 Minutes)
 - Learn more about how we live out our Contribute value! Watch the video.
- Short Toes (Material - Handbook - 15 minutes)
 - Learn about how we live the collaboration value at GitLab.
 - Read the Handbook

- Org Chart (Material - Handbook - 10 Minutes)
 - You can see more information about team members and who reports to whom on the team page.
- Throughout the course you will be asked to schedule a few brief meetings with your peers. Keep in mind that it is always ok to put a meeting on someone's calendar, if they can't make it and decline it is not a problem. We hope you enjoy getting to know your super cool co-workers!
- Check out the org chart and the Team Page

<summary markdown="span">4. Our Portfolio</summary>

4. Our Portfolio

- Our Portfolio
 - Please click on the link below and go through the course modules.
 - Our Portfolio (no longer available)
- QUESTION: Pitch Deck Video (Material - Video - 15 Minutes)
 - Please write one thing you learned or found interesting from watching the GitLab Pitch Deck video.
- GitLab Features & Functionality
 - GitLab is a complete DevOps platform, delivered as a single application, fundamentally changing the way Development, Security, and Ops teams collaborate. GitLab helps teams accelerate software delivery from weeks to minutes, reduce development costs, and reduce the risk of application vulnerabilities while increasing developer productivity. Check out this reference guide to learn more about what is included in each of the different stages of GitLab.
- Product Tiering Quiz (Assignment - 25 Minutes - 10 Points - Pre Work)
 - Take a moment to complete this short knowledge check quiz
- GitLab Security Solutions (Material - Slides and Video - 30 minutes)
 - Security is one of the biggest differentiators to Ultimate. In this course, you will learn detailed information about GitLab security capabilities with a click through demo.
 - Using GitLab for Software Security Video
 - GitLab Secure Doc
 - GitLab Security and Compliance Capabilities Deck
- Selling Professional Services (Material - Video - 30 Minutes)
 - Our Professional Services team is made up of not only GitLab subject matter experts but seasoned DevOps professionals who have experience in deploying and maintaining both large-scale applications as well as creating and teaching best practices throughout the SDLC. Our experts help lead Concurrent DevOps Transformations, providing direct support to our customer's strategic business initiatives. GitLab's Professional Services team exists to enable your clients realize the full value of their GitLab installation. We can provide direct implementation support to ensure the GitLab installation is resilient and secure. We also offer migration services to facilitate the transition to GitLab by delivering a clean dataset to resume operations at once. Our education and specialized training provide training in best practices, such as CI/CD, version control, metrics, and more.
 - You can also watch the Sales Enablement Session about how to sell services
- GitLab Direction & Latest Releases
 - Our vision is to replace disparate DevOps toolchains with a single application that is pre-configured to work by default across the entire DevOps lifecycle. We aim to make it faster and

easier for groups of contributors to deliver value to their users, and we achieve this by enabling:

- Faster cycle time, driving an improved time to innovation
- Easier workflows, driving increased collaboration and productivity
- Our solution plays well with others, works for teams of any size and composition and for any kind of project, and provides ongoing actionable feedback for continuous improvement. You can read more about the principles that guide our prioritization process in our product handbook.
- Be sure to review the information from our latest release!
 - GitLab Direction
 - GitLab Releases
- Product Maturity
 - GitLab has a broad scope and vision, and we are constantly iterating on existing and new features. Some stages and features are more mature than others.
 - To convey the state of our feature set and be transparent, we have developed a GitLab Product Maturity framework for categories, application types, and stages.
- Additional Resources
 - The below are resources you might want to review or bookmark for later.
 - GitLab Terms & Conditions
 - GitLab Marketing Materials Repository: Check out the GitLab.com marketing materials repository to see all of our best and most relevant sales collateral. Please be careful to only view or download these files, and feel free to send downloaded copies to your clients to help them understand GitLab value.
 - GitLab Pricing Model: Check out the chart to understand our pricing model. For additional context take a look at the handbook page on pricing.

<summary markdown="span">5. Field Roles & Expectations</summary>

5. Field Roles & Expectations

- Sales Roles (Material, - Handbook - 30 minutes)
 - Review the sales roles based on the customer segment you will cover.
 - Read the Handbook
 - Read the Strategic Account Executive (Enterprise) Role Description
 - Read the Account Executive (Mid-Market) Role Description
 - Read the Customer Advocate (SMB) Role Description
 - Read the Sales Development Representative Role Description
- Solutions Architects (Material - Handbook - 15 minutes)
 - GitLab's Solutions Architects (SAs) are trusted advisors to GitLab prospects and customers during the presales motion, demonstrating how the GitLab application and GitLab Professional Services address common and unique business requirements.
 - Read the Solutions Architect Role Description
 - Read about the Proof of Value Deliverable
- Customer Success Managers (Material, - Handbook - 15 minutes)
 - GitLab's Customer Success Managers serve as trusted advisors to GitLab's customers. This section outlines the CSM role and their key deliverables: Health Checks, Success Plans, and Executive Business Reviews.

- Read the CSM Handbook
- Read about Customer Health Scores in the Handbook
- Read about Success Plans in the Handbook
- Read about Executive Business Reviews in the Handbook
- Professional Services Engineers (Material - Handbook - 10 minutes)
 - Professional Services Engineers (PSEs) provide professional services on-site or remote deployment of GitLab technology and solutions as well as training. The PSE will act as the technical representative leading the direct interaction with the customer's personnel and project teams by rolling out best practices.
 - Read the PSE Role job description
 - Read the Handbook
- Customer Success Handbook (Material - Handbook - 10 minutes)
 - Skim and bookmark the Handbook

<details>

<summary markdown="span">6. Sales Process</summary>

6. Sales Process

- Command of the Message Intro Course (Assignment - 2 Hours - 10 Points - Pre Work)
 - Please complete the Command of the Message learning path.
 - Time to complete is approximately 1.5 hours
- MEDDPIC Full E-Learning Course (Assignment - 2 Hours - 10 Points - Pre Work)
 - Please review the MEDDPIC handbook page. The full elearning is optional.
 - Time to complete is approximately 1.5 hours
- GitLab Value Framework (Material - Sales Collateral - 35 Minutes)
 - The GitLab value framework (internal only) is one of the most useful tools available for salespeople. Take a look to understand our value drivers, how to uncover customer needs, and how to articulate value and differentiation. A framework summary (internal only) is also available for quick reference.
- Seller Deficit Disorder (Material - Sales Collateral - 15 Minutes - Pre Work)
 - Please read this short document by Force Management to prepare for the Command of the Message training in Sales Quick Start.
- Co-Selling with Partners (Course - 30 Minutes - Pre Work)
- Social Selling 101 (Material - Video - 20 Minutes)
 - Social selling is the art of using social networks to find, connect with, and nurture your customers and prospects. Watch the video and use this guide to learn how to make a profile that will resonate with your prospects.
- QUESTION: Business Development (Assignment - 15 Minutes - 10 Points - Pre Work)
 - Business development is hard... because not everyone gets marketing qualified leads or has a big referral network. Take a look at the Sales Development handbook page to understand more about your XDR partners and their processes. Please share 1-2 insights on strategy or best practices from your experience. How do you consistently keep the pipeline full of leads? Let's crowdsource some best practices!
- QUESTION: Account Development (Assignment - 15 Minutes - 10 Points - Pre Work)
 - One of the most important parts of a salesperson's job is account development. Your clients bought from you once, and they are very likely to do it again! Please share 1-2 insights on strategy or best practices from your experience. How do you keep your clients buying more and

sending referrals? Let's crowdsource some experience!

<summary markdown="span">7. Our Competition</summary>

7. Our Competition

- The Industry In Which GitLab Competes (Material - Video - 11 Minutes)
 - Sid Sijbrandij, co-founder of GitLab, discusses the overall industry where GitLab competes.
 - You Tube - The Industry GitLab Competes In
- ACTIVITY: Review & Subscribe: Industry Insights (Assignment - 1 Point - Pre Work)
 - Review and subscribe to the following blogs recommended by Sid to get the latest industry insights.
 - <https://news.ycombinator.com/>
 - <https://thenewstack.io/>
 - <https://martinfowler.com/>
 - <https://about.gitlab.com/blog/>
- Competitor Overview (Material - Handbook - 30 Minutes)
 - There are a lot of DevOps tools out there. As a single application for the entire DevOps life cycle, GitLab can remove the pain of having to choose, integrate, learn, and maintain the multitude of tools necessary for a successful DevOps tool chain. However, GitLab does not claim to contain all the functionality of all the tools listed here. Click on a DevOps tool to compare it to GitLab. Last thing don't forget to log into Crayon, our competitive intelligence platform to view all of our latest competitive advantages.
- GitLab vs. GitHub (Material - Video - 3 Minutes)
 - No... we are not the same company! This short YouTube video on GitLab vs. GitHub covers some basic differences.
 - Check out the GitLab vs. GitHub
- Azure DevOps
 - Check out the GitLab vs. Azure DevOps
- ACTIVITY: Phone-A-Friend: Competitors (Assignment - 45 Minutes - 10 Points - Pre Work)
 - Talk with 3 tenured GitLab sales professionals (individual contributors or people managers) and ask them for their tips and tricks on successfully beating the competition. Please take notes from your calls and briefly summarize one or two things you learned from each conversation in the Google Form to submit the assignment.
- QUIZ: Competitors (Assignment - 5 Points - Pre Work)

Please take a moment to answer the questions in this short quiz. The information in this quiz is covered in the handbook pages on Competitive Intelligence and DevOps Tools Landscape.

<summary markdown="span">8. Tools to Get Your Job Done</summary>

8. Tools to Get Your Job Done

- Using GitLab: The Basics (Material - Handbook - 45 minutes)
 - This module includes information to help you learn GitLab, and walks you through Projects,

Issues, Merge Requests, Pipelines, Settings, User & Admin Area. It includes the Git Basics Training commonly delivered to customers by Professional Services and documentation to help you feel more comfortable with using GitLab.

- Learning GitLab with Git Basics
- GitLab Basics Guides
- Introduction to GitLab Workflow
- Description Templates
- GitLab Tech Stack Details (Material - Handbook - 10 Minutes)
 - Take a look to understand all the tools that GitLab uses to keep the business running smoothly.
- ACTIVITY: You've Got Issues! (Assignment - 20 Minutes - 10 Points - Pre Work)
 - Please find the Sales Enablement Sandbox Project, and read the handbook page "No Tissues with Issues". Create an issue with a label, due date, weight, and assign it to yourself. Submit the link to your issue to complete this assignment. Also take a look at the Markdown syntax guide to learn more about how to code using Markdown. This will be very helpful as you create issues and merge requests.
- ACTIVITY: Practice Searching Issues and Filtering Labels (Assignment - 10 minutes - 10 points)
 - Practice searching issues and filtering using labels
- Update Your LinkedIn Profile! (Assignment - 30 Minutes - 10 Points - Pre Work)
 - Check out the slide deck on creating a great profile that will look good to your prospects and clients!
- Salesforce - Booking Orders (Material - Handbook - 10 Minutes)
 - Learn how to create Accounts, Contacts, Opportunities, and Quotes in Salesforce.
- Lead Scoring - Filtering Prospects in Salesforce (FOR SALES ONLY - Material - Level Up Video Course - 20 minutes)
 - Lead Scoring - How Does It Work? Learn the fundamentals of lead scoring and how to use lead score classifications
- Reference Edge (Material - Video - 10 Minutes)
 - Reference Edge Software will help reps to easily see what available references are the best fit for their current opportunity. Check out the video, and Powerpoint on this new tool.

<details>

<summary markdown="span">10. GitLab's Customer Support Team</summary>

10. GitLab's Customer Support Team

- Review the GitLab Customer Support Documentation (Material - Handbook - 5 minutes)
 - The GitLab Support Team provides technical support to GitLab.com and Self-Managed GitLab customers. The Support Team Handbook is the central repository that explains our work processes and the reasons behind them. To learn more, check out the Handbook.
- Review the following workflows in the GitLab Customer Support Documentation (Material - Handbook - 15 minutes)
 - Read the Working with GitLab Support page as it details how to get in touch with us for common requests requiring Support involvement.
 - The Support Tickets & Customer Information and the Common Requests sections have a list of workflows that you might frequently encounter.
 - Check out this Slack workflow if you have to escalate a ticket for a customer to understand the expectations around it.
 - Read the Trials and Prospect Support workflow that should be followed for prospects looking to evaluate Support experience.
 - Make note of Support's internal-requests project - you will be filing issues under this for some of the workflows listed in the above page.
- Review the Zendesk Workflow (Material - Handbook - 15 minutes)
 - Zendesk is the tool the GitLab Support Team uses to work tickets for customers. Please familiarize yourself with the associated workflows.
 - Review the workflows in this section of the Handbook.
- Sign up for Zendesk (Assignment - 5 Minutes - 10 Points - Pre Work)
 - All GitLab staff can request a 'Light Agent' account so that you can see customer tickets

in Zendesk and leave notes for the Support team.

- To do so, follow the process outlined in the handbook. Once the account is created, you'll need to wait 24 hours for it to be assigned in Okta. Once Zendesk is assigned, you should be able to login to Zendesk at <https://gitlab.zendesk.com/agent>.

<details>

<summary markdown="span">Technical Deep Dive (SA, CSM, and PSE ONLY</summary>

12. Technical Deep Dive (SA, CSM, and PSE ONLY)

- GitLab Ultimate Demo (Material - Video - 60 minutes)
 - Review the GitLab Ultimate Demo
- Auto DevOps (Material - GitLab Docs - 15 minutes)
 - Auto DevOps provides pre-defined CI/CD configuration which allows you to automatically detect, build, test, deploy, and monitor your applications. Leveraging CI/CD best practices and tools, Auto DevOps aims to simplify the setup and execution of a mature & modern software development lifecycle.
 - Review the GitLab Doc on Auto DevOps
- GitLab API (Material - GitLab Doc - 15 minutes)
 - Automate GitLab via a simple and powerful API.
 - Review the GitLab Doc on API
- GitLab for Agile (Material - 30 minutes)
 - Agile development is iterative, incremental, and lean approaches to streamline and accelerate the delivery of projects. Ever wondered if GitLab supports Agile methodology? If you're considering using GitLab it might not be obvious how its features correspond with Agile artifacts, so we've broken it down for you in a blog and the GitLab Agile Planning page.
 - Review the Agile Delivery page on the company website
 - Review the Agile Blog
- GitLab Runners (Material - GitLab Docs, Slides, and Video - 60 minutes)
 - GitLab Runner is the open source project that is used to run your jobs and send the results back to GitLab. It is used in conjunction with GitLab CI, the open-source continuous integration service included with GitLab that coordinates the jobs. Below are slides, the video presentation, and additional information about GitLab Runners.
 - GitLab Runner Doc
 - GitLab Runner Deep Dive Slides
 - GitLab Runner Deep Dive Reording
- GitLab Reference Architectures and GitLab GEO (Material - 20 minutes)
 - Review the GitLab Reference Architectures and Geo Replication Overview, then hear Brian Wald, Solution Architect Manager, break it all down.
 - GitLab Reference Architectures
 - GitLab High Availability and Geo Options Video
- ACTIVITY: Let's Install GitLab! (Material - Handbook - 60 minutes)
 - Choose one of the installation options mentioned in the link below. Once installed populate with some test data. Be sure to include: Populate with some test data: User account, Project, Issue.
 - Review the About GitLab Installation Page
- ACTIVITY: Let's Install A GitLab Runner! (Material - Handbook - 60 minutes)
 - Choose one of the installation options mentioned in the link below. Become familiar with the executors and different use-cases they solve.
 - Review the About GitLab Runner Page
- Kubernetes 101 (Material - 13 hours)
 - It is essential that you understand the Kubernetes (k8s) fundamentals. Based on your existing Kubernetes experience you should either take the first course "Kubernetes for the Absolute Beginner" (6 hours) or "Learn DevOps: the Complete Kubernetes Course" (13 hours).
- Resources (Optional Material)
 - Bookmark these AWS and CI references
 - Bookmark these Marketing Demos

</details>

<details>

<summary markdown="span">Integrations (SA, CSM, and PSE Only)</summary>

13. Integrations (SA, CSM, and PSE Only)

- Category Overview

- GitLab's vision is to be the best single application for every part of the DevOps toolchain. However, some customers use tools other than our built-in features and we respect those decisions. The Integrations category was created specifically to better serve those customers. Currently, GitLab offers 30+ project services that integrate with a variety of external systems. Integrations are a high priority for GitLab, and the Integrations category was established to develop and maintain these integrations with key 3rd party systems and services.

- Jira

- GitLab Issues are a powerful tool for discussing ideas and planning and tracking work. However, many organizations have been using Jira for these purposes and have extensive data and business processes built into it. While you can always migrate content and process from Jira to GitLab Issues, you can also opt to continue using Jira and use it together with GitLab through our integration. For a video demonstration of integration with Jira, watch GitLab workflow with Jira issues

- Jenkins

- GitLab's Jenkins integration allows you to trigger a Jenkins build when you push code to a repository, or when a merge request is created. Additionally, it shows the pipeline status on merge request widgets and on the project's home page. Videos are also available on GitLab workflow with Jira issues and Jenkins pipelines and Migrating from Jenkins to GitLab.

- Github

- GitLab provides an integration for updating the pipeline statuses on GitHub. This is especially useful if using GitLab for CI/CD only. This project integration is separate from the instance wide GitHub integration and is automatically configured on GitHub import.

- GitLab as OAuth 2 Authentication Service Provider (Material - GitLab Docs - 60 minutes)

- OAuth provides to client applications a 'secure delegated access' to server resources on behalf of a resource owner. In fact, OAuth allows an authorization server to issue access tokens to third-party clients with the approval of the resource owner, or the end-user.

- Review this page to learn how to use GitLab as an OAuth authentication service provider

</details>

<details>

<summary markdown="span">SAs Only: Set Up Your Demo Environment</summary>

14. SAs Only: Set Up Your Demo Environment

- ACTIVITY: Obtain Gold Level Access to Enable All Features on GitLab.com (Assignment - 15 minutes - 10 points)

- An example request

- ACTIVITY: Create a demo account on gitlabdemo.com (Assignment - 10 points)

- Log in with your GitLab credentials using Okta. After login, a GitLab group will be created automatically and accessible on the Cloud Sandbox. From there, this group can serve as a ground

for future demo projects. For an overview of our demo systems, please review the Demo Systems Handbook page. For an overview of the Cloud Sandbox, please review the Sandbox Cloud Realm Handbook Page.

- ACTIVITY: Set Up Standby Demo Project (Assignment - 1 day - 10 points)

- At any point in the day, you may be called in to do a quick demo and its helpful to have a standby project in your back pocket with commonly requested workflows.

- Pair up with a member of your team on creating a standby project. Bonus - Collaborate on storytelling ideas when creating the standby project.

- Create a project in a familiar framework and language. Add the following capabilities to the project:

- Containerize the application and push to the container registry

- Enable GitLab Kubernetes integration and connect to the demo cluster

- Add unit tests to the project and include unit test reports

- Add static analysis to identify vulnerabilities in the codebase

- Add dependency scanning to identify vulnerabilities in the projects dependencies

- Add multiple approvals rules and review gating mechanisms

- Enable protected branches

- Create an issue board with a workflow

- ACTIVITY: Deliver Your Demo (Assignment - 60 minutes - 10 points)

-Deliver a short demo of your choice in the SA Bootcamp Demo Scenarios below. Access to Jenkins and Jira and the associated GitLab.com project are available in the SA Vault within 1Password

-Be sure to invite your manager and onboarding buddy.

-Upload the below recorded scenarios to the below Google Drive folder

- OPTIONAL: Sign up for a Sandbox Cloud Environment

- Sandbox Cloud is an automated provisioning platform for AWS or GCP environments. These environments are helpful for demo/sandbox/testing purposes and is paid for by GitLab.

<details>

<summary markdown="span">PSEs Only: Statement of Work</summary>

16. PSEs Only: Statement of Work

- The Statement of Work (SOW) Process (Material - Handbook - 20 minutes)
 - Review the SOW Creation Process, and review the below reference deck for details on creating a Professional Services SOW.
 - Workflow for the SOW
 - SOW Creation Instructions
- ACTIVITY: Create a Mock SOW (Assignment - 60 minutes - 10 points)
 - Create a mock SOW using the calculator below and the automatic SOW creator on that page. This is for 1000 users. The prospect wants an HA deployment on AWS, admin training for 20 people, CI/CD training for 60 people and a migration of their existing data from their existing SVN system (assume this costs \$15K). Send the link of the Google doc you create to your manager when it's complete.
 - GitLab Services Calculator Please note the SOW may have errors in it as the calculator is still WIP
 - Many example SOW's can be found in the Google Drive Folder

</details>

SECTION: sales/onboarding/sales-learning-path/onboarding-process.md

Sales Onboarding Process

1. The GitLab Candidate Experience team initiates a general GitLab onboarding issue for every new GitLab team member
 - See the People Ops onboarding issue template
1. In the "Day 2" section of the general GitLab onboarding issue, a role-based entitlement access request (AR) will be created automatically for new team members if a pre-approved template exists. The new team member will be tagged in the AR automatically, and the AR will also be automatically added to the new team member epic together with their onboarding issue. Pre-approved role-based entitlement access request templates for field roles are available here:
 - departmentbusinessdevelopment
 - departmentchannel
 - departmentcommercialsales

- departmentcustomersuccess
- departmententerprisesales
- departmentfieldoperations

1. In the "Sales Division" section of that issue, Field Enablement is tagged with the action to add the new sales team member to the Sales Quick Start learning path in EdCast. They will be added to the learning path within their first week of joining GitLab. This learning path is designed to accelerate the new sales team member's time to productivity by focusing on the key sales-specific elements they need to know and be able to do within their first several weeks at GitLab.

1. The new sales team member will receive an email prompting them to login to EdCast to begin working through the Sales Quick Start learning path.

- When possible, Sales Enablement will also update the new team member's onboarding issue and/or add a comment to explicitly reference the link to their Sales Quick Start learning path.

- In the "New Team Member" section, there is a specific action for the new hire to "Complete your Sales Quick Start learning path."

- See what's included in the virtual, self-paced Sales Quick Start learning path.

- Non-Sales team members can choose to add themselves to the SQS Learning Path regardless of role if interested in understanding what new Sales Team Members are expected to complete prior to attending an SQS Workshop.

1. Field team members will matriculate into an appropriate role-based learner journey after successful completion of Sales Quick Start to support onboarded / ramping team member's continued learning journey to greater success.

Role-based onboarding journeys

To accelerate ramp time and to support the GitLab values of results, iteration and efficiency, we have optimized the field onboarding program to provide new team members with the core information and essential competencies paired with the day-to-day skills that they need to be successful in their individual role. Learning is combined with specialized on the job training and a more robust shadowing program to ensure that new team members can contextualize and apply what they are learning throughout the entire onboarding journey.

The onboarding program includes individual role-based learning journeys for AEs, SAEs, SAs, CSMs, CAMs, ABDMs and ISRs. Each role-based learning journey is designed based on the unique needs of each segment and includes the following milestones:

- Month 1: Understand role and GitLab product (SQS & Pre-work)
- Month 2: Meet customers
- Month 3: Become customer-ready certified
- Month 4: Close first deals
- Month 5 and Beyond: Continue to develop intermediate and advanced skills

Learning Journeys

`<iframe src="https://docs.google.com/presentation/d/e/2PACX-1vRUZzM8uy4aE4huFZ0eC1xql31obWQYjHxTtaDkOcz1nm8QHg1Dr3JlZqAvHRAyK8tlGnYdzOy9Q/embed?loop=true&delayms=3000" frameborder="0" width="960" height="569" allowfullscreen="true" mozallowfullscreen="true" webkitallowfullscreen="true"></iframe>`

GitLab's role-based learning journeys are based on milestones and enable us to deliver relevant

information and training over the first several months at GitLab.

The Customer-Ready Shadow Program

Shadowing the customer calls of your peers offers a hands-on way to learn how different GitLab roles represent GitLab. We often learn best when we have the opportunity to learn from our peers, practice, and get feedback in an interactive way. It's also a great way for current team members to make new hires feel welcome and a part of our sales culture at GitLab. Learn more on the Customer-Ready Shadow Program page.

SECTION: sales/playbook/_index.md

Overview

Welcome to the Enterprise Sales handbook page!

The Enterprise Sales department is part of GitLab Sales and includes both Large and Public Sector sales teams. The sales field in Enterprise is made up of Major and Strategic Account Executives (MAEs and SAEs) who collaborate closely with their deal team (Inside Sales, Customer Success, Sales Development, Channel & Alliances and more) and work across functions to deliver maximum value to strategic and large prospects and customers throughout their entire journey with GitLab. When thinking about 'what good looks like' in this department, refer to your job family, the field competencies, and our GitLab values.

Besides this page, there are a few bookmarks you'll want to set that will be your main sources of truth during your everyday work. These are:

- The GitLab Sales handbook page: This page serves as our home base. From here, you can find a wealth of resources that are relevant to the entire sales field. Whether you're looking for sales order processing info, or wondering how to get executive support, this is where you'll find what you need.
- Field Slack Channels: View and join these Slack channels based on your role and team to stay connected with your peers.
- GitLab Level Up Learning Platform: You'll receive access to GitLab Level Up during your first week of onboarding. This learning hub includes training and refresher courses on everything related to Sales at GitLab, including our sales methodology, tools, and sales skills.
- The Enterprise Sales Google drive: You'll use this folder and the GitLab Sales drive to reference and store internal-only resources relevant to your work. You'll find everything from running notes docs for your accounts to planning toolkits and templates for proposals and presentations.
- Enterprise Sales Highspot landing page: You'll receive access to Highspot in Okta during your first week of onboarding. It's where all sales content is stored - whether you're looking for competitive intelligence, solution selling guidance, templates to use in proposals, or the latest marketing assets.
- The Customer-Ready Shadow Program: Shadowing customer calls offers a hands-on way to learn how different GitLab roles represent GitLab. We often learn best when we
